 -- backward pressure .. 63
 -- account of .. 68-71
 -- in Banti's disease .. 72, 83, 415
 -- bladder distention simu-
 lating .. 61, 815
 -- in blood diseases .. 137
 -- Bright's disease .. 62, 71,
 136, 263
 -- account of .. 71
 -- four types .. 62
 -- bronchiectasis and .. 367
 -- from bronchitis .. 62
 -- bulging of flanks with .. 59

Ascites, contd.

- caput Medusae with... 59
- from carcinoma of
 - colon... 67, 412
 - duodenum... 67
 - intestine... 412
 - liver 62, 63, 66, 68, 412, 415, 412, 468
 - ovary... 412, 842
 - pancreas... 67, 412
 - portal glands... 68
 - rectum... 412
 - stomach... 67, 412
 - suprarenal capsule... 67
- causes of... 61, 62
- change of position and
 - in children... 480
 - chronic bronchitis and... 68
 - from chronic lung conditions... 62
 - nephritis... 14, 15, 57
 - peritonitis... 15, 60, 61, 62, 63, 71, 525
- chyliform... 72
- chylous, from abdominal injury... 62, 72
- in Bright's disease... 72
- causes of... 62
- from heart injury... 62
- chronic peritonitis with... 72
- in chronic tubal nephritis... 72, 138
- chyluria with... 72, 140
- elephantiasis and... 62, 72
- Filariae anemomomism and... 72
- general account of 72, 73
- in leukaemia... 72, 148
- lipaemia with... 72, 140
- from lymphatic obstruction... 72
- mediastinal sarcoma pseudo... 72
- from receptaculum chyli obstruction 62, 72
- retro-peritoneal sarcoma... 62
- in subacute nephritis... 140
- from thoracic duct obstruction... 62, 72
- two types of... 72
- from cirrhosis of liver
 - 48, 59, 62, 63, 67, 68, 83, 143, 146, 341, 414, 415, 466, 783, 910, 923
- conditions simulating
 - constipation from... 164
 - cyst of lesser omentum sac simulating... 61
 - diaphragm pushed up by... 374
 - from diet deficiency 73, 110
- differential diagnosis of
 - causes of... 62 et seq.
 - dipping and... 59, 841
 - from distoma hepaticum 410
 - dullness of... 841
 - from duodenal ulcer... 63
 - dysentery... 63
 - dyspnoea from... 247, 250
 - dystocia from... 250
 - in Egyptian splenomegaly 62, 72, 709, 781
 - from emphysema 62, 68, 269
- encysted... 806
- operation in diagnosing... 843
- ovarian cyst simulated by... 843
- pelvic swelling from enlarged liver with... 63
- spleen simulating... 774
- epigastric angle widened by... 59
- examination after paracentesis in
 - in exhaustion disease... 110
 - luminal splenomegaly 62, 72
 - lamine and... 62, 73
 - from fatty heart... 62
 - fibroid heart... 62
 - lung... 62, 68, 367, 417
 - with fibroma of ovary with twisted pedicle 842
 - fluid thrill with... 59
 - from gastric ulcer... 62, 63
 - with general dropsy 62, 412
 - gonococcal... 63

Ascites, contd.

- in Graves' disease... 514
- guinea-pig test with... 65
- from gummia of liver 412
- in Hanot's cirrhosis 414, 466
- from heart failure 14, 61, 69, 847
- account of 62, 68-71
- heart impulse displaced by... 59, 473, 474, 476
- from hepatic abscess... 62
- high blood-pressure... 62
- in Hodgkin's disease... 62, 72, 137
- from hydatid cyst... 61, 62, 63, 66, 68, 412, 806
- hydatid cyst simulating 61
- hydramnios simulating 841
- hydropneumothorax simulating 61
- hydrops amnii simulating... 61
- from hyperpneisis... 61
- hypogastrum bulged by diaphragm bulged by... 59
- from inferior vena cava obstruction... 59, 63, 68
- inferior vena cava obstruction from 515, 909
- inspection and... 59
- from intrathoracic new growth... 68
- jaundice with 63, 66, 67, 68, 412
- in Lida-azar... 62, 72
- knee-flow position for percussing in... 60
- in leukaemia... 66, 137
- linea albaeantes from... 59, 459
- lipaemia with non-chylous... 72
- liver diseases causing... 67
- displaced upwards by 462
- fluctuated... 60
- from chronic peritonitis... 61
- in tuberculous peritonitis... 63
- in lymphadenoma 61, 66, 137
- lymphatic leukaemia... 61, 62, 72
- malaria... 62
- malignant endocarditis... 9
- from malignant glands... 61
- peritonitis 61, 63, 65, 805
- portal glands... 412
- mediastinitis... 535
- mensuration in... 60
- meteorism simulating 486
- from mitral regurgitation... 62, 262
- stenosis 62, 69, 417, 847
- multiple abdominal tumours with... 63
- in multiple serositis... 62
- from myocardial affections... 62
- new growth of ovary... 413
- with nutmeg liver... 463
- obesity simulating... 60
- oedema of body with... 62
- face with... 62
- legs from 59, 62, 63, 68, 515, 517
- loins with... 59
- scalp with... 62
- serotum with... 59
- thighs with... 59
- orthopnea from... 250
- from ovarian cyst 60, 63, 66, 438, 841
- ovarian cyst simulated by 64
- simulating... 60, 841
- with ovarian cyst with twisted pedicle... 842
- from pale granular contracted kidney... 62, 71
- palpation and... 59, 595
- pancreatic cyst simulating... 61
- paracentesis for 63, 67, 68
- parovarian cyst simulating... 60
- pelvic swelling due to 840
- percussion and... 59
- from perihepatitis 62, 63, 467
- perirectal abscess... 63

Ascites, contd.

- from pernicious anaemia... 62, 72, 137
- phantom tumour simulating... 60, 61
- physical signs of
 - pneumococcal... 59, 63
 - in polyorrhomenitis... 62
 - from portal obstruction... 44, 412, 784
 - thrombosis... 67
 - position of umbilicus in... 59, 61
 - from primary alcoholic heart... 62
 - prostatic abscess... 63
 - pseudo-chylous... 72
 - in pseudo-leukemia... 49
 - infantum... 62, 72, 147
 - pulmonary stenosis... 62
 - pulsatile liver with... 847
 - from pylephlebitis... 344
 - pyosalpinx... 63
 - red granular contracted kidney... 62, 71
- relations of umbilicus in 60
- from renal tumour... 67
- vein thrombosis... 68
- retroperitoneal cyst simulating... 61
- ribs pushed up by... 59
- from sarcoma of liver... 62, 63, 68, 412
- portal glands... 65
- semi-starvation... 73
- in severe anaemias 63, 71
- shifting dullness with... 60
- site of uterus with... 60
- skin shiny over... 59
- in splenic anaemia 62, 72, 83, 137, 415, 467
- splenomegaly leukoemia... 62, 71
- splenomegalic cirrhosis... 780
- from stercoral ulcer of colon... 63
- subacute peritonitis 15, 71
- syphilis... 68
- of liver... 62, 63
- tabes mesenterica... 486
- triced in tapdiche... 400
- tricuspid stenosis... 847
- tuberculous glands... 61
- peritonitis (Fig. 7) 59, 61, 63, 64, 65, 67, 480, 706, 777, 805, 806
- physical signs of 60
- portal glands... 66, 67
- ulceration of bowel... 63
- tumour of colon... 61
- duodenum... 61
- kidney... 61
- liver... 61
- pancreas... 61
- stomach... 61
- suprarenal capsule... 61
- twisted ovarian pedicle... 842
- tympanites simulating... 60
- from typhoid ulcer... 63
- umbilicus flush with surface in... 59, 61
- protruded in... 59, 61
- stretched transversely by... 59, 61
- vaginal examination and... 60, 66
- from valvular heart disease... 62, 68, 69
- varicose abdominal veins with... 909
- in war oedema 73, 110
- Wassermann's test in... 68
- weight increase due to... 933
- winter cough and... 68
- Ascite fluid, albumin in... 65
- bacteria in... 65
- blood-stained, in malignant peritonitis... 65
- characters of... 60, 65
- in portal thrombosis... 67
- chylous, albumin in... 73
- characters of 72, 73
- cholesterol in... 73
- fat content of... 73
- globulin in... 73
- lecithin in... 73
- lipins of... 73
- lipin-globulin combination in... 73

Ascite fluid, chylous, contd.

- mucinoid substances in... 73
- proteins of... 73
- putrefaction resistance of... 73
- salts of... 73
- total solids in... 73
- coagulation of... 65
- fragments of new growth in... 65
- freezing point depression of... 72
- globulin in... 65
- gonococci in... 65
- high proteid content in portal thrombosis 67
- hydatid hooklets in 65, 66
- lymphocytes in... 65
- multinuclear endothelial cells in... 805
- papilloma in... 69
- peritoneal cells in... 65
- pneumococci in... 65
- polymorphonuclear cells in... 65
- specific gravity of 65, 72
- spontaneous coagulation of... 65
- staphylococci in... 65
- streptococci in... 65
- tubercle bacilli in... 65
- Asexual atchosis... 237
- Asparagus officinalis, dermatitis due to... 915
- Aspergillus of fauces, sore throat due to... 757
- lung, haemoptysis from 361
- palate, sore throat from 757
- sputum, sloughing... 187
- of tonsil, bacteriology in diagnosing... 761
- uvula, sore throat due to 757
- Aspergillus flavus in sputum... 792
- fungatus in sputum... 792
- in Madura foot... 893
- niger in sputum... 792
- lung infected by... 365
- Aspliate workers, dermatitis in... 917
- Asphyxia in angina Ludovici... 853
- blood-pressure raised in... 71, 106
- borborism from... 107
- coma in... 181
- convulsions from 181, 182, 183
- head-retraction in... 731
- from heart failure... 106
- in Landry's paralysis... 632
- local, in Raynaud's disease... 203, 320
- in mitral stenosis 17, 71, 106
- tetanus... 175
- from tooth-plate in larynx (Fig. 202) 240
- in whooping-cough... 182
- Asphyxial nephritis... 9
- Aspiration of kidney... 450
- pneumonia (see Pneumonia) and see Needling; and Paracentesis
- Aspirin, angioneurotic oedema simulated after 824
- erythema from... 275
- ferric chloride reaction from... 214
- haemoglobinuria from... 357
- hoarseness from... 388
- noises in head from... 504
- oedema due to... 516
- of face from... 514
- of larynx from... 388
- in urine... 214
- urticaria from... 514
- vertigo from... 504
- Assam, ankylostomiasis in 103
- kula-azar in 37, 708, 780
- Astereognosis from cerebral causes... 76
- in disseminated sclerosis... 753
- tabes dorsalis... 753
- Asthma, account of 653, 654
- adrenalin relieving... 654
- aneurysm simulating 653
- bronchitis from 131, 249
- distinguished from 131

Asthma, contd.

- bronchitis and emphysema from 191, 200, 653
- - simulating .. 249, 653
- cardiac dyspnoea simulating .. 653
- Charcot-Leyden crystals in .. 131, 191
- clubbed fingers from .. 142
- cocaine sprays relieving .. 654
- conditions simulating .. 653
- constipation in .. 165
- corysta in .. 223
- Curschmann's spirals in .. 131, 191
- cyanosis in .. 200
- difficulties in diagnosis .. 653
- dyspnoea from 247, 249, 404
- - not cough, the chief symptom of .. 653
- - emphysema distinguished from 191, 272
- eosinophil corpuscles in sputum in 131, 191
- eosinophilia in 271, 272, 654
- fatty heart simulating .. 264
- fibroma of larynx simulating .. 653
- foreign body simulating .. 653
- goutre simulating .. 653
- insomnia from 402, 404
- laryngeal examination in .. 654
- - papilloma simulating .. 653
- - lobelia relieving .. 654
- - mediastinal new growth simulating .. 653
- - neurosis simulating .. 653
- - polycythemia in 650, 651
- - polyuria in .. 653, 654
- renal dyspnoea simulating .. 653
- - retinal examination in 654
- - shortness of breath from 114
- - sputum in .. 191
- - stramonium relieving .. 654
- - syphilitic stenosis of bronchus simulating .. 653
- - thymic .. 653
- - uræmic .. 653
- X rays in excluding things simulating .. 654
- Astrigmatism, eyes from .. 547
- headache from 370, 549, 867
- hypermetropic, optic disc in (Fig. 430) .. 520
- midorbital tenderness from .. 549
- monocular diplopia from .. 220
- pain in eye from .. 547
- photophobia from .. 639
- tenderness of scalp from 867
- Astley Cooper bladder in hernia case .. 834
- - irritable breast of .. 531
- - - detachment of .. 551
- - - - .. 552
- - - - .. 921
- - - vision and .. 921
- - - dysentery .. 100, 872
- - - - paralytic (see Paraplegia) .. 73
- ATAXY .. 73
- in aeroplane pilots .. 77
- from alcohol .. 74, 77
- - aluminium .. 77
- of arms in Friedrich's ataxy .. 624
- in balloonists .. 77
- from brain-stem lesions .. 76
- in Brown-Sequard paralysis .. 76
- - caisson workers .. 77
- - cerebellar (see Cerebellar Ataxy) .. 733
- - in cerebellar abscess .. 371, 630, 733
- - from cerebellar lesions .. 74, 76, 77, 371, 630, 733
- - - cerebral defect .. 74
- - - chemicals .. 77
- - in children .. 76
- - choreiform contractions distinguished from 170
- - from coal-gas .. 77
- - coke fumes .. 77
- in combined degeneration of cord 75, 545, 631

Ataxy, contd.

- in convalescence .. 77
- from cord lesions .. 75, 76
- - crura cerebri lesions .. 76
- - defects causing .. 74
- - from diphtheria .. 74
- - in disseminated sclerosis .. 75, 76, 157, 376, 385, 630, 631, 883
- - divers .. 77
- - from emotion .. 77
- - encephalitis .. 76, 157
- - familial, intention tremor in .. 884
- - - tremor in .. 880, 883
- - in Friedrich's ataxy 75, 76
- - Friedrich's (see Friedrich's Ataxy) .. 77
- - from fumes .. 77
- - functional .. 77
- - hemi- .. 76
- - hemi-anæsthesia and .. 77
- - hemiplegia and 76, 77, 171
- - hereditary (see Friedrich's Ataxy) .. 77
- - from hypnotics .. 77
- - hypotonia with .. 76
- - hysterical .. 77
- - in infantile hemiplegia .. 76
- - knowledge of limb-position in .. 74
- - of lips .. 77
- - locomotor (see Tabes dorsalis) .. 77
- - from loss of sensory impulses .. 74
- - - manganese .. 77, 212, 882
- - - medulla lesions .. 76
- - minor but important degrees of .. 73
- - from motor-car smash .. 77
- - movements illustrated (Fig. 662) .. 853
- - from new growth of cord 76
- - nystagmus with .. 77
- - of palate .. 77
- - from panic .. 77
- - paralysis simulated by 612
- - paraplegia and .. 77
- - from peripheral nerve defects .. 74
- - - neuritis .. 74, 570
- - - petrol fumes .. 77
- - - pons lesions .. 76
- - - railway accident .. 77
- - - Romberg's sign in .. 74
- - - senile .. 77
- - from spinal hæmorrhages .. 77
- - - spinocerebellar, choreiform movements in 883
- - in springing myelia .. 76
- - tabes dorsalis 74, 75, 76, 571, 627, 753
- - of tongue .. 77
- - traumatic .. 77
- - tremor with .. 883
- - vertigo with .. 77
- - of vocal cords .. 77
- - (and see Inco-ordination) .. 77
- Atelactasis, congenital, bronchiectasis from .. 366
- Ateliosis, account of 236, 237
- Atheroma, abdominal, angina abdominalis from 485
- - colic from .. 485
- - meteorism from .. 485
- - pain all over abdomen from .. 485
- - vomiting from .. 485
- - accentuated second sound due to .. 1
- - age incidence of .. 204
- - angina abdominalis from .. 538
- - - pectoris with .. 654
- - of aorta, abdominal pain from .. 151, 152
- - - alcoholic .. 152
- - - angina abdominalis from .. 148, 151, 152
- - - pectoris from .. 53
- - colic simulated from .. 151, 152
- - gastric colic from .. 148
- - pain in shoulder from 580
- - peritonitis simulated by .. 152
- - - senile .. 152
- - syphilitic .. 152

Atheroma of aorta, contd.

- - systolic bruit from 69, 119
- - aortic regurgitation from .. 120
- - and arteriosclerosis, sphygmomanometer in distinguishing .. 1
- - blood-pressure not necessarily high with .. 204
- - of brachial artery, unequal pulses from .. 674
- - cerebral arteries, noises in head from .. 504
- - - vertigo from .. 501
- - - clot on .. 521
- - of coronary artery, abdominal pain from .. 151
- - - angina pectoris from .. 375, 861
- - - colic simulated by .. 151
- - - D.A.H. simulated by .. 247
- - - diagnosis by exclusion .. 375
- - - dyspnoea from 246, 375
- - - heart enlarged with .. 375
- - - failure from .. 240
- - - thumpings from 590
- - - pain in spine from .. 591
- - - palpitation from .. 375, 594
- - - precordial pain from .. 375
- - - rheumatism of shoulder simulated by .. 863
- - - shortness of breath from .. 113
- - - syncope from .. 375
- - - tenderness of spine from .. 871
- - - dead fingers from .. 204
- - - in diabetes .. 894
- - - embolism from .. 531
- - - flatulence from .. 538
- - - gangrene from .. 521, 894
- - - hæmatemesis from 336, 342
- - - heart-block from .. 109
- - - hemiplegia from .. 884
- - - inequality of pulses from .. 673
- - - intermittent claudication from .. 204
- - - myocardial degeneration with .. 69
- - - pain in arm from .. 516
- - - epigastrum from .. 538
- - - popliteal, gangrene from .. 540
- - - Morton's neuralgia from .. 540
- - - of pulmonary artery, hæmoptysis from .. 362
- - - infarct from .. 363
- - - in mitral stenosis .. 268, 363
- - - thrombosis from .. 363
- - - subclavian artery, unequal pulses from .. 674
- - - from syphilis .. 262
- - - systolic aortic bruit from .. 1
- - - bruit from .. 260
- - - tenesmus from .. 538
- - - thrill due to .. 875
- - - throbbings in head from .. 371
- - - tinnitus due to .. 878
- - - ulcer of foot from .. 893
- - - leg from .. 894
- - - valve rupture from .. 262
- ATHETOSIS .. 168
- - accoucheur's hand in .. 2
- - of arm .. 604
- - from cerebral embolism .. 169, 170
- - - hæmorrhage .. 169
- - - thrombosis .. 169, 170
- - in children .. 169
- - - chill causing .. 169
- - in congenital cerebral diplegia .. 169
- - - diplegia .. 883, 884
- - - double .. 168
- - - from encephalitis .. 169
- - - epilepsy and .. 168
- - - face affected by .. 604
- - - facial paresis and .. 168
- - - feet affected by .. 168
- - - fingers affected in .. 168
- - the hand in (Fig. 147) 169

Athetosis, contd.

- hands affected in .. 168
- - from hemiplegia 171, 328, 883
- - idiopathic .. 169
- - in infantile hemiplegia .. 76, 604
- - infants .. 169
- - from injury at birth .. 169
- - insanity and .. 169
- - of leg .. 604
- - in Little's disease .. 169
- - from meningeal hæmorrhage .. 169
- - mouth affected by .. 169
- - nervous shock causing 169
- - from polio-encephalitis .. 169
- - post-hæmiplegic .. 170
- - primary .. 169
- - primitive .. 169
- - in spastic paraplegia of infants .. 169
- - toes affected by .. 168
- - without gross changes in nervous system .. 169
- - wrists affected by .. 168
- Athletes, aortic disease in .. 261
- - - phoscuria in .. 340
- - heart enlarged in .. 266
- - - impulse displaced in .. 374
- - left ventricle hypertrophied in .. 258, 374
- - myocardial changes in .. 18
- - prolonged first sound in .. 2
- - - serenumbranosus bursa in .. 844
- - - stitch in .. 531, 862
- - - tenderness of spine in 870
- - Athlete's heart .. 266
- - Atmospheric pressure changes, epistaxis from 274
- - - - - tinnitus due to .. 878
- - Atony of bladder, micturition difficult from 492
- - - colon from 618
- - - constipation and .. 160
- - - from dysentery .. 160
- - - diagram of (Fig. 149) 160
- - X rays in diagnosing .. 160, 165
- - pelvic colon, constipation and .. 165
- - - rectum, constipation from .. 165
- - stomach, characters of 307
- - - dilatation from .. 218
- - - dyspepsia from .. 399
- - - flatulence due to .. 302
- - - gastroptosis with .. 303
- - - sense of fullness with 367
- - Anoxia, amblyopia due to 922
- - - arsenic in .. 277
- - - central scotoma due to 922
- - - erythema from 275, 277
- - - optic atrophy due to .. 922
- - - - neuritis due to .. 922
- - Atrophic carcinoma of breast .. 839
- - - rhinitis (see Rhinitis) .. 888
- - - spots in xeroderma pigmentosum .. 888
- - Atrophy, acute yellow, of liver (see Acute Yellow Atrophy) .. 73
- - - cerebellar, intention tremor from .. 884
- - - of face in torticollis .. 179
- - - from seventh nerve lesion .. 82
- - - hemi- of face .. 79
- - - tongue .. (Fig. 83) 79
- - - trunk .. 79
- - of kidney from ureteral calculus .. 719
- - - leg (see Legs, Atrophy of) .. 719
- - - muscles of hand (see Muscles of Hand) .. 719
- - - mastication in bulbar paralysis .. 773
- - - in Tooth's paralysis 141
- - - MUSCULAR .. 78
- - - in acute anterior poliomyelitis .. 80
- - - from alcohol .. 85
- - - in amyotrophic lateral sclerosis 80, 145, 172, 619, 630
- - - from aneurysm .. 80
- - - in anorexia nervosa 78

Atrophy, muscular, contd.

- - - from anterior corneal cell destruction .. 80
- - - cruritis .. 540
- - - in arm .. 615
- - - beri-beri .. 81
- - - from brachial neuritis 544
- - - plexus lesions 82, 617
- - - brachitis .. 583
- - - in bulbar paralysis .. 774
- - - from burn scars .. 147
- - - callus .. 80, 82
- - - carcinoma .. 78
- - - cervical rib .. 80, 82, 142, 204, 545
- - - cholera .. 79
- - - cirrhosis of liver .. 78
- - - diabetes .. 78, 335
- - - diarrhoea and vomiting 78
- - - diphtheria .. 84
- - - disuse .. 78
- - - in dysentery .. 78
- - - of face .. 82
- - - in facial paralysis .. 604
- - - from fractures .. 79, 80
- - - Friedrich's disease .. 176
- - - general paralysis .. 78
- - - gonorrheal arthritis 425
- - - gumma of nerve .. 80
- - - hepatic abscess .. 78
- - - hysteria .. 178
- - - infantile paralysis .. 78
- - - of intraspinal .. 617
- - - from joint disease 79, 436, 457, 583
- - - laceration scars .. 147
- - - in leg .. 609
- - - malaria .. 78
- - - marasmus .. 78
- - - from mercury .. 84
- - - in multiple neuritis 541
- - - myopathy 620, 624, 625
- - - from nerve injury 80, 82
- - - neuropathic fibrillary contractions in .. 172
- - - from new growth of bone .. 79
- - - - involving nerve .. 80
- - - paralysis of anterior crural nerve .. 609
- - - pelvic tumour involving sacral plexus .. 80
- - - peripheral nerve lesions causing, list of .. 80
- - - in peripheral neuritis 80, 82, 85, 436, 570, 623, 626, 627, 934
- - - peroneal, early case 611
- - - in peroneal atrophy 620
- - - phibosis .. 79
- - - from poliomyelitis .. 78, 79, 80, 623, 624, 625
- - - primary, sciosis from 192
- - - progressive, see Progressive Muscular Atrophy
- - - in pseudo-hypertrophic muscular paralysis .. 78, 79, 80, 625
- - - ptomaine poisoning 78
- - - R.D. with .. 78
- - - in rheumatoid arthritis .. 427, 431
- - - from sacro-iliac joint disease .. 81
- - - sarcoma .. 78
- - - sciatica .. 80, 82, 539
- - - seventh nerve lesion 82
- - - spinal cord lesions causing, list of .. 80
- - - from splints .. 79
- - - sprains .. 79
- - - in starvation .. 78
- - - from syphilis .. 78
- - - syringomyelia 80, 320, 321, 619
- - - tabes dorsalis .. 78
- - - talipes .. 144
- - - thoracic aneurysm .. 82
- - - neoplasm .. 82
- - - of tongue .. 82
- - - in bulbar paralysis .. 602
- - - in Tooth's paralysis (Fig. 82) 79, 80, 141, 146
- - - from transverse myelitis .. 80, 81, 627
- - - trigeminal neuralgia 549
- - - tuberculosis .. 78
- - - tuberculous joint .. 432

Atrophy, muscular, contd.

- - - in tumour of cauda equina .. 80, 81
- - - twelfth nerve lesion 82
- - - in typhoid fever .. 78
- - - ulcerative colitis .. 78
- - - from ulnar paralysis (Fig. 85) 82
- - - in Volkmann's contracture .. 617
- - - wasting diseases .. 78
- - - Werdnig-Hoffman, fibrillary contractions in .. 172
- - - with R.D., list of causes of .. 80
- - - or without R.D. .. 725
- - - oligo-point-cerebellar .. 883
- - - intention tremor due to .. 884
- - - optic, from atoxyl .. 922
- - - blindness due to .. 925
- - - from cerebellar absciss .. 733
- - - tumour .. 733
- - - in choroido-retinitis 924
- - - colour-blindness due to .. 926
- - - congenital, in idiocy 622
- - - from diabetes .. 335
- - - in diplopia .. 884
- - - disc pallid in .. 519
- - - in disseminated sclerosis 93, 185, 607, 613, 630, 923
- - - familial idiocy .. 924
- - - Friedrich's ataxy .. 624
- - - glaucoma .. 924
- - - hereditary, central scotoma in .. 923
- - - in hydrocephalus .. 257
- - - due to lead .. 922
- - - (Fig. 156) 922
- - - Leber's central scotoma in .. 923
- - - in Little's disease .. 169
- - - macular wedge type .. 156
- - - after neuritis .. 519
- - - ophthalmoscopic examination for .. 93
- - - in pachia .. 279
- - - primary, (Fig. 42) 219
- - - scotoma from .. 93
- - - from sphenoidal sinus distention .. 235
- - - visual fields contracted in .. 924
- - - ovarian, with unicornuate uterus .. 24
- - - peroneal, Tooth's see Tooth's Peroneal Atrophy
- - - primary muscular see Myopathy
- - - progressive muscular (see Progressive Muscular Atrophy)
- - - of skin in epidermolysis bullosa .. 496
- - - lupus erythematosus 746
- - - pseudopelade .. 865
- - - scleroderma .. 865
- - - syringomyelia .. 320
- - - TESTICULAR .. 85
- - - from bicycle injury .. 86
- - - brain injury .. 85, 86
- - - compression .. 85
- - - of spermatic cord .. 85
- - - testis .. 85
- - - cricket-ball blow .. 86
- - - epichantosis .. 85
- - - after epididymitis 85, 507
- - - from falling astraddle .. 86
- - - gonorrhoea .. 85, 86, 393
- - - gout .. 85, 86
- - - haematocoele .. 85
- - - hydrocele .. 85
- - - ill-fitting truss .. 85
- - - impotence from .. 393
- - - from influenza .. 85, 86
- - - inguinal hernia .. 85
- - - injury .. 85, 86, 393
- - - kick at football .. 86
- - - list of causes of .. 85
- - - from mumps .. 85, 86, 507
- - - neurotrophic causes 85
- - - obesity from .. 505, 507
- - - in old age .. 85

Atrophy, testicular, contd.

- - - from operation .. 85
- - - orchitis .. 85, 86, 393, 507
- - - potassium iodide .. 85
- - - spermatocele .. 85
- - - spinal injury .. 85, 86
- - - strain .. 86
- - - syphilis .. 85, 86
- - - tubercle .. 85, 86, 507
- - - typhoid fever .. 85, 86
- - - varicocele .. 85
- - - after varicocele operation .. 866
- - - from X rays .. 85, 86
- - - of tongue in bulbar paralysis 243, 603, 602, 731, 773
- - - from twelfth nerve lesion .. 82
- - - Atropine, convulsions .. 181
- - - delirium from .. 212
- - - erythema due to .. 275, 917
- - - headache relieved by .. 549
- - - mydriatic action of .. 675
- - - pupils unequal from .. 675
- - - Attie suppuration .. 522
- - - Attitude see Posture
- - - Auditives .. 771
- - - Auditory aura .. 87
- - - meatus, external (see External Auditory Meatus)
- - - nerve see Nerve, Cranial, Eighth
- - - word centre (Fig. 602) 770
- - - AURA .. 86
- - - apprehension .. 86
- - - auditory .. 87
- - - desire to go to stool as .. 87
- - - epigastric sensation as .. 86
- - - epipne .. 86, 182, 183
- - - characteristics of .. 187
- - - flushing a form of .. 303
- - - parageusia due to .. 87
- - - subjective smell as .. 756
- - - gustatory .. 87
- - - hearing voices as .. 87
- - - from intracranial growth .. 87
- - - in Jacksonian epilepsy .. 87, 185
- - - motor .. 86
- - - numbness as .. 86
- - - olfactory .. 87
- - - pain in foot as .. 87
- - - painful, from parietal lobe tumour .. 87
- - - petti mal and .. 87
- - - prelude to epilepsy .. 86
- - - psychical .. 86
- - - rising in throat as .. 87
- - - running as .. 86
- - - sense of unreality as .. 86
- - - sensory .. 86
- - - tingling as .. 86
- - - undescrivable feeling as .. 86
- - - varieties of .. 86
- - - vertigo as .. 911
- - - visceral .. 86
- - - visual .. 87
- - - Auricle rate, 300 per minute .. 665
- - - 400 per minute (Fig. 527) 666
- - - left, hypertrophic, bronchiectasis from 367
- - - in mitral stenosis .. 268, 367
- - - nerve relations of .. 533, 863
- - - single .. 196, 267
- - - thrombus in, cerebral embolism from .. 170
- - - (and see Ear)
- - - Auricular extrasystole, electrocardiogram of (Fig. 535) 669
- - - in mitral stenosis .. 670
- - - fibrillation, absolute disorder of pulse in 666
- - - account of .. 665
- - - auricular systole disappearing in .. 666
- - - in cardiosclerosis .. 665
- - - digitalis in .. 69
- - - electrocardiograms of (Fig. 461) 596, (Fig. 527) 666
- - - in diagnosing .. 595
- - - in Graves' disease .. 267
- - - irregular heart with 2

Auricular fibrillation, contd.

- - - from mitral stenosis 2, 69, 268, 665
- - - multiple extrasystoles simulating .. 666
- - - paroxysmal tachycardia distinguished from .. 670
- - - polygram of (Fig. 526) 666
- - - presystolic bruit disappearing in .. 666
- - - thrill disappearing .. 666
- - - tachycardia from .. 857
- - - tumbling rhythm with 2
- - - flutter, account of .. 665
- - - electrocardiograms of (Fig. 461) 596, (Fig. 525) 665
- - - in diagnosing 665, 672
- - - paroxysmal tachycardia distinguished from .. 670
- - - tachycardia in 670, 672
- - - systole, disappearance of .. 665
- - - Auriculo-systolic wave in polygram .. 663
- - - Auriculo-temporal nerve, distribution (Fig. 580) 748
- - - Auriculo-ventricular block (see Heart-block)
- - - bundle (see Bundle of His)
- - - delay .. (Fig. 104) 109
- - - Austin Flint murmur .. 119
- - - Australasia, hydatid disease in .. 66, 366, 807
- - - Australian dogwood, dermatitis due to .. 915
- - - gum tree, dermatitis due to .. 915
- - - Austria, impetigo herpetiformis in .. 125
- - - Auto-agglutination of blood .. 51
- - - Auto-erythro-phagocytosis .. 51
- - - Automatism after convulsions .. 181
- - - in epilepsy .. 25
- - - Axilla, aneurysm in .. 816
- - - bromidrosis of .. 803
- - - coloured sweat of .. 803
- - - cystic hygroma of .. 816
- - - eczema marginatum of .. 312
- - - emphysema pointing in .. 816
- - - erythrasma affecting .. 313
- - - excessive sweating of .. 803
- - - hair absent from .. 91
- - - large glands in (see Lymphatic Glands, Axillary)
- - - lipoma of, tuberculous abscess simulating .. 816
- - - pain in, from abscess .. 816
- - - of liver .. 740
- - - inflamed glands .. 475
- - - pediculosis pubis affecting .. 499
- - - primary malignant disease in .. 816
- - - scabies affecting .. 918
- - - seborrhoeic dermatitis affecting .. 498
- - - SWELLING IN .. 816
- - - sycosis vulgaris affecting .. 682
- - - tuberculous abscess in 816
- - - Axillary abscess (see Abscess)
- - - aneurysm (see Aneurysm)
- - - glands (see Lymphatic Glands, Axillary)
- - - hair, premature, with hypernephroma of kidney .. 776
- - - vein (see Vein)
- - - Azospermia, sterility due to .. 793, 794
- - - Azotic diabetes .. 655
- - - polyuria in .. 654

BABINSKI'S SIGN .. 87
 - - - (and see Plantar Reflex, Extensor)
Bacillæmia .. 739
Bacilluria .. 88
 - - - anaemia from .. 47
 - - - appendicitis simulated by .. 153

- Bacilluria, contd.*
- cachexia from .. 127
 - colic from .. 147
 - cough from .. 187
 - delirium from .. 211
 - hæmaturia from .. 348
 - increased frequency of micturition from 491, 901
 - loss of weight due to .. 933
 - out of condition from .. 113
 - pain in iliac fossa from .. 555, 557
 - limbs in .. 570
 - perinephritis from .. 187
 - in pregnancy .. 536
 - renal tuberculosis simulating .. 352
 - right side rather than left .. 556
 - shortness of breath from .. 113
 - temperature chart in (Fig. 448) 560
 - toxæmia from .. 113, 127
 - uræmia from .. 211
 - ureteric colic from .. 153
 - urine culture in diagnosing .. 153
 - vesical colic from .. 148
 - (and see Bacteriuria; and Coli Bacilluria)
 - Bacillus, acid-fast* .. 788
 - in leprosy .. 82

— — ureters from	91
— from tonsillitis	90
urine changes in	90
— without urinary symptoms	91
— vomiting from	91
— and see Bacilluria; and Coli Bacilluria	
Bag of worms feeling in varicocele	855
Baker's cyst, popliteal	844
Balanitis, account of	763
— chancre with	763
— in diabetes mellitus	764
— enuresis from	270
— gangrene of penis from	763
— with gonorrhœa	763
— in gout	764
— increased frequency of micturition from	491
— oedema of prepuce from	763
— pain in penis from	578
— paraphimosis from	763
— phimosis from	763
— priapism due to	656
— pyuria due to	763
— sore on penis from	763
— striking discharge from	763
— syphilis	763
— ulceration of penis from	763
Bald ringworm, alopecia areata distinguished from	311
— tongue from scarlet fever	763

BALDNESS

— absolute	91
— due to alopecia areata	92
— antisyphilitic treatment	
— curing	91
— of armpits	91
— from bottle bacillus	92
— eczema	91, 92
— erysipelas	91, 92
— of eyelids	91
— face	91
— from favus	91, 92
— fever	91, 92
— folliculitis decalvans	92
— hats	91
— after head injury	86
— hereditary and	91
— from kerion	92
— lupus erythematosus	
— — 91, 92, 865	
— males and	91
— in morphia	92
— occipital, from head-rolling	866
— in progeria	247
— pseudopelade	866
— from psoriasis	91
— of pubic regions	91
— from ringworm	91, 92, 311
— seborrhœa	91, 92
— shock	91
— syphilis	91, 92
— of trunk	91
— Wassermann test and	92
Bal-valve gall-stone in ampulla of Vater	739
Ballet-dancers, cramp in	188
Balloon fillers, poisoning in	421
— filling, hydrogen and	421
Ballooned rectum in obstruction	168
Balloonists, ataxia in	77
— noises in head in	504
— vertigo in	504
Balm of Gilead, dermatitis due to	915
Balsam of Peru, rash from	971
Band, amniotic, oedema due to	511
— Bands (see Adhesions)	
Bandage, tight, gangrene from	317, 322
Banti's disease, ascites in	72, 83, 415
— chronic peritonitis in	72
— cirrhosis of liver and	72, 83, 143, 415, 422, 780, 783
— clubbed fingers in	143
— Egyptian splenomegaly allied to	709
— features of	72
— jaundice in	422
— pyrexia in	688, 708
— spleen enlarged in	83
— splenic anæmia and	72, 83, 143, 415, 422, 467, 780
— splenomegaly cirrhosis and	780
Bárany's apparatus in testing hearing	206
Barbers, dermatitis in	917
Barium chloride in Huppert's test	903
— test in carbolluria	906
— enema (see Enema)	
— salts, dermatitis from	917
— in Verrey lights	917
— and X rays (see X rays and Barium)	
Barking cough	186
Barley, actinomyces from	792
— corn in urethra	575
Barlow's disease	50, 51
— anæmia in	50, 93, 128
— bedclothes kicked off in	128
— bleeding gums in	93, 128
— diet cure of	51
— fresh vegetables curing	51, 93
— hæmorrhage in	93
— impaired nutrition in	128
— night sweats in	803
— pain in bones in	128
— periosteal hæmorrhage in	93
— perspiring head in	128

Barlow's disease, contd.

— purpura in	93, 676
— scurvy and	93, 679
— sleep sweats in	128
— spongy gums in	93
— stomatitis in	93
— subperiosteal hæmorrhages in	128
— tenderness of bones in	50, 93, 128
Barmaids, dermatitis in	917
Barrel-shaped chest	208, 460
Bartholin's duct red and inflamed	239
— gland abscess, achine in	
— perineum from	579
— gonococcus in	231
— normal secretion of	231
— reddened in gonorrhœa	854
Bartholinian cyst	855
Bartholinitis, aching in	579
— perineum from	579
— gonococcus in	231
— normal secretion of	231
— reddened in gonorrhœa	854
Basophil corpuscles in anæmia	30
— colour of figure of	Fig. 42, 29
conditions of occurrence of	30
— in Hodgkin's disease	49, 471, 782
— Jenner's stain and	29, 30
— in lymphadenoma	83
— lymphatic leukæmia	34
— painters	30
— size of	30
— in splenic anæmia	72
— splenomedullary leukæmia	32
— from turpentine	30
— in zinc workers	30
— myelocytes	28
Basophilia, punctate, coloured figure of (Fig. 34)	29
— general account of	30
— illustrated (Fig. 43)	31
— from lead	30
— in leukæmia	30
— pernicious anæmia	30, (Fig. 43) 31
— from turpentine	30
Bates, Mr. and Mrs., giant and giantess (Fig. 269)	325
Bath, cold, menorrhagia from	482
— hot, high blood-pressure relieved by	404
— — insomnia relieved by	404
Bathers, jelly-fish stings in	278
Bathing, dead fingers from	203
— drawers area, dhotie's itch of	499
— — eczema of	742
— — intertrigo affecting	499
— — marginaria of	499
— — erythrasma of	499
— — psoriasis of	499
— — tinea marginata of	499
— — (and see Buttocks; Groin; and Nape Region)	
— — rash in small-pox	678
— gangrene of lung after	323
— pruritus	659
Bats, inability to hear	208
Bay rum, dermatitis from	916
Bazin's disease, account of	502
— erythema in	276
— ulcer of leg in	895
Beaded ribs in rickets	194, 782
Beaked pelvis in rickets	233

- Bean in bronchus, gangrene of lung from . . . 322
 - Indian, dermatitis from . . . 915
 - oesophagus obstructed by (Fig. 203) . . . 241
 Beans, oxaluria from . . . 523
 Beard, eczema seborrhoeum affecting . . . 602
 - falling out after head injury . . . 86
 - pediculosis pubis affecting . . . 499
 - ringworm of (see Tinea Sycosis)
 - trichophyton rosaceum affecting . . . 310
BEARING-DOWN PAIN 529
 - (and see Pain, Bearing-down)
 Bedbugs (see Bug)
 Bedclothes kicked off in infantile scurvy . . . 128
Bedsore, account of . . . 321
 - anaesthesia and . . . 321
 - of finger . . . 301
 - from fracture-dislocation of spine . . . 321
 - gangrene from . . . 317
 - in hemiplegia . . . 321, 894
 - of larynx . . . 763
 - from lesion of cauda equina . . . 321
 - in malignant disease . . . 805
 - meningitis . . . 321
 - meningio-mylitis . . . 321
 - myelitis . . . 321, 452
 - parts affected by . . . 321
 - pyaemia from . . . 321
 - after spinal wound . . . 321
 - from transverse lesion of cord . . . 321
 Bee-sting (see Sting)
 Beer, arsenic in . . . 85, 642, 645
 - oxaluria from . . . 523
 - primary alcoholic heart from . . . 70
 - regurgitation of food through nose due to . . . 730
Beer-drinker's heart 70.
 Beer-drinking, acute nephritis simulated after . . . 514
 - general oedema from . . . 513, 516
 Beetroot, oxaluria from . . . 523
Belching . . . 302
 - from flatulence . . . 485
 Bell sound over pneumothorax . . . 209
 Bell's facial paralysis, contracture from . . . 178
 - palsy . . . 602, 605
 Belladonna, constipation relieved by . . . 161
 - delirium due to . . . 211, 212, 213, 214
 - erythema from . . . 275
 - followed by . . . 859
 - irritant action of . . . 675
 - poisoning, anidrosis in . . . 803
 - pupils dilated by . . . 859
 - unequal from . . . 675
 - very wide from . . . 213
 - purpura due to . . . 676
 - rash due to . . . 917
 - scales due to . . . 744
 - tachycardia from . . . 856, 858, 859
 - thirst due to . . . 875
 - tongue dry from . . . 859
 Bellows murmur of aortic disease . . . 117
 Belt, Riedel's lobe of liver from . . . 461, 462
 Bence-Jones' albumose, amounts found . . . 22
 - bone-marrow affection and . . . 22
 - from carcinoma of bone . . . 21, 22
 - coagulation point of . . . 22
 - in leukæmia . . . 22
 - test for . . . 21
 - white ring with . . . 61
 - albumosuria . . . 5, 20
 - general account of . . . 21, 22
 - from myelomata . . . 20
 Benedict's solution, composition of . . . 327
 - in estimating sugar . . . 329
Benedict's, contd.
 - test for glycosuria . . . 327
Benzene and chloroform in measuring specific gravity of blood . . . 651
 - dermatitis due to . . . 917
 - fainting due to . . . 297
 - used by printers . . . 917
Benzidine test for blood . . . 104
 - occult blood . . . 215
 Benzoic acid, erythema from . . . 275
 - Fehling's solution reduced after . . . 327
 Benzol in aeroplane varnish . . . 416
 Beri-beri, anaemia from . . . 44
 - cachexia from . . . 44
 - decorticated rice and . . . 73, 83, 279, 516
 - dietetic causation . . . 83
 - Eastern origin of . . . 83
 - muscle wasting in . . . 83
 - oedema in . . . 83, 514
 - of legs in 73, 516, 517
 - peripheral neuritis in . . . 80, 82, 83, 516
 - pyrexia in . . . 516
 - rigor rare in . . . 737
 - in seamen . . . 83, 516
 Bial's test, glycuronic acid and . . . 327
 - for pentose . . . 327
 Bicarbonate of soda (see Sodium Bicarbonate)
 Biceps (see under Muscles)
 - jerk in hysteria . . . 614
 - increased, from cerebral lesion . . . 613
 - lost . . . 615
 - jerks unequal in hemiplegia . . . 381
 Bichromate of potassium (see Potassium)
 Bicuspid tooth, pain in temple due to . . . 867
 - tenderness in temple due to . . . 867
 Bicycle injury, testis atrophy from . . . 86
 Bicycling, menorrhagia from . . . 482
 Bigeminy, electrocardiogram of (Fig. 54) . . . 668
 - extrasystoles causing (Fig. 54) . . . 668, 670
 Big toe (see Toe, Great)
 Bilberries, melana simulated by . . . 481
Bile deficiency, fat changes in stools due to . . . 300
 - duct, Ascaris lumbricoides impacted in . . . 410
 - carcinoma (see Carcinoma)
 - cicatrization of, jaundice due to . . . 407
 - common, carcinoma of, colic from . . . 147
 - - urobilin from . . . 129
 - growth of, bile pigment in urine from . . . 130
 - obstructed, gall-bladder enlarged from . . . 316
 - - by gall-stone . . . 316
 - stone in, colic from . . . 147
 - pancreatitis from . . . 128
 - congenital obliteration of . . . 411
 - jaundice due to . . . 407
 - hydatid cyst opening into . . . 410
 - inflammation of, colic from . . . 147
 - kinked, with hepatoposia . . . 463
 - lymphatic glands obstructing . . . 784
 - obstruction of, carcinoma simulated by . . . 468
 - by enlarged portal glands . . . 422
 - gall-stone . . . 468
 - jaundice from . . . 468
 - liver enlarged from . . . 463, 468
 - in lymphadenoma . . . 422
 - by malignant glands . . . 66
Bile duct, obstruction of, contd.
 - by tuberculous glands . . . 67
 - stricture of, gall-bladder enlarged from . . . 411
 - gall-stones simulated by . . . 411
 - jaundice from . . . 411
 - laparotomy in diagnosing . . . 411
 - liver enlarged from . . . 411
 - ulceration of, from gall-stones . . . 411
 - Gmelin's test for . . . 903
 - inspissated, jaundice due to . . . 407, 410
 - iodine test for (Fig. 420) . . . 406
 - pigment in blood serum in pernicious anaemia . . . 419
 - Huppert's test for . . . 903
 - iodine test for . . . 903
 - nitric acid test for . . . 903
 - salts, bradycardia from . . . 100
 - in stools, corrosive sublimate in testing for . . . 215
 - urine, account of . . . 903
 - in biliary colic . . . 151
 - and see Jaundice
 - vomit . . . 929
 - in gastritis . . . 930
 - intestinal obstruction . . . 930
 Bilharzia, hamatobia, anaemia from . . . 44
 - in bladder . . . 102
 - wall (Fig. 29) . . . 454
 - blood per anum from . . . 96, 102
 - cachexia from . . . 128
 - cystoscope in diagnosing . . . 356, 577
 - in Egypt . . . 102, 356, 470
 - eosinophilia from . . . 103, 272
 - fainting from . . . 297
 - hamaturia from . . . 44, 348, 355, 722
 - liver enlarged from . . . 470
 - microscope in diagnosing . . . 102, 722
 - mucus per anum from . . . 102
 - ova of (Fig. 96) . . . 102
 - in faces . . . 102
 - urine . . . 102, 356, 557, 576
 - pain in penis from . . . 716, 722
 - pyuria from . . . 96, 102
 - in rectum . . . 35
 - severe anaemia from . . . 35
 - in South Africa . . . 356
 - ulceration of bladder from . . . 722
 - vesical colic from . . . 148
 - tuberculous simulated by . . . 356
Biliary cirrhosis, hypertrophic . . . 466
 - colic (see Colic, Biliary)
 - crises in tabes dorsalis . . . 148
 Bilious headache . . . 369
 - typhoid, purpura in . . . 676
 Biliousness, bicarbonate of soda and . . . 566
 - bowels inactive in . . . 640
 - calomel and . . . 566
 - deficient air in . . . 640
 - exercise and . . . 640
 - diet and . . . 640
 - micropsia in . . . 926
 - migraine and . . . 640
 - muscae volitantes and pain between shoulders and . . . 565, 566, 587
 - in shoulder from . . . 560
 - pathology not known . . . 640
 - photophobia in . . . 640
 - salivation from . . . 662
 - sick headache and tongue coated in . . . 640
 - uric acid from . . . 901
 Bilirubin, stercobilin from . . . 902
 - in stools . . . 215
 - urine orange-coloured from . . . 903
 Biliverdin in stools in duodenal ulcer . . . 130
 - urine . . . 906
 - black from . . . 903
 - dark green from . . . 903
 Billiard-ball smooth areas in alopecia areata . . . 92, 311
Blot's breathing . . . 139
 - relation to Cheyne-Stokes breathing . . . 110
 - in tuberculous meningitis . . . 110
 Bird feeders, aspergillus in . . . 792
 - food, sporotrichosis and . . . 165
 Birds, inability to hear . . . 208
 - trypanosomes in . . . 37
 - uric acid in . . . 901
 Birth, blood per anum after . . . 96
 - difficult (see Dystocia)
 - forceps injury at, paraplegia from . . . 622
 - injury, Duchenne's palsy from . . . 618
 - hemiplegia from . . . 382
 - infantile diplegia from . . . 169
 - hemiplegia from . . . 169
 - monoplegia from . . . 169
 - paraplegia from . . . 169, 621, 622
 - triplegia from . . . 169
 - paralysis of arm from . . . 622
palsies, causes of . . . 169
 - chorea spastica due to . . . 884
 - and see Childbirth; and Labour
 Bismuth, blue line on gums from . . . 45
 - enema (see Enema)
 - melana simulated by . . . 481
 - rectal concretion due to . . . 874
 - renal calculus simulated after . . . 441
 - slaty stools after . . . 481
 - and X rays, see X rays and Radium
 Bismuth-emetine-iodide in amoebic dysentery . . . 98, 99
 Bisulphide of carbon (see Carbon Bisulphide)
 - sodium in Cannadage's test . . . 129
Bite, bug, central puncture in . . . 677
 - itching from . . . 658, 659
 - purpura from . . . 676, 677
 - relapsing fever from . . . 96, 420, 738
 - typhus fever from . . . 417, 691
 - cat, spirochaetosis from . . . 213
 - delirium from . . . 213
 - dog, delirium from . . . 213
 - hydrophobia from . . . 175, 213, 243, 885
 - ferret, spirochaetosis from . . . 213
 - flea, central puncture in . . . 677
 - itching from . . . 659
 - purpura due to . . . 676
 - fox, delirium from . . . 213
 - hydrophobia from . . . 213
 - gnats, of ear, earache from . . . 252
 - face swollen from . . . 824
 - septicæmia from . . . 704
 - vesicle due to . . . 920
 - insect, face swollen from . . . 824
 - inguinal glands enlarged from . . . 840
 - wheals due to . . . 935
 - leech, purpura due to . . . 676, 677
 - mosquito, of ear, earache from . . . 252
 - face swollen from . . . 824
 - itching from . . . 659
 - malaria from . . . 38
 - septicæmia from . . . 704
 - vesicle due to . . . 920
 - mouse, spirochaetosis from . . . 213
 - of penis, sore due to . . . 763
 - punctum in . . . 920
 - rat, spirochaetosis from . . . 213
 - relapsing fever due to . . . 36
 - snake (see Snake-bite)
 - stout, spirochaetosis from . . . 213
 - tarantula, delirium from . . . 211
 - tongue swollen from . . . 85, 852
 - vesicles due to . . . 920
 - viper, delirium from . . . 211
 - effects of . . . 422
 - (and see Snake-bite)
 - weasel, spirochaetosis from . . . 213
 - wolf, delirium from . . . 213
 - hydrophobia from . . . 213, 885
 - (and see Sting)

Biting cheeks in epilepsy 182
 - tongue (see Tongue)
 Biurates, solubility of .. 901
 Biuret test for albumose .. 20
 Black dot ringworm .. 311
 - heliobore, dermatitis due to .. 916
 - measles .. 345
 - motions .. 481
 - (and see Melena)
 - small-pox .. 354
SPECKS BEFORE THE EYES .. 92
 - spots in field of vision .. 92
 - vomit in acute yellow atrophy .. 345
 - phosphorus poisoning .. 421
 - yellow fever .. 345, 420
 Blackheads, absent in drug rashes .. 682
 - in acne vulgaris .. 125, 600
 Blacksmith's heart, palpitation from .. 594
 Blacksmiths, cramp in .. 189
 heart hypertrophy in .. 2
 left ventricle hypertrophied in .. 258, 374
 myocardial change in .. 18
 prolonged first sound in .. 2
 Blackwater fever (see Fever)
 Bladder, abscess opening into .. 646
 actinomycosis opening into .. 296, 724
 appendicular abscess adherent to .. 356
 - ruptured into .. 296, 356, 716, 723, 724
 atony of, micturition difficult from .. 492
 Bacillus coli in .. 647
 - and see Coli Bacillaria
 bilharzia in .. 102, 354
 - (Fig. 29)
 blood-clot in, colic from .. 148
 micturition difficult from .. 492
 calculus in (see Calculus, Vesical)
 carcinoma of (see Carcinoma of Bladder)
 of cancer opening into .. 296, 716, 724
 colon opening into .. 716
 invading .. 724
 of pelvic colic invading .. 148, 356, 724
 rectum infiltrating .. 491
 invading .. 148, 356, 724
 opening into .. 296, 716
 sigmoid colon invading .. 724
 opening into .. 296, 716
 uterus infiltrating .. 356, 491, 724
 opening into .. 296, 716
 vagina invading .. 356
 colic (see Colic, Vesical)
 composite calculus in (Fig. 294) .. 355
 disease of, pain in leg from .. 543
 displaced down, with hypertrophy of cervix .. 657
 distended, abdominal tumour from .. 61
 ascites simulated by .. 61, 815
 catheter in diagnosing .. 815, 841
 - dullness over .. 61
 - dystocia due to .. 250
 - from enlarged prostate .. 61, 815
 - felt per rectum .. 728
 - fibromyoma of uterus stimulated by .. 840
 - micturition in diagnosing .. 815
 - ovarian cyst simulated by .. 815, 840
 - pain above pubes with .. 55
 - pelvic swelling due to .. 840
 - pregnancy simulated by .. 815, 840
 - from retention of urine .. 55, 492
 - retroverted gravid uterus .. 61, 815, 841

Bladder, distended, contd.
 - signs of .. 61
 - in spastic paraplegia .. 815
 - from spinal cord lesions .. 61
 - tabes dorsalis .. 61, 815
 - tapped in error .. 815
 - urachal cyst simulated by .. 815
 - diverticulitis abscess opening into .. 296, 356, 716
 - diverticulum of (see Diverticulum)
 - dysenteric ulcer of intestine adherent to .. 356
 - opening into .. 716, 724
 - epithelioma of .. 577, 722
 - and see Carcinoma of Bladder
 - extroversion of, congenital .. 658
 - after operation .. 658
 - prolapse of uterus simulated by .. 657
 - into vagina .. 658
 fistula of (see Fistula)
 foreign body in, colic from .. 148
 - X-ray shadow from .. 444
 full, priapism from .. 657
 gangrene of, from cystitis .. 720
 gonococcus infecting .. 228
 gradual emptying on catheterization .. 58
 growth in, cystitis from .. 720
 - cystoscope in diagnosing .. 354, 494
 - enlarged prostate simulated by .. 493
 - haematuria from .. 349
 - hydronephrosis from .. 354
 - pelvic swelling from .. 840
 - pyuria with .. 349
 - renal pain from .. 354
 - tumour from .. 354
 retention of urine from .. 493
 growth invading, colic from .. 148
 in hernia .. 834
 hypogastrum .. 815
 ischaemic dilatation of (Fig. 627) .. 815
 iliac abscess opening into .. 716, 723, 724
 in infants .. 815
 inflamed trigone of, pain in penis from .. 493
 injury to (see Injury)
 instrumentation of, colic from .. 148
 - cystitis from .. 90, 720
 irritable .. 495, 902
 - from diverticulitis .. 161
 - from exaluria .. 524
 - from stranguy due to .. 797
 - from vesical calculus .. 721
 - irritated by appendicitis .. 148
 - parametritis .. 148
 - pelvic abscess .. 148
 - periproctal abscess .. 148
 - pyosalpinx .. 148
 lavage of, in diagnosing origin of pyuria .. 716
 oedema of, from cystitis .. 720
 operations (see Operation on Bladder)
 pain in (see Pain)
 papilloma of (see Papilloma of Bladder)
 pelvic abscess opening into .. 356, 716, 723
 periproctal abscess opening into .. 29, 296
 pouch of (see Diverticulum)
 pressure on, bearing-down pain from .. 529
 prolapse of, stranguy due to .. 797
 prostatic abscess opening into .. 716, 723
 psoas abscess opening into .. 716, 723, 724
 pyosalpinx opening into .. 356, 716, 723, 724
 rectal examination in investigating .. 350

Bladder, contd.
 - rupture of, from fractured pelvis .. 351
 - sarcoma invading .. 148
 - sound in diagnosing .. 658
 - cystocele .. 611
 - sphincter, nerve-supply of (Fig. 471) .. 491
 - stammering .. 491
 - stone in (see Calculus, Vesical)
 - succussion in .. 800
 - sudden emptying of, anuria from .. 55
 - saprophytes in .. 90
 - trabeculated, in cystitis .. 720
 - trigone of, inflamed, pain in penis from .. 493, 576
 - trouble from nerve disease .. 81
 - and see Micturition; Sphincter Trouble, etc.
 tuberculosis of (see Tuberculosis of Bladder)
 tuberculous bowel opening into .. 716, 724
 fistula of .. 296
 ulcers of (Fig. 574) .. 717
 - bowel adherent to .. 356
 tumour of, aching in loin from .. 349
 kidney enlarged from .. 349
 micturition interrupted by .. 576
 pain during micturition due to .. 576
 - seen with cystoscopy .. 350
 ulceration of (see Ulceration of Bladder)
 uric acid calculus in (Fig. 292) .. 354
 vermiform appendix adherent to .. 724
 villous carcinoma of (see Carcinoma of Bladder)
 tumour of, colic from .. 148
 - cystoscopy in diagnosing .. 491, 576
 - fragment in urine .. 349
 - haematuria from .. 348, 354, 576, 577
 - pain in penis from .. 574
 - paroxysmal haemoglobinuria simulated by .. 358
 - sudden stoppage of urine by .. 491
 - yeasts in .. 647
 - and see under Vesical
 Blanching after abdominal injury .. 735
 from aneurysm .. 534
 duodenal ulcer .. 157, 482
 leaking abdominal aneurysm .. 778
 rupture of aneurysm .. 157
 tubal gestation .. 157
 severe haemorrhage .. 157
 in typhoid fever .. 157
 Bleachers, chloride of lime used by .. 917
 dermatitis in .. 917
 Bleaching powder, dermatitis due to .. 916
 - test for indican .. 395, 905
 Blebs (see Bullae)
 Bleeding cheeks in stomatitis .. 95
 - gums .. 93
 - and see Gums, Bleeding
 lips in stomatitis .. 95
 from mouth in haemophilia .. 346
 - Hodgkin's disease .. 346
 - from mercury .. 94
 - nose .. 273
 - and see Epistaxis
 palate in stomatitis .. 95
 tongue in stomatitis .. 95
 Blepharitis, chronic (Fig. 232) .. 287
 - marginal, conjunctiva hypertrophied from .. 273
 - epiphora from .. 273
 - lid edge hypertrophied from .. 273
 from facial paralysis .. 604
 in Mongolian idiocy .. 293

Blind spot in field of vision from albuminuric retinitis .. 93
 - cataract .. 93
 - corneal opacity .. 93
 - detached retina .. 93
 - disseminated sclerosis .. 93
 - embolism of retinal artery .. 93
 - haemorrhage into vitreous .. 93
 - iritis .. 93
 - keratitis .. 93
 - melanotic sarcoma .. 93
 - ophthalmoscope and .. 92
 - from optic atrophy .. 93
 - neuritis .. 93
 - perimetria and .. 92
 - from quinine .. 93
 - scotoma due to .. 923
 - from synchiae .. 93
 - thrombosis of retinal vein .. 93
 - tobacco amblyopia .. 93
 - and see Scotoma
BLINDNESS .. 920
 - in arteriosclerosis .. 925
 - colour (see Colour Blindness)
 - COMPLETE .. 924
 - congenital .. 924
 - from congenital optic atrophy .. 622
 - day .. 926
 - from detachment of retina .. 925
 - dilated nasal sinus .. 925
 - electric, red vision in .. 926
 - from embolism of retinal artery .. 925
 - in familial idiocy .. 924
 - from fracture of base of skull .. 925
 - glaucoma .. 288, 925
 - after haemorrhage .. 923
 - hemi- (see Hemianopsia)
 - from hysteria .. 754, 925
 - in idiocy .. 622
 - from iritis .. 924
 - migraine .. 924, 925
 - monocular, in migraine .. 922
 - night (see Night Blindness)
 - from ophthalmia neonatorum .. 285, 924
 - ophthalmoscope in investigating .. 925
 - from optic atrophy .. 925
 - chiasma lesion .. 925
 - nerve compression .. 925
 - injury .. 925
 - tract lesion .. 925
 - partial, account of .. 923
 - in hysteria .. 923
 - from quinine .. 925
 - retinobulbar neuritis .. 639, 925
 - searching movements of eyes in .. 505
 - snow, hemeralopia from .. 926
 - red vision in .. 926
 - from spasm of retinal artery .. 925
 - sudden, causes of .. 925
 - temporary, from retinobulbar neuritis .. 924
 - from thrombosis of retinal vein .. 925
 - unilateral .. 925
 - uraemic .. 925
 - from vitreous haemorrhage .. 925, 926
 - and see Amblyopia; Vision, Defective
 Blinking tic .. 173
 Blister, limping due to .. 456
 Blisters, eosinophilic corpuscles in .. 127
 - from friction .. 125
 - on oedematous tissues .. 124
 - from vesicants .. 124
 - (and see Bullae)
 Blistering, albuminuria from .. 17
 - by cantharides .. 17
 Block, heart- (see Heart-block)
 sinu-auricular (see Sinu-auricular Block)

BLOOD PER ANUM .. 96

- from abdominal injury .. 96
- actinomycosis .. 96
- acute summer diarrhoea .. 96
- anaemia from .. 43
- from aneurysm .. 97
- ankylostomiasis .. 97, 102
- arsenic .. 96, 102, 103
- bilharzia .. 96, 102
- after birth .. 96
- in blood diseases .. 96
- from calomel .. 96, 102, 103
- carcinoma .. 98
- of bladder .. 96
- colon .. 96, 97, 356, 413
- descending colon .. 96, 97, 98
- duodenum .. 97
- rectum .. 96, 97, 556
- sigmoid .. 96, 97, 556
- splenic flexure .. 776
- stomach .. 97
- uterus .. 96
- chemicals .. 102
- in children .. 101
- cholera .. 76
- from cirrhosis of liver .. 97, 783
- colitis .. 96, 700
- corrosive sublimate .. 103
- diverticulitis .. 96, 356
- drugs .. 96, 102
- duodenal ulcer .. 97, 343
- dysentery .. 96, 97, 98, 871
- embolism .. 96, 97
- epistaxis .. 96, 97
- fissure .. 96, 97
- fistula .. 96, 97
- foreign body .. 96
- gastric ulcer .. 97
- gastro-intestinal irritants .. 102, 103
- after gastrojejunostomy .. 69
- from hæmoptysis .. 97
- in Henoch's purpura .. 102, 680
- from hydrochloric acid .. 103
- in infants .. 101
- infective endocarditis .. 97
- from injury .. 96, 97
- in intermittent fever .. 96
- from intussusception .. 96, 101, 164, 727, 812, 829
- invagination of rectum .. 166
- jaundice .. 96
- list of causes of .. 96
- in lymphatic leukaemia .. 96
- from nitric acid .. 103
- Oxyuris vermicularis .. 96, 102
- parasites .. 102
- pelvic abscess .. 99
- sarcoma .. 96
- peptic ulcer .. 96
- in pernicious anaemia .. 96
- from phosphorus .. 96
- piles .. 96, 98
- polypus of colon .. 96, 97
- pelvic colon .. 96, 97
- rectum .. 96, 97, 727, 728
- sigmoid colon .. 97
- proctitis .. 96
- prolapse .. 101
- ptomaine poisoning .. 872
- purgation .. 96
- in purpura .. 96
- hæmorrhagica .. 346
- rectal examination in .. 97
- from rectal injury .. 96
- relapsing fever .. 96
- sarcoma of stomach .. 97
- in scurvy .. 96
- from septic umbilical cord .. 96, 101
- in septicæmia .. 96
- from sigmoidoscopy .. 96
- sigmoidoscopy in .. 97
- in splenic anaemia .. 783
- splenomedullary leukaemia .. 96
- sprue .. 96
- from sulphuric acid .. 103
- syphilitic proctitis .. 96, 100
- thrombosis .. 96, 97, 152

Blood per anum, contd.

- from tuberculous ulceration of colon .. 96
- rectum .. 96
- typhoid fever .. 96, 97
- ulceration of rectum .. 97
- in ulcerative colitis .. 96, 97, 100, 564
- vaginal examination in .. 96
- in yellow fever .. 97
- zymotic diarrhoea .. 101
- (and see Melena)
- auto-agglutination in .. 51
- Bacillus coli from .. 739
- influenza from .. 739
- pyocyaneus from .. 739
- typhosis from .. 739
- bacteriological investigation of (see Blood Culture)
- benzidine test for .. 104
- casts (see Casts, Urinary, Blood)
- Charcot-Levyden crystals in .. 131
- clot in bladder, colic from .. 148
- micturition difficult from .. 492
- from kidney due to blood diseases .. 147
- colic from .. 147
- due to growth .. 147
- infarction .. 147
- infective endocarditis .. 147
- injury .. 147
- leukaemia .. 147
- pernicious anaemia .. 147
- purpura .. 147
- scurvy .. 147
- tubercle .. 147
- in ureter, colic from .. 147
- coagulability of (see Coagulability of Blood)
- colour index of (see Colour Index)
- crescents in, in malaria .. 420
- crusts in jaundice .. 405
- culture .. 83
- germs found on .. 739
- in infective endocarditis .. 46, 261, 612, 687, 704, 715
- leptothrix septicaemia .. 692
- lobar pneumonia .. 739
- Malta fever .. 455, 739
- Micrococcus tetragenus recovered on (Fig. 550) .. 692
- in pyæmia .. 678
- pyrexia cases .. 687, 713
- rigor cases .. 738
- septicaemia .. 678, 687, 715, 739, 786
- streptothrix infections .. 687
- tetragenous fever .. 692
- typhoid fever .. 687, 689, 739, 784
- cysts in sarcoma .. 823
- diseases, apopleciform .. 208
- Meniere's disease in .. 83, 872
- bleeding gums in .. 362
- blood per anum in .. 96
- clot from kidney in .. 147
- epistaxis in .. 362
- gastric colic in .. 148
- hæmatemesis in .. 336
- hæmoptysis in .. 362
- hæmorrhage into gastric mucosa in .. 148
- inner ear in .. 208
- hyperplasia of red marrow in .. 862
- peripheral neuritis in .. 83
- pleuritic effusion in .. 137
- purpura in .. 676, 679
- pyrexia in .. 688, 707

- endocrine factors and .. 106
- epistaxis from .. 273, 275
- fatigue factors and .. 106
- with fatty heart .. 18
- fibroid heart .. 18
- first sound prolonged with .. 2, 105
- in gastric crises .. 396, 536
- general account .. 105, 108
- from granular kidney .. 1, 17, 71, 137, 201, 246, 504, 729
- hæmatemesis from .. 342
- hæmorrhage into vitreous from .. 106
- headache from .. 372

Blood-pressure, high, contd.

heart failure from
17, 62, 106, 201, 246
in heart failure 71, 106
high-frequency elec-
tricity relieving 401
hot baths relieving 404
hyperacusis from 389, 390
from hyperpnea 62
hypertrophy of left
ventricle with 2, 729
from hypothyroidism
impulse forceful with
insomnia from 402, 404
life insurance and 404
massage relieving 404
in melancholia 106
menorrhagia from
482, 484
metrorrhagia from 487
mitral regurgitation
from 262
in mitral stenosis
17, 71, 106
with myocardial affec-
tions 18
nervous factors and 106
noises in head from 504
nutmeg liver from 463
often unimportant 105
in old age 387
pulpitation from 594
pituitary vagaries and 106
with polycystic kid-
neys 57, 450
in polycythemia 246
pivalorrhagia and 662
in Raynaud's syn-
drome 106
reduplicated first
sound with 729
second sound from 374
in renal disease 183, 372
retinal arteries thin
and wiry with 106
tortuous with 106
hemorrhages with
106, 595
retinitis with 595
shortness of breath
with 106
sphygmomanometer
in detecting 595
in splenomegaly
polycythemia 780
throbbings in head
from 371
thyroid extract help-
ing 106
tinnitus due to 878, 879
tube-casts with 595
in uræmia 111, 183, 396
variations in 106
vertigo due to 504, 911
vision affected from 106
without symptoms 106
in women at middle-
age 106
low. In Addison's disease
45, 106, 212, 372,
641, 928, 934
anæmia 372
asthenia 106
from cigarettes 106
debilitating malady 106
delirium from 212
in Graves' disease 106
headache from 372
in morbus cordis 372
phthisis 106
pigmentation with 106
after residence in
India 106
from severe hæmor-
rhage 212
vertigo due to 911
from vomiting 396
maximum systolic ar-
terial 105
minimum diastolic ar-
terial 105
pulmonary, raised, in
mitral stenosis 364
rest in bed and 105
stethoscope in measur-
ing 105
sphygmomanometer in
measuring 105
Blood-root, dermatitis due
to 916

Bloody sweat 803
Blow on chest, hæmoptysis
from 364
ear, noises in head from 504
vertigo from 504
epigastric, hæmatem-
esis from 442
vomiting due to 429
hæmatoma of jaw from 834
on internal semilunar car-
tilage, fainting from 297
pericostitis of jaw from 834
purpura due to 676
over solar plexus, faint-
ing due to 297
swelling on bone after 817
on testicle, fainting from 297
tympanic membrane
ruptured by 522
Blowing of nose, surgical
emphysema from 254
Blowpipe workers, eye-
strain in 547
Blubber, lips from lym-
phanitis 824
macroglossia with 852
Blue brain 204, 205
field of vision for 921
line on gums (see Gums)
pill, polyuria after 653
sclerotics and brittle
bones Fig. 259 304
vision after cataract
extraction 926
Blueness of ears, blue-
brain and 204
hands, blue-brain and 204
lips in pneumonia 735
and see Cyanosis
Blush, area in regions of
pain 527
Blushing, absence of,
from paralysis of cer-
vical sympathetic 270
from emotion 303
flushing distinguished
from 303
Boat, dizziness on 911
races, albuminuria after 18, 330
glycosuria after 330
Boeck, multiple benign
sarcoid 502
Boil in ear, deafness from 207
carache from 252
meatal sinus simu-
lating 522
meatus obstructed by 207
otorrhœa from 522
pain in ear from 252
pre-audicular gland
enlarged from 252
pus from 522
tender swelling due
to 522
carbuncle distinguished
from 682
on face 824
nature of pustule in 681
in perineum, aching in
perineum from 579
of scrotum 849
still neck from 795
suppurative menin-
gitis from 732
tenderness of spine
from 868
thrombosis of innom-
inate vein from 910
vulval swelling due to 853
Boils due to Accladium
Castellani 312
acute nephritis from 11
from ankylostomiasis 635
in asphaltic workers 917
cow-pox simulating 302
in diabetes 334, 335
of face, cavernous sinus
thrombosis from 284
finger affected by 301
general enlargement of
lymph glands due to 471
due to tur 917
Boiler-makers, deafness in
noises in head in 504
vertigo in 504
Boiling in removing albu-
min 20
test for albuminuria 524
Bence-Jones' albumose 21

**Bolting food, sense of full-
ness from** 307
**Bombs, hexa-nitro-di-
phenylamine in** 917
Bone, abscess of (see Abscess)
acute necrosis of, rheu-
matic fever simulated by 423
affections, X rays in
diagnosing 818-823
carcinoma of (see Car-
cinoma)
caries of (see Caries)
chloroma of 51, 257, 304
in dermoid cyst 444
destroyed in xero-
derma pigmentosum 88
dissect, talipes from 144, 147
exhumation of, in osteo-
arthritis 430
egg-shell cracking of 188
epithelioma invading
823, 895
erosion of, by aneurysm 842
epithelioma 896
sarcoma (Fig. 642) 823
syphilis 892
expanded by myeloid
sarcoma (Fig. 649) 822
fibroma of 821
fracture of, callus after 817
gumma of 819
hydatid cyst in 823
hypernephroma in 823
injury of, arrested
growth from 147
overgrowth from 147
Innocent tumours of 820
jaw, myeloma affecting 822
lacrimal, necrosis of 273
lipoma of 821
malar, overgrown in
acromegaly 293
mandibular, overgrown
in acromegaly 293
narrow affections, albu-
minose and 22
eosinophilia from 271
not red in aplastic
anæmia 31
red in pernicious
anæmia 31
necrosis of (see Necrosis)
neoplasm of, muscular
atrophy from 79
secondary to breast 306
pelvis 306
in pleura 132
to stomach 306
thyroid gland 306, 876
X rays in diagnosing 306
node on, after injury 817
osteosarcoma of 188, 190
overgrowth of, from
injury 147
pain in (see Pain)
piece of, in œsophagus 240
trachea, gangrene of
lung from 323
rarefaction of, in rheu-
matoid arthritis 431
rider's 845
rodent ulcer destroying 225, 892
sarcoma of (see Sarcoma)
sinus of, anæmia from
infected 47
spontaneous fracture of
(see Fracture, Spon-
taneous)
stapes, vertigo due to
pressure on 912
SWELLING ON 817
and see Swelling on
a Bone
syphilis of (see Syphilis)
tender (see Tenderness)
thickening of, from
periostitis 818
tuberculosis of (see Tu-
berculosis)
tumour of, pain in leg
from 539
Bone-conduction test of
hearing 206
**Bones, bending of, in mol-
lities ossium** (Fig. 261) 305
osteitis deformans 819
osteogenesis imper-
fecta 233

Bones, bending of, contd.
in rickets 305
brittle (see Fragilitas
Ossium)
brown, in hydroa æsti-
vale 271
porphyria 904
deformed in rickets 458
enlarged in acromegaly
142, 255, 656
ends of, in achondro-
plasia 233
in rickets 233
in leontiasis ossea 255
pulmonary osteo-
arthropathy 142, 436
nodules on, in yaws 501
Paget's disease of 255
pain in (see Pain)
polyostitis affecting 295
premature ossification
of, in infantilism 234
in rickets 182
sett in rickets 194
osteogenesis imper-
fecta 233
osteomalacia 233
tenderness in (see Ten-
derness)
thickened in osteitis
deformans 194, 819
thin in mollities ossium
(Fig. 261) 305
transparent-ended, in
arthritis 428
(and see under various
Bones)
Bookmakers, hoarseness in 387
Boot polish, methæmoglobinæmia from 202
oil of mirbane in 202
toe, worn, in peripheral
neuritis 75
spastic paralysis 607
Boots, blisters from 123
brown, blue-black facies
from 202
ill-timed, limping from 456
Morton's neuralgia from 540
tight, hyperextension of
toes from 146
pes cavus from 146
toes deformed by 146
whitlow from 497
Borage, dermatitis due to 915
BORBORYGMI 107
absent in general peri-
tonitis 107, 485, 734
asphyxia causing 107
bacteriology of stools
in cases of 107
carbohydrates and 107
from carcinoma of colon 107
colic and 735
constipation with 107
cyanosis and 107
diarrhœa with 107
from dysentery 107
fermentation 107
flatulence with 107
functional 107
in heart failure 107
hunger causing 107
at ileocaecal valve 107
from intestinal band 107
colic 525
obstruction and 168, 485
in nervous people 107
sigmoidoscope in cases
of 107
stethoscope in detect-
ing 107
from ulcerative colitis 107
X rays after bismuth
in cases of 107
Bordet-Gengou reaction
in whooping-cough 250
Boric acid, erythema from 275
Boring epithelioma 836
pains in tabes dorsalis 753
Bothriocephalus dispar,
anæmia from 44
latus, albuminuria from 16
anæmia from 515, 634, 635
cachexia from 128
eosinophilia from 272
from fresh-water fish 633
head of (Fig. 491) 633
œdema of legs from
515, 517

Calculus, renal, contd.

operation in diagnosis 56
 - ing 56
 - oxaluria and 353, 524
 - pain in back from 554
 - hypochondrium 553, 554
 - over kidney from 56
 - in loin from 56, 351
 - testis from 351, 589
 - thigh from 351
 - along ureter from 56
 - passage of 56
 - phlebolith simulating 440
 - pricking pain from 350
 - pyelitis from 718, 719
 - pyelography and 446
 - pyelonephritis from 719
 - pyonephrosis from 351, 450, 718, 719
 - pyrexia from 150
 - pyuria from 56, 449, 351, 716, 719
 - renal abscess from 351
 - colic from 351
 - tuberculous simulating Fig. 287 352, 719
 - rigor from 150, 717, 719
 - sex incidence of 55
 - skiagrams of Fig. 354, 355, 440, Fig. 436, 441
 - spleen simulated by 412
 - tenderness of kidney with 554
 - undue pulsation of abdominal aorta simulating 662
 - ureteral catheterization in diagnosing 554
 - urine acid and 901, 902
 - urine normal with 719
 - X rays in diagnosing 19, 56, 351, 353, 554, 694, 718, 719
salivary, account of 590, 848
 - pain in tongue from 590
 - ptyalism from 601
 - secretion of Fig. 432 848
 - swelling of face from 590
 - tongue swollen from 852
 - X rays in diagnosing 590
 - sublingual tongue swollen from 852
 - urine, X rays and 440
 - ureteral, abscess from 491
account of 353, 559, 577, 719
 - anuria from 55
 - appendical concretions simulating 442, 443
 - appendicitis simulated by 353, 559, 719, 724
 - backache from 574, 720
 - bilateral 578
 - bougie in diagnosing 578
 - calcined gland simulating 353, 442, 443, 559
 - colic from 147, 559
 - cystoscope in diagnosing 56, 353, 559, 578, 720
 - felt per rectum 56, 578, 720, 729
 - vaginam 56, 720
 - fistula from 494
 - frequency of micturition from 577, 719
general account of 56
 - hæmaturia from 348, 353, 559, 577, 720
 - hydronephrosis from 719
 - impacted 351
 - intestinal contents simulating 442
 - kidney atrophy from 719
 - pelvis dilated from 577
 - opaque bougie in diagnosing 353
 - ovarian pain simulated by 719
 - pain over 56
 - at external abdominal ring from 577
 - along iliac crest from 577
 - in iliac fossa from 555, 557, 559
 - kidney from 577
 - penis from 494, 576, 577, 719

Calculus, ureteral, contd.

- pain in testis from 589
 - ureter from 56, 719
 - urethra from 494
 - without pain 559
phlebolith simulating 442, 443, 559
 - and phleboliths, skiagram of Fig. 356 444
 - psos abscess simulating 565
 - pyonephrosis from 719
 - pyuria from 577, 716, 720
 - renal colic preceding 719
 - rheumatoid arthritis of spine simulating 565
 - rigidity in right iliac fossa from 559
 - sites of impaction of 719
 - skiagrams of Fig. 360, 361, 442, (Fig. 362) 443, (Fig. 447) 558
 - in diagnosing 56, 577
 - spinal caries simulating 565
 - spondylitis deformans simulating 565
 - tuberculous bladder simulated by 577, 719
 - ureteral catheter in diagnosing 559
 - ureteritis simulating 559
 - vesical calculus simulated by 577, 719
 - X rays in diagnosing 353, 442, 559, 578, 720
urethral, account of 493
 - aching in perineum from 579
 - behind stricture 444, 575, 766
 - blood per urethram due to 493
 - blood-stained discharge due to 230
 - bougie in diagnosing 492
 - in children 56
 - discharge due to 227, 240
 - endoscope in diagnosing 230, 356, 578
 - epididymitis from 850
 - epididymo-orchitis from 584
 - felt by finger 575
 - hæmaturia from 348, 356
 - impaction of 574
 - increased frequency of micturition from 491
 - in males 556
 - micturition stopped by 230, 493, 575
 - pain in penis from 230, 356, 493, 574
 - priapism due to 656
 - retention of urine from 356, 493
 - skiagram of Fig. 368 445
 - stranguary due to 797
 - sudden stoppage of urine by 230
 - tumour of urethra due to 230
 - urethritis from 850
 - X rays and 444
 - uric acid 900
 - in bladder (Fig. 292) 354
 - not opaque to X rays 440
vesical, account of 355, 576, 721
 - aching in perineum from 579
 - age incidence of 576
 - behind enlarged prostate 721
 - blood from penis due to 576, 721
 - colic due to 148
 - convulsion from 181
 - crystals in urine with 721
 - cystitis from 355, 490, 576, 699, 721
 - cystoscope in diagnosing 355, 491, 494, 576, 721, 874
 - in diverticulum 721
 - exercise and 490
 - felt per rectum 728

Calculus, vesical, contd.

- frequency of micturition from 355, 490, 576, 719, 721
 - hæmaturia from 348, 355, 576, 721, 874
 - irritability of bladder from 721
 - jolting and 490
 - micturition inter-rupted by 355, 491, 576
 - nocturnal micturition with 355
 - pain after micturition from 493
 - during micturition due to 576
 - in penis due to 574, 576, 719, 721
 - priapism due to 656
 - pricking pain in penis from 355, 721
 - pyuria from 355, 576, 716, 721
 - renal colic and 355
 - sex incidence of 355
 - sound in diagnosing 355, 576, 874
 - not detecting 721
 - stranguary due to 797
 - tenesmus from 873, 874
 - ureteral calculus simulating 577, 719
 - X rays in diagnosing 353, 442, 721
 - xanthan, X rays and 915
 - Calendula, dermatitis from 410
 - Call, analgesia in, in tabs dorsals 753
 - bruising of, limping from 456
 - Jacquet's erythema of muscle, see Muscles
 - nodules in, in Bazin's disease 502
 - pain in, from prostatitis 513
 - paravitis of 610
 - seborrhoeic dermatitis affecting 498
 - wasted, in Tooth's peroneal atrophy Fig. 82, 79
 - Callus, auditory nerve involved in 208
 - deafness from 208
 - disappearance of 817
 - after fracture 817, 834
 - intercostal pain from 531
 - involving nerve, muscle atrophy from 82
 - R.D. from 82
 - on law 834
 - muscle atrophy from 80
 - muscular 179
 - musculo-spiral nerve paralysis from 84, 615
 - R.D. from 80
 - of spine, alocheiria from 22
 - cord compressed by 22
 - wrist-drop from 84
 - Calmette's reaction in Addison's disease 45
 - tuberculous peritonitis 777
 - Calomel, biliousness and 566
 - blood per anum from 96, 102, 103
 - colic from 148, 525
 - colitis from 103
 - flatulence and 566
 - indigestion and 566
 - mucus in stools from 103
 - polyuria after 653
 - tenesmus due to 873
 - ulcerative colitis from 100
Cambridge, fat estimation method of 290, 300
CAMBRIDGE'S PANCREATIC REACTION 128
 - carcinoma and 129
 - with carcinoma of pancreas 67, 776
 - in pancreatitis 316, 811
 - retroperitoneal cyst and 811
 - technique of 129
 - Camphor, coma from 154
 - convulsions from 181
 - delirium from 212
 - eosinophilia from 271
 - Fehling's solution reduced after 327

Camphor, contd.

- priapism from 657
 - Canada, tick paralysis in 625
 - Canal, inguinal, testis in - of Nuck, hydrocele of (see Hydrocele)
 - semicircular (see Semicircular Canals)
 - Canary Islands, Malta fever from 691
 - Cancer (see Carcinoma, Sarcoma, etc.)
 - cells, atypical mitosis in 365
 - in pleuritic effusion 365
 - sputum 365
 - green (see Chloroma)
Cancrum oris, account of 95
 - bleeding gums from 93
 - from debilitation 95
 - gangrene from 317
 - illustrated (Fig. 95) 95
 - after measles 95
 - pyaemia from 661
 - Canine tooth, empyema of antrum of Highmore from 226
 - nasolabial tenderness from 549
 - Cannabis indica, delirium from 212
 - micropsia from 926
 - prapism from 657
 - yellow vision due to 926
 - Canter rhythm in anaemia - from dilated fatty heart 729
 - in pericarditis 265, 373, 533, 729, 863
 - pernicious anaemia 729
 - reduplicated heart sound simulating 729
 - Cantharides, acute nephritis from 11
 - albuminuria from 17
 - anuria from 55
 - blistering with 17
 - bullæ from 123, 124
 - dermatitis due to 915
 - erythema due to 275, 917
 - hæmaturia from 348
 - hysterical patient using 124
 - leucocytosis from 651
 - malingerer using 124
 - polyexanthema from 650, 651
 - priapism from 657
 - ptyalism from 661
 - stranguary due to 798
 - tenesmus due to 873
 - vesication due to 917
 - Cap, duodenal, deformed, in duodenal ulcer 554
 - Capillary bronchitis (see Bronchitis)
 - pulsation from aortic disease 263
 - reurgitation 259
 - Capasicam, bullæ from 124
 - dermatitis due to 915
 - erythema from 275, 917
 - fastigiatum, dermatitis due to 915
 - hysterical patient using 124
 - malingerer using 124
 - pain in tongue from 591
 - Capsule, internal (see Internal Capsule)
 - Capsules, suprarenal (see under Suprarenal)
 - Caput Medusæ in cirrhosis of liver 59, 910
 - Carbide of calcium, eczema from 917
 - ulcers of skin due to 917
 - used by acetylene workers 917
 - Carbohydrate fermentation, borborygmi from 107
 - starvation, acidosis from 3
 - Carbol-fuchsin, formula 788
 - Carbol-methylene blue in Ziehl-Neelsen staining 788
 - Carbollic acid (see Acid)
Carboluria, account of 906
 - Carbon bisulphide, dermatitis due to 917
 - fainting due to 297
 - hæmoglobinuria from 357
 - india-rubber solvent 84
 - neuritis from 80, 84
 - tinnitus due to 878

Carbon bisulphide, contd.

- tremor due to .. 881
- used by rubber workers .. 917
- vertigo due to .. 878
- dioxide, after-damp and .. 154
- coma from .. 154
- headache from .. 371
- in inflammation of stomach .. 307
- snow, bulla from .. 123
- in wells .. 154
- monoxide, coma from .. 154
- fainting due to .. 297
- gangrene from .. 317
- haemoglobinuria from .. 357
- headache from .. 371
- poisoning from brazier .. 155
- carboxyhaemoglobin in .. 155
- cherry-red colour in .. 551
- circulation disorders after .. 322
- from coal-gas .. 155
- coma from .. 155
- gangrene after .. 322
- from lime-kiln .. 155
- Raynaud's disease simulated after .. 322
- from slow combustion stove .. 155
- tetrachloride in ankylostomiasis .. 103, 635
- Carbonate of calcium, effervescence due to .. 5
- opalescence in urine from .. 5
- sodium in Benedict's solution .. 327
- dead fingers and .. 204
- Carboxyhaemoglobin, ammonium sulphide and .. 155
- in carbon monoxide poisoning .. 155
- spectrum of .. (Fig. 19) 133
- Carbuncle, cellulitis distinguished from .. 682
- in diabetes .. 334, 335
- on face .. 824
- cavernous sinus thrombosis from .. 284
- furuncle distinguished from .. 682
- malignant pustule simulated by .. 682
- simulating .. 683
- pain in face from .. 311
- in perineum, aching in perineum from .. 579
- pyrexia due to .. 311, 687
- stiff neck from .. 795
- swelling of face from .. 311
- tinca sycosis simulating .. 311
- Carcinoma, abdominal, rectal shelf in diagnosing .. 729
- albumosuria with .. 21
- of ampulla of Vater, colic from .. 147, 148
- anaemia from .. 27, 515
- of antrum of Highmore .. 226
- ascending colon, blood per anum from .. 96
- basal-celled (see Rodent Ulcer)
- of bile-duct, bile pigment in urine from .. 130
- carcinoma of duodenum simulating .. 811
- colic from .. 147
- jaundice due to .. 407, 811
- bladder, aching in perineum from .. 579
- age incidence of .. 277, 722
- anuria from .. 55, 56
- at base .. 577, 722
- blood per anum from .. 96
- drops from penis due to .. 721
- cystitis due to .. 490, 699
- cystoscope in diagnosing .. 56, 353, 576, 577, 722
- felt per rectum .. 355
- fragment in urine .. 577, 728
- frequency of micturition from .. 349
- micturition from .. 56, 353, 355, 490, 576, 577, 722

Carcinoma of bladder, contd.

- hamaturia due to .. 56, 348, 349, 353, 355, 576, 577, 721, 722
- hydronephrosis from .. 56
- illustrated (Figs. 288, 289) .. 354
- infiltrating type .. 56
- in men .. 722
- multiple .. 722
- obstructing both ureters .. 55, 56
- opening into rectum .. 296
- pain due to .. 490, 722
- after micturition due to .. 493, 576
- on micturition from .. 56
- in penis from .. 355, 493, 574, 576, 577, 722
- perineum from .. 494
- urethra from .. 494
- vulva from .. 494
- papilloma simulating .. 722
- pelvic glands enlarged from .. 550, 577, 721, 722
- pricking in penis from .. 721
- pyelitis from .. 718
- pyonephrosis from .. 718
- pyuria from .. 56, 355, 576, 716, 722
- rectal examination in diagnosing .. 56, 350, 353, 576, 721
- rectum invaded by .. 96
- renal aching from .. 722
- pain from .. 577
- retention of urine from .. 353
- strangury due to .. 747
- symptoms of .. 56
- ulceration of .. 722
- ureter obstructed by .. 577, 722
- vaginal examination in diagnosing .. 56, 350
- vesical crises simulating .. 798
- villous .. 349, 577, 722
- fragment in urine .. 349
- haematuria from .. 348, 353
- pyuria due to .. 716
- bone .. 190, 823
- albumosuria with .. 21
- Benedict's albumosuria and .. 22
- sarcoma simulated by (Fig. 136) .. 190
- secondary to thyroid .. 876
- skiagraph of (Fig. 26) .. 21
- spontaneous fracture due to .. 304
- brain, hemianopsia from .. 379
- breast, account of .. 839
- age incidence of .. 839
- amputation of breast for (Fig. 405) .. 512
- atrophic .. 839
- axillary glands enlarged from .. 475, 838, 839
- blood from nipple due to .. 227
- breast smaller with .. 839
- carcinoma en cuirasse from .. 886
- cyst simulating .. 838
- from cystic disease .. 838
- fear of .. 529
- fibro-adenoma simulating .. 839
- growth in spine after .. 583
- hardness of .. 839
- lenticular cancer of .. 886
- skin from .. 886
- little anaemia with .. 44
- in married women .. 839
- mastitis simulating .. 839
- microscope in diagnosing .. 838, 840
- nipple retracted with .. 839
- oedema of arm after (Fig. 405) .. 512
- pain with .. 529
- rheumatism of shoulder simulated by .. 863
- secondary in axilla .. 322
- bone (Fig. 26) .. 21, 823

Carcinoma of breast, contd.

- secondary in frontal bone .. 256
- lung .. 365
- round subclavian vein .. 322
- in scalp .. 866
- spine (Fig. 178) .. 102, 193, 610, 869
- sex incidence of .. 879
- skin puckering from .. 838, 839
- ulcerated over .. 839
- supraclavicular gland enlarged from .. 277, 475
- tubercle simulating .. 838
- bronchus, emphysema from .. 131
- secondary in lung .. 365
- bundle of His .. 109
- cachexia from .. 27, 218, 515
- of caecum, abdominal tumour due to .. 828
- account of .. 563
- actinomycosis simulating .. 562
- appendicitis simulated by .. 814
- bismuth and X rays in diagnosing .. 563
- bladder invaded by .. 724
- blood per anum from .. 96
- in stools from .. 828
- carcinoma of rectum simulating .. 563
- sigmoid simulating .. 563
- effects of adhesions simulating .. 563
- faces simulating .. 563
- with few symptoms .. 828
- hydatid cyst simulating .. 564
- impacted faeces with .. 814
- intestinal obstruction from .. 828
- intussusception simulating .. 829
- laparotomy in diagnosing .. 563, 828
- mucus in stools from .. 828
- opening into bladder .. 296, 716
- pain in iliac fossa from .. 558
- pyuria due to .. 716
- swelling in iliac fossa from .. 563, 814
- tuberculous caecum simulating .. 562
- tumour in iliac fossa from .. 168
- volvulus simulating .. 563
- wasting with .. 828
- cauda equina .. 81
- in cervical glands .. 241
- of cervix uteri, bleeding on examination .. 251
- foetid discharge from .. 232
- check .. 225
- colloid, of peritoneum .. 65
- of colon, abdominal distention from .. 413
- tumour due to .. 167, 439, 555, 723
- abscess round .. 439, 555, 723
- Addison's disease .. 642
- simulating .. 642
- albuminuria from .. 439
- albumosuria with .. 21
- anaemia from .. 98, 163
- anaesthetic in diagnosing .. 162
- annular .. 776
- anorexia from .. 163
- appendicitis simulating .. 812
- ascending, blood per anum from .. 96
- ascites from .. 67, 412
- barium enema showing (Fig. 143) .. 163, (Fig. 144) 164
- bismuth and X rays in diagnosing .. 594, 809
- blood per anum from .. 96, 356, 413
- in stools from .. 163, 439, 495, 815

Carcinoma of colon, contd.

- borborygmi from .. 107
- cachexia from .. 815
- carcinoma of stomach simulated by .. 809
- colic from .. 148, 162, 163
- colitis simulating .. 700, 872
- constipation from .. 98, 162, 413
- descending (see Carcinoma of Descending Colon)
- diarrhoea due to .. 98, 162, 216, 872
- diverticulitis simulating .. 167, 168, 356, 557, 697, 827
- gastric ulcer simulated by (Fig. 140) .. 161
- hiccup from .. 387
- in hypochondrium .. 809
- induratum from .. 395
- inguinal glands enlarged from .. 831
- intestinal obstruction from .. 163, 167, 168, 555, 745, 776, 815
- sand from .. 742
- intussusception from .. 412, 413
- jaundice from .. 412, 413
- kidney enlargement simulated by .. 447
- simulating .. 439
- laparotomy in diagnosing .. 56, 827
- liver enlargement simulated by .. 413, 462
- loss of strength from .. 163
- weight from .. 98, 163
- malignant peritonitis from .. 65
- mesenteric glands enlarged from .. 476
- movable kidney simulated by .. 113
- mucus per rectum from .. 356
- in stools from .. 97, 439, 495
- obstruction by .. 439
- occult blood in stools from .. 163
- often no tumour with .. 162
- opening into bladder .. 716
- pain with .. 98
- in hypochondrium from .. 553, 555
- spine from .. 871
- at umbilicus from .. 593
- palpable peristalsis with .. 163
- pelvic (see Carcinoma of Pelvic Colon)
- perforated, general peritonitis from .. 149
- simulating colic .. 149
- urgent laparotomy for .. 149
- pericolic simulating .. 812
- perinephric abscess from .. 438
- peristalsis powerful above .. 107
- peritonitis due to .. 735
- perityphlitic simulating .. 812
- pigmentation in mouth from .. 642
- pneumoperitoneum from .. 800
- portal glands enlarged from .. 412, 476
- vein obstructed by .. 67
- pyuria due to .. 716
- rectal examination for .. 413
- renal pelvis opened by .. 647
- retroperitoneal glands enlarged from .. 476
- secondary in liver .. 315
- lung .. 365
- portal glands .. 423
- sigmoid (see Carcinoma of Sigmoid)
- sigmoidoscope in diagnosing .. 104, 163, 823, 872
- simulated by polyp .. 98
- skiagrams (Fig. 143) .. 163, (Fig. 144) 164
- spasm of bowel with .. 163

Carcinoma of colon, contd.

- - spastic constipation simulating ..	161
- - spleen simulated by ..	775
- - spurious diarrhoea with ..	98
- - subdiaphragmatic abscess from ..	649
- - supraclavicular gland enlarged in ..	(Fig. 77) 66, 475
- - tenderness of spine from ..	871
- - tenesmus due to ..	815, 872
- - transverse blood per anum from ..	96
- - skiagram showing ..	(Fig. 140) 161
- - tuberculous caecum simulating ..	162
- - colon simulating ..	812
- - peritonitis simulating ..	809
- - tumour with ..	162
- - tympanites from ..	413
- - umbilical tumour from ..	593
- - vesico-colic fistula from ..	162
- - visible peristalsis with ..	163
- - vomiting from ..	168, 413
- - X rays in diagnosing ..	104, 163, (Fig. 144) 164, 413, 439, (Fig. 64) 827
- - of cystic duct, colic from ..	147
- - descending colon, fissure and X rays in diagnosing ..	98
- - blood per anum from ..	98, 97, 98
- - constipation from ..	98
- - dysenteritis simulating ..	98
- - laxative per rectum from ..	98
- - operation in diagnosing ..	98
- - pain in left iliac fossa from ..	98
- - tumour in left iliac fossa from ..	98
- - diazo reaction from ..	218
- - duct of breast ..	839
- - blood from nipple due to ..	227
- - of duodenum, anaemia due to ..	811
- - ascites from ..	67
- - blood per anum from carcinoma of bile-duct simulated by ..	811
- - pancreas simulated by ..	811
- - stomach simulated by ..	811
- - colic from ..	147, 148
- - dilatation of stomach from ..	218, 811
- - duodenal ulcer simulating ..	412
- - emaciation from ..	412
- - epigastric tumour from ..	811
- - gall-bladder distended with ..	811
- - haematemesis from ..	336, 811
- - jaundice with ..	412, 811
- - portal vein obstructed by ..	67
- - rarity of ..	343, 811
- - secondary in liver ..	315
- - portal fissure ..	811
- - suppurative cholangitis from ..	811
- - supraclavicular glands enlarged from ..	475
- - tumour with ..	343
- - visible peristalsis from ..	811
- - vomiting due to ..	811
- - wasting due to ..	811
- - en cuirasse ..	886, (Fig. 664) 887
- - eosinophilia from ..	271
- - of Fallopian tube, pelvic swelling due to ..	840
- - fatty heart from ..	264
- - of fauces ..	762
- - sore throat due to ..	757
- - femur, skiagram (Fig. 26) 21	

Carcinoma, contd.

- - of forehead ..	225
- - gall-bladder, biliary colic and ..	314
- - cholangitis with ..	408
- - cholecystitis from ..	696
- - colic from ..	147
- - dilatation of stomach with ..	218
- - emphyema of gall-bladder from ..	696
- - gall stones and ..	315, 315
- - jaundice in ..	314
- - laparotomy ..	315
- - gnosis ..	315
- - pain in hypochondrium from ..	553
- - between shoulders from ..	566
- - pyloric stenosis from ..	218
- - pyrexia and ..	314
- - secondary in left supraclavicular gland ..	315
- - liver ..	315
- - suppurative cholangitis from ..	415
- - supraclavicular glands enlarged from ..	475
- - tenderness of gall-bladder from ..	553
- - general wasting from ..	78
- - gummia simulating ..	765
- - of hepatic flexure, blood per anum from ..	96
- - histology in diagnosing ..	226
- - of ilium, skiagram of ..	(Fig. 26) 21
- - in inguinal glands ..	727, 830
- - of ischaemia, skiagram of ..	(Fig. 26) 21
- - jaw ..	225
- - kidney ..	449
- - Cheyne-Stokes breathing from ..	139
- - colic from ..	147
- - haematuria from ..	348
- - kidney enlarged from ..	448
- - liver displaced by ..	438
- - pyuria due to ..	716
- - supraclavicular gland enlarged from ..	475
- - uremia from ..	139
- - larynx, dysphagia from ..	245
- - foul breath from ..	115
- - laryngoscope in diagnosing ..	762
- - sore throat due to ..	758
- - in left supraclavicular glands, from carcinoma of colon ..	776
- - leucocytosis in ..	453
- - of lip ..	225, (Fig. 378) 460
- - liver, account of ..	467
- - age incidence of ..	467
- - albuminuria from ..	21
- - angina simulating ..	469
- - ascites with ..	62, 63, 66, 68, 315 412, 468
- - without ascites ..	414
- - bile-duct obstruction simulating ..	468
- - Cammidge's reaction and ..	68
- - from carcinoma colli ..	776
- - catarrhal jaundice distinguished from ..	411
- - cirrhosis with ..	466
- - simulated by ..	466
- - simulating ..	468
- - conus with ..	468
- - diabetes simulating ..	461
- - dragging in hypochondrium from ..	468
- - fluctuation in ..	468
- - gall-bladder enlargement simulated by ..	315
- - gall-stone simulating ..	468
- - gummia simulating ..	417
- - haemorrhage into ..	465, 468
- - hepatoptosis simulating ..	461
- - hicough from ..	387
- - hyatid disease distinguished from ..	468, 470
- - jaundice from ..	66, 68, 315, 408, 412, 414, 468
- - without jaundice ..	414
- - large portal glands with ..	468
- - leucocytosis in ..	468

Carcinoma of liver, contd.

- - liver enlarged from ..	63, 68, 315, 408, 412, 414
- - hard from ..	68, 315, 414
- - nodular from ..	315, 414
- - tender with ..	68
- - nodules of ..	414
- - olive-green colour from ..	414
- - pain in epigastrium from ..	538
- - hypochondrium ..	553
- - liver from ..	468
- - right arm from ..	468
- - shoulder from ..	468
- - between shoulders from ..	566
- - in spine from ..	871
- - perinephritis over ..	468
- - portal gland involved with ..	414
- - primary ..	468
- - very rare ..	414
- - pulse feeble with ..	468
- - pyrexia from ..	(Fig. 323) 408, 468, 469, 688, 706, 715
- - rectal examination in ..	68
- - retinal examination in ..	68
- - rub over ..	468
- - secondary ..	467
- - to colon ..	315
- - duodenum ..	315
- - gall bladder ..	315
- - india-rubber bottle ..	138
- - pancreas ..	68, 315
- - rectum ..	315
- - stomach ..	241, 315, 397, 777
- - sense of fullness from ..	468
- - skin, dry and shrivelled with ..	468
- - Skodak resonance due to ..	755
- - splenitis simulating ..	467
- - tenderness of spine from ..	871
- - uniloculated nodules in ..	68, 315, 414, 465, 468
- - usually secondary ..	414
- - wasting from ..	468, 469
- - loss of weight due to ..	932
- - in lumbar glands ..	727
- - of lung, bronchitis simulated by ..	700
- - cervical sympathetic irritated by ..	675
- - haemoptysis from ..	361, 365
- - pupil dilated with ..	675
- - red-currant jelly sputum from ..	365
- - secondary to breast ..	365
- - bronchus ..	365
- - colon ..	365
- - oesophagus ..	365
- - pancreas ..	365
- - stomach ..	365
- - shortness of breath from ..	114
- - skiagram of (Fig. 105) ..	114
- - unsuspected ..	114
- - X rays in diagnosing ..	114
- - mammae (see Carcinoma of Breast) ..

- - retroperitoneal gland enlarged from ..	476
- - strangury due to ..	797
- - supraclavicular glands enlarged from ..	475
- - tumour of cauda equina simulated by ..	81
- - ureter obstructed by ..	57
- - palate ..	762
- - sore throat due to ..	757
- - pancreas, account of ..	67
- - anaemia with ..	810
- - aortic pulsation through ..	67
- - ascites from ..	67, 412
- - Cammidge's reaction with ..	67, 68, 776
- - not always positive with ..	129
- - carcinoma of duodenum simulated ..	811
- - colic with ..	147, 316
- - without diabetes ..	335
- - dilatation of stomach from ..	218
- - epigastric tumour due to ..	810
- - fat in stools with ..	67, 130, 300
- - gall-bladder enlarged with ..	67, 316, 408, 554
- - palpable with ..	412, 554
- - gall-stones simulated by ..	316
- - glycosuria with ..	67
- - dilatation of stomach in diagnosing ..	67
- - iodine co-efficient of urine in ..	129
- - jaundice from ..	67, 316, 412, 554, 776, 810, 811
- - laparotomy in diagnosing ..	538
- - malignant peritonitis from ..	65
- - muscle fibres in faeces with ..	130
- - occult blood in stools from ..	130
- - pain in epigastrium from ..	538
- - hypochondrium ..	554
- - shoulder from ..	580
- - portal glands enlarged from ..	412
- - vein obstructed by ..	67
- - prognosis in ..	810
- - pyloric stenosis from ..	218
- - secondary in liver ..	68, 315, 365
- - lung ..	775
- - spleen simulated by ..	775
- - stercobilin and ..	130
- - stools acid with ..	130
- - supraclavicular glands enlarged from ..	475
- - tumour from ..	554
- - wasting with ..	810
- - pancreatitis from ..	128
- - of parotid gland ..	848
- - pelvic colon, barium enema in detecting ..	(Fig. 144) 164

Carcinoma pelvic colon, contd.

bladder invaded by	148, 356, 724
colic from	148
dyschezia from	166
explosive diarrhoea from	394
faeces per vaginam from	356
hamaturia from	356
incontinence of faeces with	394
opening into bladder	716
pyuria due to	716
sigmoidoscope in diagnosing	163
urine per vaginam from	356
X rays in detecting (Fig. 144)	164
in pelvic glands	727
of pelvis, hydronephrosis from	353
penis, account of	765
impotence due to	393
leucocytosis from	454
leukemia simulated by	454
myelocytes from	454
perineum, aching in	579
incontinence of faeces from	394
peritoneum, primary	65
pharynx, earache from	253
sore throat due to	757
portal glands (see Lymphatic Glands. Portal)	
prostate, aching in perineum from	579
calculi simulating	575
felt per rectum	728
hamaturia from	348, 355
increased frequency of micturition from	490
pain in penis from	574, 575, 576
pelvic glands enlarged	350
rectal examination in diagnosing	350, 575
secondary in scalp	866
spine	869
strangury due to	797
urine difficulties from	493
pylorus, bismuth and X rays in diagnosing	594
calcified cyst simulating	802
dilatation of stomach from	218
gastrectasis from	801
HCl in stomach in	802
laparotomy in diagnosing	802
microscope in diagnosing	802
simple stenosis simulating	802
skiagram of (Fig. 277)	340
test meal in diagnosing	594
from ulcer	802
umbilical pain from	593
tumour from	593
in young subjects	802
rectum, account of	98, 727
aching in rectum from	727
adenoma, simulating	874
age incidence of	556, 727
anemia with	98
ascites from	412
bearing-down pain from	529
bladder invaded by	148, 356, 491, 724
bleeding from	727
blood per anum from	96, 97, 556
in stools from	166
Bright's disease simulated by	9
carcinoma of caecum simulated by	563
colic from	148
constipation due to	98, 166, 556, 727
diarrhoea due to	98, 727
dyschezia from	166

Carcinoma of rectum, contd.

emaciation from	727
explosive diarrhoea from	394, 727
faeces per vaginam from	356
fixed to coccyx	727
sacrum	727
foot-drop from	146
frequent desire to defaecate from	556
hamaturia from	348, 356
haemorrhage from	727
bowel due to	727
impacted faeces simulating	557, 873
incontinence of faeces from	304
increased frequency of micturition from	491
inferior vena cava obstruction from	9
jaundice from	409, 412
loss of strength from	166
weight from	98, 166, 557
lumbosacral plexus affected by	81
malignant peritonitis from	65
microscope in diagnosing	727
mucus per rectum from	556, 727
in stools from	97, 166
opening into bladder	296, 716
pain with	98
in bottom of back from	727
along colon from	556
in iliac fossa from	555, 556
penis from	576, 578
rectum from	727
spine from	871
periproctal abscess from	874
simulating	874
piles from	726
simulated by	97
polypi simulating	98, 727, 874
portal glands enlarged from	412
proctoscope in diagnosing	166
pyuria due to	716
rectal examination in diagnosing	98, 166, 168, 557, 727, 873
secondary in inguinal glands	727
liver	315, 727
lumbar glands	727
pelvic glands	727
sigmoidoscope in diagnosing	163, 166
simple ulcer simulating	727
site of	727
spurious diarrhoea with	98
strangury due to	797
stricture due to	727
supraclavicular glands enlarged from	9, 475
syphilitic proctitis simulating	100
tabes dorsalis simulating	874
tenderness of spine from	871
tenesmus due to	873
tuberculous ulceration simulating	101
tumour of cauda equina simulated by	81
ulceration of	727
urine per vaginam from	356
venereal ulceration distinguished from	98
vesiculitis simulating	700
wasting with	874
X rays in diagnosing	557
rib, tenderness of chest from	862
sacrum, skiagram (Fig. 26)	21
sciatic nerve, rectal examination in diagnosing	729

Carcinoma, contd.

of sigmoid colon, account of	826
age incidence of	556
barium enema in diagnosing (Fig. 644)	827
bismuth enema in diagnosing	557
blood per anum from	96, 97, 556
carcinoma of caecum simulated by	563
colloid	826
constipation from	556
explosive diarrhoea from	394
frequent desire to defaecate from	556
impacted faeces simulating	557
incontinence of faeces with	394
intestinal obstruction from	815, 826
invading bladder	724
loss of weight from	557
mucus per rectum from	556
opening into bladder	296, 716
pain along colon from	556
in iliac fossa from	555, 556, 558
pyuria due to	716
ring type	826
scirrhus	826
sigmoidoscope in diagnosing	98, 557
spastic constipation simulating	557
supraclavicular gland enlarged at (Fig. 77)	46
swelling in left iliac fossa due to	826
X rays in diagnosing	557
skin	886
skull, secondary to thyroid	876
spine, abdominal pain from	151
from breast	197, 869
colic simulated by	151
hysteria simulated by	531
intercostal pain from (Fig. 178)	192, 531
kyphosis, from	193
malnourishing simulated by	531
pain in back from (Fig. 158)	192
between shoulders from	566
in testis from	589
from prostate	869
secondary to breast (Fig. 158)	192
thyroid	876
skiagram of (Fig. 157)	192
from testis	869
thyroid	869
splenic flexure, account of	776
annular	776
blood per anum from	96, 776
constipation due to	776
diarrhoea due to	776
hypochondriac tumour from	776
intestinal obstruction from	776
mucus in stools from	776
physical signs of	776
secondary in liver	776
skiagram (Fig. 143)	163
spleen simulated by	775
supraclavicular gland affected from	776
without tumour	776
spontaneous fracture due to	304
squamous-celled (see Epithelioma)	
of sternum, tenderness of chest from	862

Carcinoma, contd.

of stomach	97
abdominal tumour due to	340
acanthosis nigricans with	295, 646
account of	340, 777
acetonuria from	3
achlorhydria in (Fig. 286)	344
age incidence of	340, 397
albumosuria with	21
anemia with	42, 44, 340, 342, 397, 777, 811
anaesthetic in diagnosing	342
aneurysm simulated by	(Fig. 650) 846
anorexia from	58, 340, 397
nervosa simulated by	572
ascites from	67, 412
bismuth and X rays in diagnosing (Figs. 277, 278)	340, 777, 930
blood per anum from	97
in gastric contents with	397
vomit from	777
of body	397
cachexia from	340
carcinoma of colon simulating	809
duodenum simulating	811
cardiac end, skiagram of (Fig. 278)	340
orifice	397
cirrhosis of liver simulating	344
coffee-ground vomit in	340
colic from	148
colour index low with	342, 307
diagnosis of	397
diffuse	311
india-rubber-bottle stomach with	138
multiple serous effusions from	138
tenderness in glands	138
liver	138
sense of fullness with	306
skiagram (Fig. 26)	342
no symptoms with	138, 306
dilatation of stomach with	218, 340, 342, 397, 811, 829
distaste for meat with	58, 393
dyspepsia simulated by	341, 933
dysphagia from	240, 241, 397
enlarged spleen distinguished from	776
epigastric tumour due to	342, 809
epithelioma of oesophagus simulated by	340
filling defects with	397
fractional test-meal in (Fig. 286)	344
fungating endocarditis simulating	27
gas under diaphragm from	647
gastric HCl absent with	44, 537, 930
ulcer simulated by	339
gastritis simulated by	341
gastroscopy in diagnosing	341
hamatemesis due to	336, 340, 811
heartburn from	376
hiccough from	387
history in	397
hour-glass contraction from (Fig. 280)	341
hydrochloric acid deficient in	341, 397, 777
hypothermia with	347
hysteria simulated by	572
india-rubber-bottle	341
indigestion from	397

Carcinoma of stomach, contd.

- jaundice from .. 412
 - lactic acid with .. 397
 - in vomit .. 397
 - in left hypochondrium .. 811
 - leucocytosis with 454, 777
 - leukaemia simulated by 454
 - liver enlargement .. 462
 - simulated by .. 340
 - loss of strength from .. 397, 933
 - malignant peritonitis from .. 65
 - malingering simulated by .. 572
 - melana from .. 97, 482
 - mesenteric glands enlarged from .. 476
 - myelocytes from .. 454
 - nausea with .. 340, 397
 - nodules in round ligament from .. 804
 - at umbilicus from .. 804
 - in urachus from .. 804
 - occult blood in stools with 44, 104, 163, 397
 - oesophagus infiltrated by .. 241
 - obstructed by .. 241
 - operation in diagnosing 342, 397, 933
 - Oppier-Boas bacillus with 397, 401, 930
 - pain with .. 397
 - in epigastrium from 340, 537
 - hypochondrium from .. 553
 - shoulder from .. 580
 - between shoulders from .. 566
 - in spine from .. 871
 - stomach from .. 777
 - pernicious anaemia simulated by 397
 - - simulating 27, 347
 - phanton tumour .. 808
 - simulating .. 777
 - physical signs of 777, 778
 - pigmentation of skin with .. 295
 - pneumothorax from 647
 - portal glands enlarged from 412, 476
 - vein obstructed by 67
 - pulsation in (Fig. 650) 846
 - pyloric stenosis due to .. 340, 930
 - at pylorus .. 397
 - pyrexia with 340, 347
 - retroperitoneal glands enlarged from .. 476
 - salivation from .. 662
 - sarcine with 777, 930
 - secondary in bone .. 306
 - - liver 241, 315, 347, 397, 777
 - lung .. 365
 - neck glands .. 241
 - supraclavicular gland .. 777
 - at umbilicus .. 397
 - sex incidence of .. 397
 - with simple ulcer (Fig. 274) 338
 - skiagrams of (Fig. 277) 340, (Fig. 279) 341
 - spleen simulated by .. 775, 811
 - starting in old ulcer .. 397
 - subdiaphragmatic abscess from 647, 649
 - supraclavicular glands enlarged with 397, 475
 - swelling in iliac fossa due to .. 829
 - tenderness of spine from .. 871
 - test meal in .. 44
 - tumour from .. 537
 - in epigastrium with 397
 - ulcer distinguished from .. 219
 - visible peristalsis from 811
 - vomiting from 340, 397, 537, 777, 811, 829, 928

Carcinoma of stomach, contd.

- wasting due to 811, 829
 - weighing machine in excluding .. 342
 - X rays in diagnosing 341, 342, 497, 537, 829
 - in supraclavicular gland 777
 - secondary to india-rubber bottle .. 138
 - stomach .. 138
 - of suprarenal capsule, ascites from .. 67
 - portal vein obstructed by .. 67
 - supraclavicular glands enlarged from .. 475
 - testis .. 586, 850
 - iliac glands enlarged from .. 587
 - lumbar glands enlarged from .. 587
 - mesenteric glands enlarged from .. 476
 - microscopical examination in diagnosing 769
 - portal glands enlarged from .. 476
 - retroperitoneal glands enlarged from .. 476
 - scrotal sore from 768, 769
 - scrotum involved in 767
 - secondary in scalp .. 866
 - spine .. 869
 - supraclavicular glands enlarged from .. 475
 - thyroid gland, age incidence of .. 876
 - cervical glands enlarged from .. 876
 - characters of .. 876
 - haemorrhage into cyst simulating 876
 - paralysis of vocal cord due to .. 876
 - secondary in bones .. 823, 876
 - frontal bone .. 256
 - scalp .. 866
 - skull .. 876
 - spine .. 869, 876
 - sex incidence of .. 876
 - ulceration of trachea from .. 876
 - tongue .. 896
 - dysphagia from .. 244
 - foul breath from .. 113
 - and see under Epithelioma
 - tonsil, earache from .. 253
 - foul breath from .. 113
 - gumma simulating .. 761
 - histology in diagnosing .. 761
 - sore throat due to .. 757
 - transverse colon, blood per anum from .. 96
 - pall-bladder enlarged by .. 316
 - skiagrams of (Fig. 140) 161, (Fig. 142) 163
 - at umbilicus, secondary to stomach .. 397
 - of urethra, blood-stained discharge due to .. 230
 - histology in diagnosing .. 230
 - inguinal glands enlarged from .. 230
 - painful micturition from .. 230
 - from stricture .. 230
 - tumour of urethra due to .. 230
 - uterus, anuria from 55, 56
 - backache from .. 574
 - bladder invaded by .. 56, 148, 356, 491, 724
 - opened by 296, 716
 - blood per anum from 96
 - body, fetid discharge due to .. 232
 - broad ligament invaded by .. 56
 - colic from .. 148
 - dyschezia from .. 166
 - endometritis simulating .. 700
 - erosion simulating .. 488

Carcinoma of uterus, contd.

- faeces per vaginam from .. 356
 - with fibroid .. 488
 - fibroid simulating .. 842
 - foul discharge due to .. 232, 489
 - haematuria from 348, 356
 - laceration from .. 387
 - leukorrhoea from .. 57
 - increased frequency of micturition from 491
 - lipiodol in diagnosing 940
 - lumbosacral plexus affected by .. 81
 - mesenteric glands enlarged from .. 476
 - metrorrhagia from .. 487, 488
 - metrostaxis from .. 489
 - microscope in diagnosing .. 488, 842
 - pain in inguinal region from .. 574
 - down legs from .. 574
 - in ovarian region from .. 574
 - spine from .. 871
 - pelvic swelling due to 840
 - polypus simulating 488
 - portal glands enlarged from .. 476
 - pyelitis from .. 718
 - pyometra from .. 489
 - pyonephrosis from .. 718
 - pyuria due to .. 716
 - rectum invaded by .. 96
 - opened by .. 296
 - retroperitoneal glands enlarged from .. 476
 - sterility due to .. 793
 - strangury due to .. 794
 - tenderness of spine from .. 871
 - tubercle simulating 488
 - tumour of cauda equina simulated by 81
 - both ureter obstructed by .. 55, 56
 - urine per vaginam from .. 356
 - vaginal examination in diagnosing .. 57
 - vulva .. 762
 - sore throat due to .. 757
 - vagina, aching in perineum from .. 579
 - bladder invaded by .. 356
 - faeces per vaginam from .. 356
 - haematuria from 340, 356
 - inguinal glands enlarged from .. 476
 - micturition difficult from .. 492
 - urine per vaginam from .. 356
 - ventriculi (see Carcinoma of Stomach)
 - of vertebra (see Carcinoma of Spine)
 - vulva, micturition difficult from .. 492
 - vulval swelling due to 853
 - (and see Epithelioma)

CARDIAC BRUITS

- crises in tabes dorsalis 597
 - dullness (see Heart Dullness)
 - failure (see Heart Failure)
 - impulse (see Heart Impulse)
 - infantism .. 236
 - pain (see Pain)
 - (and see Heart)
 - Cardio-respiratory bruit (see Bruit)
 - Cardiosclerosis, auricular fibrillation in .. 665
 - extrasystoles with .. 668
 - heart-block due to .. 668
 - mitral regurgitation from .. 118
 - paroxysmal tachycardia in .. 670
 - (and see Myocardial Affections)
 - Cardiospasm 243, 244, 535
 - (and see Achasia of Oesophagus)

Cardol, dermatitis due to

- Caries, cervical, account of 795
 - - in children .. 795
 - - curvature due to .. 795
 - - dysphagia from 244, 661
 - - dyspnoea from .. 246
 - - head held between hands in .. 795
 - - rigid with .. 528
 - - hoarseness from .. 388
 - - larynx displaced by 388
 - - pain in arm from .. 545
 - - neck from 528, 694, 795
 - - ptyalism from .. 661
 - - retropharyngeal abscess from .. 694
 - - rigidity of neck from 795
 - - skiagram of (Fig. 619) 795
 - - stance in .. 795
 - - stiff neck from 694, 795
 - - torticollis simulating 179
 - - X rays in diagnosing 528, 694
 - (and see Spinal Caries)
 - dental, abscess of antrum of Highmore from .. 567
 - - adenitis from .. 474
 - - bleeding gums from 93, 94
 - - cacosgeusia due to .. 860
 - - empyema of antrum of Highmore from 226
 - - foul breath from .. 112
 - - gastritis from .. 398
 - - haemoptysis simulated by .. 350
 - - loss of weight due to 933
 - - mercury and .. 94
 - - neuralgia from .. 372
 - - pain in ear from .. 253
 - - jaw from .. 567
 - - ptyalism due to .. 661
 - - retraction of gums due to .. 731
 - - taste abnormality from .. 861
 - - tongue swollen in .. 852
 - - ulcer in mouth from 898
 - - ulceration of tongue from .. 244, 897
 - - of os calcis .. 552
 - - pain in heel from .. 551
 - - pelvis, tuberculous, limping from .. 457
 - - pubis, scrotal swelling due to .. 851
 - - rib, abscess of chest wall from .. 530
 - - siccra .. 869
 - - tenderness of spine from .. 868
 - - of spine (see Spinal Caries)
 - - tuberculous .. 818
 - - spontaneous fracture due to .. 304, 306
 - Carminatives, heart symptoms and .. 377
 - Carneous mole, metrostaxis from .. 489
 - Carnin, uric acid and .. 901
 - Carotid aneurysm, pupils unequal from .. 675
 - - artery (see Artery)
 - - glands enlarged from epithelioma of tongue 897
 - Carpenters, dermatitis in .. 659, 917
 - - itch of .. 659
 - - paralysis of serratus magnus in (Fig. 473) 617
 - Carpopedal contractions (see Spasm, Carpopedal)
 - Carpus (see Wrist)
 - Cartilage, arytoid, perichondritis of (see Perichondritis)
 - - blackened in ochronosis .. 644, 906
 - - capping exostosis .. 820
 - - costal, calcified, calculus simulated by 440, 442
 - - cricoid, perichondritis of, hoarseness from 388
 - - - sore throat due to 758
 - - destroyed in osteoarthritis .. 430
 - - of ear, sodium urate in .. 428
 - - eroded in rheumatoid arthritis .. 427

Cartilage, contd.

- internal semilunar, blow on, fainting from .. 297
- - - painful .. 431
- - - tenderness over .. 435
- of joint, eroded in hæmophilia .. 435
- loose, in knee, limping from .. 456
- necrosed by lupus vulgaris .. 500, 892
- in new growth of bone .. 843
- rodent ulcer destroying .. 225
- semilunar, displaced, synovitis from .. 435
- - kick on, vomiting due to .. 929
- thyroid, perichondritis of, sore throat due to .. 758
- - thyroid gland simulated by .. 876
- Caruncle, urethral, bleeding from .. 855
- - dyspareunia due to .. 239
- - pain in .. 855
- - prolapse of urethra simulating .. 855
- - strangury due to .. 797
- - vulval swelling due to .. 853
- Caruncule, myritiformes reddened in gonorrhœa .. 854
- Cascara sagrada, colic from .. 148

- general paralysis .. 139
- hemiplegia from .. 385
- hyperpyrexia from 390
- pseudo-bulbar paralysis due to 242, 731
- round cerebral abscess .. 385
- from tumour .. 385
- from syphilis .. 139
- syphilis (see Syphilis)
- thrombosis (see Thrombosis)
- tumour, acetoneuria from 3
- agueusia due to .. 859
- alteration of character due to .. 882
- anisoma from .. 756
- aphasia from .. 772
- arterio-sclerosis simulating .. 371
- Babinski's sign from .. 88
- bradycardia from .. 109
- bradypnoea from .. 110
- cerebral abscess distinguished from .. 109
- compression from .. 110, 111
- haemorrhage simulated by .. 385
- cerebrospinal fluid under pressure in 383
- Cheyne-Stokes breathing from .. 139
- choked disc from 184, 385
- coma from 110, 153, 154, 158

Cerebral tumour, contd.

- convulsions from .. 184
- deafness from .. 205
- delirium from .. 212
- diabetes insipidus from .. 655
- encephalitis simulating .. 157
- fainting due to 297, 298
- frontal headache with .. 370
- gas-fire effects simulating .. 372
- giddiness from .. 385
- glycosuria from .. 330
- haemorrhage into .. 385
- headache from 110, 184, 370, 385, 396, 613, 640, 655, 772
- hemiplegia from 88, 382, 385
- lupus with .. 675
- hyperacusis from .. 389
- hyperpyrexia from .. 390
- hypothermia with .. 392
- inattention due to .. 882
- incoherence due to .. 882
- increased intracranial pressure from .. 109
- insomnia from 402, 404
- Jacksonian epilepsy from .. 174
- knee-jerk absent from 452
- latency of .. 298, 385
- lateral tumour from 882
- loss of memory due to 882
- lumbar puncture in diagnosing .. 640
- lymphocytes in cerebrospinal fluid in 383
- mental changes with 882
- myxedema simulating 50
- no nausea with .. 929
- neurosis simulated by 158
- noises in head from 504
- obesity with .. 509
- occipital headache from .. 528
- optic neuritis with 109, 110, 184, 385, 396, 528, 613, 640, 655, 772, 866
- paralysis due to 396, 866
- of arm from .. 613
- pellagra simulating .. 279
- photophobia from .. 639
- plumbism simulating 371
- pulse slow from 109, 866
- pupil constricted from 75
- pyramidal tract lesion from .. 88
- saturnine encephalopathy simulating 155
- softening round .. 385
- stupor from .. 110
- subjective smell from 756
- tenderness of scalp from .. 865, 866
- tremor due to .. 880
- unilateral headache from .. 369, 370
- paralysis from .. 154
- tremor from .. 882
- uraemia simulating .. 111
- vertigo from 110, 504, 912
- vomiting from 4, 110, 184, 385, 528, 613, 640, 655, 772, 866, 929, 931
- Wassermann reaction in diagnosing .. 640
- veins (see Veins)
- vomiting .. 931
- indigestion simulated by .. 396
- (and see under Brain)
- Cerebritis, convulsions from .. 183
- Cerebrospinal fever (see Meningitis, Cerebrospinal)
- fluid, albumin in .. 383
- Bacillus coli in .. 384
- influenza in .. 384
- typhoid in .. 384
- bacteriological examination of .. 384
- in meningitis .. 623, 627
- characters of .. 382
- choline test in .. 383
- coagulation of .. 383

Cerebrospinal fluid, contd.

- cryoscopy of .. 383
- cytological examination of .. 383
- in diarrhoea, tuberculous, meningitis 184
- dripping from nose 224
- from ear from fractured skull .. 155
- in encephalitis .. 223
- Fehling's solution reduced by .. 224
- fibrinous, in acute meningitis .. 382
- freezing-point of .. 383
- globulin in .. 383
- gold chloride test in .. 383
- in hemiplegia .. 382
- lymphocytes in .. 243
- in cerebral tumour 383
- chloroma .. 383
- encephalitis .. 383
- general paralysis .. 157, 305, 383, 384
- herpes zoster .. 383
- leukæmia .. 383
- mumps .. 383
- poliomyelitis .. 383
- sleeping sickness .. 243
- syphilis .. 383
- tabes dorsalis 383, 541
- tuberculous meningitis .. 383, 623
- in meningitis .. 732
- meningococcus in 384, 521
- from nose, due to fractured skull .. 155
- nucleoprotein in .. 383
- opalescent, in acute meningitis .. 382
- platinumochloride test in .. 383
- pneumobacillus in .. 384
- pneumococcus in .. 384
- polymorphonuclear cells in .. 383
- in meningococcal meningitis .. 623
- suppurative meningitis .. 623
- under pressure, in cerebral abscess .. 383
- haemorrhage .. 383
- tumour .. 383
- meningitis .. 383
- purulent, in acute meningitis .. 382
- reaction always alkaline .. 383
- reddish-brown in acute meningitis 382
- sarcocoma cells in .. 383
- specific gravity of .. 383
- Spirochaeta pallida in 384
- staphylococcus in .. 384
- streptococcus in .. 384
- sugar in .. 383
- in syphilis .. 243
- not tinged in jaundice
- Treponema pallidum in .. 384
- Trypanosoma gambiense in .. 384
- trypanosomes in 37, 708
- tubercle bacilli in .. 384
- turbid, in acute meningitis .. 382
- urea in .. 383
- in uræmia .. 111
- Wassermann reaction in 243, 384, 628
- in general paralysis .. 157, 305
- Weichselbaum's diplococcus in .. 384
- xantho-protein, in acute meningitis 382
- yellow, in acute meningitis .. 382
- meningitis (see Meningitis, Cerebrospinal)
- Cerumen (see Wax)
- Cervical adenitis, epidemic (see Kikland's Disease)

 - effusion in (see Effusion)
 - emphysematous, outline of (*Fig. 182*) 209
 - expansion, diminished in emphysema 208, 269
 - normal degree of... 208
 - fixation of, in rheumatoid arthritis... 114
 - spondylitis deformans 114
 - fullness in, from mediastinal growth... 534
 - gripped-in-vic sensation in, from heart disease 52
 - gunshot wound of, empyema from... 135
 - haemothorax from... 135, 649
 - pneumothorax from... 649
 - hydatid cyst in... 910
 - hyperalgesia of... 863

Chest, contd.

- hyper-resonant, with emphysema and bronchitis .. 17
- injury to (see Injury) .. 459
- linear allicates on .. 816
- lymphatic drainage of .. 199
- movements, convulsive, in bronchopneumonia .. 199
- deficient, in bronchiectasis .. 366
- fibroid lung .. 210, 366
- phthisis .. 362
- with pneumothorax .. 532, 647
- unilaterally deficient, from stenosis of bronchus .. 365
- myoma cutis on .. 889
- needling of (see Needling)
- normal outline (Fig. 180) .. 209
- outline with fibroid lung (Fig. 181) .. 209
- over-expanded, with emphysema and bronchitis .. 17
- **PAIN IN** .. 530
- (and see Pain in Chest)
- Pectolus pubis affecting .. 499
- puerile, outline of (Fig. 181) .. 209
- in rickets .. 208
- pityriasis rosea affecting .. 746
- prurigo affecting .. 601
- **PUS IN** .. 132
- (and see Empyema)
- retraction of, after empyema .. 210
- from fibroid lung .. 210
- in phthisis .. 210
- after pleuritic effusion .. 210
- **rickety characters of** .. 208
- outline of (Fig. 179) .. 209
- scorbura affecting .. 745
- sense of, band round, from heart disease .. 52
- of weight on, from heart disease .. 52
- sensory centre for (Fig. 483) .. 631
- **SEROUS EFFUSION IN** .. 135
- (and see Effusion, Serous)
- shrivelled on one side, from empyema .. 191, 192
- fibroid lung .. 191, 192
- scrobula from .. 191
- shrunken, from fibroid lung .. 269
- skiagram of normal (Fig. 301) .. 374
- small pox of .. 920
- **stomach in** (Fig. 514) .. 649
- resonance in .. 755
- **succussion in** .. 800
- surgical emphysema of .. 254
- systolic retraction of .. 535
- swelling of, from aneurysm .. 198
- telangiectases round, in cirrhosis .. 910
- emphysema .. 910
- **TENDERNESS OF** .. 861
- (and see Tenderness of Chest)
- tightness in, from mediastinal growth .. 544
- mediastinus .. 535
- tinea versicolor of .. 313
- **unilateral enlargement of** .. 208, 209
- by empyema .. 208
- intrathoracic tumour .. 208
- pleuritic effusion .. 208
- pneumothorax .. 208
- varicella affecting .. 919, 920
- **VARICOSE VEINS ON** .. 910
- (and see Veins, Varicose Thoracic)
- veins on (see Veins, Thoracic)
- wall, abscess of (see Abscess of Chest Wall)
- actinomycosis affecting .. 562
- bulging of, from aneurysm .. 260

Chest wall, contd.

- cancer deposits in .. 210
- flattened in phthisis .. 362
- gummata of .. 210
- myeloma of .. 210
- tumour of, bulging due to .. 210
- ulceration of, actinomyotic .. 562
- wasting of, in phthisis .. 362
- wound, empyema from .. 134
- gangrene of lung from .. 422, 323
- pneumothorax from .. 647, 649
- pyopneumothorax after .. 801
- surgical emphysema from .. 649, 805
- X rays of, in oedema of arm .. 512
- **CHEYNE-STOKES RESPIRATION** .. 138
- from acute nephritis .. 139
- arm-waving in .. 212
- from arsenobenzol derivatives .. 422
- arsenobillon .. 422
- arterial degeneration .. 139
- arteriosclerosis .. 139
- ascending nephritis .. 139
- butyl chloral hydrate .. 139

Cholesterol crystals, contd.

- illustrated (<i>Fig. 263</i>)	317
- in pleuritic fluid	138
- microscope in diagnosis	138
- in mucocoele	138
- pericardial effusion	137
- cholesterol	299
- in chylous ascitic fluid	73
- Choline test in cerebrospinal fluid	383
- Choluria	903
- Chondrodystrophy, account of	233
- Chondroma of breast	839
- - ilium, pain in iliac fossa from	558, 564
- - swelling in iliac fossa from	564, 829
- - metacarpal bones	820
- - multiple	820
- - myeloid sarcoma simulating	822
- - pain in hands from	820
- - of pelvic bones, X rays in diagnosing	829
- - phalanges	820
- - round joints from gonorrhoea	179
- - - rheumatism	179
- - - rheumatoid arthritis	179
- - - spondylitis deformans	179
- - - tuberculosis	179
- - ulceration over	820
- Chondromatous gout simulating	821
- of hand, skiagraph of	821
- nerve distribution of	821
- Chondrosarcoma of femur, skiagraph of	822
- Chorda tympani, geniculolateral ganglion and	604
- - paralysis (see Paralysis)	
- CHORDEE	140
- - corpus cavernosum and	140
- - spongiosum and	140
- - from fracture of penis	140
- - gonorrhoea	140
- - pain in penis from	579
- - from urethritis	579, 763
- Chorea in acute rheumatism	758
- - acute, starts in	173
- - age incidence of	170
- - aortic disease after	261, 263
- - arsenic in	85, 103, 623, 872
- - articulation interfered with in	170
- - in children	385
- - chronic, account of	171
- - choreiform contractions in	170
- - degenerative, account of	171
- - duration of	170
- - electrical, choreiform contractions in	170
- - - convulsions from	181
- - endocarditis and	170, 263
- - extensor plantar reflex in	88
- - family incidence of	170
- - fingers extended in	614
- - fright and	170
- - general account of	170
- - grasp not maintained in	614
- - habit chorea distinguished from	170
- - hemi-	170
- - Henoch's, choreiform contractions in	170
- - - convulsions from	181
- - - nystagmus and	174
- - neck and shoulder affected in	171
- - Huntington's	171
- - acute chorea simulating	171
- - - age incidence of	171
- - - articulation defective in	171
- - - chorea simulating	171
- - - choreiform contractions in	170
- - - duration of	171
- - - hereditary	171
- - - insanity in	171
- - hysteria simulating	171

Chorea, contd.

- - insanities	170
- - hyperpyrexia in	390
- - knee-jerk in	452, 614
- - major, choreiform contractions in	170
- - - epidemic of	171
- - - hysteria and	171
- - - religion and	171
- - minor, choreiform contractions in	170
- - mitral stenosis and	69, 363, 857
- - movements cease in sleep	170
- - pandemic, choreiform contractions in	170
- - - paralysis of arm in	614
- - - patient emotional in	170
- - - peripheral neuritis in	623
- - - post-hemiplegic, in children	171
- - - choreiform contractions in	170
- - - in pregnancy	170
- - - pre-hemiplegic	171
- - - choreiform contractions in	170
- - - respiration jerky in	170
- - - rheumatic fever and	170, 423
- - - sex incidence of	170
- - - spastica	884
- - - not distinguished from tremor in	880
- - - unilateral tremor in	882
- - - valvular disease and	17
- - - weakness of one side in	385
- - - wrist flexed in	614
- CHOREIFORM CONTRACTIONS	170
- - (and see Contractions, Choreiform)	
- - movements in cerebellar ataxy	883
- - - diplegia	883
- - - from encephalitis	223
- - - in Friedreich's ataxy	624, 883
- - - hemiplegia	883
- - - after hemiplegia	171
- - - in infantile hemiplegia	76
- - - Little's disease	169
- - - olivo-ponto-cerebellar atrophy	883
- - - spino-cerebellar ataxy	883
- - Chorea-epidemic, local discharge from	488
- - from hydrodiform mole	488
- - metrorrhagia from	487, 488
- - metrorrhagia from	489
- - pregnancy and	488
- - of uterus, cohe due to	148
- Chorionic villi in uterine cast	238
- Choroid, coloboma of	517
- Choroidal tubercles (see Tubercles in Choroid)	
- Choroiditis, ring scotoma due to	924
- - syphilitic, account of	518
- - - defective vision from	518
- - - illustrated (<i>Fig. 415</i>)	518
- - of yellow spot, amblyopia with	922
- - - nystagmus due to	922
- - Choroido-retinitis, night blindness due to	926
- - optic atrophy due to	924
- - visual fields constricted in	924
- Christ, hearing voice of, in the insane	503
- Christmas rose, dermatitis due to	916
- Chrome, yellow, dermatitis due to	917
- Chromic acid, haemoglobinuria from	357
- Chromidrosis	645, 803
- - chronic hypertrophic haemorrhagic pachymeningitis	627
- - interstitial nephritis (see Nephritis)	
- Chrysanthemum, dermatitis due to	915
- Chrysarobin, bullic from	123
- - dermatitis from	124

Chrysarobin, contd.

- diazo-reaction from	218
- erythema from	275, 917
- staining of skin due to	917
- vesicles from	124
- Chrysophanic acid (see Acid)	
- Church, fainting in	297
- Churning sounds in hydro-pneumopericardium	800
- Chvostek's sign in tetany	3
- Chylous ascites (see Ascites, Chylous)	
- fluid, characters of	72, 73
- - pleuritic exudate, account of	138
- CHYLURIA	140
- - from abdominal injury	140
- - age incidence of	140
- - chylous ascites and	72, 140
- - elephantiasis with	140
- - eosinophilia with	140
- - in filariasis	36, 140
- - lipaemia with	140
- - from malignant disease	140
- - receptaculum chyli rupture	140
- - rectal examination in	140
- - sex incidence of	140
- - spontaneous	140
- - in subacute nephritis	140
- - from thoracic duct blockage	140
- - in tropics	140
- - vaginal examination in	140
- Cider, regurgitation of food through nose due to	730
- Cigarettes, cachexia from	128
- - dead fingers from	204
- - dyspnoea from	247
- - low blood-pressure from	106
- - palpitations from	596
- Cigarette-rollers, cramp in	189
- Cigarette-rolling tremor	880
- Ciliary muscle paralysis, accommodation difficult from	84
- - - from diphtheria	84, 242
- Cinchona, dermatitis from	915
- Cinnamon, leucocytosis from	453
- - rectal concretion from	873
- Circinate syphiloderm	691
- - tubercular syphiloderm	311
- - ulcers of syphilis	892
- Circumcision, death after	477
- - lymphadenitis and	656, 657
- - priapism from	656, 657
- - tuberculosis of penis after	765
- Circumflex nerve (see Nerve)	
- Cirrhosis of liver, account of	465
- - - achlorhydria in	341
- - - acne rosacea in	67
- - - age incidence of	465
- - - albuminuria from	16, 21
- - - alcohol and	67, 336, 344, 414, 465, 679
- - - amenorrhoea in	23
- - - anaemia in	47, 415, 783
- - - ascites in	48, 62, 63, 67, 68, 72, 83, 143, 336, 344, 414, 466, 783, 910, 933
- - - late in	67
- - - Banti's disease and	49, 72, 83, 143, 415, 422, 780, 783
- - - blood per anum from	97, 783
- - - bottle-nose in	67
- - - in bronzed diabetes	335, 467, 644
- - - cachexia from	218
- - - cancer with	466
- - - simulating	466
- - - caput Medusae in	59, 910
- - - carcinoma simulated by	468
- - - of stomach simulated by	344
- - - in children	415, 465
- - - choleraemia from	213
- - - chronic peritonitis in	72
- - - clubbed fingers in	(<i>Fig. 127</i>) 143, 415
- - - coma in	153, 414, 466
- - - commoner in males	465

Cirrhosis of liver, contd.

- - from congenital syphilis	411
- - - conjunctiva icteric in	67
- - - cramps in legs in	67
- - - delirium from	213
- - - tremens in	466
- - - delusions in	466
- - - diarrhoea from	217
- - - diazo-reaction from	218
- - - dilated venules on cheek in	466
- - - diminished appetite in	58
- - - dipping in	466
- - - drowsiness from	414
- - - dyspepsia with	465
- - - in Egypt	465
- - - Egyptian splenomegaly	709
- - - enteritis with	465
- - - epistaxis in	67, 273, 783
- - - facies in	48, 294
- - - gall-stones simulating	466
- - - gastric ulcer simulated by	339, 344
- - - gastritis in	58, 398, 465
- - - general account of	67
- - - wasting in	78
- - - haematemesis in	47, 67, 336, 337, 344, 415, 465, 482, 780, 783
- - - haemorrhages in	783
- - - haemorrhoids in	67
- - - Hanot's, account of	414, 466
- - - - achloric jaundice in	414
- - - - ascites in	414, 466
- - - - in children	466
- - - - clubbed fingers in	415, 466
- - - - duration of	466
- - - - growth stunted in	466
- - - - haemorrhages in	466
- - - - jaundice in	466
- - - - liver enlarged in	414, 466
- - - - firm in	466
- - - - in males	466
- - - - purpura in	466
- - - - pyrexia in	466
- - - - spleen enlarged in	414, 466
- - - - harsh dry skin in	466
- - - - heart failure in	466
- - - - hypertrophic biliary	466
- - - - jaundice with	235
- - - - insomnia from	404
- - - - intestinal catarrh from	217
- - - - flatulence from	308
- - - - jaundice from	47, 63, 67, 336, 408, 414, 415, 466, 468, 783
- - - - leucocytosis in	468
- - - - no leucocytosis in	415
- - - - liver dullness diminished in	460
- - - - edge beaded in	67, 414
- - - - enlarged in	67, 336, 344, 408, 414, 415, 465, 468
- - - - firm in	344
- - - - hard from	67, 414, 465
- - - - rough in	67
- - - - small in	67
- - - - smooth in	67, 414
- - - - surface uneven in	465
- - - - tender in	414
- - - - long duration of	67
- - - - loss of appetite in	67
- - - - weight due to	933
- - - - from malaria	417, 466
- - - - malignant peritonitis simulating	65
- - - - melanin in	67, 97, 465, 481, 482
- - - - menorrhagia from	482, 484
- - - - mental obtusation in	466
- - - - meteorism in	466
- - - - morning sickness in	67, 466
- - - - multibulbar	67
- - - - muscular atrophy in	78
- - - - muttering delirium in	414
- - - - nystagmus in	30
- - - - nausea in	67
- - - - nocturnal delirium in	404
- - - - nose red in	466
- - - - oedema in	653

Cirrhosis of liver, contd.

- - - oedema of ankles in .. 466
- - - pain in limbs in .. 568
- - - over liver in .. 465
- - - pallor in .. 48
- - - pancreatitis from .. 128
- - - paracentesis abdominis in .. 67, 68
- - - perihepatitis and .. 68, 465
- - - phthisis with .. 337
- - - pigmentation of face in .. 67, 294, 466
- - - skin in .. 48
- - - pulse weak in .. 466
- - - purpura with .. 676, 783
- - - pyrexia in .. 48, 408, 414, 466, 688, 706, 708, 709, 715
- - - rouleaux formation in .. 51, 784
- - - sallow facies in .. 67, 294, 466
- - - serous effusion in .. 653
- - - short survival after ascites .. 67
- - - spleen enlarged in .. 67, 83, 336, 344, 415, 465, 468, 778, 782, 783
- - - splenic anaemia and .. 49, 72, 83, 143, 415, 422, 466, 780, 783
- - - splenomegaly .. 415, 780
- - - acholuric jaundice and .. 780, 781
- - - age incidence of .. 780
- - - anaemia in .. 780

- in scarlet fever .. 153
- severe fevers .. 153
- from severe heart disease .. 181
- sewer gas .. 154
- shock .. 154
- in sleeping sickness .. 153
- small-pox .. 153
- from snake-bite .. 422
- with spasm of glottis .. 912
- in spirochaetosis icterohæmorrhagica .. 153, 420
- spotted fever .. 153
- stertor in .. 153
- in Stokes-Adams' disease 109, 154, 181, 596
- from sulphonal .. 110, 154
- sunstroke .. 156

Coma, contd.

- in superior longitudinal sinus thrombosis 153, 733
 - in suppurative meningitis .. 153, 154
 - - pyelonephritis .. 57
 - syphilis of the brain .. 153
 - from tetral .. 110, 154
 - in T.N.T. poisoning .. 153
 - - trance .. 154
 - from trional .. 110, 154
 - in trypanosomiasis 153, 708
 - from tuberculous kidney .. 153, 184
 - - typhoid fever .. 153
 - - typhus fever .. 153
 - unilateral paralysis in .. 154
 - in uraemia 57, 88, 109, 153, 154, 181, 521
 urea in cerebrospinal fluid in .. 383
 - from veronal .. 110, 154
 - in Weil's disease .. 153
 - wells .. 154
 - yellow fever .. 153
 Combined sclerosis of cord, achlorhydria in .. 341
 - - achylia gastrica and 631
 - - no anaesthesia in 631
 - - ascending nephritis in .. 211
 - - ataxic paraplegia and .. 631
 - - ataxy in 75, 631, 754
 - - bladder distended from .. 61
 - - cystitis in .. 211
 - - delirium in .. 211
 - - in diabetes .. 335
 - - extensor planar reflex in 88, 176, 545
 - - hyperaesthesia in 754
 - - incontinence of urine from .. 61
 - - inco-ordination in 315
 - - manganese poisoning simulating .. 212
 - - micturition difficult from .. 492
 - - no nystagmus in 631
 - - paraesthesia in 545
 - - paraplegia from 626
 - - pernicious anaemia and .. 30, 631
 - - posterior column sclerosis in .. 75
 - - retention of urine in .. 211
 - - sensory changes in 754
 - - spastic paraplegia in .. 545, 754
 - - spasticity in 176, 631
 - - sphincter trouble in .. 176
 - - syphilis and .. 631
 - - tendon jerks increased in .. 545
 - - tracts affected in 631
 - - uraemia in .. 211
 - - no voice change in 631
 Combustion products, delirium from .. 212
 - - dyspnoea from .. 246
 - - fainting due to .. 297
 Comedones in acne 303, 600, 683
 Comes nervi mediani, enlarged .. 673
 Comma bacillus in cholera 872
 Common bile-duct (see Bile Duct)
 - cold (see Cold)
 Commotional shock .. 77
 Compass paint, acroprene, seleniumtreated hydrogen from .. 421
 Compensation, failure of cardiac, causes of .. 62
 Compensatory emphysema in bronchiectasis .. 366
 - - with fibril lung 269, 366
 Complexion, florid, in Mongolian idiocy .. 294
 - mottled, in Mongolian idiocy .. 294
 - (and see Facies)
 Composite calculus in bladder .. (Fig. 294) 355
 Compositors, cramp in .. 189

Compression, cerebral (see Cerebral Compression)
 - of cord (see Spinal Cord, Compression of)
 - lumbar enlargement, paraplegia from .. 626
 - myelitis (see Myelitis)
 - paraplegia (see Paraplegia)
 Conception, prevention of, menorrhagia from .. 482
 Concert room, fainting in 297
 Concrete-boring, subacromial bursitis from .. 582
 Concretion, appendical, colic from .. 148
 - - urteric calculus simulated by .. 442, 443
 - - rectal .. 873
 - (and see Calculus)
 Concussion, acetoneuria from 3
 - Babinski's sign in .. 88
 - of brain, no nausea with 929
 - pain in scalp after .. 800
 - tenderness of scalp from .. 805, 866
 - vomiting due to .. 929
 - coma from 88, 153, 331
 - deafness from .. 207
 - delirium from .. 212
 - glycosuria from 330, 331
 - from head injury .. 212
 - headache from .. 370
 - hyperaesthesia after .. 389
 - jaundice due to 408, 422
 Condiments, pain in tongue from .. 590
 Conduction deafness (see Deafness)
 Condyloma, account of .. 854
 - of anus .. 498, 854
 - of buttock .. 854
 - in congenital syphilis .. 480, 498
 - genital organs .. 498
 - of lips .. 460
 - mercury for .. 854
 - pemphigus distinguished from .. 743
 - in perineum .. 579, 760
 - salvarsan for .. 854
 - soft sore with .. 854
 - distinguished from 854
 - sore throat with .. 854
 - in syphilis .. 601, 854
 - of thigh .. 854
 - vulval swelling due to 854
 Goncs, brightness perception and .. 921
 - colour perception and .. 921
 - in retina .. 921
 - and rods, functions of 921
 - in yellow spot .. 921
 Confectioners, dermatitis in .. 917
 - nail changes in .. 496
 Congenital abnormality of subclavian artery .. 241
 - absence of levator palpebrae superioris .. 660
 - olfactory nerve, anosmia due to .. 756
 - recti abdominales .. 636
 - alcaptonuria .. 905
 - alopecia .. 91
 - amenorrhoea, causes of 23
 - anophthalmos .. 924
 - atelectasis, bronchiectasis from .. 366
 - fibroid lung from .. 366
 - blindness .. 924
 - brittleness of nails .. 497
 - cataract, nystagmus from .. 505
 - cerebral diplegia .. 169
 - - atrophic .. 169
 - cervical ribs .. 544
 - cleft palate .. 223
 - club-foot, account of 144
 - clubbed fingers .. 143
 - coloboma of choroid (Fig. 412) 517
 - - iris .. 517
 - - lens .. 517
 - - optic disc .. 517
 - colour blindness .. 925
 - crescent of the optic disc .. (Fig. 410) 517
 - - in retina .. 517
 - cryptomenorrhoea .. 23
 - cystic hygroma .. 816

Congenital, contd.

- deal-mutism .. 772
 - deafness .. 205
 - defect of cortex, infantile diplegia from 622
 - - paraplegia from .. 621
 - diaphragmatic hernia 801
 - dilatation of colon .. 826
 - dislocation of hip in female sex .. 195
 - - head of femur on dorsum ili in .. 195
 - - hips wide in .. 195
 - - limping from .. 457
 - - lordosis from 191, (Fig. 164) 194, 195, 314
 - - Scarpia's triangle hollow in .. 195
 - - skiagram (Fig. 165) 195
 - - stance in (Fig. 164) 194, 195
 - - waddling gait in .. 195, 314
 - - X rays in diagnosis 195
 - double pupil .. 220
 - elephantiasis .. 849
 - enophthalmos .. 270
 - error in ocular muscle insertions .. 270
 - extroversion of bladder 658
 - fibroma in chest .. 911
 - superior vena cava obstructed by .. 911
 - fistula, sterility due to 793
 - frigidity, impotence from .. 393
 - heart disease without bruit .. 143, 650
 - - clubbed fingers in 142, 143, 196, 650
 - - coma from .. 181
 - - convulsions from .. 181, 182
 - cyanosis from 142, 182, 196, 650
 - - with cyanosis and no bruit .. 196
 - - delirium from .. 212
 - - dyspnoea from .. 246
 - - haemoglobin in .. 650
 - - haemoptysis in .. 363
 - - heart enlarged in 182
 - - failure from .. 246
 - - left ventricle enlarged in .. 258
 - - palpitation from .. 594
 - - phthisis in .. 363
 - physical signs of .. 650
 - - plethoria in .. 212
 - - polycythemia in .. 650
 - - systolic bruit due to 875
 - - thrill due to .. 875
 - varieties of 196, 267
 - herniation of stomach into chest .. 649
 - Hirschsprung's disease 805
 - hydrocephalus .. 622
 - hypertrophy of cervix uteri .. 657
 - hypoplasia of intestine 160
 - - pulmonary artery .. 120
 - - ichthyosis, onychogryphosis with .. 497
 - incidence of acholuric jaundice .. 50
 - - rare anaemias .. 51
 - inguinal hernia, oblique 833
 - inguinoscrotal hernia 834
 - lymphangioma circumscriptum .. 919
 - macrocheilia .. 852
 - macroglossia .. 852
 - macular coloboma .. 922
 - malformation of aortic valve .. 260, 262
 - - duodenum, acute intestinal obstruction from .. 167
 - - heart, right ventricle preponderance in (Fig. 108) 122
 - - hemiplegia from .. 382
 - - meningocoele .. 622
 - - merycin .. 485
 - - morbus cereuleus .. 241
 - - myelocoele .. 622
 - - narrowness of anal canal 166
 - obliteration of bile-ducts 411
 - - jaundice due to .. 407

Congenital obliteration, contd.

- of duodenum .. 167
 - - ileum .. 167
 - obstruction of lachrymal ducts .. 273
 - - rectum .. 167
 - - oedema .. 511
 - - optic atrophy in idiocy .. 622
 - - persistence of hyaloid artery .. 922
 - - pupillary membrane 674
 - - porphyria .. 904
 - - ptosis .. 660
 - pulmonary stenosis, ascites from .. 62
 - - clubbed fingers from .. 142
 - - heart failure from .. 62
 - - regurgitation with .. 269
 - - spastic paraplegia (see Paraplegia, Spastic)
 - - spina bifida .. 622
 - - steatorrhoea .. 301
 - stenosis of pylorus, vomiting from .. 480
 - syphilis (see Syphilis)
 - talipes, account of .. 14
 - - equinovarus, illustrated (Fig. 128) 144
 - torticollis .. 179
 - transposition of heart .. 373
 - - viscera .. 241
 - tremor .. 879
 - - in children .. 880
 - urinary fistula .. 494
 - Concretion of liver (see Liver)
 - - lungs, passive from .. 268
 - - mitral stenosis .. 268
 - - pelvic see Pelvic Congestion
 - - pulmonary, in arteriosclerosis .. 14
 - - chronic nephritis .. 14
 - - heart failure .. 14
 - of uterus (see Uterus)
 - Gonorrhoea, attacks in general paralysis .. 770
 - Gonorrhoea, test for acid .. 401
 - Gonorrhoea, desquamated .. 237
 - - hec in talipes .. 144
 - Gonorrhoea, deviation of eyes in cornea .. 154
 - Gonorrhoea, division of .. 891
 - - glaucoma in Graves' disease .. 292
 - - herpes zoster of .. 914
 - - hypertrophic from .. 273
 - - in cirrhosis of liver .. 87
 - - injected in glaucoma 288
 - - xerosis of .. 891
 - - night blindness due to 926
 - Gonorrhoea, catarrh from .. 94
 - Gonorrhoea, angular .. 286
 - - characters of the red-denning in .. 285
 - - chronic .. 286
 - - cornea clear in .. 285
 - - corneal ulcer from .. 890
 - - with cutaneous diphtheria .. 681
 - - diphtheritic, ulcer of cornea with .. 891
 - - in electric blindness .. 926
 - - epiphora from .. 272
 - - erythroptia with .. 926
 - - eye inflamed in .. 285
 - - from facial paralysis .. 604
 - - follicular 285, (Fig. 231) 286
 - - general account of .. 285
 - - glaucoma distinguished from .. 289
 - - gonorrhoeal .. 285
 - - ulcer of cornea with .. 891
 - - grittiness from .. 370
 - - headache from .. 286
 - - illustrated (Fig. 228) 286
 - - iris normal in .. 285
 - - iritis distinguished from 289
 - - lachrymation in .. 285
 - - membranous, due to diphtheria .. 286
 - - - staphylococci .. 286
 - - oedema of eyelids from .. 285, 660
 - - pain in .. 285

Conjunctivitis, contd.

- pain in eye from	546
- face from	548
- phlyctenular	(Fig. 230) 286, 890
- photophobia from	285, 639, 926
- ptosis from	660
- pupil black in	285
- rainbow vision due to	926
- in snow-blindness	926
- spirochaetosis ictero-haemorrhagica	420
- tie from	173
- in trench fever	710
Connective tissue in stools	215
- in diarrhoea	216
Consciousness, double	25
- loss of, in grand mal	87
- petit mal	87
- (and see Coma; Fainting; and Syncope)	
Consenting rules (see Rules)	
CONSTIPATION	158
- abdominal distention in	806
- swelling due to	804
- from abdominal tumour	160
active congestion of	
- liver	417
- acute gastritis	338
- intestinal obstruction	166
- paracanthitis	168, 810, 931
- peritonitis	168
- yellow atrophy	416
- adhe- sions	163
- agar-agar and	160
- anaemia from	43, 514
- in anorexia nervosa	58
- aperients from	160
- from appendicitis	812, 828
- ascites	164
- in asthma	165
- from atony of colon	160
- pelvic colon	165
- rectum	165
- belladonna relieve	161
- biliousness from	640
- borborygm with	107
- caecum distended in	802
- from carcinoma of colon	98, 162, 413
- descending colon	98
- pelvic colon	166
- rectum	98, 166, 556, 727
- sigmoid	556
- splenic flexure	776
- uteri	166
- in catarrhal jaundice	411
- charcoal in testing	158
- in chlorosis	49
- chronic, account of	158-161
- from chronic gastritis	338
- from intestinal obstruction	396
- peritonitis	64
- colon visible in	809
- complete, in intestinal obstruction	151
- from congenital narrowness of anal canal	166
- tumulative	158
- from deficient water-drinking	162
- definition of	158
- in diabetes	158, 162
- diagnosis of Hirschsprung's disease	486
- after diarrhoea	165
- diet and	160, 161
- difficulty of micturition with	165
- from disease of duodenum	161
- female pelvic organs	161
- gall-bladder	161
- stomach	161
- vermiform appendix	161
- distended tubes	166
- diverticulitis and	556, 697
- dropped liver and	164
- in emphysema	165
- enemas and	160
- from enterospasm	538
- enuresis from	270
- faecal tumour in colon with	777
- fainting due to	297
- familial	160
- in fat people	160
- from fatty infiltration of bowel	160

Constipation, contd.

- from fibrous stricture of rectum	166
- finger in rectum relieving	165
- from fluid loss	165
- foul breath from	113
- fragmentary	159
- in general peritonitis	734
- after haemorrhage	165
- from haemorrhagic pancreatitis	736
- hard dry faeces	162, 165
- headache from	369, 371
- in Henoch's purpura	102
- from Hirschsprung's disease	164, 802
- in hot weather	162
- hypochondriasis	161
- from hypoplasia of bowel	160
- indicanuria from	395
- in insane persons	161
- insomnia from	402
- intestinal	158
- causes of	160
- diet relieving	159
- hard faeces from	165
- mild aperients relieving	159
- me	159
- scybala in	159
- with intestinal fermentation	303
- intestinal flatulence due to	308
- from intestinal obstruction	303, 555, 636, 825
- intussusception	101, 829
- invagination of rectum	166
- in jaundice	406
- from kink of colon	163
- Lane's kink	561
- lead	45, 161, 168
- loss of weight due to	933
- in Malta fever	571
- meningitis	165
- menorrhagia from	482
- movable kidney and	164
- mucus in stools from	495
- in myelitis	165
- due to neglected calls	165
- in neurasthenia	161
- noises in head from	504
- from obesity	160
- oesophageal obstruction	160
- in old age	160
- opium relieving	161
- from ovarian tumour	166
- pain in abdomen	161
- pelvis	161
- spine from	871
- from paresis of pelvic colon	165
- rectum	165
- polivrectal	158
- from pericolic	812
- after peritonitis	163
- from perityphlitis	812
- perspiring	162
- petroleum and	160
- photophobia from	639, 640
- pigmentation of skin from	643
- from polypi of pelvic colon	98
- rectum	98
- pregnancy	164
- pressure of gravid uterus	166
- uterine fibroid	166
- proctoscope in	166
- prolapse from	101
- from prolapse of anus	101
- purgatives	933
- pyloric obstruction	160
- rectal examination in	166
- in rickets	182
- from senile hypoplasia of bowel	160
- shock	161
- sigmoidoscope in	159, 166
- soap in rectum relieving	165
- from spasm of sphincter ani	166
- spastic, account of	161
- caecum distended in	161
- cancer of colon simulated by	161
- sigmoid stimulating	557
- diverticulitis simulating	161

Constipation, spastic, contd.

- from hypertonus of colon	308
- membranes in stools	161
- mucomembranous	161
- colic and	161
- mucus in stools in	161
- in neurotic women	161
- pain with	308
- in iliac fossa from	555
- sense of fullness from	308
- shreds in stools in	161
- X rays in diagnosing	308
- from strangulated hernia	825, 833
- syphilitic proctitis	100
- in tabs dorsalis	165
- from tea-drinking	160
- technique of barium and X-ray examination in	159
- tenderness of spine from	871
- from tuberculous colon	812
- in typhoid fever	689, 737
- with undue pulsation of abdominal aorta	662
- vertigo from	504
- from viscerotaxis	163
- in women	161
- from worry	161
- X rays in diagnosing	161
- nature of	161
- in yellow fever	420
Contortionists, hamstrings	195
- elongated in	195
- lordosis in	195
Contraction, cicatricial, after burn	797
- ring of uterus, recognition of	250, 251
CONTRACTIONS, ATHE-	168
TOTIC	
- carpopedal (see Spasm, Carpopedal)	
- CHOREIFORM	170
- of arm	170
- ataxy distinguished from	170
- from cerebral embolism	170
- thrombosis	170
- in chorea electrica	170
- minor	170
- minor	170
- chronic chorea	170
- cortical sclerosis	170, 171
- of face	170, 171
- in Friedrich's ataxy	171
- of hands	170, 171
- after hemiplegia	171
- in Henoch's chorea	170
- Huntington's chorea	170
- hysteria	170, 171
- intention tremors distinguished from	170
- in pandemic chorea	170
- post-hemiplegic chorea	170
- preceding hemiplegia	171
- in pre-hemiplegic chorea	170
- St. Vitus's dance	170
- of shoulder	170
- in spastic paralysis of children	171
- infants	170
- tremors distinguished from	170
- chronic, in paramyoclonus multiplex	174
- FIBRILLAR	171
- in amyotrophic lateral sclerosis	172, 619
- arm muscles	615
- bulbar paralysis	172
- chronic poliomyelitis	177
- muscle degeneration	880
- neuropathic muscular atrophy	172
- progressive muscular atrophy	172, 177
- tremor distinguished from	880
- in Werdnig-Hoffmann paralysis	172
- hour-glass, of uterus	252
- dystocia from	250
SPASMODIC	172
- accoucheur's hand from	2

Contractions, spasmodic, contd.

- in athetosis	2
- chorea	173
- delirium tremens	173
- epilepsy	174
- from fatigue	173
- in general paralysis	173
- Graves' disease	173
- hysteria	2, 173
- of intestine (see Colic; and Enterospasm)	
- from nervous exhaustion	173
- in neurosis	2
- from overwork	173
- in tetany	2
- tetanic, in epilepsy	175
- of uterus	252
- tonic, of uterus	252
- wormlike, in intermittent claudication	542
- reaction of degeneration	74
Contracture after a burn	147, (Fig. 154) 180
- Dupuytren's (see Dupuytren's Contracture)	
- of face	178
- after facial paralysis (Fig. 465-467, 604, 605)	
- from fracture (Fig. 151)	178
- injury of nerve	178
- ischaemic, of calf muscles	147
- after laceration	147
- masses preventing	178
- in monoplegia	613
- movement preventing	178
- of muscles, ischaemic, talipes from	147
- from splint (Fig. 151)	178
- tuberculous joint	179
- tumour of joint	179
- Volkmann's, of hand (Fig. 151, 178, 617)	
CONTRACTURES	177
- from adhesions about joints	178
- in alcoholic neuritis	177
- arsenical neuritis	177
- Bell's facial paralysis	178
- chronic poliomyelitis	177
- from disuse	178
- after enterica	147
- from gonorrhoea	179
- in hysteria	171, 178
- duration of	178
- joint changes from	436
- from joint diseases	179
- of leg (see Talipes)	
- in peripheral neuritis	436
- poliomyelitis	177, 620
- after polymyositis	703
- in progressive muscular atrophy	177
- from rheumatism	179
- rheumatoid arthritis	179, 428
- scars	147, 180
- spasticity	176
- spondylitis deformans	179, 180
Contralateral pain in	
- appendicitis	556
- from renal calculus	556
Contusion of brain, hyperpyrexia from	390
- chest, gangrene of lung after	323
Convalescence, anaemia in	42, 43
- ataxy in	77
- bradycardia in	671
- delirium in	212
- fainting due to	296
- hoarseness in	387
- hyperaemia in	389
- hypothermia in	392
- knee-jerks exaggerated in	451
- oedema of legs in	515, 517
- poluria in	653, 654
- priapism from	657
- shortness of breath from	113
- sinus arrhythmia in	664
- tachycardia in	857
- tremor due to	879, 880
- vertigo in	911
Convergence pupillary reflex lost in alcoholism	674
- diphtheria	674
- tabs dorsalis	674

- dysmenorrhoea from 237, 248
- ectostoma from 251
- encysted ascites simulating 843
- extra-uterine gestation simulated by 842
- fibroma simulated by 483
- simulating 251, 840, 842
- fluctuation in 251, 843
- gas in 800
- hamorrhagic, dysmenorrhoea from 237
- hydatid cyst simulating 843
- inferior vena cava obstructed by 515, 909
- jaundice from 413
- kidney enlargement simulated by 438
- lipoma simulating 843
- malignant peritonitis from 66
- mensuration and 60
- meteorism simulating 486
- oedema of legs from 515, 517
- operation in diagnosing 843
- palpitation from 595, 597
- pancreatic cyst simulating 840
- paracæstesis in diagnosing 60
- pelvic swelling due to 840
- physical signs of 60, 438
- pregnancy simulating 840
- proliferating, ascites with 63
- multiple tumours with 63
- papillomatous 66
- renal colic simulated by 438
- rupture of, dysmenorrhoea simulated by 239
- pain in pelvis from 573
- strangury due to 797
- necrosis in 800
- suppurating, appendicitis simulated by 558
- leucocytosis with 453
- pyrexia due to 687
- vaginal examination in diagnosing 693
- swelling in iliac fossa due to 829
- tenesmus due to 873
- thrill with 60
- tuberculous peritonitis simulating 65
- twisted, abdominal pain from 555
- appendicitis simulated by 559
- colic simulated by 149

Cyst, ovarian, twisted, contd.

- dullness in flanks from 559
- dysmenorrhoea 239
- fluid in abdomen from 559
- laparotomy for 559
- pain in iliac fossa from 555, 557, 573
- pelvis from 559
- pelvic adhesions after 573
- peritonitis from 559
- strangulated hernia simulated by 559
- urgent laparotomy for 149
- twisting of pedicle of 438
- a-cites with 842
- umbilicus and 60
- urachal cyst simulating 816, 843
- uterus drawn up by 60
- vaginal examination and 60
- pancreatic, abdominal distention from 61
- tumour from 811
- account of 811
- ascites simulated by 61
- from chronic pancreatitis 811
- without diabetes 335
- epigastric tumour from 811
- fluctuation in 811
- gas in 776
- glycosuria with 811
- in hypochondrium 811
- induction with 811
- jaundice with 811
- ovarian cyst simulated by 840
- pain in shoulder from 580
- pale bulky stools with 811
- with pancreatic calcification 811
- pelvic swelling due to 840
- peptonizing ferments in 61
- spleen simulated by 775
- starch-digesting ferments in 61
- parovarian, simulating ascites 60**
- peripancreatic 811
- peritonæum, lesser sac 811
- retention, in kidneys 15
- of mucous gland in mouth 590
- salivary 590
- in senile kidneys 14
- retroperitoneal 811
- abdominal distention from 61
- ascites simulated by 61
- carcinoma simulated by 802
- dilatation of stomach from 218
- jaundice from 407
- in left hypochondrium 812
- pyloric stenosis from 218
- in sarcoma 823
- serosal, spermatozoa in 588
- translucency tests of 588
- sebaceous, on back 888
- of face 824, 888
- hernia simulated by 593
- inflamed 593
- lipoma distinguished from 888
- on scalp 888
- of scrotum 769, 849
- suppurating, occipital glands enlarged from 473
- thyroid gland simulated by 876
- at umbilicus 593
- vulval swelling due to 853
- scrosis, of kidney, hydronephrosis simulated by 450
- suppurating, of scrotum 767
- suprahypoid, tongue swollen from 852
- tarry, of ovary, pelvic pain from 573

Cyst, contd.

- of testis, account of 587
- thoracic, unilateral sweating of head from 803
- of thyroglossal duct 852
- thyroid gland, adenoma simulating 876
- carcinoma simulated by 876
- haemorrhage into 876
- urachal, bladder distention simulating 815
- ovarian cyst simulated by 815, 843
- pain in hypogastrium from 815
- pelvic swelling due to 840
- tuberculous peritonitis simulated by 815
- of vagina, presenting externally 653
- vas aberrans of Haller 587
- Wolffian body 811
- Cystallina 495
- Cystic change in fibroid of uterus 483, 488
- disease of breast 838
- carcinoma from 838
- cystic epididymis allied to 851
- pain in arm from 838
- breast from 838
- duct, carcinoma of, colic from 147
- obstructed, gall-bladder enlarged from 316
- by gall-stone 316
- stone in colic from 147
- goitre 876
- hyroma of axilla 816
- lipoma simulated by 816
- microscope in diagnosing 816
- kidneys, abdominal distention from 15
- account of 57, 450
- achme in lions from 450
- incidence of 450
- albuminuria from 9, 655
- anuria from 55, 57
- arterio-sclerosis with 57, 450
- ascites uncommon with 57
- bilateral tumour with 57
- blood-pressure raised with 57
- Cheyne - Stokes breathing from 139
- in childhood 352
- chronic nephritis simulated by 57
- difficulty in delivery due to 15
- enlarged 352, 448
- flatulence from 57
- general account of 15
- lassitude with 57
- hamaturia with 348, 352, 353, 450
- first sign of 15
- headache from 57
- high blood-pressure with 450
- hydronephrosis distinguished from 353
- intestinal obstruction from 15
- in new-born 15
- oedema uncommon with 57
- in old age 15
- polyuria from 353, 654, 655
- with porcephalus 622
- renal tube-casts due to 655
- tumour with 353, 450
- specific gravity of urine low with 353
- spleen simulated by 812
- without symptoms 450
- tumour from 15
- uræmia from 57, 139
- urine changes with 15, 57, 450
- vomiting with 57
- ovary, extra-uterine gestation simulated by 842
- felt per rectum 728
- Cysticerci, eosinophilia from 503

- - colon affected by .. 95
- - crusts in .. 95
- - Duhring's disease and .. 126
- - eczema distinguished from .. 918
- - eosinophilia in 271, 918
- - erythema in .. 865, 918
- - finger affected by .. 301
- - herpes zoster distinguished from .. 914
- - gushed from .. 914
- - itching in 126, 658, 865
- - mouth affected by 93, 95
- - multiform character .. 918
- - pityriasis rubra from 746
- - pustules in .. 918
- - pyrexia in .. 96, 709
- - scabs in .. 918
- - scalp affected in .. 865
- - skin eruption of .. 126
- - sleeplessness in .. 126
- - tenderness of scalp from .. 865
- - urticaria in .. 126, 918
- - vagina affected by .. 95

Dermatitis herpetiformis, contd.

- vesicles in	126, 865, 913, 918
- no weeping in	918
- due to hexanitro-di-phenylamine	917
- Hippomane mancinella	916
- hops	916
- horseradish	916
- Humen elegans	916
- hydrogen peroxide	917
- hydroquinone	917
- Indian bean	915
- iodides	920
- iodine	915
- iodotorm	918
- Iris florentina	916
- itching in	659
- due to ivy	916
- jaborandi	916
- in jam-makers	515
- due to Juniperus sabina	916
- virginiana	916
- knot grass	916
- lacquer tree	916
- lady's slipper	915
- Lappa officinalis	916
- laundry work	916
- laurel	916
- leatherwort	915
- leopard's bane	915
- Leucanthemum vulgare	916
- lilac	916
- lime	915, 917
- Lobelia inflata	916
- lotion	915
- Lycopersicon esculentum	916
- in lye-dye-makers	917
- due to lye	917
- mahogany	916
- mancinella	916
- manrake	916
- marigold	915
- Marula cotula	916
- in masons	917
- due to mayweed	916
- meadow cotton	915
- in medicine-makers	917
- due to mercury	917
- mesotan	915
- metal	917
- mineral acids	915
- mortar	915
- moth hairs	659
- Mucuna pruriens	916
- mustard	916
- gas	917
- Myrcia acris	916
- nasturtium	916
- Nerium oleander	916
- nettle	916
- night-flowering cereus	915
- occupation	124, 515, 659, 915, 917
- account of	916
- itching in	658
- from occupational dermatoses	515
- in orange-peelers	515
- due to orris root	916
- ox-eye daisy	916
- in painters	917
- due to Papillaris capolliti	131
- paraphenylenediamine	918
- parasticides	915
- parsnip	916
- Pastinacea sativa	916
- Pediculoides ventricosus	916
- pepper	916
- phenol	918
- phenyl-hydrazine	917
- in photographers	917
- due to Phytolacca decandra	916
- picric acid	917
- Pilocarpus pennatifolius	916
- pimento	915
- upas tree	915, 916
- Piper nigrum	916
- plants	915
- Podophyllum pellatum	916
- poison ivy	916
- poke	916
- Polygonum aviculare	916
- punctatum	916
- potassium cyanide	917
- in poultry dealers	917
- due to prickly elder	915

Dermatitis, contd.

- due to Primula obconica	124, 278, 515, 659, 915, 916
- parinosa	916
- sinensis	916
- in printers	917
- pruriginosa polymorpha	917
- recurrens graviditatis	123
- due to pulsatilla	915
- pustular, from tartarated antimony (Fig. 544)	686
- due to Pyrethrum car-nium	916
- cinnaricofolium	916
- roscum	916
- pyrogallac acid	917
- queen's root	916
- ragweed	916
- Ranunculus acris	916
- bulbosus	916
- scleratus	916
- red pepper	915
- reeds	916
- resin	124
- Rhus metopium	916
- toxicodendron	659, 915, 916
- venenata	916
- vernicifera	916
- rodinal	917
- rose-picker's	915, 916
- due to rosewood	916
- in rubber-workers	917
- due to rue	916
- Ruta graveolens	916
- salicylic acid	918
- Sanguinaria canadensis	916
- satin-wood	124, 515, 659, 915, 916, 917
- sayin	916
- sawdust	917
- scilla	916
- seborrhoeic napkin	916
- reaction affected by	498
- parts affected by	498
- due to Sedum acre	916
- septic, small-pox simu-lated by (Fig. 543)	686
- in shellac workers	917
- silicate workers	917
- silk winders	917
- silver platers	917
- due to Sinoplocarpus fetidus	916
- Sinapis simplex	916
- Sixximbrium officinale	916
- skunk cabbage	916
- smart weed	916
- soap	515, 659, 915, 917
- soda	917
- solidago	916
- South African boxwood	916
- splints	920
- spruce	915
- spurge	915
- squill	916
- steam	916
- Stillingia sylvatica	916
- stings	920
- stoncrop	916
- sugar	659, 915, 917
- sulphur	918
- sunflower	916
- Syringa vulgaris	916
- in tanners	917
- due to tar	124, 917
- teak	916, 917
- Tectonia gravidis	916
- tetrayl	917
- tetterberry	915
- Thapsia garganica	916
- Thuja occidentalis	916
- timpans	916
- tomato leaves	916
- trades causing	278, 917
- due to trinitrotoluene	917
- Tropaeolum majus	916
- Tryoxylus longior	916
- turpentine	124, 915, 917, 918
- urticaria	915, 916
- vanilla	915, 916
- varnish	124
- Veratrum album	916
- viride	916
- Vercy lights	917
- vesicant	915
- vesicles in	515
- due to volatile oils	124
- in washerwomen	917

Dermatitis, contd.

- due to waters	515
- wild hops	915
- wood anemone	915
- woods	916
- X rays	275, 917
- yellow chrome	916
- (and see Erythema; Vesicles, etc.)	
- Dermatology (Fig. 654)	856
- warts in	935
- Dermato-mucosa-mycosis	702
- Dermato-mycosis	569, 702, 886
- illustrated (Fig. 559)	702
- Dermato-neuro-mycosis	702
- Dermato-onychosis	912
- Dermatoses, bullous (see Bullous Dermatoses)	
- occupational, oedema of arms from	516
- face from	516
- neck from	516
- Dermoid cyst (see Cyst)	
- Descemet's membrane	890
- Descending colon (see Colon)	
- Desert, delirium in	211
- Desire, sexual, pain in testis from	589
- Desquamation	281
- branny, in Paget's disease	887
- in cheilopompholyx	124
- erythema scarlatini-forme	281
- due to iodine	918
- in pellagra	279
- scarlatina	12, 124, 281, 763
- (and see Scabies)	
- Detachment of retina (see Retina)	
- Detonators, fulminate of mercury in	917
- Detrusor urine, nerve-supply of (Fig. 477)	611
- paralysis of, retention of urine from	493, 495
- Deutero-albumose	20
- Dextrosuria (see Glycosuria)	
- Dhoobie's itch (see Itch)	
- Diabetes, azotic	655
- polyuria in	654
- bronzed, account of	335
- alcoholism and	335, 644
- cirrhosis of liver in	335, 467, 644
- pancreas in	335
- glycosuria in	335, 467
- liver enlarged in	467
- hard in	467
- Perl's reaction in	32, 335, 467
- pigmentation of skin in	335, 467, 644
- Prussian blue reaction in liver in	32
- insipidus, account of	655
- from aneurysm at base of brain	655
- cerebral haemorrhage	655
- softening	655
- thrombosis	655
- tumour	655
- excessive drinking in	655
- after fractured base	655
- from fright or funk	655
- glioma at base of brain	655
- without gross nerve lesion	654, 655
- from gumma at base of brain	655
- increased frequency of micturition from	490
- from medulla oblongata lesion	654, 655
- pituitary injections	655
- stopping	655
- polyuria in	490, 650, 653, 654, 655, 874
- from shock	655
- specific gravity of blood in	655
- urine low in	655
- thirst in	874
- total urine solids normal in	655
- urine colourless in	902
- in war	655

Diabetes, contd.

- mellitus, abdominal pain in	486
- absent in carcinoma of pancreas	335
- chronic pancreatitis	335
- pancreatic calculus	335
- cyst	335
- acetone and	3, 331, 655
- acidosis in	3, 211, 330, 331, 334
- in acromegaly	331, 656
- acute	334
- alcoholism simulating	331
- age importance in	334
- in prognosis of	329
- air hunger in	111, 112
- albuminuria in	16, 334
- alcoholism simulating	111
- alimentary glycosuria and	331, 655
- amenorrhoea in	23
- ants, attracted to urine in	334
- from anxiety	331
- appetite excessive in	334
- arterial degeneration and	334
- arteriosclerosis and	318, 322
- atheroma in	894
- balanitis from	764
- big heart with	334
- blood-sugar in	332, 333
- estimations in	330
- raised in	334
- boils in	334, 335
- brachial neuralgia in	544
- neuritis from	544
- bradypnoea in	110, 111, 112
- in Brahmins	335
- bulbar paralysis in	335
- carbuncles in	334
- carcinoma simulated by	461
- cataract from	334, 335
- cerebral haemorrhage in	335
- simulating	331
- softening in	335
- Cheyne-Stokes	335
- breathing in	335
- coma in	3, 111, 112, 153, 154, 213, 334, 335, 486, 928
- combined sclerosis in	335
- concussion simulating	331
- constipation in	158, 162
- craving for food in	58
- delirium in	211, 213
- delusions in	335
- dementia in	335
- diabetetic acid in urine in	3, 331, 655
- dietetic restrictions	334
- discovered accidentally	334
- drowsiness in	111, 928
- eczema of penis in	334, 499
- perineum in	579
- serotum in	334
- thighs in	334
- vulva in	499
- excessive weight and	330
- from excitement	331
- familial incidence of	335
- flies attracted to urine in	334
- fractured base simulating	331
- gangrene in	317, 318, 322, 335
- of leg in	894
- lung in	322, 335, 791
- toe in	334
- general wasting in	78
- glycosuria in	83, 213, 329, 330, 334, 486, 655
- gout with	334
- in Graves' disease	331
- hair affected in	334
- shed in	335
- headache in	371
- hepatoptosis in	461
- high blood-pressure with	334

Diabetes mellitus, contd.

- in Hindoos . . . 335
- hypothermia in . . . 392
- impending coma in . . . 110
- impotence in . . . 393
- increased frequency of micturition from . . . 490
- from infective illness . . . 334
- influenza . . . 334
- injury . . . 334
- insanity in . . . 335
- insidious infection causing . . . 335
- insulin in 112, 333, 344
- irritability in . . . 334, 405
- in Jews . . . 335
- knee-jerks absent in . . . 83, 334, 452
- in lactation . . . 332
- from late nights . . . 331
- lateral sclerosis in . . . 335
- lipæmia in . . . 72, 334
- lobar pneumonia in . . . 334, 335
- loss of weight in . . . 334, 934
- mania in . . . 335
- from measles . . . 334
- medullary degeneration in . . . 335
- melancholia in . . . 335
- mental degeneration in . . . 335
- mentality changed in . . . 334
- meteorism in . . . 486
- minor degrees 329, 330
- muscular atrophy in . . . 78, 335
- weakness in . . . 334
- in myxœdema . . . 656
- nails affected in . . . 334
- shed in . . . 335, 496
- nerve changes in . . . 335
- from nerve shock . . . 334
- nervous fatigue . . . 330
- neuritis in 178, 318, 610
- neuro-retinitis in . . . 335
- obesity preceding . . . 330, 506
- ophthalmoscope in . . . 334
- optic atrophy in . . . 335
- neuritis in . . . 335
- overweight and . . . 334
- from overwork . . . 331
- oxybutyric acid in . . . 331
- pain in abdomen in . . . 111
- legs in . . . 83
- limbs in . . . 83
- scalp in . . . 867
- pancreas and . . . 335
- pancreatic colic in . . . 148
- from pancreatitis . . . 131
- paræsthesia in . . . 83
- paralysis in . . . 83
- of external popliteal nerve from . . . 610
- perforating ulcer of foot in . . . 335, 894
- peripheral neuritis from . . . 80, 83, 318, 335, 571
- phthisis in . . . 334
- polyuria in 334, 490, 650, 653, 654, 655, 874
- in pregnancy . . . 332
- prognosis in 3, 329
- pruritus due to . . . 658
- psychic changes in . . . 335
- pupil reacting to light but not to accommodation in . . . 674
- race incidence of . . . 335
- renal glycosuria simulating . . . 333
- sex incidence of . . . 334
- from short sleep . . . 331
- sight impaired in . . . 335
- simulated after anaesthetics . . . 332
- drugs . . . 332
- opiates . . . 332
- by glycuronic acid . . . 332
- skin dry in . . . 334
- lustreless in . . . 334
- specific gravity of urine in . . . 331, 655
- high in . . . 334
- low in . . . 334
- stress and strain causing . . . 335
- stupor in . . . 111

Diabetes mellitus, contd.

- sugar in cerebro-spinal fluid in . . . 383
- threshold in . . . 333
- tolerance test in 333
- sweet acetone breath in . . . 213
- without symptoms . . . 334
- tenderness of scalp in . . . 867
- thirst in . . . 334, 874
- tongue deep red in . . . 334
- large in . . . 334
- from tonsillitis . . . 334
- tooth infection . . . 335
- trophic changes in . . . 335
- types of . . . 334
- ulcer of leg in . . . 894
- urine colour in . . . 902
- vomiting in . . . 928
- vulvitis in . . . 334
- wasting in . . . 38, 461
- from worry . . . 331
- xanthoma in . . . 335, 889
- (and see Glycosuria)
- phosphatic . . . 637, 655
- aching in loins in . . . 637
- emaciation in . . . 637
- polyuria in . . . 637, 654
- thirst in . . . 637
- Diabetic coma (see Coma)
- gangrene (see Gangrene)
- Diacetic acid (see Acid)
- DIACETURIA . . . 3, 214
- acetonuria and . . . 214
- in alcoholism . . . 331
- causes of . . . 3
- in cyclical vomiting of children . . . 479, 928
- diabetes . . . 330, 331, 655
- ferric chloride reaction of . . . (Fig. 184) 214
- Diagrams (see Illustrations)
- Dial, noises in head from . . . 504
- vertigo from . . . 504
- Diamond miners, phthisis in . . . 363
- silicosis in . . . 363
- Diamonds in rectum . . . 726
- Diaphragm, bullet wound of, stomach hernia due to . . . 376
- deformed in phthisis from . . . (Fig. 148) 134
- from pleural adhesions (Fig. 119) . . . 135
- fifth cervical nerve root supplying . . . 864
- flattened and drawn up after pleuritic effusion . . . (Fig. 384) 481
- fourth cervical nerve root supplying . . . 864
- immobile in pneumothorax . . . 532
- immobilized by empyema . . . 807
- pleural effusion . . . 807
- subphrenic abscess . . . 807
- lesions, pain in shoulder from . . . 582, 583, 864
- low and flat, from pneumothorax . . . (Fig. 511) 648
- myoclonus of, in encephalitis . . . 173
- hiccough from . . . 173
- nerve supply of . . . (Fig. 474) 618, 620
- overstrained from coughing . . . 532
- pain due to . . . 532
- painful in general peritonitis . . . 734
- paralysis of (see Paralysis)
- pericardium adherent to . . . 71
- phantom tumour and . . . 843
- phrenic nerve supply . . . 185, 864, 927
- pushed down by empyema . . . 807
- pleural effusion . . . 807
- up by abdominal tumour . . . 374
- ascites . . . 374
- hydatid cyst . . . 470
- liver abscess . . . 464
- (Fig. 379) 465
- in meteorism . . . 805
- by pregnancy . . . 374

Diaphragm pushed up, contd.

- by subphrenic abscess (Fig. 116) 133
- tympanites . . . 374
- sinuous, from adhesions, skiagram (Fig. 303) 375
- skiagram of (Fig. 215) 248
- normal (Fig. 301) 374
- stationary with pleurisy . . . 401
- stomach herniated through, from bullet injury . . . 376
- heart impulse displaced by . . . 376
- X rays in diagnosing . . . 376
- strain of, from coughing . . . 863
- tenderness in chest from lesion of . . . 864
- third cervical nerve root supplying . . . 864
- in vomiting . . . 927
- X rays in defining . . . 134, (Fig. 384) 481
- (Fig. 623) 801
- Diaphragmatic hernia (see Hernia)
- neuralgia . . . 531
- pleurisy (see Pleurisy)
- DIARRHŒA . . . 214

- chronic . . . 216
- in chronic dysentery . . . 872
- nephritis . . . 217
- cirrhosis of liver . . . 217
- colitis . . . 700, 872
- collapse from . . . 215
- connective tissue in stool in . . . 216
- constipation after . . . 165
- convulsions with . . . 182
- depression with . . . 216
- from diet indiscretion . . . 216
- Distoma hepaticum . . . 410
- in diverticulitis . . . 556
- from drugs . . . 216
- in dysentery 98, 99, 216, 709
- dyspeptic . . . 215
- from emotion . . . 217
- epidemic . . . 215
- in epidemic jaundice . . . 420
- exophthalmic goitre . . . 216
- explosive . . . 217
- from carcinoma of colon . . . 394
- rectum . . . 394, 727
- from faecal impaction . . . 217
- fatty, from pancreatic lesions . . . 538
- fever with . . . 216
- fontanelle sunken from frothing, in sprue . . . 47
- in gastritis . . . 930
- gastrogenic . . . 216
- hard faeces after . . . 165
- in Henoch's purpura . . . 102, 428
- hill . . . 217
- hydrochloric acid in . . . 216
- controlling . . . 216
- indicanuria from . . . 395
- in infants . . . 215
- acetonuria from . . . 3
- infective, cholera simulated by . . . 872

Diarrhœa, contd.

- in influenza . . . 570
- with intestinal fermentation . . . 303
- in intestinal obstruction . . . 303
- from irritants . . . 217
- in lardaceous disease . . . 784
- 10, 47, 217, 469, 479
- marasmus from . . . 217
- after meals . . . 280
- in Meigs's disease . . . 217
- morning . . . 217
- from mucocutaneous colitis . . . 872
- muscle fibres in stools in . . . 216
- from mushroom poisoning . . . 421
- nervous . . . 217
- from new growth . . . 216
- pancreatic . . . 216
- paradoxical . . . 217
- in pellagra . . . 279
- pernicious anemia . . . 216
- from phthisis . . . 217
- in polymyositis . . . 702
- pseudo-, in dyschezia . . . 159
- from ptomaines . . . 216
- 278, 650, 872
- pulse feeble with . . . 216
- in pyæmia . . . 738
- with pyonephrosis . . . 450
- from rectal crises . . . 217
- rectal examination in cases of . . . 215, 216
- in rickets . . . 182
- severe, from arsenic . . . 650
- in cholera . . . 650
- collapse from . . . 392
- hypothermia from . . . 392
- in infants . . . 650
- ptomaine poisoning . . . 650
- polycythæmia from . . . 650
- from sphincter trouble . . . 217
- sprue . . . 47, 217, 709
- spurious, from carcinoma of colon . . . 98
- rectum . . . 98
- stool examinations in . . . 215
- summer . . . 215
- of infants, blood per anum from . . . 96
- polycythæmia in . . . 650, 651
- tenesmus in . . . 872
- in suppurative phlebitis . . . 738
- from syphilitic proctitis . . . 100
- in tabes dorsalis . . . 217, 874
- test meals in cases of . . . 215
- tetany with . . . 2, 189
- thirst due to . . . 875
- from tuberculosis . . . 217
- tuberculous bowel . . . 562
- peritonitis . . . 806
- typhoid fever . . . 216, 688
- ulcerative colitis . . . 217
- 564, 806, 812, 872
- unripe fruit . . . 216, 872
- urates from . . . 900
- urine concentrated from . . . 900
- from venous stasis . . . 217
- and vomiting (and see Diarrhœa, Zymotic)
- 101, 106, 216
- general wasting from . . . 78
- muscular atrophy from . . . 78
- zymotic, blood per anum in . . . 101
- in children . . . 101
- enterocolitis in . . . 101
- Gaertner's bacillus in . . . 479
- marasmus from . . . 479
- Morgan's bacillus in . . . 479
- summer and . . . 101
- vomiting in . . . 101
- Diastase co-efficient of urine . . . 216
- test . . . 19
- Diastolic bruit (see Bruit)
- collapse of neck veins from adherent pericardium . . . 265
- shock from adherent pericardium . . . 265

Disulphide (see Bisulphide)

Disuse, contracture from 178
 - muscular atrophy from 78
Diuretics, polyuria after 653, 654
Diuretin, angina ab-
 - minalis and 396, 538
 - pectoris and 396
 - polyuria after 653
Divarcation of recti 636
 - - evident on raising head 593
 - - pain at umbilicus from 593
 - - test for 436
 - - visible peristalsis due to 636
Divers, ataxia in 200
 - noises in head in 504
 - tinnitus in 878
 - vertigo in 504
Divergent strabismus, diagram of (Fig. 188) 221
Diverticulitis abscess (see Abscess)
 - acute, abscess from 296, 556
 - - account of 556
 - - acute tenderness with 556
 - - age incidence of 556
 - - appendix epiploica and 556
 - - blood per anum from 96
 - - from chronic colitis 556
 - - colic simulated by 149
 - - from constipation 556
 - - diarrhoea with 556
 - - general peritonitis from 149, 556
 - - 'left-sided appendicitis' 556
 - - micturition frequent with 556
 - - opening into bladder 296
 - - operation for 556
 - - pain in iliac fossa from 556, 556
 - - pulse-rate raised with 556
 - - pyosalpinx simulated by 556
 - - pyrexia with 556
 - - rectal examination in 556
 - - rigidity of muscles over 556
 - - from sacculi 556
 - - sex incidence of 556
 - - swelling in left iliac fossa in 816
 - - tongue coated in 556
 - - tumour with 556
 - - urgent laparotomy for 149
 - - vaginal examination in 556
 - - vomiting from 556
 - - age incidence of 161, 698
 - - barium enema in diagnosing 161
 - - blood per anum from 96, 350
 - - carcinoma simulated by 98, 167, 168, 356, 557
 - - simulating 827
 - - colic from 148
 - - colitis simulating 700
 - - hamaturia from 348, 356
 - - intestinal obstruction from 167
 - - intestino-vesical fistula from 356
 - - intussusception simulating 829
 - - irritability of bladder with 161
 - - laparotomy in diagnosing 98, 356, 557, 693, 827
 - - mucus per rectum from 555
 - - pain in iliac fossa from 555
 - - pelvic abscess from 356, 557
 - - pericolic from 162
 - - periprostic abscess simulated by 557
 - - periprostic abscess simulated by 557
 - - pyosalpinx simulated by 557
 - - pyrexia in 161
 - - rectal examination in diagnosing 557
 - - skiagram of (Fig. 446) 557
 - - spastic constipation simulated 161
 - - stricture of colon from 162

Diverticulitis, contd.

- symptoms like appendicitis in 816
 - ulcerating into bladder 356
 - vaginal examination in diagnosing 557
 - vesicocolic fistula from 162
 - - X rays in diagnosing 698
Diverticulum of bladder, cystoscope in diagnosing 447
 - - stone in 721
 - - swelling in iliac fossa due to 829
 - - X rays in diagnosing 447
 - - colon, opaque enema in diagnosing (Fig. 141) 162
 - - perinephric abscess from 438
 - - X rays in diagnosing 162
 - - Meckel's, obstruction from 167
 - - of oesophagus, 242
 - - dysphagia due to 927
 - - food regurgitation due to 927
 - - skiagram of (Fig. 206) 242
 - - vomiting simulated by 927
Diving, epistaxis due to 274
 - fainting due to 297
 - fracture of spine from 304
 - gangrene of lung after 323
 - tympanic membrane ruptured in 522
Dizziness in aortic regurgitation 259
 - apoplexy preceded by 184
 - on boat 911
 - at edge of cliff 911
 - heights 911
 - in phosphuretted hydrogen poisoning 421
 - train 911
Doses, hydatid disease and 807
 - Taenia echinococcus in 807
 - tolylmedamine pain due in 421
Dose-bite, see Bite
Dogwood, Australian, dermatitis due to 915
 - dermatitis due to 916
Domestic servants, acroparasthesia in 545
Dope, aeroplane (see Aeroplane Dope)
Doromium pardalianche, dermatitis due to 915
Dorsal nerve-root (see Nerve Root)
 - nerves (see Nerve)
 - segments (see Spinal Segments, Dorsal)
Dorsalis pedis artery, cessation of pulse in 46
 - - embolism of, in infective endocarditis 46
 - - penis nerve, distribution of (Fig. 580) 748
Dorsiflexion of foot, normal extent of 143
Dorsiflexors, paresis of, in peripheral neuritis 75
Dots, Maurer's, in malaria parasites 42
 - - Schuffner's, in malaria parasites 42
 - - Double consciousness 25
 - - hemiplegia (see Hemiplegia)
 - - pupil (see Pupil)
 - - vision (see Diplopia)
Double-jointed thumbs in Mongolian 236
Douches, sterility due to 793
Douglas's pouch, carcinoma in 729
 - - left per rectum 729
 - - hydatid in 66
Dragging in chest from mediastinitis 535
 - of foot (see Foot)
 - leg in hysteria 608
 - lumbosacral, from pyosalpinx 724

Dragging, contd.

- sense of, from carcinoma of liver 468
 - of toes in spastic paralysis 607
Drains, bad, fainting due to 297, 299
Draught in motoring 567
 - myalgia from 572
 - pain in back from 567
 - stiff neck from 528
 - Drawing-up of legs due to intussusception 101
Dreams, horrifying, notes on 499
 - - psycho-analysis and 499
 - - (and see Nightmares; and Night Terrors)
Dreamy consciousness from uncinate tumour 87
Dresbach's anaemia, elliptic red cells in 51
Dribbling of saliva in babies 661
 - - bulbar paralysis 661, 731
 - - facial paralysis 661
 - - mercurial stomatitis 661
 - - ptyalism and 660
 - - (and see Salivation)
 - - urine (see Urine, Dribbling)
Drink (see Alcohol)
Drop-foot (see Foot-drop)
Drop-wind (see Wind-drop)
Dropped beats, account of 665
 - - digitalis causing 664
 - - ectocystole stimulating 670
 - - heart-block simulated by 664
 - - from heart-block 667
 - - pulse irregular from 664
 - - pulsus alternans simulated 671
 - - from sino auricular block 665
 - - big toe in Tooth's peroneal atrophy 79
Dropping of colon, skiagrams of (Figs. 472, 478) 517
 - stomach, X rays in diagnosing (Fig. 476) 517
Dropsy, general (see Oedema)
Drosera rotundifolia, dermatitis due to 915
Drowning from cramp 188
Drowsiness in acute yellow atrophy 315
 - anuria 55, 56
 - botulism 244
 - cerebrospinal meningitis 278
 - cirrhosis of liver 414
 - after convulsions 181
 - in diabetes mellitus 111, 928
 - from encephalitis 156, 157, 278, 632, 701
 - headache with 370
 - from hypopituitarism 509
 - obesity and 509
 - in phosphorus poisoning 421
 - pituitary infarctum 236
 - trypanosomiasis 708
 - uraemia 55, 56, 372
Drug habit from acetanilide 113
 - - cocaine 113
 - - heroin 113
 - - morphia 113
 - - out of condition from 113
 - - shortness of breath from 113
 - - sudden stopping of, delirium from 212
 - - poisoning, coma from 181
 - - convulsions from 181
 - - rash from bromide 682
 - - copula 479
 - - iodide 682
 - - itching in 477, 479
 - - pityriasis rubra from 746
 - - small-pox simulated by 687
 - - syphilis simulated by 479
 - - rashes, list of 917
 - - (and see under Erythema, etc.)
Drug-taker, shifty eyes of 299
Drugs, amblyopia from 94, 922
 - anamia from 44, 515
 - aphrodisiac, certain 657

Drugs, contd.

- ataxy due to 77
 - blood per anum from 96, 102
 - bradypnoea from 110
 - bright yellow urine from 903
 - cacogestasia due to 860
 - coma from 110, 154
 - convulsions from 181, 182
 - cyanosis from 196
 - deafness from 207
 - delirium from 212
 - dermatitis due to 917
 - diarrhoea from 216
 - diazo-reaction from 218
 - epiphora from 272
 - fainting due to 297, 299
 - foul breath from 112
 - glycosuria from 332
 - green vision from 335
 - haematemesis from 336
 - hamaturia from 348
 - - simulated after 904
 - haemoglobinuria from 357
 - headache from 371
 - intestinal colic from 525
 - leucocytosis from 453
 - loss of weight due to 934
 - methaemoglobinemia from 202, 650, 651
 - methaemoglobinuria after 196
 - noises in head from 504
 - oedema due to 511, 515, 516
 - palpitation from 594
 - photophobia from 649, 640
 - pigmentation of skin from 645
 - polycythemia from 650, 651
 - porphyria from 904
 - priapism from 657
 - ptyalism from 661
 - pulse slow from 110
 - purpura due to 676, 677
 - pyuria cases and 798
 - rash due to 917, 920
 - scaly eruptions due to 744
 - scrotoma from 913
 - shortness of breath from 113
 - stranguary due to 798
 - stupor from 110
 - tachycardia from 550, 858
 - tetanus due to 873
 - thirst due to 875
 - tinnitus due to 879
 - tongue swollen from 851, 852
 - tremor due to 879, 881
 - urine abnormal coloured from 903, 904
 - vertigo from 504
 - vomiting due to 928
 - wheals due to 935
 - yellow vision due to 926
Drum-beating noise in head 503
Drummers, cramp in 189
Drumstick bacilli in tetanus 521, 885
Drunk, blind, diabetes simulated by 331
 - or dying 154
Drunks, glycosuria in 213
Dryness of mouth, cacogestasia due to 860
 - - in fevers 860
 - - nasal mucosa from fifth nerve paralysis 756
Duchenne's palsy 618
Ducrey's bacillus in soft chancre 854
Duct, Bartholin's, red and inflamed 239
 - bile (see Bile Duct)
 - carcinoma of breast 839
 - - blood from nipple due to 227
 - - cystic (see Cystic Duct)
 - - ejaculatory, gonococcus infecting 228
 - - hepatic, stone in, colic from 147
 - - lachrymal, obstruction of 273
 - - omphalo-mesenteric, cyst of 593
 - - pancreatic, catarrh of 411
 - - stone in, colic from 148
 - papilloma of breast, blood from nipple due to 227

- very large child . . . 250
- weak uterine contractions . . . 250
- Dystrophia adipogenitalis from dyspituitarism . . . *Fig. 39c* 503
- Dystrophy, muscular (see Myopathy)
- Dysuria (see Micturition, Difficulty)

- EAR, bee-sting of, earache from . . . 252
- blackened, in ochronosis . . . 906
- blood from, due to foreign body . . . 522
- fracture of skull . . . 522
- instrumentation . . . 522
- malignant ulceration . . . 522
- in malingering . . . 522
- due to needle . . . 522
- in neurosis . . . 522
- due to pencil . . . 522
- rupture of tympanic membrane . . . 522
- toothpick . . . 522
- glass on, noises in head from . . . 504
- vertigo from . . . 504
- blueness of, blue-brain and . . . 204
- boil in (see Boil in Ear)
- bubbling in, due to otitis media . . . 878
- cartilage, sodium urate in . . . 428
- cerebrospinal fluid from, from fractured skull . . . 155
- chilblain of, earache from . . . 252
- cholesteatoma of . . . 522
- clicking in, due to dilator tube . . . 878
- salpingo-pharyngeus . . . 878
- coarse, in cretin . . . 290
- congenital syphilis of . . . 912
- of corn in trachea, gangrene of lung from . . . 323
- cracking in, due to dilator tube . . . 878
- salpingo-pharyngeus . . . 878
- creaking in, due to cerumen . . . 878
- foreign body . . . 878
- cyanosis affecting . . . 195
- in detecting pulsation . . . 260
- diptheria of . . . 522
- discharge from (see Discharge from Ear; and Otorrhoea)

Ear, contd.

- disease, cerebral abscess from . . . 184
- tinnitus with . . . 877, 878
- without tinnitus . . . 878
- eczema of (see Eczema)
- epithelioma of, earache from . . . 252
- pre-audicular gland enlarged from . . . 473
- exostosis of, deafness from . . . 207
- meatus obstructed by . . . 207
- foreign body in (see Foreign Body)
- frost-bite of, earache from . . . 252
- furuncle in (see Boil in Ear)
- gangrene of, in Raynaud's disease . . . 320
- gnat-bite of, earache from . . . 252
- gout of, earache from . . . 252
- growth in, deafness from . . . 207
- meatus obstructed by . . . 207
- hamatoma of, earache from . . . 252
- in general paralysis . . . 305
- hamorrhage from (see Ear, Blood from)
- herpes of . . . 253
- zoster of, with facial paralysis . . . 604
- lissing in . . . 878
- humming in . . . 878
- impetigo of, earache from . . . 252
- injury of (see Injury)
- instrumentation of, blood due to . . . 522
- internal, hamorrhage into (see Hamorrhage)
- infection of, tinnitus due to . . . 879
- vertigo from disease of . . . 912
- irritation in, nystagmus from . . . 505
- vertigo from . . . 505
- large in, Mongolian idiocy . . . 293
- lobule absent in, progeria . . . *Fig. 29d* 237
- Arnold's nerve supplying . . . 195
- lupus, erythematous, affecting . . . 746
- malignant disease of, blood due to . . . 522
- middle (see Middle Ear)
- mosquito-bite of, earache from . . . 252
- movement of, lost in facial paralysis . . . 603
- musical noises in . . . 878
- nerve-supply of . . . 253
- noises in, various . . . 878
- (and see Noises in the Head; and Tinnitus)
- ossicles of . . . 205
- pain in (see Pain)
- perichondritis of, deafness from . . . 207
- earache from . . . 252
- pitcher-shaped in Mongolian idiocy . . . 293
- polypus in (see Polypus)
- pulsation detected by . . . 846
- Raynaud's disease affecting . . . 320, 852
- referred pain in . . . 253
- roaring in . . . 878
- rodent ulcer of, earache from . . . 252
- rubbing in, teething . . . 253
- seborrhoeic dermatitis, affecting . . . 498
- secondary syphilitic ulceration in . . . 522
- singing in, in arteriosclerosis . . . 14
- chronic nephritis . . . 14
- sore on, pre-audicular gland enlarged from . . . 473
- syphilis of (see Syphilis)
- syringing, vertigo from . . . 912
- telephone . . . 879
- tenderness in, from boil . . . 522
- thick in myxodema . . . 290
- tophus of . . . *(Fig. 34d)* 429

Ear, contd.

- ulceration of (see Ulceration)
- vertigo from lesion of . . . 912
- wasp-sting of, earache from . . . 252
- wax in (see Wax in Ear)
- whistling in . . . 878
- EARACHE . . . 252
- from adenoids . . . 253
- bee-sting . . . 252
- boil in meatus . . . 252
- carcinoma of pharynx . . . 253
- tonsil . . . 253
- catarrhal otitis . . . 253
- chilblain . . . 252
- eczema . . . 252
- epithelioma . . . 252
- fainting due to . . . 297
- from foreign body in meatus . . . 252
- frost-bite . . . 252
- furunculosis . . . 252
- gnat-bite . . . 252
- gout . . . 252
- hamatoma of auricle . . . 252
- impetigo . . . 252
- injury . . . 252
- list of causes of . . . 252
- from mastoid abscess . . . 694
- mosquito bite . . . 252
- otitis media . . . 694
- perichondritis . . . 252
- polypus in meatus . . . 252
- retro-pharyngeal abscess . . . 253
- rodent ulcer . . . 252
- sarcoma of pharynx . . . 253
- tonsil . . . 253
- syphilis . . . 252
- syphilitic ulceration of pharynx . . . 253
- tuberculous ulceration of pharynx . . . 253
- wasp-sting . . . 252
- wax . . . 252

- amidol . . . 917
- anidrosis in . . . 803
- baldness from . . . 91, 92
- from balsam of Peru . . . 917
- in barmads . . . 917
- barbers . . . 917
- of bathing-drawers area . . . 742
- from benzine . . . 917
- by bichromate of potash . . . 917
- in bleachers . . . 917
- blood crusts in . . . 598
- brown stain after . . . 745
- burning in . . . 682, 914
- from carbide of calcium . . . 917
- carbon bisulphide . . . 917

Eczema, contd.

- in carpenters . . . 917
- cheiropompholyx simulating . . . 919
- in chemists . . . 917
- chimney-sweeps . . . 917
- from chloride of lime . . . 917
- in cleaners . . . 917
- confectioners . . . 917
- crops in . . . 914
- crusts in 682, 742, 745, 746, 913, 914
- dermatitis herpetiformis distinguishing from . . . 918
- simulating . . . 915
- from dyes . . . 917
- of ear, cough from 185, 186
- earache from . . . 252
- serous discharge from . . . 522
- eczema marginatum simulating . . . 747
- eosinophilia from . . . 272
- erythema in 745, 914, 915
- favus distinguished from . . . 309
- finger affected by . . . 301, 602
- from formalin . . . 917
- in French polishers . . . 917
- granulosus rubra nasi distinguished from . . . 803
- in grocers . . . 917
- heat in . . . 602
- herpes distinguished from . . . 915
- from hydrogonia . . . 917
- impetigo from . . . 865
- contagiosa, distinguished from . . . 918
- intertrigo, bathing-drawers area affected by . . . 499
- folds affected by . . . 499
- of umbilicus . . . 593
- itching in . . . 598, 599, 602, 658, 682, 684, 745, 865, 913, 918
- lichen planus distinguished from . . . 919
- ruber planus simulating . . . 598
- urticaria, simulating . . . 919
- of tips . . . 459, 742
- from lye . . . 917
- marginatum, account of 312
- bathing-drawers area affected by . . . 499
- Job's itch and . . . 312
- eczema distinguished from . . . 747
- Epidermophyton malleum causing . . . 310, 312
- erythrasma distinguished from . . . 313
- microscope in . . . 312
- rhombic . . . 312
- in nevus in . . . 747
- parts affected by . . . 312
- scales in . . . 312, 747
- of scrotum . . . 747
- from metal . . . 917
- miliaria rubra simulating . . . 918
- mycosis fungoides simulating . . . 888
- nails affected by . . . 312, 496
- redema in . . . 686
- Paget's disease simulating . . . 887
- papules in . . . 598, 915
- due to paraphenylenediamine . . . 918
- of penis, in diabetes 334, 499
- perineum, aching in . . . 579
- diabetic . . . 579
- gouty . . . 579
- from phenol . . . 918
- phenyl-hydrazine . . . 917
- photography . . . 917
- pityriasis rubra from . . . 746
- distinguished from . . . 746
- in printers . . . 917
- prurigo distinguished from . . . 601
- psoriasis simulated by . . . 745
- pustular, impetigo distinguished from . . . 682
- syphilitic distinguished from . . . 684
- pustules in . . . 681, 682, 915
- from pyrogallie acid . . . 917

- Effusion, pleural, contd.*
- recurrences of .. 915
 - ringworm simulating .. 311
 - from rodinal .. 917
 - in rubber workers .. 917
 - rubrum, scabs in .. 742
 - sago-grain bodies in .. 919
 - from satin-wood .. 917
 - sawdust .. 917
 - scabies distinguished .. 742, 918
 - scabs in .. 742, 745

- - - pyralorrhœa from ..	662
- - - sinus arrhythmia due to ..	664
- - - tachycardia from ..	672
- - - tic increased by ..	173
- - - tremor due to ..	879, 880
- - - uncontrolled expression of, in bilateral facial paralysis ..	603
- - - cerebral diplegia ..	603
- - - pseudo-bulbar paralysis ..	603, 773
- - - in paralysis agitans ..	292
- Emotional shock, anorexia nervosa from ..	58
- - - nerve disorder from ..	77
- Emphysema, albuminuria from ..	269
- - - ascites from ..	62, 68, 269
- - - from asthma ..	191, 200
- - - asthma distinguished from ..	191
- - - barrel-shaped chest in ..	208, 460
- - - bleb, pneumothorax from rupture of ..	647
- - - breath sounds enfeebled in ..	208
- - - bronchitis with ..	199, 208, 269, 364
- - - and bronchitis (see Bronchitis and Emphysema) ..	210
- - - bulging of chest with ..	210
- - - chest movements impaired in ..	208
- - - outline of (Fig. 182) ..	209
- - - over-distended in ..	199
- - - Cheyne-Stokes breathing from ..	139
- - - chronic bronchitis and clubbed fingers from ..	68
- - - compensatory, in bronchiectasis ..	142
- - - with fibroid lung ..	269, 366
- - - constipation in ..	165
- - - coughing from ..	364
- - - cubical chest with ..	269
- - - cyanosis with ..	199
- - - dorsal curve of spine exaggerated in ..	208
- - - dyspnoea from ..	246, 404
- - - epigastric angle wide with ..	269
- - - epistaxis from ..	274
- - - expansion diminished with ..	199, 269
- - - expiration prolonged in ..	208, 269
- - - fatty heart simulated by ..	595

Emphysema, contd.

- flatulence with ..	303
- hæmoptysis from ..	364
- heart difficult to hear in ..	208
- - - dullness obscured by ..	208, 269
- - - enlarged with ..	269
- - - failure from ..	62, 68, 139, 199, 201, 246
- - - impulse displaced in ..	373
- - - impalpable with ..	258, 269
- - - obscured in ..	372
- - - sounds faint with ..	269
- - - hyper-resonance with ..	208, 269
- - - inelastic skin and ..	199
- - - insomnia from ..	402, 404
- - - inspiration shortened in ..	208
- - - intercostal spaces wide in ..	208
- - - liver dullness diminished with ..	208, 269, 460, 462
- - - enlarged from ..	269
- - - menorrhagia from ..	482, 484
- - - neck short in ..	208
- - - nutmeg liver from ..	463
- - - oedema of legs from ..	269
- - - in old people ..	111
- - - orthopnea with ..	199
- - - pain in shoulder from ..	532
- - - palpitation from ..	594, 595
- - - physical signs 199, 208, 269 ..	648
- - - pneumothorax from ..	648
- - - polycythæmia in ..	651
- - - râles with ..	199
- - - at bases with ..	269
- - - rhonchi with 199, 208, ..	269
- - - ribs everted in ..	460
- - - right ventricle enlarged from ..	268, 374, 536
- - - shortness of breath from ..	111, 114
- - - shoulders high in ..	208
- - - SURGICAL ..	254
- - - abdominal swelling due to ..	804
- - - of abdominal wall ..	805
- - - from bronchitis ..	254
- - - bullet wound ..	254
- - - chest wound 254, 649, ..	805
- - - coughing ..	254
- - - crackling in ..	188, 805
- - - crepitus in ..	190, 254
- - - from duodenal ulcer ..	254
- - - of face ..	254
- - - from fractured rib ..	254, 649
- - - gas gangrene ..	805
- - - gas-producing bacteria ..	254
- - - gastric ulcer ..	254
- - - hospital gangrene ..	254
- - - injury of bladder ..	254
- - - cæcum ..	254
- - - duodenum ..	254
- - - oesophagus ..	254
- - - neck wound ..	805
- - - needling chest ..	254
- - - nose-blowing ..	254
- - - operation ..	254
- - - putrefaction ..	254
- - - rectal injury ..	254
- - - sneezing ..	254
- - - stab ..	254
- - - stomach injury ..	254
- - - trachea wound ..	805
- - - tracheotomy ..	254
- - - ulceration of bladder ..	254
- - - cæcum ..	254
- - - oesophagus ..	254
- - - rectum ..	254
- - - whooping-cough ..	254
- - - systolic murmur from ..	269
- - - tactile vocal fremitus increased with ..	269
- - - telangiectases round chest in ..	910
- - - tricuspid regurgitation from ..	269
- - - vesicular murmur diminished with ..	269
- - - voice sounds increased with ..	269
- - - winter cough with ..	199
- Employer's Liability Act, saturnine encephalopathy and ..	214
- Empyrosynthosis in tetanus ..	175

- Empyema, abnormal situations of** 133, 790
- abscess of chest wall from 530

 - bronchiectasis after 367
 - - simulated by 112
 - and bronchitis, winter cough from 17
 - from bronchopneumonia 134, 199
 - buried 703
 - **general account of** 112
 - - without abnormal signs (Fig. 512) 618
 - bursting into lung 210
 - caecostoma due to 860
 - chest asymmetry after 209
 - - bulged by 210
 - - shrivelled after 192
 - - on one side from 191
 - after childbirth 115
 - clubbed fingers from 112
 - cough from 112, 188
 - coughed up 695, 703
 - crackling rales with 134
 - cyanosis with 199
 - **deep-seated, account of** 112
 - diaphragm immobilized by 807
 - - pushed down by 807
 - difficult cases of 695
 - **difficulties in locating** 791
 - discharging into lung, gangrene of lung from 123
 - dullness due to 695
 - from duodenal ulcer 134
 - dyspnoea from 247
 - from epithelioma of bronchus 134
 - - oesophagus 134
 - erythema over 276
 - of ethmoidal sinuses, frontal headache from 694
 - - puncture in diagnosing 694
 - - purulent discharge from 694
 - - pyrexia due to 687, 694
 - - subjective smell due to 756
 - - X rays in diagnosing 694
 - febrile illness from 365
 - fibroid lung after 367
 - from foreign body in bronchus 134
 - foul pus expectorated from 649
 - sputum from 790, 791
 - Friedländer's bacilli causing 134
 - of frontal sinus, aching above eye from 226, 370, 694
 - - after nasal catarrh 226
 - - pain over 226
 - - pointing 226, 694
 - - pyrexia due to 687, 694
 - - radiogram in diagnosing 694
 - - subjective smell due to 756
 - - tenderness over 226
 - - of forehead from 694
 - from gall-bladder infection 134
 - **of gall-bladder, account of** 696
 - - due to *Bacillus coli* 696
 - - paratyphus 696
 - - typhus 696
- Empyema of gall-bladder, contd.**
- due to carcinoma 696
 - gall-bladder enlarged from 316, 408, 696
 - from gall-stone 316, 696
 - jaundice with 696
 - leucocytosis from 316, 453
 - operation in diagnosing 696
 - pain over gall-bladder from 696
 - in right hypochondrium from 696
 - pyrexia due to 687, 694
 - rigors from 696
 - suppurative cholangitis from 415
 - tenderness over gall-bladder from 696
 - from typhoid fever 316, 317, 415
 - (and see Cholecystitis)
 - gangrene of lung distinguished from 364
 - - simulated by 791
 - gas gangrene bacilli causing 134

- simplex .. 276, 280
- erysipelas simulated by .. 282
- leprosy simulating .. 478
- scales in .. 744
- scarlet fever simulated by .. 281
- in small-pox .. 276, 278
- from snake-bite .. 276
- soap .. 515
- sodium cacodylate .. 277
- strawberries .. 278
- sulphur .. 918
- in syphilis .. 479
- from tape-worm .. 276, 280
- of thighs .. 498
- trades causing .. 275, 277
- in trench fever .. 710
- trichinosis .. 276
- trypanosomiasis .. 276, 280
- from turpentine .. 918
- vacciniiform, of infants .. 498
- valium disease and .. 17
- from various injections .. 275
- vesicular, perleche and .. 460
- vesiculolum .. 919
- of vulva in infants .. 498
- from waters .. 515
- X rays .. 276
- Erythema-papules .. 597
- Erythraemia (see Polycythæmia, Splenomegalic)
- Erythrasma, abdominal folds affected by .. 313
- account of .. 313
- axilla affected by .. 313
- bathing drawers area affected by .. 499
- eczema marginatum distinguished from .. 313

Erythrasma, contd.

- eczema scabrothoicum .. 313
- distinguished from .. 313
- genito-crural region affected by .. 313
- joint folds affected by .. 313
- microscope in diagnosis .. 313
- Microsporon minutissimum causing .. 313, 747
- mycelium in .. 313, 747
- pityriasis rosea distinguished from .. 313
- scales in .. 276, 747
- spores in .. 313
- submammary folds affected by .. 313
- tinca versicolor simulating .. 313
- Erythrocythæmia (see Polycythæmia, Splenomegalic)
- Erythromelalgia .. 542
- age incidence of .. 542
- cold alleviating .. 542
- in disseminated sclerosis .. 543
- ergotism simulating .. 542
- erythema in .. 276, 747
- flushed extremities in .. 320, 542
- gangrene from .. 317, 320
- rare in .. 542
- hard work and .. 320
- heat in extremities in .. 320
- intermittent claudication distinguished from .. 542
- œdema in .. 543
- pain in extremities in .. 320, 542
- Raynaud's disease distinguished from .. 542
- reflexes normal in .. 543
- sex incidence of .. 542
- in syringomyelia .. 543
- tabes dorsalis .. 543
- temperature changes and .. 320
- tenderness in .. 542
- warmth worsening .. 542
- worse if limb dependent .. 542
- Erythrospira, account of .. 926
- after cataract extraction .. 926
- conjunctivitis with .. 926
- in electric blindness .. 926
- from fatigue of retina .. 926
- photophobia with .. 926
- from retinal hæmorrhage .. 926
- snow-blindness .. 926
- vitreous hæmorrhage .. 926
- Essential albuminuria .. 18
- hæmaturia .. 348
- infantile .. (Fig. 200) 246

- serous effusions in .. 110
- from excesses, impotence from .. 393
- fainting due to .. 296
- glycosuria from .. 330
- from hepatoptosis .. 463
- insomnia from 402, 403, 404
- nervous, convulsions from .. 181
- noises in head from .. 504
- spasmodic contractions from .. 173
- vertigo due to .. 504
- puerperal .. 252
- from visceroptosis .. 463
- Exocardial bruit (see Bruit)
- Exophthalmic goitre (see Graves' Disease)
- EXOPHTHALMOS .. 283
- from aneurysm in orbit .. 285
- arteriovenous aneurysm .. 284
- cavernous sinus thrombosis .. 156, 284, 739
- corneal ulcer due to .. 891
- from distention of nasal sinus .. 284
- encephalocele .. 284
- exostosis .. 284
- Graves' disease .. 267, 283, 292, 596, 857, 877, 881
- gumma .. 284
- intermittent .. 285
- from ivory exostosis of orbit .. 208
- lymphosarcoma (Fig. 227) .. 284
- meningocele .. 284
- nasal sinus distention .. 258

Exophthalmos, contd.

- from new growth .. 284
- orbital cellulitis .. 284
- periorbitis .. 284
- pulsating .. 285
- from thrombosis of cavernous sinus .. 283
- tubercle .. 284
- unilateral .. 284
- from varicose veins in orbit .. 285
- (and see Proptosis)
- Exostoses, familial incidence of .. 845
- multiple .. 820
- round joints from gonorrhea .. 179
- rheumatoid .. 179
- rheumatoid arthritis .. 179
- spondylitis deformans .. 179
- tuberculosis .. 179
- Exostosis, account of .. 820
- of big toe .. 820
- bursa over .. 820
- cartilage capping .. 820
- of ear, deafness from .. 207
- meatus obstructed by .. 207
- lemnus in children .. 845
- skiagram of (Fig. 635) .. 820
- ivory, of auditory meatus .. 820
- exophthalmos from .. 820
- of frontal bone .. 255, 820, 820
- petrous bone .. 820
- skull .. 820
- of orbit, exophthalmos from .. 284
- ossified tendon simulating .. 845
- in popliteal space .. 844, 845
- Explosive diarrhoea from carcinoma of colon .. 394
- rectum .. 394, 727
- laughter in double hemiplegia .. 290
- manufacturers, dermatitis in .. 917
- substances used by .. 917
- sounds in head in insanity .. 878
- tears in double hemiplegia .. 290
- Explosives, high, acute yellow atrophy from .. 416
- picric acid in .. 917
- Exposure, hypothermia from .. 492
- paroxysmal hæmoglobinuria and .. 358
- Expression, see Facies
- Extensor muscles (see under Muscles)
- plantar reflex, see Plantar Reflex, Extensor
- External abdominal ring, aching at, from abscess of testis .. 768
- epididymo-orchitis .. 584, 585
- pain at, from ureteric calculus .. 577
- testis at .. 589
- auditory meatus, Arnold's nerve supplying .. 185
- herpes of, with facial paralysis .. 604
- inflamed, noises in head from .. 504
- vertigo from .. 504
- ivory exostosis of .. 820
- obstructed by boils .. 207
- deafness from .. 207
- by exostosis .. 207
- foreign body .. 207
- growth .. 207
- from injury .. 207
- by perichondritis .. 207
- polypus .. 207
- wax .. 207
- cutaneous nerve, distribution of (Fig. 580) .. 748
- pain in .. 540
- iliac artery, aneurysm of .. 827, 832
- jugular vein, enlarged thyroid compressing .. 877
- plantar nerve (see Nerve)
- popliteal nerve (see Nerve)

External, contd.

- rectus muscle, paralysis of (see Paralysis) ..
- saphenous nerve, distribution of (*Fig. 580*) 748
- urinary meatus, red in gonorrhoea .. 228
- Extract, pituitary, diabetes insipidus checked by .. 655
- thyroid (see Thyroid)
- Extrasystoles, account of** 668
- alarm due to .. 668
- alternating, pulsus bigeminus from .. 673
- arising in junctional tissues .. 670
- auricular .. 668, 670
- electrocardiogram of (*Fig. 535*) 669
- in mitral stenosis .. 670
- bigeminy due to (*Fig. 534*) 668
- bradycardia from .. 671
- causing sense of heart-stopping .. 668
- characters of .. 672
- definition of .. 668
- distress from .. 668
- dropped beat simulated by .. 670
- electrocardiogram of (*Fig. 534*) 668
- graphic methods advisable in diagnosis 669
- heart jerk due to .. 668
- sounds corresponding to .. 669
- heart-block simulated by .. 668, 670
- Mackenzie on .. 668
- multiple, auricular fibrillation simulated by .. 666
- pulse irregular from .. 666
- due to nervousness .. 668
- occurring in complexes 670
- precise cause unknown .. 668
- pulse character with .. 668
- irregular from 672, 673
- pulsus alternans from 671
- bigeminus from .. 670
- due to senile cardio-sclerosis .. 668
- shortness of breath and (*Fig. 537*) 669
- ventricular .. 668, 670
- electrocardiograms of (*Fig. 536*) 669
- Extra-uterine gestation (see Gestation)
- Extravasation of urine (see Urine)
- EXTREMITY, LOWER, PARALYSIS OF** 607
- **UPPER, PARALYSIS OF** 611
- Extroversion of bladder (see Bladder)
- EYE, ACUTE INFLAMMATION OF** 285
- anterior chamber of, deep with dislocation of lens .. 220
- irregular with dislocation of lens 228
- shallow in glaucoma 288, 926
- colobomata of .. 517
- defective closure of, in hemiplegia .. 381
- displacement of, by abscess of orbit .. 222
- cavernous sinus thrombosis .. 222
- diplopia from .. 222
- by exostosis .. 222
- orbital growth .. 222
- haemorrhage .. 222
- after tenotomy .. 222
- upwards, by growth of superior maxilla 285
- flame-shaped haemorrhages in, in albuminuric retinitis .. 519
- from thrombosis .. 519
- foreign body in (see Foreign Body)
- hard, in glaucoma .. 288
- herpes zoster of .. 914
- inflamed, from conjunctivitis .. 285

Eye, inflamed, contd.

- from glaucoma .. 285
- iritis .. 285
- lachrymation from .. 285
- pain from .. 285
- photophobia from .. 285
- injury, double pupil from .. 220
- photophobia from .. 639
- lesions, headache due to .. 371
- melanotic carcinoma of 886
- sarcoma of (see Sarcoma, Melanotic)
- muscles (see Muscles)
- notes on normal .. 921
- opaque nerve fibres in (*Figs. 413, 414*) 518
- operation on, double pupil from .. 220
- ophthalmoscopic examinations of .. 517
- **PAIN IN** .. 456
- (and see Pain in Eye)
- paralysis of (see Ophthalmoplegia and Strabismus)
- pigmented patches in, in syphilitic choroiditis 518
- posterior staphylococci of 518
- **RETRACTION OF** .. 270
- (and see Enophthalmos)
- tender in glaucoma .. 288
- retrobulbar neuritis .. 925
- tension of, increased in glaucoma 69, 675, 926
- from herpes frontalis .. 891
- unclosed, in paralysis of seventh nerve .. 891
- white patches in, in albuminuric retinitis .. 519
- optic neuritis .. 519
- syphilitic choroiditis .. 518
- due to tubercles .. 520
- Eyes, almond-shaped, in Mongolian idiocy .. 294
- BLACK SPECKS BEFORE** .. 92
- burning in, from error of refraction .. 371
- conjugate deviation of, in coma .. 154
- depressed, in hydrocephalus 256, (*Fig. 217*) 258
- half-closed, in cretin (*Fig. 254*) 294
- oblique, in Mongolian idiocy 236, (*Fig. 252*) 293
- pain behind, in influenza 692
- pigmentation round, from uterine lesion 128
- pricking in, from error of refraction .. 371
- protrusion of (see Exophthalmos and Proptosis)
- searching movements of 505
- shifty, of drug-taker .. 289
- staring in Graves' disease .. 857
- tender in spirochaetosis icterohaemorrhagica 420
- vertigo from .. 911
- watering of, from error of refraction .. 371
- Eye-ball, bruised over .. 285
- pulsation of .. 285
- Eye-brows deficient in myxoedema .. 290
- eczema seborrhoeicum affecting .. 602
- falling out in myxoedema .. 508
- overhanging .. 254
- sycosis vulgaris affecting .. 682
- Eye-lashes, pediculosis pubis affecting .. 499
- sycosis vulgaris affecting .. 682
- Eye-lid, chancre on (*Fig. 382*) 473
- pre-auricular gland enlarged from .. 473
- epithelioma of, pre-auricular gland enlarged from .. 473
- hypertrophied, from blepharitis .. 273
- paralysis of, in hysteria 178

Eye-lid, contd.

- scrofulous, nail trouble with .. 497
- sore on, pre-auricular gland enlarged from 473
- xanthoma planum affecting .. 889
- Eye-lids, angioneurotic oedema of .. 513, 824
- baggy in myxoedema (*Fig. 391*) 506
- coloured sweat of .. 803
- drooping in influenza-pneumonia (*Fig. 172*) 201
- myopathy (*Fig. 245*) 291
- (and see Ptosis)
- no hair on .. 91
- in myxoedema (*Fig. 392*) 507
- oedema of (see Oedema)
- pigmented in exophthalmic goitre 267, 292
- puff in myxoedema .. 290
- red from cavernous sinus thrombosis .. 284
- red-edged in angular conjunctivitis .. 286
- retracted in Graves' disease .. 291, 877
- sewing together of .. 891
- thick in cretin .. 290
- trachoma .. 286
- xanthelasma of, in jaundice .. 405
- Eye-strap from acetylene blowpipes .. 547
- astigmatism .. 547
- electric light .. 547
- error of retraction 547, 640
- fine needlework .. 547
- glaucoma from .. 288
- headache from 370, 372
- from hypermetropia .. 547
- in microscopists .. 547
- from occupation .. 547
- **pain in eye from** .. 547
- photophobia from .. 639
- from presbyopia .. 547
- reading small print .. 547
- snow .. 547
- strong sunshine .. 547

- FACE, acne affecting** 600, 683, 865
- rosacea on 303, 600, 881
- actinomycosis of .. 893
- anaesthesia of (see Anaesthesia)
- angioneurotic oedema of 824
- asymmetry of, from Bell's palsy 602, 605
- - torticollis and .. 795
- atelectosis affecting .. 168
- atrophy from seventh nerve lesion .. 82
- in torticollis .. 179
- bloody sweat of .. 803
- boil on .. 824
- cavernous sinus thrombosis from 284
- bones enlarged in acromegaly .. 837
- - torticollis and .. 837
- bullae on, in impetigo contagiosa .. 498
- pemphigus neonatorum .. 498
- carbuncle on .. 824
- cavernous sinus thrombosis from .. 284
- chancre on .. 824
- choreiform contractions of .. 170
- colloid milium affecting 890
- coloured sweat of .. 803
- contracture of .. 178
- post-paralytic (*Figs. 465-467*) 604, 605
- cyanosis of .. 195
- dilated veins on, in cirrhosis of liver .. 466
- dysidrosis of .. 918
- epithelioma of .. 824
- enlarged cervical glands from .. 475
- epithelioma adenoides cysticum affecting .. 890
- erysipelas of .. 824, 865
- suppurative meningitis from .. 732

Face, contd.

- erythema papulatum affecting .. 600
- fibroma of .. 824
- flushed, in influenza-pneumonia (*Fig. 172*) 201
- yellow fever .. 345
- gumma of (*Fig. 516*) 659
- hair absent from .. 91
- hemiatrophy of .. 79, (*Fig. 468*) 605
- facial paralysis simulated by .. 605
- herpes simplex affecting 913
- hyperaesthesia of, in neuralgia .. 549
- impetigo affecting .. 684
- lichen scrofulosorum affecting .. 598
- lipoma of .. 824
- lupus of .. 367
- erythematous affecting .. 303, 744, 746
- vulgaris of .. 891, 892
- malpresentation 250, 251
- multiple benign sarcoid simulating .. 502
- myoma cutis on .. 889
- myopathy affecting .. 625
- nerve-supply of .. 865
- neuralgia of .. 549
- oedema of (see Oedema) 548
- **PAIN IN** .. 548
- (and see Pain in Face)
- paralysis of (see Paralysis)
- pigmentary nevo-sarcomatosis of .. 454
- pigmentation of (see Pigmentation)
- puffiness of, in acute nephritis .. 57
- pustular syphilides of 684
- quivering of, in Friedreich's ataxia .. 883
- referred pains in .. 867
- rigidity of (see Trismus)
- rodent ulcer of .. 892, 895
- scleroderma of .. 886
- sebaceous cyst of 824, 888
- seborrhoea affecting 303, 744
- segmental areas of (*Figs. 658, 659*) 867
- sensory areas of (*Figs. 442, 443, 445*) 550
- sepsis on, cervical adenitis from .. 763
- small, in anosteoplasia 233
- small-pox of 685, (*Fig. 686*) 920
- spasm of, in hysteria .. 605
- tetanus .. 175
- square, in acromegaly 293
- stiff, in tetanus .. 885
- surgical emphysema of 254
- SWELLING OF** .. 824
- (and see Swelling of the Face)
- sycosis vulgaris affecting 682
- syphilis of, rosacea distinguished from .. 304
- syphiloderma affecting 601
- telangiectasis on .. 303
- tenderness in, from tooth .. 549
- tetany involving .. 189
- tinea affecting .. 173
- tinea versicolor of .. 313
- tremor of, from alcohol 881
- congenital .. 880
- trichinosis affecting .. 569
- tubercule of .. 683
- tumours of .. 824
- ULCERATION OF 891, 892** .. (and see Ulceration of Face)
- unilateral sweating of .. 803
- vaccinia of .. 824
- varicella affecting 919, 920
- venous stigmata on .. 881
- xeroderma pigmentosum affecting .. 888
- Faceache from empyema of antrum 694
- Facial centre in mid-brain 603
- nerve (see Nerve, Cranial, Seventh)
- neuralgia, trismus simulated by .. 884
- nucleus, lesions affecting .. 604

Facial nucleus, contd.

- in pons Varolii .. 603
- **PARALYSIS** .. 602
- (and see Paralysis, Facial)
- FACIES, ABNORMALITIES OF** .. 289
- of *acanthosis nigricans* 295
- *acromegaly* .. 293, 837
- *acute nephritis* .. 295
- in Addison's disease .. 295
- *angioneurotic oedema* (Fig. 407) 513
- anxious, in abdominal disease .. 290
- in *argyria* .. 295
- blue-black, from brown boots .. 202
- broad, in *myxœdema* .. 656
- of *chronic alcoholism* .. 294
- *cirrhosis of liver* 48, 294
- *colic* .. 150
- congenital syphilis (Figs. 240, 241) 290
- *cretin* 234, (Figs. 254, 255) 294
- *cretinoid* .. 290
- in cyanosis with jaundice .. 417
- dusky, in splenomegalic polycythæmia .. 651
- in dyspituitary obesity (Fig. 299) 290
- *erythræmia* .. 294
- expressionless, in bilateral facial paralysis .. 603
- cerebral diplegia .. 603
- paralysis agitans .. 614
- pseudo-bulbar paralysis .. 603
- of familial lenticular degeneration (Fig. 256) 294
- fatuous, in insular sclerosis .. 290
- ferret, in microcephaly 234
- in *Graves' disease* 291, 292
- Hippocratica, in general peritonitis .. 485, 734
- of peritonitis .. 150
- in influenza-pneumonia (Figs. 172-174) 201
- lardaceous disease .. 10
- leonine, from leontiasis ossea .. 255
- mask, in paralysis agitans .. 292
- in microcephaly .. 234
- of mitral stenosis (Fig. 78) 69, 294
- *Mongolian idiosy* .. 293
- *myopathic* (Figs. 243, 244) 291
- fatigue type (Fig. 245) 291
- nasal smile type (Fig. 246) 291
- in *myxœdema* (Fig. 68) 50, 290, (Fig. 391) 506
- olive-green, in malignant jaundice .. 414
- in osteo-arthritis .. 430
- paralysis agitans (Fig. 248) 292, 609, 881
- peach-blossom .. 282
- in peritonitis .. 150
- pernicious anæmia .. 294
- pigmented, in cirrhosis of liver .. 67, 466
- of *polydermatomyositis* 295
- *polymyositis* 295, (Fig. 559) 702
- rat-like, in microcephaly .. 234
- in rheumatoid arthritis 430
- *risus sardonius* .. 740
- sad, in tabes dorsalis (Fig. 249) 292
- sallow, in cirrhosis of liver .. 67, 466
- in scarlet fever .. 282
- scleroderm .. 741
- senile, in congenital syphilis .. 498
- septic, with subphrenic abscess .. 807
- of splenomegalic polycythæmia 294, (Fig. 515) 652
- starchy, in paralysis agitans .. 292
- pseudo-bulbar palsy 773
- in tabes dorsalis (Fig. 249) 292

Facies, contd.

- triangular, in hydrocephalus (Fig. 217) 257
- in tuberculous peritonitis .. 706
- vacant, in chronic alcoholic .. 289
- Facio - scapulo - humeral muscular dystrophy .. 78
- myopathy .. 172
- *Factitious urticaria* (Fig. 654) 856
- epidermolysis bullosa and .. 126
- hæmoglobinuria in .. 358
- *Fæcal accumulation*, abdominal tumour from .. 439
- age incidence of .. 777
- carcinoma of cæcum simulated by .. 563
- constipation with .. 777
- enema in diagnosing .. 439, 777
- obstruction with .. 777
- sex incidence of .. 777
- concretion in appendix, colic from .. 148
- fistula (see *Fistula*)
- impaction, age incidence of .. 217
- due to carcinoma of cæcum .. 814
- carcinoma of rectum simulated by .. 873
- sigmoid stimulating .. 557
- colic from .. 148, 163
- diarrhoea from .. 217
- enema in diagnosing .. 873
- pain in hypochondrium from .. 553
- iliac fossa from .. 555
- rectal examination in diagnosing .. 873
- tenesmus due to .. 873
- mass in colon, enlarged spleen simulated by .. 777
- movable kidney simulated by .. 813
- spleen simulated by vomiting (see *Vomiting*) .. 775
- Fæces*, acid, from fermentation .. 215
- in gastrocolic fistula .. 301
- from intestinal fermentation .. 308
- in jejunoileic fistula .. 301
- pancreatic deficiency .. 300
- disease .. 130
- alkaline, from putrefaction .. 215, 308
- with gall-stone obstruction .. 130
- ascariis ova in .. 411
- bacteriological investigation of .. 43, 47, 83
- in cases of boryngism .. 107
- bile deficiency and .. 300
- biliverdin in, in duodenal ulcer .. 130
- blood in (see *Stools*, Blood in)
- bubbly, from intestinal fermentation .. 308
- cæcum distended with characters in greedy colon cases .. 160
- Charcot-Leyden crystals in .. 131
- clay-coloured, in catarrhal jaundice .. 411
- jaundice .. 406
- clayey, in chronic pancreatitis .. 810
- in colon, liver enlargement simulated by .. 462
- coproporphyrin in .. 903
- digging out of, in dyschezia .. 159
- estimation of fats in .. 299
- **FATTY** .. 299
- (and see *Stools*, Fatty)
- gall-stone in .. 344, 410
- gas-production on incubating .. 308
- hard, constipation from .. 162, 165
- from diarrhoea .. 165

Fæces, hard, contd.

- and dry from deficient water drinking .. 162
- in diabetes .. 162
- from perspiring .. 162
- in women .. 162
- from fluid loss .. 165
- hæmorrhage .. 165
- intestinal constipation .. 165
- **INCONTINENCE OF** .. 393
- and see *Incontinence of Fæces*
- keratin particles in .. 634
- keratin-coated capsules in, in pancreatic disease .. 410
- lead in 45, 85, 94, 155, 184
- meat fibres in .. 300, 308
- *microscopical examination of, technique of* 634
- **MUCUS IN** .. 495
- and see *Stools*, Mucus in
- muscle fibres in .. 130, 215
- in diarrhoea .. 216
- intestinal fermentation .. 303
- pancreatic disease .. 410
- occult blood in (see *Blood*, Occult)
- ova in .. 103, 104, 131, 634
- in ankylostomiasis 514, 635
- of *Bilharzia* in .. 102
- from *Bistoma hepaticum* .. 410
- **method of examination for** .. 634
- from parasites .. 58
- *Oxyuris vermicularis* in .. 102
- **pancreatic deficiency and** 300
- **pancreatitis and changes in** .. 130
- paraffin in .. 299
- **PASSED PER URETH: RAM** .. 296, 724
- vaginam .. 356
- **PUS IN** .. 680
- (and see *Pus in Stools*)
- putrefactive odour of, in intestinal flatulence .. 308
- reaction of - see *Reaction of Stools*
- soap crystals in .. 300, 301
- starch cells in, in intestinal fermentation .. 303
- stercobilin in .. 902
- carcinoma of pancreas and .. 130
- gall-stones and .. 130
- tarry, from melæna .. 97
- (and see *Melæna*)
- test for blood in .. 481
- tubercle bacilli in .. 562
- vegetable cells in .. 308, 634
- vibrio in, in cholera .. 345
- in vomit .. 929
- (and see *Stools*)
- FAINTING** .. 296
- due to Addison's disease .. 297, 299, 641
- D.A.H. .. 597, 859
- in elderly patients .. 298
- flushing with .. 303
- due to grief .. 296
- **list of causes of, classified** .. 296, 297
- due to Ménière's disease .. 297, 912
- seldom due to organic heart lesion .. 296
- Faintness in angina pectoris .. 533
- aortic regurgitation .. 259
- from arsenic .. 338
- **duodenal ulcer** .. 482
- extra-uterine gestation .. 489
- fatty heart .. 264
- gastric hæmorrhage .. 339
- before hæmatemesis .. 359
- from hepatoptosis .. 463
- paroxysmal tachycardia .. 857
- snake-bite .. 422
- visceroptosis .. 463
- Falling, in Ménière's disease .. 912
- to one side, due to cerebellar abscess .. 733
- when sitting, in familial lenticular degeneration .. 294

Falling, contd.

- in paralysis agitans .. 881
- due to vertigo .. 911
- Falloppian canal, facial nerve and .. 605
- *colic*, causes of .. 148
- tube, appendix adherent to .. 829
- carcinoma of, pelvic swelling due to .. 840
- inflamed, appendicitis simulated by .. 814
- pain in back from .. 814
- pelvis from .. 814
- lesions, pelvic swelling due to .. 840
- suppurative, subphrenic abscess from .. 807
- tumour, movable kidney simulated by .. 813
- tubes, absence of, sterility due to .. 793
- congestion of, pelvic pain from .. 573
- distended, dyschezia from .. 166
- lipiodol in .. 940
- and X rays showing (Fig. 69) 939
- Familial acholuric jaundice (see *Jaundice*, Acholuric)
- ataxic, intention tremor in .. 884
- tremor in .. 880, 883
- bradycardia .. 107
- constipation .. 160
- idiocy, amaurotic .. 924
- inability to hear birds and bats .. 208
- incidence of acholuric jaundice .. 50, 781
- acute rheumatism 136, 758
- angioneurotic oedema .. 280, 513, 853
- blue sclerotics .. 304
- chorea .. 170
- clubbed fingers .. 143
- diabetes .. 335
- epilepsy .. 182
- exostoses .. 845
- fragilis ossium .. 304
- Friedrich's ataxy .. 171, 624
- hæmophilia .. 93, 679
- Hanot's cirrhosis .. 414
- Huntington's chorea .. 171
- Meigs' disease 280, 516
- Milroy's disease 512, 516
- mycemia .. 485
- myopathy .. 620
- paranyoclonus multiplex .. 173
- peroneal atrophy .. 141
- phthisis .. 790, 932
- primary muscular dystrophy 78, 146, 624
- pseudo-hypertrophic muscular paralysis .. 624
- rare anæmias .. 51
- rheumatic fever .. 423
- spastic paraplegia .. 145
- splenomegalic cirrhosis .. 780
- Tooth's paralysis 141, 146
- peroneal atrophy .. 624
- jaundice .. 408
- lenticular degeneration (see *Degeneration*)
- nerve deafness .. 207
- pentosuria .. 327
- retinitis pigmentosa .. 924
- splenomegaly (see *Splenomegaly*)
- tremor .. 879
- Famine, ascites from .. 62, 73
- relapsing fever and .. 420, 738, 785
- typhus fever and .. 417
- Faradic current in reaction of degeneration 74, 724
- Fascia, palmar, Dupuytren's contracture of (Fig. 152) 179
- plantar, gonorrhœal arthritis affecting .. 425
- torn .. 552
- rheumatic nodules in .. 502
- fastigium in rigor .. 736
- Fat boy of Peckham .. 508

Fat, contd.

- arterial, <i>thromb.</i> ..	
- contents of ..	chylous
- of the fluid ..	73
- droplets in urine ..	140
- globules in casts ..	140
- heart impulse obscured by ..	372
- indigestion, stools in ..	215
- intramuscular, in myopathy ..	62
- method of estimating ..	299
- necrosis in acute pancreatitis ..	168, 485, (Fig. 625) 810, 811
- haemorrhagic pancreatitis ..	736
- omentum ..	931
- pancreatitis ..	931
- people, constipation in ..	160
- fatty infiltration of bowel in ..	160
- stains for, osmic acid ..	140
- in stools (see Stools) ..	358
Fats, Absorption of ..	300
- Fatigue, convulsions from ..	859
- due to D.A.H. ..	859
- dyspepsia from ..	400
- fainting due to ..	296
- fibrillar contractions of muscle and ..	171
- haemoglobinuria from high blood-pressure ..	106
- inosmina from ..	403
- muscular twitchings ..	172
- in myasthenia gravis ..	77
- myopathy ..	245 (Fig. 245)
- nervous, glycosuria from ..	291
- in neurasthenia ..	870
- paroxysmal haemoglobinuria and ..	358
- of retina, blue vision ..	926
- after cataract extraction ..	926
- red vision from ..	926
- spasmodic contractions from ..	173
- tremor due to ..	879, 880
Fatness, linea albicantes ..	459
- myocardial changes from ..	181
- in pituitary infarctum ..	236
- rickets ..	182, 480
- thymic infarctum ..	235
- (see Obesity) ..	
Fatty acid crystals in stools ..	215, 216, 300, 301
- method of estimating ..	299
- in gangrene ..	318
- stools ..	216
- normal amounts of ..	300
- blood (see Lipemia) ..	
- casts (see Casts, Urinary) ..	
- degeneration of heart (see Heart, Fatty) ..	
- kidneys in phosphorus poisoning ..	421
- liver (see Liver) ..	
- diarrhoea from pancreatic lesions ..	538
- infiltration of bowel, constipation from ..	160
- heart (see Heart, Fatty) ..	
STOOLS ..	299
- (and see Stools, Fatty) ..	
- tumour (see Lipoma) ..	
Faeces, actinomycosis of ..	762
- sore throat due to ..	757
- aspergillosis of, sore throat due to ..	757
- bacteriological examination of ..	742
- carcinoma of ..	762
- sore throat due to ..	757
catarrh of, bacteria which cause ..	757
- sore throat due to ..	757
- crusts on ..	95
- dermatitis herpetiformis affecting ..	95
- epithelium of, submaxillary gland enlarged from ..	474
- erythematous bullous affecting ..	95
- gumma of ..	762
- sore throat due to ..	757
Inflammation of ..	761

Fauces, contd.

- mucus, <i>contd.</i>	
- mucous patches on, in	764
- syphilis	95
- perianthus affecting	281
- reddened, in erythema	281
- scarlatiniform	281
- scarlet fever	281
- sepsis of, cervical adenitis from	763
- snail-track ulcers on	691
- tuberculosis of	762
- sore throat due to	757
Favus, account of	309
- due to Achorium quinqueanum	309
- Schönleinii	309
- alopecia areata distinguished from	309
- from animals	309
- atrophic scarring due to	309
- baldness from	91, 309
- of body (<i>Fig. 262</i>)	309
- crusts in	309, 742
- cup-shaped crusts in	311
- eczema distinguished from	309
- hair affected by	309
- brittle in	311
- honeycomb appearance of	309
- lupus erythematosus simulated by	309
- from mucus	309
- microscope in diagnosis	309
- mousy smell of	309, 311
- mucous membranes affected by	309
- mycelium in	309
- nails affected by	309, 496
- onychomycosis from	312
- pimples in	309
- psoriasis simulated by	309
- pustules simulated by	309
- ringworm distinguished from	311
- of scalp 91 , (<i>Fig. 262</i>)	309
- seborrhoea distinguished from	309
- spores in	309
- sulphur-yellow discs of	309
- tenderness of scalp from	865
- Fear, amenorrhoea from	23
- D.A.H. due to	859
- Graves' disease looking like	291
- popliteal abscess due to	844
- thyroid gland enlarged	877
- Febricula, influenza and	712
- notes on	569
- pain in limbs in	568, 569
Febrile albuminuria	16
- relation to acute nephritis	17
- albumosuria	20
- feet, acroparasthesia affecting	545
- anæsthesia of, vertigo due to	911
- attitude in tetany	2
- bloody sweat of	803
- broad and thick, in myxedema	503
- bromidrosis of	803
- chelidomorpholysis of	743, 919
- cold, menorrhagia and	484
- cyanosis affecting	195
- enlarged in acromegaly	255, 656, 337
- erythema papulatum affecting	600
- flat, in rickets (<i>Fig. 192</i>)	232
- flushed, in erythromelalgia	542
- gangrene of (see Gangrene)	542
- lividity of, in Raynaud's disease	542
- œdema of (see Œdema)	
- pain in (see Pain)	
- pityriasis rubra of	746
- pruritus of	659
- pulmonary osteoarthropathy of	
- (<i>Figs. 351, 352</i>)	436
- smallpox affecting	685
- sweating, in rheumatoid arthritis	426
- tender, in erythromelalgia	542
- in tetany	182

Feet, contd.

— tremor of, due to alcohol 881
— — manganese 882
— (and) foot and Siles 882
Fehling's solution, ceret re-
— spinal fluid and 383
— — composition of 326, 327
— — in estimating sugar . . . 329
— — reduced after acet-
— — — amilide 196
— — — by alcapton 327,
— — — — 905, 906
— — — after benzoic acid 327
— — — camphor 327
— — — in carboluria 327, 906
— — — after chloral 327
— — — chloroform 327
— — — cholesterin 327
— — — creatinin 327
— — — after drugs 196, 332
— — — by glycuronic acid 327
— — — hippuric acid 327
— — — homogenistic acid 905
— — — lactose 327
— — — lævulose 327
— — — after morphine 327
— — — by pentose 327
— — — after phenacetin 196
— — — phenazone 196, 327
— — — salol 327
— — — sulphonal 196
— — — uric acid 327, 906
— — — veronal 196
— — — xanthin 327
— — test, albuminuria and 327
— — errors in 327
— — for glycosuria 326
Femur, gigantism with 325
Femoral abscess (see Abs-
— — — ccess)
— — — aneurysm 825
— — — from infective endo-
— — — — carditis 787
— — — artery, ligature of, gan-
— — — — grena 322
— — — glands (see Lymphatic
— — — — Glands, Femoral)
— — — hernia (see Hernia)
— — — pulse, delayed, from
— — — — iliac aneurysm 832
— — — region, ectopic testis in
— — — — fibroma in 826
— — — lipoma in 826
— — — sarcoma in 826
— — — ring, hernia at 804
— — — SWELLING 824
— — — (and) see Swelling,
— — — — Femoral
— — — vein thrombosis, em-
— — — — bolism of lung from 199
— — — — edema of leg from 512
Femur, bent, in osteo-
— — — — genesis imperfecta . . . 233
— — — carcinoma of, skia-
— — — — gram of (Fig. 26) 21
— — — chondrosarcoma of,
— — — — skia-gram of (Fig. 637) 822
— — — epiphysitis of, limping
— — — — from 457
— — — — exostosis of 845
— — — — skia-gram of (Fig. 638) 820
— — — fracture of (see Fracture)
— — — myeloid sarcoma of,
— — — — skia-gram of (Fig. 641) 823
— — — myeloma affecting . . . 822
— — — necrosis of, popliteal
— — — — abscess due to 844
— — — osteitis of, from typhoid
— — — — fever 424
— — — osteomyelitis of, diffi-
— — — — culty in diagnosing 512
— — — — limping from 457
— — — painful swelling of, in
— — — — scurvy rickets 819
— — — periosteal sarcoma of . . . 845
— — — — skia-gram of
— — — — (Fig. 635) 821
— — — periostitis of, limping
— — — — from 457
— — — — popliteal abscess due
— — — — to 844
— — — red marrow in, in per-
— — — — nicious anemia 31
— — — sarcoma of (see Sarcoma)
— — — separated epiphysis of
— — — — 457, 846
Fenestra rotunda, vertigo
— — — due to pressure on
— — — — 910

4. Fergusson's speculum in

Ferguson's speculum in examining cervix uteri	231
Ferments in gastric juice	401
pancreatic cyst	61
Fermentation, acid stools	215
- borborygmi from	107
- in dilated stomach	636
- intestinal, constipation with	303
- diarrhoea with	303
- flatulence due to	308
- muscle fibres in stools with	303
- starch cells in stools with	303
- stools acid in	308
- bubbly in	308
- tetany and	308
- vegetable residues in stools in	308
- wind due to	307
- in stomach, flatulence due to	30
- test in confirming glycosuria	90
- lactosuria	33
Ferret bite, spirochaetosis from	213
- face in microcephaly	23
Ferric chloride in Bial's test	92
- test for alcapton	305
- aspirin and	214
- carbolic acid and	214
- for diacetic acid	214
(Fig. 184)	214
- in melanuria	904
- salicylate and	905
- salol and	214
Ferricyanide of potassium in estimating blood-sugar	333
Ferrocyanide of potassium in Benedict's solution	327
- Perle's test	31
Ferrous chloride, arsenide of calcium	421
- arsenuretted hydrogen from	421
- phosphide of calcium in phosphuretted hydrogen from	421
- in steel hardening	421
Ferula galbaniflua, dermatitis due to	915
Festation in paralysis agitans	314
Fetishism, account of	393
Fever, acute and pains in	372
- albuminuria in	16
- blackwater, coma in	153
- hæmatemesis in	340
- hæmoglobinuria in	358
- hæmorrhages in	345
- hæmorrhagic erosions in	340
- malaria and	358
- purpura in	676
- quinine and	358
- urine black in	357
cerebrospinal (see Meningitis, cerebrospinal)	
- cloudy swelling in	16
- delirium in	211
- dengue, leucopenia in	455
- enteric (see Fever, Typhoid)	
- gaol (see Fever, Typhus)	
- glandular (see Kirlind's Disease)	
- hay, ægustia due to	859
- anosmia from	756
- epiphora from	272
- nasal discharge due to	223
- intra-ocular, blood per anum in	96
- lepto-thrix	687
Malta, account of	571
- agglutination test in	455
- anæmia in	455
- arthritis with	425
- blood culture in	555
- bronchitis in	571
- constipation in	571
- duration of	691
- few signs in	691
- geographical distribution of	691
- goat's milk and	571

Fever, Malta, contd.

-- headache in .. 571
 -- leucocytosis in .. 455
 -- leucopenia in .. 455
 -- on Mediterranean shores .. 571
 -- Micrococcus meliten-sis in .. 571, 691, 571
 -- orchitis in .. 571
 -- pain in limbs in 568, 571
 -- perspirations in .. 571
 -- rigor rare in .. 737
 -- a septicæmia .. 739
 -- serum reaction in 571, 687, 691, 715, 785
 -- spleen enlarged in .. 571, 691, 778, 785
 -- temperature chart of (Fig. 547) 691
 -- typhoid fever simu-lated by .. 691
 -- undulant type of .. 691
 -- paratyphoid, A, B, and C 689
 -- account of .. 785
 -- arthritis of spine from 796
 -- B. paratyphus in .. 785
 -- peripheral neuritis from .. 84
 -- pulse relatively slow in .. 715
 -- spleen enlarged in .. 778, 785
 -- typhoid fever simulated by .. 689, 785
 -- Widal reaction in .. 84, 689, 715, 785
 -- negative in .. 715
 -- peroneal atrophy after 624
 -- phlebotomus, brady-cardia in .. 110
 -- periperal, infective parotitis in .. 848
 -- rheumatic fever simu-lated by .. 739
 -- rigor ducto .. 737, 738
 -- vaginal discharge in 738
 -- rat-bite, account of .. 740
 -- from cats .. 213, 740
 -- delirium in .. 213
 -- erythema in .. 276
 -- from ferrets 213, 740
 -- headache in .. 740
 -- leucocytosis in .. 740
 -- malaise in .. 749
 -- from mice .. 213
 -- pain in limbs in 568, 570
 -- muscles in .. 740
 -- pains all over in .. 740
 -- periodic pyrexia in 715
 -- rash in .. 740
 -- from rats .. 213, 740
 -- rigor in .. 737, 740
 -- salvarsan curing .. 687
 -- in diagnosing .. 213, 740
 -- spirochete in .. 213
 -- from stoats .. 213
 -- swelling in muscles in 740
 -- temperature chart in (Fig. 579) 740
 -- from weasels .. 213, 740
 -- relapsing, abdominal pain in .. 420
 -- tenderness in .. 420
 -- account of .. 420, 785
 -- anaemia in .. 36
 -- blood per anum in .. 96
 -- parasites in .. 36
 -- bug bites and 36, 420, 738
 -- characters of pyrexia in .. 420, 715, 785
 -- crisis in .. 785
 -- delirium in .. 211
 -- from the East .. 709
 -- in Egypt .. 738
 -- epidemic .. 738
 -- epistaxis in .. 420
 -- famine and 36, 420, 738
 -- in filth and famine .. 785
 -- Great Britain .. 420
 -- hæmatemesis in .. 390
 -- hyperpyrexia in .. 392
 -- hypothermia after .. 420, 738
 -- in India .. 408, 420
 -- jaundice in .. 420
 -- liver enlarged in .. 420
 -- Obermeier's spiro-chæte in 36, 420, 709, 738, 785
 -- pains in back in .. 785
 -- pulse rapid in .. 785

Fever, relapsing, contd.

-- relapses in .. 709
 -- rigor in .. 717, 738, 785
 -- spirochæte of (Fig. 606) 779
 -- spleen enlarged in .. 420, 778, 785
 -- sweats in .. 785
 -- temperature chart of (Fig. 48) 36
 -- uncleanness and .. 36
 -- remittent, purpura in 676
 -- rheumatic, account of 423
 -- acute necrosis of bone simulating .. 423
 -- coma in .. 153
 -- flitting joint affection in .. 423
 -- gonococcal arthritis simulating (Fig. 320) 423, 425
 -- great pain in .. 423
 -- Henoch's purpura simulating .. 428

- from bronchopneumonia 366
- caseous bronchial gland 367
- causes of 366
- cavernous breathing with 210, 269
- chest asymmetry from 191, 192, 209, 258, 269
- outline with Fig. 183 209
- Cheyne Stokes breathing from 139
- from chronic tuberculosis 366
- clubbed fingers with 17, 142, 210, 269, 366, 466, 790
- compensatory emphysema with 269, 366
- from congenital atelectasis 366
- consonating râles over 258, 269, 366
- cough from 188, 269
- cyanosis from 143, 417
- deficient movement of chest with 210, 258, 366
- dullness over 258
- dyspnoea from 246, 269
- after emphysema 367
- epigastric pulsation from 269
- from epithelioma 367
- expectoration from 269
- foetid sputum with 269
- from foreign body 367
- haemoptysis with 269
- heart displaced by 143, 210, 258, 269, 366, 373, 375
- failure from 17, 62, 68, 139, 201, 246
- from hepatic tumour 367
- hypertrophied left auricle 367
- jaundice from 417
- from large heart 367
- liver enlarged from 417
- pulsating from 417
- tender from 417
- from lobar pneumonia 366
- lung compression 367
- lymphadenomatous glands 367
- mediastinal neoplasm 367

Fibroid lung, contd.

- in mitral stenosis 367
- new growth simulating 136
- nutmeg liver from 417
- oedema of legs from 417
- osteo-arthropathy with 436
- palpitation from 594
- pectoriloquy with 258, 269, 366
- after pericardial effusion 367
- phthisis distinguished from 269
- physical signs of 210, 258, 269, 366
- after pleural effusion 367
- pneumonia 367
- from pneumonococcosis 366
- polycythemia with 650, 651
- resonance impaired over 210, 269, 366, 375
- retraction of chest from 210
- right ventricle enlarged from 268
- scoliosis from 191
- shoulder drawn down with 210, 269
- spinal curvature with 210, 269
- from splenic tumour 367
- sporotrichosis 366
- sputum of 210
- from stenosis of bronchus 367
- subphrenic abscess 367
- syphilis 367
- tactile vocal fremitus deficient with 210, 366
- increased with 210, 269
- transposition of viscera simulated by 269
- tubular breathing over 210
- vesicular murmur deficient with 258, 366
- voice sounds deficient with 258, 366
- vomiting due to 188, 929
- without many abnormal signs 143
- X rays in diagnosing 143, 269
- of uterus (see Fibromyoma)
- Fibrolophoma of abdominal wall 804
- Fibroma of bone 821
- breast 839
- congenital, in chest 911
- dermoid cyst simulating 888
- of face 823
- in femoral region 826
- of jaw 835
- larynx, asthma simulated by 653
- lower jaw 834
- molluscum 888
- neuro-, of cord located by lipiodol (Fig. 270) 326
- in von Recklinghausen's disease 503, 865
- in nose, epistaxis from 273
- of ovary, twisted pedicle of, ascites with 842
- recurrent, of basiphrenoid 225
- of vocal cord, stridor due to 799
- vulva 853, 855
- Fibromyoma of cervix presenting through vagina 657
- round ligament 832
- uterus, account of 483
- albuminuria from 9
- anuria from 57
- ascending nephritis from 9
- bearing-down pain from 529
- bimanual examination in diagnosing 438
- cachexia with 128
- calcified, X-ray shadow from 444
- carcinoma with 488
- simulated by 842

Fibromyoma of uterus, contd.

- cystic change in 483, 488
- cysts in 842
- degeneration of 842
- distended bladder simulating 840
- dullness in front of 448
- dyschezia from 166
- dysmenorrhoea from 237
- dystocia from 250, 251
- enlarged kidney simulated by 438
- expulsion of, pain in pelvis due to 573
- extra-uterine gestation simulated by 842
- extrusion of 488, 658, 842
- felt per rectum 728
- fluctuation in 841
- haemorrhage from 698
- hardness of 251, 483
- inversion of uterus simulated by 658
- irregular shape from 248
- lipiodol in diagnosis 940
- lumbosacral plexus affected by 81
- menorrhagia with 482, 483, 841
- metrorrhagia from 487, 488, 842
- micturition difficult from 492
- necrobiosis of 842
- ovarian cyst simulated by 251, 842
- simulating 483, 840
- tumour simulating 841
- pain in leg from 81
- pelvic swelling due to 57, 840
- physical signs of 438
- pigmentation of face with 128
- pregnancy simulating 840
- presenting through vagina 657
- rapid enlargement of 842
- renal back pressure from 57
- sarcoma with 488, 842
- sloughing of 842
- toxid discharge from 232
- softening of 483
- in pregnancy 251, 842
- sound in diagnosing 483
- sterility due to 793
- strangury due to 797
- swelling in iliac fossa due to 829
- tenesmus due to 873
- thrill in 483
- tumour of cauda equina simulated by 81
- twisted, simulating colic 149
- urgent laparotomy for 149
- ureters obstructed by 57
- uterus enlarged with 483
- vagina, presenting externally 658
- vulval swelling due to 853
- Fibromyxoma of parotid gland 848
- Fibrosarcoma of basiphrenoid 225
- dysphagia from 661
- pyalism from 661
- nasopharynx, foul breath from 111
- snoring due to 757
- post-nasal fossa, cough from 186
- scrotum 849
- Fibrosis, mediastinal (see Mediastinal Fibrosis)
- Fibrositis from apical dental infections 571
- bowel infection 571
- brachial neuralgia diagnosed from 544
- from cholecystitis 571
- chronic rheumatism from 571
- deltoid tender from 544
- gonococcal, of foot 146, 540
- of heel 552

Fibrositis of heel, contd.

- spine on os calcis simulating 552
- from infected nasal sinus 571
- infective arthritis and 566
- of laryngeal muscles, hoarseness from 388
- lumbago from 571
- myalgia from 572
- myositis and 566, 581
- neuritic pains from 566
- neuritis and 581
- nodules in 544
- occupation neurosis simulating 581
- pachymeningitis simulating 583
- pain in heel from 551
- limbs from 568
- shoulder from 580
- between shoulders from 566
- peri-arthritis tenderness in 544
- perichondritis of larynx in 763
- from prostatitis 571
- pyorrhea alveolaris 571
- pyosalphix 571
- rheumatoid arthritis and 566, 581
- triduity of back from 566
- scatica from 572
- from septic seminal vesicles 571
- testis 571
- shoulder immobilized by 544
- tender from 795
- still neck from 581
- synovitis and 544
- tender fibrous masses in 544
- muscle insertions in 544
- tenderness of back from 566
- spine from 869
- Fibula, epiphysitis of 456
- greenstick fracture of 456
- osteomyelitis of 456
- periostitis of 456
- sarcoma of 456
- Ficus, dermatitis due to 915
- Field of vision (see Vision)
- Fifth cranial nerve root (see Nerve Root, Cervical)
- segment, sensory area for Fig. 584 751
- cranial nerve (see Nerve, Cranial)
- dorsal nerve (see Nerve, Dorsal)
- segment, sensory area for Fig. 584 751
- lumbar segment, sensory area for Fig. 584 751
- sacral nerve root, distribution of Fig. 585 752
- Fig. dermatitis due to 915
- exaluria from 523
- Fim, filaritis in 36
- Filaments in urine in gleet 228
- from urethritis 229
- Filaria bancrofti nocturna 37
- diurna 37
- embryo (Fig. 603) 779
- embryos in blood 280
- Leishman's stain and 37
- size of 37
- perstans 37
- sanguinis hominis, chylous ascites and 72
- chyluria from 140
- elephantiasis due to 36, 72, 140, 512, 849, 855, 894
- embryos in blood 140
- eosinophilia from 36, 140, 272
- severe anaemia from 35
- in tropics 72, 140
- Filariasis, anaemia in 36
- blood parasites causing 36
- in China 36
- chyluria in 36
- in England 37
- erythema from 276, 280
- in Fiji 36
- general account of 36
- inguinal glands enlarged in 830

Filaria, *contd.*

- adema due to .. 511
- in Pacific islands .. 36
- file-makers, cramp in .. 189
- filix mass, collapse from .. 421
- jaundice from .. 421
- poisoning by .. 421
- for tape-worm .. 421
- fillet, sensory impulses and .. 73
- film, blood (see Blood Films)
- finger, acanthosis nigricans affecting .. 301
- affected in, washer-women .. 301
- angiokeratoma affecting .. 301
- anna affecting .. 301
- bacillus coli infection of .. 302
- bedsores of .. 301
- boils affecting .. 301
- bullous affections of .. 301
- chancre affecting .. 301
- epithelial gland enlarged from .. 476
- cheirompolyx affecting .. 301
- chil-lan affecting .. 301
- dermatitis herpetiformis affecting .. 301
- diabetic gangrene affecting .. 301
- diphtheria of .. 302
- dissection wound of .. 301
- dysidrosis affecting .. 301
- embolism of, in infective endocarditis .. 302
- epidermoids, bullous affecting .. 301
- epithelioma of .. 301
- erythematous affections of .. 301
- eucalyptus leaves affecting .. 301
- frostbite of .. 301, 302
- granuloma annulare affecting .. 301
- ichthyosis affecting .. 301
- impetigo contagiosa affecting .. 301
- leprosy affecting .. 301
- lichen planus affecting .. 301
- little, pain in, from cardiac causes .. 52
- **MALLET** .. 479
- mustard affecting .. 301
- orange affecting .. 301
- papular affections of .. 301
- pemphigus affecting .. 301
- pityriasis rubra pilaris affecting .. 301
- plants affecting .. 301
- prick, septicæmia from .. 704
- psoriasis affecting .. 301
- pustular affections of .. 301
- in rectum in relieving constipation .. 165
- reddening of, from onychia .. 497
- rhus affecting .. 301
- scleroderma affecting .. 301
- septic wound of, cellulitis from .. 511
- soda affecting .. 301
- **SORE** .. 301
- (and see Sore Finger)
- squamous affections of .. 301
- sugar affecting .. 301
- syphilide affecting .. 301
- tenderness of, from dactylitis .. 881
- thapsia affecting .. 818
- trophic ulcer of .. 301
- tuberculous dactylitis affecting (Fig. 629) .. 818
- ulcerative affections of .. 301
- urticaria affecting .. 301
- verruca necrogenica affecting .. 301
- vesicular affections of .. 301
- whittow affecting .. 301
- X-ray ulcer of .. 301
- Fingers, Acarus scabiei on .. 659
- acroparasthesia affecting .. 545
- atethosis affecting .. 168
- attitude of, in tetany .. 2
- black, in Raynaud's disease .. 203
- blebs on, from epidermolysis bullosa .. 496

Fingers, *contd.*

- broad in achondroplasia .. 233
- myxodema .. 507, 656
- bulle on, in, syringomyelia .. 125
- burning in, in acroparasthesia .. 545
- cheirompolyx of .. 918
- chondromata of .. 820
- **CLUBBED** .. 142
- (and see Clubbed Fingers)
- curved divergently in achondroplasia .. 233
- **DEAD** .. 203
- from arteriosclerosis .. 204
- atheroma .. 204
- bathing .. 203
- in blue-brain .. 204, 205
- carbonate of soda and .. 204
- from cervical rib .. 204
- cold .. 203
- ergotism .. 203
- excessive smoking .. 204
- menorrhagia and .. 484
- minor degrees of .. 203, 204
- from occupation .. 204
- pellagra .. 203
- in peripheral neuritis .. 570
- Raynaud's disease .. 203
- washerwomen .. 204
- from weight-carrying .. 204
- eczema affecting .. 301, 602
- marginatum of .. 312
- enlarged in acromegaly .. 142
- pulmonary osteoarthropathy .. 142
- erythema keratodes affecting .. 502
- gangrene of (see Gangrene)
- gonorrheal arthritis of .. 425
- Heberden's nodes on .. 502
- loss of, in Raynaud's disease .. 203
- lupus erythematosus affecting .. 301, 746
- vulgaris of .. 301
- muscles of, see under Muscles
- in myxodema (Fig. 893) .. 507
- nodose, in progeria .. 237
- nodular pads on .. 502
- numbness in, in acroparasthesia .. 545
- pads on (Fig. 356) .. 427, 431, 520
- Dupuytren's contraction with .. 432
- osteoarthritis combined with .. 432
- skagram of (Fig. 344) .. 431
- pain in (see Pain)
- **papules on, in pityriasis rubra pilaris** .. 600
- podgy in myxodema (Fig. 70) .. 51
- purple in Raynaud's disease .. 203
- Raynaud's disease affecting .. 301, 302, 320, 852
- scabies affecting .. 301, 918
- scarred in Morvan's disease .. 302
- Raynaud's disease .. 302
- syringomyelia .. 302
- sensory centre for .. 631
- spindled from gout .. 426
- in rheumatoid arthritis (Fig. 332) .. 426, 472
- Still's disease (Fig. 361) .. 472
- three middle, same length in achondroplasia .. 233
- tingling in, in acroparasthesia .. 545
- tremor of, due to alcohol .. 881
- in Graves' disease .. 857, 881, 934
- ulnar deflection of, in rheumatoid arthritis (Fig. 334) .. 427
- whittows on, in Morvan's disease .. 320
- Fire-damp, coma from .. 154
- marsh gas and .. 154
- in mines .. 154

Firmen, left ventricle enlarged in .. 258

- First cranial nerve (see Nerve, Cranial)
- dorsal segment, sensory area for (Fig. 584) .. 751
- lumbar segment, sensory area for (Fig. 594) .. 751
- sacral segment, sensory area for (Fig. 584) .. 751
- Fischer, coproporphyrin of .. 903
- uroporphyrin of .. 903
- Fish, fresh-water, Bothriocephalus letus from .. 633
- fried, urticaria from .. 935
- trypanosomes in .. 37
- urticaria from .. 824
- Fishbone, aorta opened by .. 337
- in bronchus, gangrene of lung from .. 422
- gum, pyralism due to .. 661
- oesophagus opened by .. 337
- in rectum .. 726
- tongue swollen from .. 851
- in tonsil, sore throat due to .. 757
- ulcer of frenum lingue due to .. 590
- Fish-dealers, dermatitis in .. 917
- Fish-spine poisoning, delirium from .. 211
- Fishermen, erythema in .. 275
- jellyfish stings in .. 278
- sea-cat poisoning in .. 278
- weever-fish poisoning in .. 278
- Fissure, anal, aching in perineum from .. 579
- blood from .. 96, 97
- dyspareunia from .. 239
- pain in penis from .. 576
- rectum from .. 727
- by nail bed, chancre causing .. 302
- operation for, incontinence of faeces after .. 394
- rectal, pain in penis from .. 578
- tenesmus due to .. 873
- of tongue from syphilis .. 898
- Fissures in skin in pellagra .. 279
- tongue due to streptococcal glossitis .. 861
- vulval .. 239
- Fistula, anal, aching in perineum from .. 579
- blood from .. 96, 97
- between biliary and urinary tracts .. 903
- of bladder from abscess .. 296
- actinomycosis .. 296
- **carcinoma** .. 296
- after childbirth .. 296
- from diverticulitis .. 296
- injury .. 296
- tuberculous .. 296
- various .. 640
- congenital, sterility due to .. 793
- faecal, at umbilicus, from pneumococcal peritonitis .. 59, 777
- tuberculous peritonitis .. 54, 65, 777
- gastrocolic, faecal vomiting due to .. 929
- faeces acid with .. 301
- **fat in stools with** .. 301
- intestino-vesical, from diverticulitis .. 356
- jejuno-colic, faeces acid with .. 301
- **fat in stools with** .. 301
- in neck from adenitis .. 474
- oesophagus to trachea, aspiration pneumonia from .. 323
- operation for, incontinence of faeces after .. 394
- penile .. 494
- perineal .. 494
- after operation .. 766
- rectal, felt by finger .. 728
- rectovaginal .. 728
- rectovesical .. 296, 728
- scrotal .. 707
- from peri-urethral abscess .. 767
- rectal suppuration .. 767
- syphilitic testis .. 767

Fistula, *scrotal*, *contd.*

- from tuberculous testis .. 585, 767
- urethral extravasation .. 767
- umbilical, in tuberculous peritonitis .. 706, 804
- urethral, from gumma .. 230
- sore in perineum from .. 766
- behind stricture .. 766
- from urethritis .. 494
- **urinary** .. 494
- congenital .. 494
- cysto-pen in diagnosis .. 494
- from injury .. 494
- kidney .. 494
- in loin .. 494
- methylene blue in .. 494
- after operation .. 494
- partition .. 494
- from peri-urethral abscess .. 494
- stricture .. 494
- suprapubic .. 494
- vaginal .. 494
- vesico-colic, from carcinoma .. 162
- diverticulitis .. 162
- periclititis .. 162
- Int-see Convolutions
- Iliac joint in Charcot's disease .. 434
- osteo-arthritis .. 430
- Flame-shaped, hemorrhages in retina .. 519
- Flashes of light, epistaxis relieving .. 274
- Flat-foot, gonococcal .. 146
- gonorrheal arthritis producing .. 425
- limping from .. 456
- long plantar ligament and .. 146
- in meralgia parasthetica .. 540
- Morton's neuralgia .. 540
- pain in foot from .. 539
- in rickets (Fig. 192) .. 232
- **FLATULENCE** .. 302
- due to aerophagy .. 302, 308
- in anemia abdominalis .. 396, 538
- anura pectoris and .. 396, 864
- from atheroma .. 538
- atonic dyspepsia .. 400
- belching in .. 485
- bicarbonate of soda and .. 376, 566
- borborogymy with .. 107
- calomel and .. 566
- from chronic gastritis .. 308
- colon visible in .. 809
- due to dilated stomach .. 302
- dysmenorrhœa simulated by .. 239
- emphysema and .. 303
- fainting due to .. 297
- due to fermentation .. 302
- foul breath and .. 113
- **gastric, account of** .. 302
- due to gastric atony .. 302
- in gastritis .. 930
- heartburn from .. 376
- heart disease and .. 52, 303, 864
- in hill diarrhoea .. 217
- inflammable gas in .. 302
- insomnia due to .. 403
- **intestinal** .. 302, 303, 308
- in cirrhosis of liver .. 308
- due to constipation .. 308
- fermentation .. 308
- in heart failure .. 308
- loss of weight due to .. 933
- marsh gas in .. 302
- mercurism simulated by .. 485
- pain behind sternum from .. 376
- between shoulders .. 566
- in chest from .. 533, 864
- epigastrium from .. 538
- hypocondrium from .. 553
- pelvis from .. 573
- round heart from .. 536
- in shoulder from .. 580
- palpitation from .. 595
- from polycystic disease .. 57
- putrefaction .. 302, 308
- pyloric obstruction .. 219, 302

Flatulence, contd.

- rhubarb relieving .. 376
- tenderness in chest from 864
- X rays in diagnosing cause of .. 302
- Flatulent dyspepsia** .. 400
 - often mis-called gas-tritis .. 338
- Flatus, fullness and .. 308
 - per urethram .. 724
- Flavour, taste and .. 860
- Flax-spinners, dermatitis in .. 917
- Fleabane, dermatitis from Flea-bite (see Bite) .. 915
- Fleas, pruritus due to .. 658
- Flexner's bacilli, dysentery and .. 99
- serum .. 98
- dysentery cured by 100
- Flexner-Harris bacilli in dysentery .. 709
- Flies, diabetic urine attracting .. 334
- Flint's murmur** .. 119
- Floating kidney .. 813
- Riedel's lobe simulating .. 461
- Flowers of ankylostomiasis .. 635
- Fluctuation in appendicular abscess** .. 843
 - bursa .. 844
 - carcinoma of liver .. 468
 - cyst of breast .. 838
 - cystic goitre .. 876
 - hygroma .. 816
 - galactocoele .. 838
 - groin from psoas abscess .. 458
 - hæmatocele .. 589
 - hydrocele .. 588, 826, 849
 - hydropneumothorax .. 449
 - liver abscess .. 465
 - mastitis .. 838
 - ovarian cyst .. 251, 843
 - pancreatic cyst .. 811
 - perinephric abscess .. 438
 - peri-urethral abscess .. 851
 - at Poupert's ligament, due to psoas abscess .. 698
 - in pregnant uterus .. 841
 - psoas abscess .. 825, 831
 - pyonephrosis .. 449
 - simulation of, in lipoma .. 816
 - in softened fibroid .. 841
- Fluid, ascitic (see Ascitic Fluid)**
- cerebrospinal (see Cerebrospinal Fluid)
- hydatid, hooklets in 227, 470
- non-albuminous .. 470
- hydrocele .. 849
- loss, collapse from .. 392
- constipation from .. 165
- excessive, bradypnea from .. 110
- collapse from .. 110
- cyanosis from .. 196
- shock from .. 110
- faces hard from .. 165
- hypothermia from .. 392
- inspissation of blood from .. 201
- polycythæmia from .. 650
- by severe diarrhoea .. 392
- vomiting .. 392
- ovarian cyst, characters of 60
- pleuritic (see Pleuritic Fluid)
- thrill with ascites .. 59
- ovarian cyst .. 60
- Fluke, lung .. 792
- (and see Distoma Hepaticum)
- Fluorescein in demonstrating corneal ulcer .. 890
- Fluorescence test for urobilin** (Fig. 322) 406
- of urine after eosin .. 904
- Flush area, rosacea affecting .. 600
- malar, in mitral stenosis 50, (Fig. 78) 69, 294, 595, 857
- myxedema 50, 290, (Fig. 391) 506, 507
- FLUSHING** .. 303
- due to alcohol .. 303

Flushing, contd.

- of arm in brachial neuralgia .. 543
- blushing distinguished from .. 303
- after castration .. 303
- due to chlorosis .. 303
- climacteric .. 303
- debility .. 303
- dyspepsia .. 303
- emotion .. 303
- epileptic aura .. 320
- in erythromelalgia .. 320
- of face in influenza .. 201
- pneumonia (Fig. 172) 201
- yellow fever .. 345
- fainting with .. 303
- due to feeble circulation 303
- giddiness with .. 303
- in Graves' disease .. 292
- due to hypochlorhydria 303
- in hysteria .. 391
- due to indigestion .. 303
- lactation .. 303
- in malaria .. 38
- at male climacteric .. 303
- due to menstruation .. 303
- nausea with .. 303
- due to nerve storm .. 303
- nose thickened from .. 303
- numbness with .. 303

- prominent, in congenital syphilis (Fig. 240) 290
- sarcoma of .. 225
- segmental areas of (Figs. 658, 659) 867

Forehead, contd.

- sloping in microcephaly 234
- syphilis of 601
- syphilitic node of 255
- tenderness in, from
 - frontal empyema 226, 694
 - sinus distention 285
 - wrinkled in acromegaly 293
 - tabs (Fig. 249) 292
- Foreign body in air passages, asthma simulated by 653
- anus, blood from 96
- aorta opened by 336, 337
- in appendix, colic from 148
- bladder, colic from 148
- X-ray shadow from 444
- bronchus, aspiration pneumonia from 323
- bronchiectasis from 367
- dyspnea from 247
- empyema from 134
- fibroid lung from 367
- gangrene of lung from 322, 324, 801
- hamoptysis from 361
- pyopneumothorax from 801
- corn from 552
- cough from 185
- in ear, blood due to 522
- creaking due to 878
- deafness from 207
- carache from 252
- meatus obstructed by 207
- tinnitus due to 878
- vertigo due to 912
- eye, corneal ulcer from 890
- pain in eye from 546
- photophobia from 639
- tic from 173
- foot, limping due to 456
- gum, pyalism due to 661
- hamatemesis from 346
- in heel 551
- X rays in diagnosis 552
- knee, limping from 456
- larynx in children 187
- cough from 187
- cyanosis from 196
- dyspnea from 246, 248
- hoarseness from 387
- laryngismus stridulus simulated by 249, 799
- meningitis simulated by 731
- stridor from 196, 799
- nasopharynx in children 113
- foul breath from 113
- nose in children 113
- discharge due to 225
- epistaxis from 273, 274
- foul breath from 113
- oesophagus opened by 336, 337
- in oesophagus 240
- bougie in diagnosis 337
- hamatemesis from 337
- oesophagoscope in diagnosis 337
- removing 241
- pyopneumopericardium from 800
- X rays in diagnosis 337
- rectum 726
- tenesmus due to 873
- swallowed, hamatemesis from 342
- in throat in children 113
- foul breath from 113
- tongue 590
- trachea, cyanosis from 197
- diphtheria simulated by 197
- dyspnea from 248
- gangrene of lung from 323
- stridor due to 799
- urethra 575
- discharge due to 227, 230
- pain in penis from 574
- Formalin, dermatitis from 915
- eczema due to 917
- for histological fixation 487

Formalin, contd.

- urticaria due to 917
- Formication 658
- Formosa, Distoma pulmonale in 367
- Fortification figures in migraine 922, 925
- Fossa, iliac (see Iliac Fossa)
- pituitary (see Sella Turcica)
- Foul air, headache from 371
- BREATH 112
- (and see Breath, Foulness of)
- sputum (see Sputum)
- Fountain pen, wearing a, pain in breast from 529
- Fourth cervical nerve, aorta supplied by 533
- root (see Nerve Root, Cervical)
- shoulder supplied by 864
- segment, sensory area for (Fig. 584) 751
- disease, account of 283
- epidemics of 283
- erythema in 276, 280, 283
- pyrexia in 283
- dorsal nerve, stomach related to 864
- verticle supplied by 533
- segment, sensory area for (Fig. 584) 751
- lumbar segment, sensory area for (Fig. 584) 751
- sacral nerve root, distribution of (Fig. 585) 752
- Fovea centralis (see Yellow Spot)
- Fowl's blood, malingering and 337, 359
- oval corpuscles in 337, 359
- Fowls, botulism in 223
- fox-bite, delirium from 213
- hydrophobia from 213
- Foxglove, dermatitis from 915
- Fractional test meal (see Test Meal)
- Fracture into ankle-joint, Dupuytren's 147
- Pott's 147
- talipes from 147
- of astragalus, pain in heel from 552
- X rays in diagnosis 552
- badly united, elephantiasis simulated by 512
- oedema of leg from 512
- of base of skull, absolute rest for 154
- blindness due to 925
- cerebrospinal fluid from ear from 155
- nose from 155, 224
- coma from 153, 331
- diabetes insipidus after 655
- epistaxis from 273
- glycosuria from 331
- from head injury 224
- subconjunctival hemorrhage due to 155
- tinnitus due to 879
- vertigo after 912
- basiphrenoid, hemianopsia after 379
- bullae from 125
- callus after 817, 834
- contracture from 178
- crepitus from 190
- depressed, of skull, bradypnea from 110
- cerebral compression from 110
- coma from 110, 153
- headache from 110
- optic neuritis from 110
- stupor from 110
- vertigo from 110
- vomiting from 110
- Dupuytren's, into ankle-joint 147
- of femur, greenstick, limping from 457
- oedema of legs after 515
- sciatic nerve paralysis from 610
- fibula, greenstick, limping from 456

Fracture, contd.

- of foot, limping from 456
- pain in foot due to 456
- greenstick 817
- in rickets 305
- of humerus, musculo-spiral nerve paralysis from 615
- jaw 834
- dysphagia from 661
- pyalism from 661
- leg, compound, cellulitis from 147
- talipes after 147
- delirium tremens after 214
- lymphatic obstruction following 894
- muscle atrophy from 880
- of os calcis 551
- pain in heel from 552
- X rays in diagnosis 552
- patella, limping from 456
- pelvis, injury of urethra from 351, 493, 575
- retention of urine from 493
- rupture of bladder from 351
- sciatic nerve paralysis from 610
- penis by blow 140
- chordae from 140
- in cortex 140
- petrous bone, deafness from 208
- Pott's, into ankle-joint 147
- R.D. from 80
- of rib, crepitus with 862
- empyema from 134
- hamoptysis from 361
- injury to lung by 254
- pneumothorax from 649
- surgical emphysema from 254, 649
- tenderness of chest from 862
- X rays in diagnosing 862
- sacrum, anaesthesia from (Fig. 587) 752
- skull, absolute rest for 154
- blood from ear in 522
- bradypnea from 110
- cerebral compression from 110
- coma from 110, 153, 154
- deafness from 208
- delirium from 211, 212
- depressed (see Fracture, Depressed)
- glycosuria from 330
- headache from 110
- from head injury 212
- hyperpyrexia from 390
- optic neuritis from 110
- stupor from 110
- unilateral paralysis from 154
- vertigo from 110
- vomiting from 110
- spine, abdominal pain from 151
- allocheiria from 22
- anaesthesia from 536, (Fig. 587) 752
- colic simulated from 151
- compression of cord in 495
- from diving 304
- girdle pains from 536
- glycosuria from 330
- hyperpyrexia from 390, 391
- intercostal pain after 531
- from muscular effort 304
- pain in chest from 536
- priapism from 657
- retention of urine from 495
- SPONTANEOUS 304
- from carcinoma 823
- chloroma 304
- fragilitas ossium 304
- in general paralysis 304, 305
- from hydatid cyst 823
- in mollities ossium 305
- from myeloid sarcoma 304, 306
- new growth 304, 306
- in scurvy rickets 819

Fracture, spontaneous, contd.

- in syringomyelia 320
- from tuberculous caries 304, 306
- of sternum, crepitus with 862
- from injury 862
- tenderness of chest from 862
- X rays in diagnosing 862
- temporal bone, deafness from 207
- thigh, paralysis of external popliteal nerve from 146
- sciatic nerve from 146
- talipes from 146
- tibia, greenstick, limping from 456
- ulcer of leg after 894
- X rays in diagnosing 190
- fracture-dislocation of spine, allocheiria from 211
- ascending nephritis in 22
- bedsores from 321
- from caries 306
- cord compression by 22
- cystitis in 211
- delirium in 211
- glycosuria from 331
- knee-jerk absent from 452
- paraplegia from 656
- priapism from 656
- retention of urine in 211
- transverse lesion of cord from 452
- uraemia in 211
- Frænum linguae, abrasion of, blood-spitting from 364
- from bronchitis 364
- coughing, 364
- in whooping-cough 364
- injury of 590
- ulcer of 898
- of prepuce, perforation of 764
- Frangilitas ossium 233, 304
- blue sclerotics with (Fig. 259) 304
- familial incidence of 304
- in osteogenesis imperfecta 233
- spontaneous fracture due to 304
- in syringomyelia 320
- Fragility of red corpuscles in acholuric jaundice 781
- familial acholuric jaundice 415
- method of testing 781
- in splenic anaemia 422
- splenomegaly cirrhosis 780
- Fragmentary constipation 159
- Fragments of growth in effusion 365
- sputum 365, 792
- urine 349
- papilloma in urine 722
- Frambesial granuloma in yaws 501
- France, ringworms of 310
- Freckles in von Recklinghausen's disease 865
- xeroderma pigmentosum 888
- Freezing point of cerebrospinal fluid 383
- depression of ascitic fluid 72
- French polishers, bichromate of potassium used by 917
- dermatitis in 917
- stained skin in 917
- Frequency of micturition (see Micturition, Increased Frequency of)
- Fresh-water fish, Bothriocephalus latus from 633
- Friction, bulbæ from 123
- over liver in general peritonitis 734
- from hepatic abscess 695
- in peritonitis 149
- pericardial, account of 117
- simulating aortic regurgitation 120
- thrill due to 875

Friction, contd.

- peritonitic, over spleen 46, 149, 734
- pleuritic, thrill due to 875
- sounds in pericarditis 265, 373, 532
- over perisplenitis 553
- in pleurisy 532, 863
- pleuropericardial 533
- from subdiaphragmatic abscess 697, 807
- (and see Rub)
- Fried fish, urticaria from 935
- Friedländer's bacilli (see Bacillus Pneumoniae)
- Friedreich's ataxia 176, 624**
 - age incidence of 78, 145, 176, 624
 - ankle-clonus absent in 624
 - arms ataxic in 624
 - cerebellar tract lesion in 76
 - choreiform movements in 171, 624, 883
 - extensor longus hallucis hypertrophied in 176
 - plantar reflex in 88, 171, 176, 624
 - family incidence of 78, 171, 624
 - hallux erectus in 79, 145, 624
 - heel drawn up in 176
 - inco-ordination in 145, 313
 - infantile paralysis simulated by 78
 - insidious onset of 624
 - intention tremor in 176, 624, 884
 - knee-jerk absent in 145, 171, 624
 - kyphosis in (*Fig. 148*) 176
 - 'main botte' in 176
 - muscular atrophy in 176
 - myopathy simulated by 78
 - nodding movements in 883
 - nystagmus in 145, 171, 176, 505, 624
 - optic atrophy in 624
 - paralysis of legs in 171
 - paraplegia from 621, 624
 - pes varus in 176
 - posterior column lesion in 75, 76
 - pupil reactions normal in 624
 - quiverings of face in 883
 - scoliosis in 176, 192, 624
 - no sensory disturbance in 624
 - sex incidence of 176
 - slow progress of 624
 - spasticity in 171, 176
 - speech jerky in 773
 - monotonous in 624
 - slurring in 145
 - syllabic in 176
 - sphincter trouble in 176
 - late in 624
 - talipes in 178, 145, 176, 624
 - Tooth's peroneal atrophy simulated by 78
 - tremor in 880, 883
- Fright, acute yellow atrophy and 345, 416**
 - chorea and 170
 - convulsions from 181
 - D.A.H. from 597
 - diabetes insipidus from 655
 - dyspnoea from 247
 - fainting from 296
 - glycosuria from 331
 - menorrhagia from 482
 - nerve disorder from 77
 - palpitation from 594, 596
 - paroxysmal tachycardia from 857
 - pupil dilated by 674
 - thyroid gland enlarged from 877
- Frigidity, congenital, impotence from 393**
- Frog-belly in cretin 290**
- Frolich's syndrome 236**
- Frontal bone, ivory exostosis of 255, 284, 820**
 - overgrown in acromegaly 293

Frontal bone, contd.

- thickened in Leontiasis ossea (*Fig. 215*) 255
- headache (see Headache)
- lobe tumour, alteration in character due to 882
- inattention due to 882
- incoherence due to 882
- loss of memory due to 882
- mental changes with 882
- unilateral tremor from 882
- ridges overgrown in acromegaly 293
- sinus (see Sinus)
- veins dilated from cavernous sinus thrombosis 283
- Fronto-nasal area (*Fig. 658*) 867**
 - pain from frontal sinus disease 550
 - nose affection 550
 - upper incisor teeth 549
 - sensory area (*Figs. 442, 443*) 550
- Fronto-temporal sensory area (*Figs. 442, 443*) 550**
- Frostbite, bullae from 123, 125**
 - of ear, earache from 252
 - finger 301, 302
 - gangrene from 317
 - haemoglobinuria from 357
 - necrosis of soft parts in 125
 - Raynaud's disease simulating 203
 - ulcer of foot from 893
 - vesicle due to 920
- Frothing diarrhoea in spruce stools in dengue 571**
- Fruit, bottled, botulism from 243**
 - stone in bronchus, hamoptysis from 361
 - unripe, diarrhoea from 216, 872
 - nightmares from 499
 - tetanus from 872
- Fuchsin, carbol, formula for 788**
- Focus vesiculosus, loss of weight due to 934**
- Fullness in chest from mediastinal growth 534**
 - head, epistaxis relieving 274
- Intestinal 308**
 - in right iliac fossa in appendicitis 558
 - from tuberculous caecum 562
- SENSE OF 306**
 - acrophagy and 308
 - from atonic dyspepsia 400
 - with atony of stomach 307
 - from carcinoma of liver 468
 - commoner in women 306
 - from eating too rapidly 306
 - gas seldom the cause 306
 - from gastritis 398
 - hypertonus of colon 308
 - stomach 306
 - in hypochondrium from active congestion of liver 417
 - from hypotonus of stomach 306
 - leather-bottle stomach and 306
 - nerves and 306
 - from spastic constipation 308
 - wind and 308
- Fulminant of mercury, dermatitis from 917**
 - in detonators 917
- Fumes, ataxia from 77**
- Fumes, dyspnoea from 246**
 - carbon bisulphide, neuritis from 84
 - coke oven, dyspnoea from 246
 - cough from 185
 - delirium from 212
 - fainting from 299
 - gas fire, dyspnoea from 246
 - out of condition from 113

Fumes, gas, contd.

- shortness of breath from 113
- lime-kiln, dyspnoea from 246
- in manufactures, out of condition from 113
- shortness of breath from 113
- noises in head from 504
- petrol (see Petrol Fumes)
- Functional albuminuria 18, 655**
 - allocheiria 22
 - anaesthesia 632
 - aphonia 606, 774
 - ataxia 107
 - borborygmi 110
 - bradypnoea 111
 - cardiopathy, palpitations from 52
 - pricking pains in 52
 - stabbing pains in 52
 - Cheyne-Stokes breathing 139
 - conditions, visual fields constricted in 924
 - disorders of speech 774
 - dyspepsia (see Dyspepsia)
 - exaggeration of knee-jerks 451, 504
 - frequency of micturition 495
 - hemidrosis 803
 - hiccough 386
 - nerve disorder from pyorrhoea alveolaris 94
 - noises in head 504
 - and organic nerve disease, Babinski's sign in distinguishing 87
 - paralysis of vocal cord 606
 - paraplegia 626, 632
 - photophobia 639
 - prolonged pyrexia 688
 - pyralorrhoea 661, 662
 - pyrexia 711
 - shortness of breath 114
 - states, visual field constricted in 924
 - tenderness of spine 870
 - trance 158
 - vomiting 931
- Fungating endocarditis (see Endocarditis, Infective)**
- Fungi, poisoning by 421**
- Fungus on Arundo donax, dermatitis due to 916**
- Fur dyes (see Dyes)**
- makers, mercerialism in 44, 882
- Furnacemen, left ventricle enlarged in 258**
 - photophobia in 639
- Furuncle (see Boil)**
- Fusiform aneurysm, X rays in diagnosing 262**
- bacilli in Vincent's angina 760, (*Fig. 609*) 779

GAERTNER'S bacillus (see Bacillus)**GAIT, ABNORMALITIES OF 313**

- ataxic (see Ataxy)
- cerebellar 77
- clumsy, in Little's disease 169
- cross-legged, in cerebral diplegia 176, 884
- Little's disease 169
- festinating, in paralysis agitans 314
- hesitant, in paralysis agitans 614
- high-stepping, from paralysis of external popliteal nerve 610
- in peripheral neuritis 75
- tabes 314
- limping (see Limping)
- in paralysis agitans 881
- reeling, from cerebellar disease 314
- in sciatic nerve paralysis 610
- scissor, in diplegia 884
- Little's disease 169
- shuffling, in lateral sclerosis 314

Gait, shuffling, contd.

- in paralysis agitans 609
- spastic, in disseminated sclerosis 883
- in spinal caries 868
- staggering, from alcohol 77
- veronal 77
- stamping, in tabes dorsalis 75
- stooping, from caries of spine 193
- tottering, in general paralysis 881
- unsteady, in peripheral neuritis 74, 75
- waddling, in congenital dislocation of hip 314
- pseudo-hypertrophic muscular paralysis 314, 625
- Galatocoele 838**
 - pain in breast from 529
- Gall-bladder, carcinoma of (see Carcinoma)**
 - disease, constipation from 161
 - distended, from carcinoma of duodenum 811
 - eighth dorsal nerve supplying 864
 - embedded in adhesions from gall-stone 316
 - empyema of (see Empyema)
 - ENLARGEMENT 314**
 - abscess of liver simulating 315
 - carcinoma of liver simulating 315
 - from carcinoma of pancreas 67, 316, 408, 412, 554, 776
 - causes of 316
 - from cholecystitis 316, 408, 696, 739
 - chronic pancreatitis 316, 408
 - colic with 437
 - conditions simulating 314
 - duodenal ulcer simulating 462
 - from empyema 316, 408, 696
 - gall-stones 316, 408
 - gastric ulcer simulating 462
 - gumma of liver simulating 315
 - hydatid cyst simulating 315, 470
 - hydronephrosis diagnosed from 315, 316
 - jaundice with 408, 437
 - kidney simulated by 437
 - laparotomy in diagnosing 316
 - movable kidney diagnosed from 315, 316
 - simulated by 813
 - from mucocele 317
 - new growth of colon simulating 316
 - duodenum simulating 316
 - pylorus simulating 316
 - suprarenal simulating 316
 - from obstruction of bile-duct 316, 411
 - pancreatic tumour 412
 - pelvic swelling due to 840
 - physical signs of 314, 315, 316, 437
 - pyloric thickening simulating 462
 - Riedel's lobe simulating 315, 461, 812, 829
 - sarcoma of liver simulating 315
 - from simple mucocele 316
 - typhoid fever 316, 419
 - X rays in diagnosing 437
 - fifth cervical nerve-root to 864
 - fourth cervical nerve-root to 864
 - infected (see Cholecystitis)
 - inflamed, rigidity over 734
 - lesions, pain in chest from 864

Gall-bladder lesions, contd.

- pain in epigastrium .. 864
- right hypochondrium from .. 864
- tenderness in chest from .. 864
- epigastrium from .. 864
- right hypochondrium from .. 864
- **mucocoele of** .. 316, 317
- nerve-supply of .. 864
- ninth dorsal nerve supplying .. 864
- normal, tetraiodophenolphthalein in (*Fig. 693*) 941
- pain over (*see Pain*) .. 864
- perforation of, general peritonitis from .. 734
- phrenic nerve twigs to .. 864
- rigid rectus simulating .. 809
- ruptured in typhoid .. 316
- seventh dorsal nerve supplying .. 864
- **skialography of** .. 941
- stone in (*see Gall-stones*) .. 20
- suppurating .. 20
- albumosuria from .. 20
- appendicular abscess simulated by .. 829
- in iliac fossa .. 829
- without jaundice .. 829
- laparotomy in diagnosing .. 829
- and *see* Cholecystitis and Empyema of Gall-bladder
- tender *see* Tenderness
- after tetraiodophenolphthalein .. 942
- thickened from gall-stone .. 316
- third cervical nerve-root to .. 864
- tumour of, portal vein obstructed by .. 778
- **Gall-stones, account of** .. 409
- adhesions from .. 218
- age incidence of .. 396
- ball-valve, in ampulla of Vater .. 739
- bile duct obstructed by .. 468
- pigment in urine from .. 192
- biliary colic from .. 314, 316
- **carcinoma diagnosed from** .. 315
- of gall-bladder with .. 315
- pancreas simulating .. 416
- simulated by .. 468
- catarrhal jaundice distinguished from .. 411
- cholangitis with .. 408, 739
- cholecystitis from .. 316, 696, 699
- in chronic pancreatitis .. 538
- chronic pancreatitis simulating .. 316, 410
- cirrhosis simulated by .. 466
- colic from .. 147, 148, 150, 151, 153, 343, 409, 410
- collapse from .. 410
- common bile-duct obstructed by .. 316
- cough from .. 187
- cystic duct obstructed by .. 316
- dilatation of right ventricle simulating .. 536
- stomach from .. 218
- duodenal ulcer simulated by .. 343, 410
- simulating .. 48, 153
- duodenum opened by .. 336
- dyspepsia from .. 376, 400
- empyema of gall-bladder from .. 316, 696
- epigastric pain from .. 316
- in faeces .. 344, 410
- fat in stools with .. 130
- gall-bladder embedded in adhesions from .. 316
- enlarged from .. 316, 408
- not enlarged with .. 554
- thickened from .. 316
- **gastric ulcer distinguished from** .. 538
- simulated by .. 343, 410
- hamatemesis from .. 336, 343, 344
- heart disease simulating .. 52

Gall-stones, contd.

- heartburn from .. 376
- hepatic abscess from .. 464
- with hepatoptosis .. 463
- hunger pain from .. 410
- impacted in ampulla of Vater, colic from .. 148
- bowel, colic from .. 148
- indigestion from .. 410
- simulated by .. 396
- infective cholangitis from .. 316
- intestinal obstruction by .. 167, 344
- **jaundice from** .. 151, 153, 314, 316, 344, 407, 409, 410, 466, 468, 554
- laparotomy in diagnosing .. 153, 315, 410
- liver enlarged from .. 344, 409, 466, 468
- melena from .. 343
- microbe infection causing .. 699
- obstruction by, stools alkaline with .. 130
- pain in back from .. 285, 410
- chest from .. 864
- epigastrium from .. 410, 538, 566
- over gall-bladder from .. 316, 344
- in hypochondrium from .. 410, 553, 566
- shoulder from .. 580, 583, 864
- between shoulders from .. 566
- in spine from .. 871
- pancreatitis from .. 128
- simulated by .. 153
- simulating .. 700
- peritoneal adhesions from .. 409
- pyloric stenosis from .. 218
- pyrexia from .. 150, 314, 316, 410, 538, 688, 699, 739
- renal calculus simulated by .. 440, 442
- colic simulating .. 554
- rheumatism of shoulder simulated by .. 863
- rigor from .. 150, 316, 410, 468, 737, 739
- sex incidence of .. 396
- shivering from .. 538
- sizes of .. 409
- **skigrams of** .. 409, 441
- (*Figs. 324, 325*) .. 409, 441
- slipping rib simulating .. 553
- spasms from .. 396
- stercobilin and .. 130
- stools pallid from .. 466
- stricture of bile-ducts from .. 411
- simulating .. 411
- subdiaphragmatic peritonitis from .. 583
- suppurative cholangitis from .. 415
- without symptoms .. 409
- tenderness in chest from .. 864
- over gall-bladder from .. 316, 538, 553
- of liver from .. 344
- in shoulder from .. 864
- of spine from .. 871
- **tetraiodophenolphthalein and 941** (*Figs. 698-701*) 943
- ulcerated into duodenum .. 343
- ulceration of bile-ducts from .. 411
- undue pulsation of abdominal aorta simulating .. 662
- urobilin in urine from .. 129
- vomiting from .. 410, 538
- wind from .. 306
- in women .. 538
- **X rays and** .. 344, 941
- Gallic acid, thirst due to .. 875
- urine black from .. 904
- brown from .. 904
- Galton's whistle in testing upper-tone limit .. 206
- Galyt, arsenic in .. 277
- erythema from .. 277
- œdema after .. 514, 516

Galyt, contd.

- **toxic effects of** .. 422
- Gamboe, colic from .. 148
- tenesmus due to .. 873
- Games, cramp during .. 188
- Gametocytes of malaria parasites .. 41, 42
- **Ganglion, Gasserian, excision of, eye changes after** .. 891
- growth involving, pain in face from .. 549
- gumma of, pain in face from .. 549
- herpes affecting .. 549
- geniculate, chorda tympani and .. 604
- spiral, deafness from changes in .. 207
- stellatum, ramus communicans to .. 618
- **GANGRENE** .. 125, 317
- from acids .. 317
- alcohol .. 320
- alkalis .. 317
- aneurysm .. 317
- anthrax .. 317
- of appendix (*see Appendicitis, Gangrenous*) .. 318
- arm .. 318
- in diabetes .. 335
- from arsenic .. 320
- arteriosclerosis .. 318, 322
- atheroma .. 894
- Bacillus aerogenes capsulatus .. 318
- bedsores .. 317
- of bladder from cystitis .. 720
- bullæ in .. 125, 125, 318
- from burn .. 317
- cancerum oris .. 317
- carbon monoxide poisoning .. 317, 322
- cauda equina lesions .. 317
- **causes of** .. 317
- from chemicals .. 317
- chicken-pox .. 317
- cholera .. 317
- coal-gas poisoning .. 317, 422
- crushing .. 317, 418
- debility and .. 320
- from diabetes .. 317, 318
- diphtheria .. 317
- disturbed innervation .. 317, 320
- **dry, account of** .. 318
- from embolism .. 318
- in Raynaud's disease .. 318
- senile .. 318
- of ears in Raynaud's disease .. 320
- from electric currents .. 317
- embolism .. 317, 318, 321
- endarteritis .. 317
- in enteric fever .. 317
- epidemic .. 317, 322
- from ergot .. 317, 322
- erysipelas .. 317
- erythromelalgia .. 317, 320
- extreme cold .. 317
- heat .. 317
- fatty acids formed in .. 318
- of fingers from aneurysm .. 322
- in diabetes .. 301, 335
- from growth in axilla .. 342
- hematoma of arm .. 322
- in Raynaud's disease .. 318
- (*Fig. 265*) .. 319, 320
- syringomyelia .. 320
- foot from atheroma .. 540
- coloured figure of .. 318
- (*Fig. 264*) .. 318
- in diabetes .. 301, 335
- after intermittent claudication .. 542
- in Raynaud's disease .. 542
- syringomyelia .. 320
- from frostbite .. 317
- gas, bacilli of, empyema from .. 134
- pneumothorax from .. 649
- surgical emphysema due to .. 805
- sweet smell with .. 649
- gases formed in .. 317
- from gonorrhœa .. 317
- of gums .. 95
- hand in diabetes .. 335
- in heart disease .. 321
- from hemiplegia .. 317

Gangrene, contd.

- hospital, surgical emphysema in .. 254
- from hot-water bottle .. 321
- ice-bag .. 321
- infantile marasmus .. 317
- injury .. 317
- of jaw .. 95
- leg .. 318
- albumosuria with .. 21
- from arteriosclerosis .. 322
- in diabetes .. 335, 894
- from leprosy .. 317, 321
- ligature .. 317, 322
- lightning .. 317
- line of demarcation in .. 318
- **OF LUNG** .. 322
- albumosuria with .. 71
- in aspiration pneumonia .. 322
- after bathing .. 323
- in bronchiectasis .. 322, 323
- bronchiectasis distinguished from .. 364
- simulating .. 791
- in bronchopneumonia .. 322, 801
- cacogeusia due to .. 860
- from chest injury .. 323
- in chronic pulmonary tuberculosis .. 322, 323
- cough from .. 322
- in debilitated persons .. 322
- diabetics .. 322, 335, 791
- elastic fibres in sputum from .. 112, 322, 323, 364, 791
- from embolism .. 322
- emphysema discharging into lung .. 323
- distinguished from .. 364
- simulating .. 791
- in fetid bronchitis .. 322, 323
- factor from .. 322
- from foreign body .. 322
- in bronchus .. 801
- trachea .. 423
- foul breath from .. 112, 364
- sputum in .. 187, 322, 323, 364, 790, 791
- hæmoptysis from .. 322, 361
- from immersion .. 323, 791
- indicuria from .. 395
- from infarction .. 801
- inhalation of foul water .. 791
- in intemperate persons .. 322
- irregular fever with .. 322
- latent .. 323
- from lateral sinus thrombosis .. 322, 791
- leucocytosis with .. 453
- without leucocytosis .. 453
- from liver abscess .. 465
- lobular pneumonia .. 791
- mouth lesion .. 791
- new growth of lung .. 801
- œsophageal lesion .. 791
- in old age .. 322
- from otitis media .. 322
- pericardial infection .. 322
- peritoneal infection .. 322
- physical signs of .. 322
- from pleural infection .. 323
- in pneumonia .. 322
- pneumothorax from .. 647, 649
- prostration from .. 322
- purulent sputum from .. 187
- in pyæmia .. 323
- pyopneumothorax from .. 801
- from septic embolism of lung .. 791
- stench from .. 112, 791
- from throat lesion .. 791
- wound of chest .. 322
- from malaria .. 317
- in malignant pustule .. 682
- from measles .. 317
- meningomyelitis .. 317
- moist .. 318
- mouldy-smelling .. 318
- from myelitis .. 317
- new growth invading vein .. 322

Gangrene, contd.

- from noma .. 317
- of nose from embolism .. 46
- in infective endocarditis .. 46
- Raynaud's disease .. 320
- offensive odour of .. 318
- due to orthotorm .. 908
- painless, in syringomyelia .. 320
- from pemphigus .. 743
- of penis from balanitis .. 763
- diabetic .. 301
- from paraphimosis .. 763
- from peripheral neuritis .. 317, 318, 320
- phenol .. 317
- of piles .. 726
- from plague .. 317
- pressure .. 317
- of effused blood .. 317
- new growths .. 317
- putrefaction in .. 318
- in Raynaud's disease .. 320
- 203, 302, 317, 318, 317
- from scarlet fever .. 317
- senile .. 317
- account of .. 322
- arterial disease and .. 320
- foot affected in .. 320
- Raynaud's disease .. 320
- simulating .. 320
- from septic wounds .. 317
- severe bruising .. 317
- of skin, leucocytosis .. 453
- slight in .. 317
- from small-pox .. 317
- snake venom .. 317
- spinal cord lesions .. 317
- splint sore .. 317
- spreading .. 318
- from stoppage of circulation .. 317, 321
- sulphides formed in .. 318
- from syphilis .. 317
- syringomyelia .. 317
- tabes dorsalis .. 317
- of testis .. 589
- from thrombosis .. 317
- tight bandage .. 317, 322
- of toe from atheroma .. 540
- diabetic .. 301, 334, 335
- from embolism .. 46
- infective endocarditis .. 46
- Raynaud's disease .. 320
- tabes dorsalis .. 321
- tongue in Raynaud's disease .. 320
- from venous thrombosis .. 321
- yellow fever .. 317
- (and see Necrosis of Soft Parts)
- Gaol fever (see Fever, Typhus)
- Gap teeth in congenital syphilis .. 291
- Parage, coma in .. 154
- tinnitus due to .. 878
- Gardener's itch .. 659
- Gardeners, dermatitis .. 515, 659, 916
- erythema in .. 515
- oedema of face in .. 515
- hands in .. 515
- Garget, dermatitis due to .. 916
- Garlic, caecogastria due to .. 860
- dermatitis due to .. 915
- foul breath from .. 112
- Garters, limping from .. 456
- Gas in abdomen (see Meteorism)
- appendicular abscess .. 800, 802
- due to Bacillus coli .. 800, 802
- in bowels, liver dullness diminished by .. 461
- burners, dyspnoea from .. 246
- in caecum, pain in iliac fossa from .. 557
- coal- (see Coal-gas)
- in colon, appendicitis simulated by .. 560
- fainting due to .. 299
- fire, dyspnoea from .. 246
- effects, cerebral tumour simulated by .. 371
- fainting due to .. 299
- fumes, fainting due to .. 297
- headache from .. 370
- insomnia from .. 403

Gas, contd.

- formation in pleural cavity .. 649
- subphrenic abscess .. 649
- free in abdomen (see Pneumoperitoneum)
- fumes, noises in head from .. 504
- out of condition from .. 113
- shortness of breath from .. 113
- gangrene (see Gangrene)
- marsh, coma from .. 154
- fainting due to .. 297
- in wind belched .. 302
- mustard, dermatitis from .. 917
- dichloro-diethyl sulphide and .. 917
- haemoptysis from .. 361, 367
- hoarseness from .. 388
- scrotum ulcerated from .. 767
- in ovarian cyst .. 800
- pericardium .. 800
- peritonium .. 800
- (and see Pneumoperitoneum)
- pleural cavity (see Pneumothorax)
- poisoning, cyanosis from .. 200
- exudative oedema of .. 200
- lungs from .. 200
- production in abscess .. 254
- by Bacillus aerogenes capsulatus .. 254, 647
- coli .. 254, 647, 649
- Welchii .. 647
- in liver .. 254
- by malignant oedema .. 647
- in pyonephrosis .. 800
- sewer, coma from .. 154
- under skin .. 254
- (and see Empyema, Surgical)
- in stomach, skiagram of (Fig. 155) .. 187
- subdiaphragmatic abscess .. 800, (Fig. 625) 801, 807
- per urethra .. 646
- in urine due to Bacillus coli .. 647
- yeasts .. 647
- Gas-containing abscess .. 646
- from appendicitis .. 646
- Bacillus coli .. 646
- pneumaturia from .. 646
- Gas-producing bacteria, surgical emphysema from .. 254
- organisms in pleural cavity .. 801
- Gas works workers, epithelioma of scrotum from .. 767
- Gases, delirium from .. 212
- dyspnoea from .. 246
- fainting due to .. 297
- haemoglobinuria from .. 357
- headache from .. 371
- irritant, coryza from .. 223
- haemoptysis from .. 361
- hoarseness from .. 388
- laryngitis from .. 196
- oedema of larynx from .. 388
- toxic, tinnitus due to .. 878
- Gasserian ganglion (see Ganglion)
- Gastralgia, dyspepsia from .. 399
- epigastric pain from .. 537
- tenderness in .. 537
- in young women .. 537
- Gastrectasis (see Dilatation of Stomach)
- Gastric adhesions, colic from .. 148
- branches of vagus nerve .. 185
- carcinoma (see Carcinoma of Stomach)
- catarrh, dyspepsia mis-called .. 398
- colic, causes of .. 148
- contents, anthrax in, in acute gastritis .. 338
- blood in, in carcinoma of stomach .. 397
- diphtheria bacilli in, in acute gastritis .. 338
- mucus in, in gastritis .. 58, 338, 398, 401
- notes on .. 929

Gastric contents, contd.

- Oppler-Boas bacilli in .. 397, 401
- pneumococci in, in acute gastritis .. 338
- pus in, in acute gastritis .. 338
- sarcinae in .. 401, 777
- streptococci in, in acute gastritis .. 338
- strychnine in .. 521, 741
- (and see Vomit)
- crises (see Crises)
- haemorrhage (see Haematemesis)
- HCl (see under Acid, Hydrochloric)
- juice, acetic acid in .. 401
- butyric acid in .. 401
- deficient acid in, in gastritis .. 58
- excess of acid in, in gastric ulcer .. 517
- ferments in .. 401
- no free HCl in, in carcinoma of stomach .. 517
- in gastritis .. 398
- HCl in (see under Acid, Hydrochloric)
- increased in (see Hyperchlorhydria)
- lactic acid in .. 401
- in carcinoma of stomach .. 397
- organic acids in .. 401
- pepsin in .. 401
- rennin in .. 401
- total acidity of .. 401
- yeasts in .. 401
- (and see Test Meal)
- peristalsis, visible .. 636
- spasm, dyspepsia from .. 399
- succussion .. 218, 219, 307, 801
- ulcer (see Ulcer)

- haemorrhages in .. 338
- headache from .. 338
- irritant poisons causing .. 338
- nausea from .. 338
- pneumococci in .. 338
- pus in gastric juice in .. 338
- pyorrhoea alveolaris causing .. 338
- septic teeth causing .. 338
- stomatitis causing .. 338
- streptococci in .. 338
- tenderness in epigastrum from .. 338
- urine concentrated in .. 338
- vomiting from .. 338
- from alcohol .. 58, 398
- colic from .. 148
- antimony .. 929
- arsenic stimulating .. 398
- from back pressure .. 930
- bile in vomit in .. 338
- carcinoma of stomach stimulating .. 341
- from chewing defects .. 338, 930
- chronic .. 338
- from alcohol .. 338
- coffee .. 338
- constipation from .. 338
- from diet errors .. 338
- flatulence from .. 338
- flatulent dyspepsia mis-called .. 338

Gastritis, chronic, contd.

- following acute .. 338
- foul breath from .. 338
- furred tongue from .. 338
- haematemesis from .. 336, 338
- haemorrhagic erosions in .. 338
- mucosa thickened in .. 338
- mucus in vomit in .. 338
- nausea from .. 338
- pyrexia from .. 338
- from tea .. 338
- tenderness in epigastrum from .. 338
- term misused .. 338
- tongue indented by teeth from .. 338
- urine concentrated in .. 338
- vomiting in .. 338
- in cirrhosis of liver .. 58, 398, 465
- from corrosive poison .. 338
- defective teeth .. 398
- diarrhoea in .. 930
- diminished acidity in .. 398
- dyspepsia mis-called .. 398
- flatulence with .. 930
- gastric acid deficient in .. 58
- HCl diminished in .. 930
- juice in .. 398
- haemorrhagic, in anthrax .. 338
- in heart disease .. 398
- from irritant foods .. 398
- loss of appetite with .. 58, 398
- in mitral disease .. 58
- mucus in .. 58, 398, 401, 930
- nausea with .. 398, 930
- from oral sepsis .. 398
- pain in epigastrum from .. 930
- limbs in .. 568
- not a feature of .. 398
- round heart from .. 536
- in shoulder from .. 580
- spine from .. 871
- phlegmonous .. 338
- from phosphorus .. 929
- phosphorus stimulating .. 930
- pyrexia in .. 398
- in renal disease .. 58, 398
- rheumatism of shoulder simulated by .. 863
- salivation from .. 662
- sense of fullness from .. 398
- weight in epigastrum from .. 398
- from tea .. 398
- tenderness of spine from .. 871
- from tobacco .. 58, 398
- tongue furred in .. 58
- toxic, haematemesis from .. 336
- ulcerative, in anthrax .. 338
- in uraemia .. 396
- vomiting with .. 398, 928, 930
- Gastrocnemius, bursa .. 844

- Gastrojejunostomy, blood per anum after .. 96
- for gastric ulcer .. 214
- pyloric stenosis .. 214
- in tubes .. 594
- Gastroptosis, abdominal support relieving .. 48
- atonic dyspepsia with .. 400
- atony of stomach with .. 303
- epigastric pain from .. 48
- movable kidney with .. 399
- pain after food from .. 48
- sex incidence of .. 48
- simulating gastric ulcer .. 48
- skiagram of (Fig. 436) .. 537
- vomiting from .. 48
- X rays in diagnosing .. 48, 399
- (and see Viscerptosis)
- Gastroscope in diagnosing acute gastritis .. 338
- carcinoma of stomach .. 341
- Gastrostaxis .. 48
- in chlorosis .. 346
- gastric ulcer simulated by .. 336, 339, 346
- haematemesis from .. 336

Gastrostaxis, contd.

- in young anæmic women 336
- Gaucher cells .. 781
- Gaucher's disease, notes on** 781
- spleen enlarged in .. 778
- Gelsemium sempervirens, dermatitis due to .. 915
- Gemelli, nerve-supply of 609, (*Fig. 471*) 611
- General paralysis** .. 157
- anæmia in .. 756
- anterior corneal cell lesion simulated by .. 78
- aphasia in .. 770
- Argyll-Robertson pupil in .. 674
- asthenia in .. 94
- aural hæmatomata in 305
- bleeding gums in .. 93
- **cerebral hæmorrhage simulated by** 157, 384
- softening from .. 139
- cerebro-spinal fluid .. 383
- change of disposition in .. 157
- Cheyne-Stokes breathing from .. 139
- coma in 153, 157, 181, 384
- congestive attacks in 770
- convulsions in 157, 181, 184, 305
- dancing defective in 157
- defective judgement in 184
- memory in .. 184
- delirium in .. 212
- dysarthria in .. 773
- dysphagia in .. 243
- **epileptiform seizure in** 384
- fainting due to .. 297
- gold curve in .. 381
- grinding of teeth in 881
- hand tremor in .. 881
- headache from .. 370
- **hemiplegia in** 382, 384, 770
- ideas of grandeur in 157, 184, 305
- impotence in .. 391
- insomnia from .. 404
- irritability in .. 405
- knee-jerks unequal in 451
- laryngeal paralysis with .. 606
- lip tremor in .. 881
- lumbar puncture in diagnosing .. 305
- lymphocytes in cerebrospinal fluid in 157, 305, 383, 384
- mental strain and .. 305
- moral changes in .. 801
- muscular atrophy in .. 78
- weakness in .. 184
- occupation neurosis .. 189
- painting defective in 157
- paraplegia from 626, 632
- peripheral neuritis simulated by .. 78
- piano-playing defective in .. 157
- pupils immobile in 184
- unequal in 184, 675
- reflexes in .. 184
- altered in .. 881
- saturnine encephalopathy simulating .. 155, 214
- sordes in .. 93
- speech blurred in 184, 881
- spontaneous fracture due to .. 304, 305
- stammering in .. 774
- starts in .. 173
- **symptoms of** .. 184
- syncope in .. 157
- syphilis and .. 305, 606
- tottering gait in .. 881
- tremor in 879, 881, 889
- of face in .. 184
- tongue in 184, 881
- twitching in .. 881
- violin-playing defective in .. 157
- voices in .. 503
- Wassermann reaction in .. 305, 384
- positive in cerebrospinal fluid 157
- worry and .. 305

General paralysis, contd.

- writing defective in 157
- peritonitis (see Peritonitis)
- tuberculosis (see Tuberculosis)
- Geniculate branch of obturator nerve .. 457
- ganglion, chorda tympani and .. 604
- neuralgia, pain in ear from .. 253
- Genital backwardness in pituitary infantilism .. 236
- regions, excessive sweating of .. 803
- lice affecting .. 659
- pustular syphilides of 684
- sore, abscess in groin due to .. 831
- inguinal glands enlarged from .. 830
- Genitalia, condylomata on 498
- elephantiasis of, in filariasis .. 36
- herpes simplex affecting .. 913
- lymphatic drainage of 840
- melanotic carcinoma of 886
- molluscum contagiosum on .. 889
- myoma cutis of .. 889
- œdema of, in acute nephritis .. 12
- from inferior vena cava obstruction .. 9
- operation on, bacteriuria after .. 90
- papules of, in syphilis 499
- premature development of, with hypernephroma of kidney (*Fig. 395*) 508, 776
- scabies affecting .. 918
- Genito-crural nerve, distribution of (*Fig. 580*) 748
- region, erythrasma affecting .. 313
- Gentian, heart symptoms and .. 377
- Geographical distribution of ankylostomiasis 103, 336
- bilharzia .. 102, 356
- dengue .. 571
- Distoma pulmonale .. 367
- dysentery .. 36
- filariasis .. 36
- hydatid cyst 66, 366, 807
- impetigo herpetiformis .. 125
- infective epidemic .. 420
- nausæa .. 37, 708, 780
- Madura foot .. 893
- malaria .. 213, 779
- Malta fever .. 571, 691
- mollities ossium .. 305
- Oidium tropicale .. 792
- Paragonimus Westerni .. 792
- pellagra .. 279
- relapsing fever 420, 738
- ringworms .. 310
- spotted fever .. 679
- sprue .. 47, 709
- tick paralysis .. 625
- trypanosomiasis .. 708
- tse-tse fly .. 708
- ulcerative dermatomyositis .. 312
- yellow fever 345, 420
- **tongue** .. 591
- German measles, albuminuria in .. 17
- cervical glands enlarged in .. 685
- erythema in .. 276, 280
- distinguished from .. 280
- general enlargement of lymph glands in 283, 471, 472
- inguinal glands enlarged in .. 830
- macules in .. 685
- maculopapular rash in 282
- measles distinguished from .. 472
- occipital glands enlarged from 472, 473

German measles, contd.

- rigor rare in .. 737
- scales in .. 744
- scarlet fever distinguished from .. 472
- simulated by .. 283
- several attacks of .. 283
- sore throat due to .. 757
- Gestation, extra-uterine, abdominal pain from .. 489
- abortion of .. 842
- **account of** .. 842
- amenorrhœa with .. 842
- blood tumour from .. 842
- colic due to .. 148
- collapse from 489, 842
- cystic ovary simulated by .. 842
- dermoid of ovary .. 842
- simulating .. 842
- faintness from .. 489
- felt per rectum .. 729
- fibroid of uterus simulating .. 842
- hæmatocele due to .. 840, 842
- internal hæmorrhage from .. 489
- metrorrhœa from .. 489
- pelvic adhesions after .. 573
- pain from .. 573, 842
- swelling due to .. 840
- **progressive** .. 842
- rupture of .. 842
- abdominal pain from .. 555
- bradypnoea from .. 110
- collapse from .. 110
- delirium after .. 211
- fainting due to .. 297
- intraperitoneal hæmorrhage from .. 211
- shock from .. 110
- simulating colic .. 149
- **symptoms due to** 489
- urgent laparotomy for .. 149
- salpingo-oophoritis simulating .. 842
- swelling in pelvis from .. 489
- tenesmus due to .. 873
- tubal mole from .. 489
- uterine hæmorrhage due to .. 842
- vomiting due to .. 929
- tubal pain in pelvis from .. 573
- pelvic swelling due to 840
- rupture of .. 573
- abdominal pain due to .. 735
- rigidity due to .. 735
- blanching with .. 157
- blood per vaginam with .. 735
- coma from .. 154
- dysmenorrhœa simulated by .. 239
- extreme blood loss from .. 154
- internal bleeding due to .. 735
- leucocytosis with .. 735
- pallor with .. 735
- period overdue with 735
- **peritonitis simulated by** .. 735
- thirst due to .. 875
- tumour due to .. 573
- (and see Pregnancy)
- Giant cells in tuberculosis 475
- Giants, goitre in .. 325
- naevi in .. 325
- polydactylism in .. 325
- (and see Gigantism)
- Giddiness (see Vertigo)
- Giemsa's stain for Spirochaeta pallida .. 854
- **GIGANTISM** .. 323
- acromegalic .. 325
- eunuchoid .. 325
- feminism with .. 325
- gonadal .. 324
- hermaphroditism with 325
- **infantile** .. 324
- illustrated (*Fig. 268*) 324
- infantilism with 234, 325
- knock-knees in .. 325
- masculinism with .. 325

Gigantism, contd.

- ovarian .. 324
- physiological .. 324
- **pineal** .. 324
- **pituitary** .. 324, 326
- from pituitary tumour 378
- primary (*Fig. 269*) 325
- shallow pituitary fossa and .. (*Fig. 309*) 379
- **suprarenal** .. 324
- illustrated (*Fig. 267*) 324
- testicular .. 324
- Giantoblasts, coloured figure of .. (*Fig. 33*) 29
- in pernicious anæmia .. 27
- severe anæmia .. 27
- Gingivitis, hæmoptysis simulated by .. 359
- suppurative, pyorrhœa alveolaris and .. 94
- in syphilis .. 93
- tuberculous, bleeding gums from .. 93, 95
- phthisis and .. 95
- (and see Gums)
- Giraldes, organ of, cyst of 587
- **GIRDLE PAIN** .. 326
- from aneurysm .. 534
- in compression paraplegia .. 326
- disseminated sclerosis 326
- from fracture of spine .. 531, 536
- hæmatomyelia .. 177
- after injury .. 531, 870
- in myelitis .. 326
- from new growth of spine .. 869
- in spastic paraplegia 326
- from spinal caries .. 536
- in syphilitic spinal meningitis .. 326
- tabes dorsalis 326, 536
- tenderness of spine with .. 867
- from transverse myelitis .. 177, 536, 628
- rickets .. 233
- sensations in disseminated sclerosis .. 753
- tabes dorsalis .. 753
- Glacial acetic acid in benzidine test .. 104
- testing for porphyrin .. 903
- Gland, Bartholin's (see Bartholin's Gland)
- lymphatic (see Lymphatic Glands)
- puncture in trypanosomiasis .. 37
- Glanders, arthritis from 425
- Bacillus mallei in 125, 682, 683
- bacillus, periostitis due to .. 818
- bacteriological examination in diagnosing 225
- bullæ in 123, 125, 683
- delirium in .. 211
- febrile .. 125
- in grooms .. 225
- from horses .. 125, 682
- in horse-dealers .. 225
- impetigo simulated by 682
- lungs affected in .. 125
- mallein injection test in 683
- nasal discharge due to .. 225, 683
- occupation and 125, 225, 683
- papules in .. 683
- rigor in .. 737
- **skin lesion of** .. 683
- ulcer of leg from .. 895
- ulceration in .. 683
- vesicles in .. 683, 917
- Glandular fever (see Kirschland's Disease)
- Glans penis (see Penis)
- Glass tube in urethra .. 575
- Glass-blowers, callosities on hands in .. 917
- rhagades in .. 917
- **Glass-eye, unequal pupils and** .. 675
- Glass-pox (see Chicken-pox)
- **Glaucoma, account of** .. 288, 924
- acute .. 288
- age incidence of .. 288

- Glaucoma, contd.**
- anterior chamber shallow in .. 288, 926
 - atropine disastrous .. 288
 - blindness due to .. 925
 - central vision good in .. 924
 - chronic .. 288
 - ring scotoma due to .. 924
 - circumcorneal injection in .. 924
 - conjunctiva injected in .. 288
 - conjunctivitis distinguished from .. 289
 - cornea anæsthetic in .. 288
 - hazy in .. 288
 - insensitive in .. 924
 - eye hard in .. 288
 - inflamed in .. 285
 - tender in .. 288
 - eyelids oedematous in .. 288
 - frontal headache from .. 288
 - halos in .. 288
 - headache from 370, 371, 867, 924
 - hyperacusis from .. 389
 - illustrated (Fig. 236) .. 288
 - from indiscretion in diet .. 288
 - iris discoloured in .. 288
 - after iritis .. 924
 - **iritis distinguished from** .. 289
 - lachrymation from .. 285
 - migraine simulated by .. 288
 - mydriatic disastrous in .. 288
 - nasal field of vision restricted in .. 288
 - ocular strain causing .. 288
 - tension raised in 639, 675, 926
 - optic atrophy in .. 924
 - **disc in** (Fig. 428) .. 520
 - cupped in .. 924
 - white and excavated in .. 288
 - pain in ears in .. 288
 - eye from 285, 288, 546, 550
 - head in .. 288
 - intense with .. 549
 - in maxillary area from .. 550
 - teeth in .. 288
 - temporal area from .. 550
 - photophobia in .. 285, 649
 - **physiological cup distinguished from** .. 517
 - pupil dilated in .. 924, 926
 - fixed in .. 924
 - pupils unequal from .. 675
 - rainbow vision from .. 288, 926
 - scotomata in .. 288
 - sex incidence of .. 288
 - sick headache simulated by .. 288
 - steamy cornea in .. 924, 926
 - **symptoms of** .. 926
 - tenderness of scalp from .. 867
 - trigeminal neuralgia in .. 924
 - vision impaired in .. 288
 - visual fields constricted in .. 288, 924, 926
 - vitreous hazy in .. 924
 - vomiting from .. 288, 924
 - **Gleet, account of** .. 228
 - arthritis with .. 425
 - epididymitis with .. 850
 - filaments in urine .. 228
 - after gonorrhoea .. 850
 - from infection of prostate .. 229
 - Glénard's disease (see Visceroproctosis)
 - Glenoid cavity, humerus falling away from .. 583
 - Glioma of cauda equina .. 81
 - cerebral, diabetes insipidus from .. 655
 - hemianopsia from .. 379
 - Gliosis, spinal, brachial neuritis simulated by .. 544
 - in syringomyelia .. 142
 - Globulin in ascitic fluid .. 65
 - cerebrospinal fluid .. 383
 - chylous ascitic fluid .. 73
 - precipitated by alcohol .. 20
 - trichloroacetic acid precipitating .. 20
 - in urine .. 5
 - in acute nephritis .. 12
 - prognosis with .. 5
 - Globus hystericus .. 242, 570
 - aphonia with .. 606
 - **Globus hystericus, contd.**
 - dysphagia from .. 243
 - in hysteria .. 179, 799
 - major, tuberculous node in .. 851
 - minor, gonococcal node in .. 851
 - **Glossina morsitans (Fig. 50)** .. 37
 - palpals (Fig. 49) .. 37
 - sleeping sickness spread by .. 37
 - trypanosomiasis and .. 37
 - in Uganda .. 37
 - **Glossitis, chronic streptococcal, account of** .. 591, 592
 - agustia due to .. 854
 - hysteria simulated by .. 861
 - illustrated (Figs. 455-460) .. 592-593
 - **neuralgia of tongue simulated by** .. 591
 - pain in tongue from .. 590, 861
 - parageusia in .. 859
 - taste abnormality due to .. 861
 - tongue fissured in .. 861
 - superficial, in syphilis .. 382
 - tongue swollen in .. 852
 - dysphagia from .. 244
 - swelling of tongue from .. 244
 - from syphilis .. 898
 - **Glossopharyngeal nerve** .. 770
 - see Nerve, Cranial, Ninth
 - neuralgia, pain in ear from .. 253
 - throat from .. 253
 - **Glossy skin in syringomyelia** .. 142
 - **Glottis, oedema of, in angina Ludovici** .. 853
 - spasm of, epilepsy and .. 912
 - loss of consciousness with .. 912
 - vertigo with .. 912
 - **Glove anaesthesia in hysteria** .. 171, 570, 615
 - peripheral neuritis .. 74, (Fig. 582) .. 749
 - **Glucosazone crystals illustrated** .. 328
 - melting point of .. 328
 - **Glue-making, noises in head from** .. 504
 - vertigo due to .. 504
 - **Gluteal bursa, tuberculous, limping from** .. 457
 - reflex, centre for .. 631
 - tenderness in sciatica .. 539
 - **Glutei (see under Muscle)**
 - **Glycerin, hæmoglobinuria from** .. 357
 - in Spiegler's test .. 7
 - **Glycerin, acidosis and** .. 4
 - **GLYCOSURIA** .. 326
 - acidosis with .. 330
 - in acromegaly .. 330, 331
 - from acute alcoholism .. 330, 331
 - albuminuria with .. 15, 330
 - **alimentary** .. 330, 331
 - diabetes and .. 655
 - alcaptonuria simulating .. 905
 - from alcohol .. 111, 213
 - anæsthetics .. 330
 - in athletes .. 330
 - **Benedict's test for** .. 327
 - blood-sugar estimations in .. 330
 - from boxing .. 330
 - in bronzed diabetes .. 335, 467, 644
 - bulbar paralysis .. 606
 - carcinoma of pancreas .. 67
 - from cerebral embolism .. 330
 - hæmorrhage .. 330, 331
 - injury .. 330, 331
 - thrombosis .. 330
 - tumour .. 330
 - in chronic nephritis .. 15
 - pancreatitis .. 810
 - colic and .. 153
 - **coma and** .. 331
 - from concussion .. 213, 330, 331
 - delirium and .. 213
 - **Glycosuria, contd.**
 - in diabetes .. 83, 213, 329, 330, 334, 486, 655
 - dietetic .. 330
 - from drugs .. 330, 332
 - excess of carbohydrate food .. 330
 - exhaustion .. 330
 - fallacies in diagnosing .. 326
 - **Fehling's test for** .. 326, 327
 - fermentation test for .. 328, 902
 - from fracture-dislocation of spine .. 331
 - fractured skull .. 330, 331
 - spine .. 331
 - fright .. 331
 - glycuronic acid simulating .. 332
 - pouty .. 331, 332, 901
 - in Graves' disease .. 330, 331
 - from head injury .. 213
 - heroin .. 330
 - in lactation .. 330, 332
 - lactosuria simulating .. 327
 - lavuluria simulating .. 427
 - from low sugar threshold .. 330, 332
 - in malaria .. 330, 332
 - from marching .. 330
 - meningeal hæmorrhage .. 330
 - meningitis .. 330
 - **minor degrees of** .. 330
 - from morphine .. 330
 - nontauterising .. 330
 - nervous fatigue .. 330
 - neuritis from .. 616
 - with normal specific gravity of urine .. 15
 - in obesity .. 332
 - old age .. 332

- - - - coma from .. 110
- - - - headache from .. 110
- - - - optic neuritis from .. 110
- - - - stupor from .. 110
- - - - vertigo from .. 110
- - - - vomiting from .. 110
- - - - mercury curing 284, 315, 769
- - - - of nerve, muscle atrophy from .. 80
- - - - R.D. from .. 80
- - - - optic radiations, headache from .. 380
- - - - hemianopsia from 380
- - - - vomiting from .. 380
- - - - orbit, exophthalmos from .. 284
- - - - no pain in .. 898
- - - - of palate .. 762
- - - - cacogostia due to .. 860
- - - - dysphagia from .. 661
- - - - ptialism from .. 661
- - - - sore throat from .. 757
- - - - papillary tumour from 765
- - - - of pelvis, lumbosacral plexus affected by .. 81
- - - - tumour of cauda equina simulated by 81
- **penis** .. 765
- - - - caries of pubis simulated by .. 851
- - - - peritonitis over .. 68
- - - - of pharynx, dysphagia from .. 661
- - - - ptialism from .. 661
- - - - potassium iodide curing 284, 315, 500, 761, 765, 769, 898
- - - - of rectum .. 727
- - - - salvarsan curing 284, 315, 761, 769, 898
- - - - of scalp .. 866
- - - - sciatic nerve, rectal examination in diagnosing 729
- - - - scrotum .. 747
- - - - skin .. 315

Gumma, contd.

- - of spine, abdominal pain from .. 151
- - - colic simulated by .. 151
- - **testis** .. 586, 768
- - thyroid gland enlarged from .. 877
- - tongue swollen by .. 852
- **of tongue** 244, (Fig. 676) 897, 898
- - - cacogostia due to .. 860
- - - dysphagia from .. 661
- - - epithelioma simulated by .. 474
- - - median .. 474
- - - mercury and iodide for .. 474
- - - ptialism from .. 661
- - tonsil, carcinoma simulated by .. 761
- - - sore throat due to .. 757
- - - tuberculous ulcer simulated by .. 898
- - - of urethra .. 230
- - - uvula .. 762
- - - sore throat due to .. 757
- - - with varicose veins .. 895
- - - wash-leather slough in Wassermann reaction with 284, 315, 417, 474, 761, 769
- - in yaws .. 501
- Gummatous chest wall .. 210
- Gummatous meningitis, dysarthria from .. 773
- - orchitis .. 586
- - periostitis with gumma of testis .. 769
- - ulcer, diagram of (Fig. 668) 895
- Gums, actinomycosis affecting .. 95
- **BLEEDING** .. 93
- - - from actinomycosis .. 93
- - - in acute yellow atrophy of liver .. 93
- - - aplastic anaemia .. 93
- - - from arsenic .. 93, 94
- - - asthenic states .. 94
- - - blood diseases .. 94
- - - from cancerous oris .. 93
- - - dental caries .. 93, 94
- - - dermatitis herpetiformis .. 93
- - - in dyspepsia .. 93
- - - from epithelioma .. 93
- - - epulis .. 93
- - - in erythema bullosum .. 93
- - - fevers .. 93, 94
- - - general paralysis .. 93
- - - hamatemeses from 337
- - - in hæmophilia .. 93, 362
- - - hæmoptysis simulated by .. 94, 359
- - - in Hodgkin's disease .. 128
- - - infantile scurvy .. 93
- - - from injury .. 93
- - - in iodine poisoning .. 93
- - - from lead .. 93, 94
- - **list of causes of** .. 93
- - - in lymphadenoma .. 362
- - - lymphatic leukaemia .. 93, 362
- - - malignant cachexia .. 93
- - - specific fevers .. 362
- - - measles .. 362
- - - from mercury 93, 94, 337
- - - myeloid sarcoma .. 93
- - - noma oris .. 93
- - - papilloma .. 93
- - - pemphigus .. 93
- - - in pernicious anaemia .. 93, 362
- - - from phagedæna oris .. 93
- - - phosphorus poisoning .. 93
- - - in phthisis .. 93
- - - pneumonia .. 93
- - - purpura .. 93, 362
- - - from pyorrhæa alveolaris .. 94
- - - in scurvy 50, 93, 337, 362, 679
- - - small-pox .. 345, 362
- - - from sordes .. 93
- - - in splenic anaemia .. 93
- - - splenomedullary leukaemia .. 93, 362
- - - stomatitis .. 95
- - - syphilis .. 93
- - - from tartar .. 93

Gums, bleeding, contd.

- - - from tooth-brush 93, 94
- - - tooth-plate .. 94
- - - tuberculous gingivitis .. 93, 95
- - - in typhoid fever .. 93
- - - Vincent's angina .. 93
- - - yellow fever 345, 420
- - - blue line on, from bismuth .. 45
- - - lead 45, 84, 149, 151, 155, 161, 168, 525
- - - peripheral neuritis .. 571
- - - in saturnine encephalopathy .. 155
- - - crusts on .. 95
- - - dermatitis herpetiformis affecting .. 95
- - - dyspeptic ulcers of .. 898
- - - epithelioma of (see Epithelioma)
- - - erythema bullosum affecting .. 95
- - - fishbone in, ptialism from .. 661
- - - fetid, in scurvy .. 50
- - - gangrene of .. 95
- - - hæmorrhage from (see Gums, Bleeding)
- - - Koplik's spots on 224, 282
- - - pain in, from mercury 94
- - - papilloma of, bleeding gums from .. 93
- - - histology in diagnosing 95
- - - pemphigus affecting .. 95
- - - pigmentation of .. 641
- - - redness of, in stomatitis .. 95
- **RETRACTION OF** .. 731
- - - due to caries of teeth 731
- - - pyorrhæa alveolaris .. 94, 731
- - - tartar .. 731
- - - tooth-brush .. 731
- - - septic, cervical adenitis from .. 763
- - - foul breath from .. 112
- - - spongy, in scurvy 50, 93, 346, 679
- - - rickets .. 819
- - - stomatitis affecting .. 95
- - - swelling of (see Swelling)
- - - tenderness of, in stomatitis .. 95
- - - tubercle bacilli from .. 95
- - - tuberculous of, bleeding gums from .. 93
- - - ulcer of .. 898
- - Gun headache .. 372
- Gunshot wound of chest (see Chest)
- - - hamatemeses from 342
- - - herniation of stomach due to .. 649
- - - pneumothorax from 647, 649
- - - pyopneumothorax from .. 801
- - - surgical emphysema from .. 649
- Gunzburg's test for free hydrochloric acid (Fig. 318) 401
- Gurgle, abdominal .. 107
- - in femoral hernia .. 825
- - inguinoscrotal hernia .. 833
- - throat before hæmoptysis .. 359
- Gustatory aura .. 87
- Gymnastics, menorrhagia from .. 482
- Gymnastics, left ventricle hypertrophied in .. 37
- Gyrus, angular, alexia from lesion of .. 771
- - - visual word centre in 770
- - - uncinate, smell centre in 756
- - - tumour of .. 756
- - - agæstia due to .. 859
- - - anosmia due to .. 756

- HABIT** chorea, chorea distinguished from 170
- - cocaine (see Cocaine)
- - drug (see Drug Habit)
- - grinding of teeth .. 335
- - heroin, impotence from 393
- - sudden stopping of, delirium from .. 212

Habit, contd.

- limping due to .. 170
- morphine, impotence from .. 393
- sudden stopping of, delirium from .. 212
- paraldehyde, impotence from .. 393
- spasm (see Spasm)

HÆMATEMESIS

- from abdominal aneurysm .. 342
- operation .. 336
- acute fevers 336, 340, 345
- gastritis .. 336, 338
- yellow atrophy 346, 345, 416
- alkalis .. 336
- anaemia from 24, 43, 48, 515
- from aneurysm 336, 337
- in angina abdominalis 396
- anthrax 338, 340, 345
- from antimony 336, 338
- with appendicitis .. 347
- from arsenic .. 336
- arteriosclerosis .. 342
- atheroma .. 336, 342
- in blackwater fever 340, 345
- from bleeding gums .. 337
- from mouth .. 336
- throat .. 336
- blood diseases .. 336
- bradypnea from .. 110
- from broken thermometer swallowed .. 342
- carcinoma of duodenum .. 336, 811
- stomach 336, 340, 811
- chlorosis .. 336, 346
- cholera .. 336, 345
- chronic Bright's disease 336
- gastritis .. 336, 338
- heart disease .. 336
- interstitial nephritis 347
- lung disease .. 336
- cirrhosis of liver 47, 67, 336, 337, 344, 415, 465, 482, 780, 783
- classified causes of .. 336
- collapse from .. 110
- coma from .. 154
- from corrosive poison 336
- delirium after .. 211
- from denique .. 336
- duodenal ulcer 336, 342, 482
- epistaxis .. 336, 337
- epithelioma of oesophagus .. 336, 337
- extreme blood loss from 154
- fainting due to .. 297
- faintness, from .. 339
- before .. 359
- in familial acholuric jaundice .. 415
- feeling of sickness before .. 359
- from foreign body 336, 342
- in oesophagus .. 337
- fowl's blood in .. 337
- from gall-stone 336, 343, 344
- gastric ulcer 48, 346, 339, 342, 397, 482, 537
- gastro-intestinal irritants 336
- gastrostaxis .. 336
- giddiness before .. 359
- from granular kidney 342
- hæmophilia .. 336, 346
- hæmoptysis 336, 337, 359
- distinguished from .. 359
- from hæmorrhagic eruptions .. 336, 340
- small-pox .. 345
- Henoch's purpura 102, 428, 931
- high blood-pressure .. 34
- Hodgkin's disease 336, 346
- infective endocarditis .. 336, 340
- injury .. 336, 342
- jaundice .. 336
- leucocytosis after .. 453
- from leukaemia 336, 346
- malaria 336, 346, 347
- malignant scarlet fever 336
- variola .. 336
- mauling .. 336, 337
- in measles .. 345
- from mediastinal growth .. 336, 337
- melæna after .. 359

Hæmatemesis, contd.

- from mercurial stomatitis .. 337
- mesenteric thrombosis 168
- nausea before .. 359
- noises in head after .. 504
- oedema of legs after .. 515
- from oesophageal lesions 336
- after operations .. 347
- oppression in epigastrium before .. 359
- from pernicious anaemia .. 336
- phosphorus .. 336, 346
- in phosphuretted hydrogen poisoning .. 421
- from portal obstruction 344
- pressure on portal vein .. 336, 344
- profuse, four common causes of .. 336
- pulse rapid and feeble from .. 339
- from purpura 336, 340, 346
- pyelephlebitis .. 336, 344
- rarely fatal .. 339
- in relapsing fever .. 420
- restlessness after .. 339
- in scarlet fever .. 445
- scurvy .. 336, 337, 346
- seeming darkness after 923
- in septic states .. 440
- shock from .. 110
- in spirælatosis hæmorrhagica .. 420
- spleen enlarged and 345, 346
- in splenic anaemia 336, 342, 345, 346, 347, 466, 467, 783
- splenogastric cirrhosis .. 346, 780
- polycythæmia 342, 780
- from strong acid .. 336
- sudden pallor from .. 339
- from swallowed blood .. 336, 337
- syncope from .. 339
- from syphilis .. 336
- of liver .. 347
- thrombosis of splenic vein .. 345
- varicose oesophageal veins .. 336, 337
- vertigo after .. 504
- without obvious cause 347
- from yellow fever 336, 340
- Hæmatidrosis .. 803
- Hæmatin, acid, spectrum of .. 213
- alkaline, caustic soda in forming .. 357
- spectrum of (Fig. 20) 13
- hæmatoporphyrin from 903
- in stomach .. 339
- Hæmatocele .. 588, 589
- albumosuria with .. 21
- ecchymosis with .. 589
- elastic .. 589
- due to extra-uterine gestation .. 840, 842
- fluctuation in .. 589
- due to hæmorrhage from corpus luteum 840
- hernia distinguished from .. 589
- hydrocele diagnosed from .. 588, 589, 849
- from injury 587, 588, 589
- new growth distinguished from .. 589
- simulating .. 587
- pelvic, bearing down pain from .. 529
- blanching with .. 157
- swelling due to .. 840
- tenesmus due to .. 873
- after puncture .. 588
- swelling of scrotum from 589
- after tapping hydrocele 589
- testis atrophy from .. 85
- not translucent 588, 589
- weighty .. 588
- Hæmatocolpos .. 23
- amenorrhœa with .. 23
- from closed hymen .. 843
- pelvic swelling due to 840
- Hæmatoma, abdominal, enlarged kidney simulated by .. 778
- spleen simulated by 778

Hæmatoma, abdominal, contd.

- from leaking aneurysm .. 778
- albumosuria from .. 21
- of arm, gangrene of fingers from .. 322
- ear, earache from .. 252
- in general paralysis 305
- forehead .. 257
- jaw from blow .. 834
- liver, abscess from .. 464
- pelvic, dystocia due to 250
- swelling due to .. 840
- of penis from forcible coitus .. 579
- injury .. 579
- perinephric abscess from .. 438, 697
- periosteal .. 817
- from loin injury .. 438
- peritoneal .. 801
- pleural, pyopneumothorax from .. 801
- of spine, abdominal pain from .. 151
- colic simulated from 151
- vulva .. 853, 855
- Hamatometra .. 23
- amenorrhœa with .. 23
- pelvic swelling due to 840
- Hæmatomyelia, commonest at 8th cervical segment 620
- deep reflexes increased in .. 177
- dissociative anæsthesia in .. 620, 752
- extensor plantar reflex in .. 177
- girdle pain with .. 177
- hyperæsthesia with .. 177
- from injury .. 620
- Klumpke's palsy distinguished from .. 620
- loss of sensation in .. 177
- oculopupillary phenomena with .. 620
- paralysis of arm from .. 620
- spastic paraplegia from 620
- spasticity in .. 176
- sphincter trouble in .. 176, 177
- Hæmatonephrosis from papilloma of kidney .. 351
- Hæmatoporphyrinuria 127, 903
- (and see Porphyrinuria)
- Hæmatrachis .. 146
- Hæmatosalpinx .. 23
- Hæmatotoxin in blood in malaria .. 38, 83, 213, 288
- brain capillaries blocked by .. 213
- Leishman's stain for .. 26
- HÆMATURIA .. 347
- from abscess outside bladder .. 723
- acute cystitis .. 348, 355
- fevers .. 348
- nephritis 12, 57, 88, 353
- urethritis .. 348, 356
- adenoma of prostate .. 348, 355
- adrenalin in cystoscopy in .. 350
- age incidence of .. 349
- albuminuria due to .. 15, 16, 349
- anaemia from .. 43
- from angioma of kidney .. 348, 351
- appendicitis 348, 356, 724
- arteriosclerosis .. 348
- bacteriuria .. 88, 90, 348
- Bilharzia hæmatobia .. 44, 348, 355, 724
- blood casts with .. 349
- from calculus .. 449, 902
- in bladder 348, 355, 576, 721, 719
- kidney 19, 349, 351, 874
- ureter 348, 353, 559, 720
- urethra .. 348, 356
- cantharides .. 348
- carbolic acid .. 348
- carcinoma of bladder .. 56, 348, 349, 353, 355, 576, 577, 721, 722
- invading bladder .. 724
- of kidney 348, 350, 448
- pelvic colon .. 356
- prostate .. 348, 355
- rectum .. 348, 356

Hæmaturia, contd.

- from carcinoma of uterus .. 348, 356
- vagina .. 348, 356
- classified causes of .. 348
- clots with .. 349
- from coli bacilluria .. 349
- colic with .. 349
- colour of urine in .. 348
- from corrosive poison 338
- crystals with .. 349
- from cystic kidneys .. 15
- cystitis .. 576, 720, 722
- cystoscope in diagnosing cause of .. 350, 449
- after dancing .. 352
- from diverticulitis 348, 356
- drugs .. 348
- simulating .. 904
- from dysenteric ulceration of intestine 348, 356
- effect of exercise on .. 349
- from embryoma of kidney .. 348, 350
- endocarditis .. 348, 357
- enlarged kidney .. 413
- prostate .. 349, 355
- epithelial casts with .. 349
- essential renal .. 348, 353
- examination of testes in 350
- fainting due to .. 297
- frequency of micturition with .. 349
- granular casts with .. 349
- guaiacum test for .. 12
- hæmoglobinuria simulating .. 347
- simulated by .. 357
- from hæmophilia .. 348
- in Henoch's purpura .. 102, 428, 680
- from hexamine .. 348
- hunting .. 352
- hydronephrosis 348, 352
- hypernephroma 448, 449
- of kidney .. 348, 350
- infarct of kidney 348, 357
- infective endocarditis .. 9, 10, 357
- inferior vena cava obstruction .. 9, 909
- thrombosis .. 347, 349
- injury .. 348, 351
- to bladder .. 348, 351
- kidney .. 348, 351
- urethra .. 348, 351
- leukaemia .. 348, 357
- malaria .. 348
- movable kidney 352, 348
- nævus of urethra 348, 356
- nephritis .. 348
- oxaluria .. 348, 353
- pain in loin with .. 349
- from papilloma of bladder 348, 349, 353, 576
- kidney .. 348, 351
- urethra .. 348
- paroxysmal hæmoglobinuria simulating .. 422
- part of micturition at which blood comes in 348
- from pelvic abscess 348, 356
- penile pain with .. 349
- points in diagnosing causes of .. 348, 349
- from polycystic disease .. 348, 352, 353, 450
- prostatic abscess .. 723
- prostatitis .. 720
- in purpura 346, 348, 357
- pyuria with .. 349
- reaction of urine in .. 349
- red urine due to .. 903
- renal cells with .. 349
- colic with 151, 168, 554
- from renal embolism .. 10
- growth 10, 349, 351, 448, 910
- mobility .. 348
- vein thrombosis .. 68
- rigor with .. 739
- sacral pain with .. 349
- from salpingitis 348, 356
- sarcoma .. 348, 350, 448
- in scarlet fever .. 345
- from scurvy .. 348, 357
- silver nitrate in cystoscopy in .. 350
- from simple ulcer of bladder .. 722

Hæmaturia, contd.

- in small-pox .. 345, 348
- spectroscopic test for .. 12
- from spermatozoitis .. 348
- in spirochaetosis ictero-hæmorrhagica .. 420
- splenomegalic polycythæmia .. 780
- sudden, in infective endocarditis .. 46
- from suppurative nephritis .. 736
- with suprarenal tumour .. 776
- from tuberculous bladder 348, 349, 494, 577, 721
- disease .. 449
- kidney 348, 349, 719, 721
- prostate .. 348, 723
- ulceration of intestine .. 348, 356
- tumour of bladder .. 449
- kidney 67, 348, 350, 776
- turpentine .. 348
- urethritis .. 722
- urine black from .. 904
- brown from .. 904
- from urotropine 348, 798
- vesical cells with .. 349
- from villous papilloma of bladder 348, 353, 577
- villous-covered carcinoma of bladder 348, 349
- yellow fever .. 348
- Hæmic bruit (see Bruit)**
- Hæmochromatosis** 201, 644
- Hæmocytometer, Thoma-Leitz** .. 26
- Thoma-Zeiss .. 26
- variations in .. 650
- Hæmoglobin, spectrum of** (Fig. 18) 13
- Hæmoglobinometer, Haldane-Gowers** .. 26
- HÆMOGLOBINURIA** .. 357
- from abrin .. 357
- in angioneurotic oedema .. 358
- from anthrax .. 358
- antinuriuretted hydrogen .. 357
- arseniuretted hydrogen .. 357
- aspirin .. 357
- in blackwater fever .. 358
- from blood extravasations .. 357
- transfusion .. 357, 358
- brownish debris with .. 347
- from carbolic acid .. 357
- carbon bisulphide .. 357
- monoxide .. 357
- casts in .. 357
- from chloroform .. 357
- chromic acid .. 357
- colours of urine in .. 357
- from croton .. 357
- drugs .. 357
- epidemic .. 357
- from ether .. 357
- in factitious urticaria .. 358
- from frostbite .. 357
- glycerin .. 357
- hæmaturia simulated by .. 347
- simulating .. 357
- in Henoch's purpura .. 358
- from hydrochloric acid .. 357
- malaria .. 358
- methæmoglobin and .. 347, 357
- from naphtha .. 357
- in nephritis .. 358
- newborn infants .. 357
- from nitric acid .. 357
- oxalic acid .. 357
- paroxysmal, account of 358
- age incidence of .. 358
- albuminuria in .. 358
- anaemia from .. 358
- black urine in .. 904
- cold and .. 358
- Eason's reaction in .. 358
- excitement and .. 358
- fatigue and .. 358
- hæmaturia simulated by .. 358, 422
- hand immersion causing .. 358
- heredity and .. 358
- jaundice in .. 408, 422
- pyrexia in .. 358
- rigor in .. 358
- serum reaction in .. 358

Hæmoglobinuria, parox., contd.

- sex incidence of .. 358
- shivering in .. 358
- syphilis and .. 358
- urine like blood in .. 358
- villous tumour of bladder simulated by .. 358
- Wassermann reaction in .. 358
- from phallin .. 357
- phenyl-hydrazine .. 357
- phosphuretted hydrogen .. 357
- poisonous mushrooms .. 357
- porphyria .. 357
- porphyrinuria simulating .. 903
- from potassium chlorate .. 357
- pregnancy toxæmia .. 357
- pyrogallic acid .. 357
- quinine .. 357
- in Raynaud's disease .. 358
- from ricin .. 357
- robin .. 357
- saponin .. 357
- seleniuretted hydrogen .. 357
- in septicæmia .. 358
- from sera .. 357
- severe burns .. 357
- fatigue .. 358
- toxæmia .. 358
- snake poison .. 357
- spectroscopic in .. 357
- from spider poison .. 357
- strychnine .. 357
- sulphonal .. 357
- sulphuretted hydrogen .. 357
- sulphuric acid .. 357
- in syphilis .. 358
- from tannin .. 357
- toad poison .. 357
- toadstools .. 357
- toxic gases .. 357
- trional .. 357
- truffles .. 357
- turpentine .. 357
- in typhoid fever .. 358
- urine black from .. 904
- brown with .. 347, 904
- seldom clear in .. 357
- from urotropine .. 357
- vasomotor neurosis .. 357
- veronal .. 357
- in yellow fever .. 358
- Hæmolysis, hæmoglobinuria from** .. 358
- Hæmolytic jaundice in**
 - pernicious anaemia .. 419
 - septicæmia .. 419
- Hæmophilia, account of** .. 346
- anaemia from .. 44
- ankle affected in .. 435
- arthritis in .. 435
- bleeding from cuts in .. 346
- gums in .. 93, 362
- from mouth in .. 346
- after tooth extraction .. 346
- epistaxis in 274, 346, 362
- familial incidence of .. 679
- family history in diagnosing .. 93
- Granddier on .. 346
- hæmatemesis in 336, 346
- hæmaturia in .. 348
- hæmoptysis in .. 362
- hæmorrhage in .. 44
- intra-articular hæmorrhages in 346, 435, 456, 457, 679
- intramuscular hæmorrhages in .. 679
- knee affected in .. 435
- limping in .. 456, 457
- in males .. 679
- menorrhagia due to 482, 484
- metrorrhagia from 487, 488
- oozing from cuts and scratches in .. 679
- pain in foot from .. 456
- pytalism in .. 661
- purpura in .. 676, 679
- sex incidence of .. 44
- stomatitis in .. 661
- submucous hæmorrhages in .. 679
- Hæmopneumothorax from**
 - bullet wound .. 801
 - needling in diagnosing .. 647, 800
 - after paracentesis thoracis .. 801

HÆMOPHTYSIS .. 358

- from actinomycosis .. 361
- anaemia from .. 43, 515
- Andrew Clark on .. 362
- from aneurysm .. 187, 361, 362, 365
- angioma of larynx .. 361
- antrum of Highmore .. 359
- sepsis simulating .. 359
- in aortic regurgitation .. 363
- stenosis .. 363
- due to arteriosclerosis .. 362
- in arthritic subjects .. 362
- from Ascaris lumbricoides .. 186
- aspergillosis .. 361
- atheroma of pulmonary arterioles .. 362
- **Bacillus prodigiosus simulating** .. 360, 791
- blood per anum from .. 97
- due to blood changes .. 362
- blood from gums simulating .. 94, 359
- mouth simulating .. 359
- nose simulating .. 359
- pharynx simulating .. 359
- in Bright's disease .. 263
- bronchial casts after .. 792
- from bronchiectasis 361, 366
- bronchitis .. 361, 364, 366
- **bronchopneumonia** 361, 364
- bronchorrhœa .. 361
- calcareous bronchial gland .. 361
- carcinoma of lung 361, 365
- from caseous bronchial gland .. 361
- **changes in larynx** .. 367
- after childbirth .. 365
- from chlorine .. 361, 367
- in cirrhosis of lung 361, 363
- **classified causes of** .. 361
- coma from .. 154
- **conditions simulating** .. 359
- in congenital heart disease .. 363
- cough with .. 359
- from cut throat .. 367
- delirium after .. 211
- dental caries simulating .. 359
- from diphtheritic larynx .. 361
- Distoma pulmonale .. 361
- Westernmani .. 367
- elastic fibres in sputum with .. 359
- from embolism .. 361, 363
- of lung .. 138, 199
- emphysema .. 364
- empyema .. 361, 365
- epistaxis causing .. 274
- simulating .. 359
- from epithelioma of bronchus .. 361
- larynx .. 361
- œsophagus .. 361
- epithelioma of tongue .. 359
- simulating .. 359
- ethmoidal sinus sepsis .. 359
- from exploratory needling .. 361
- extreme blood loss from 154
- fainting due to .. 297
- in familial acholuric jaundice .. 415
- from fibroid lung .. 269
- foreign body .. 361
- fractured rib .. 361
- frontal sinus sepsis .. 359
- in fungating endocarditis .. 363
- gangrene of lung 322, 361
- gingivitis simulating .. 359
- from granular kidney .. 362
- growth of lung .. 187
- gurgling in throat before 359
- **hæmatemesis from** 336, 337, 359
- distinguished from .. 359
- from hæmophilia .. 362
- in healthy subjects .. 362
- heart disease .. 361, 363
- Henoch's purpura .. 102
- from hepatic abscess .. 361
- hydatid cyst .. 361, 366
- injury to chest .. 361, 364
- larynx .. 361, 367

Hæmoptysis, contd.

- injury to mouth simulating .. 359
- lating .. 359
- from intubation of larynx .. 361, 367
- irritant gases .. 361, 367
- knife-grinder's lung .. 361
- **laryngeal conditions** .. 361
- laryngitis .. 361, 367
- laryngoscope in .. 367
- from leprosy of larynx 361, 364
- from pneumonia .. 361, 364
- lupus of larynx .. 361
- palate simulating .. 359
- from lymphadenoma .. 362
- lymphatic leukemia .. 362
- malignant measles .. 362
- variola .. 362
- malingering of .. 359
- from mediastinal growths 34, 361
- lymphosarcoma .. 361
- melæna from .. 97, 481
- in miner's phthisis 361, 363
- mitral regurgitation .. 262, 363
- stenosis 360, 361, 363
- from mustard gas .. 361, 367
- during night .. 359
- noises in head after .. 504
- oedema of legs after .. 515
- after operation .. 365, 367
- during paracentesis thoracis .. 361
- from Paragonimus Westernmani .. 792
- parasites .. 361
- pernicious anaemia .. 362
- pharyngitis simulating .. 359
- in phthisis 187, 198, 360, 361, 362, 363
- pneumoconiosis .. 361, 363
- from pneumothorax .. 648
- pulmonary aneurysm .. 362
- infarct .. 361, 363, 365
- thrombosis .. 363
- purpura .. 362
- **red sputum simulating** 360
- sarcoma of basiphrenoid .. 359
- simulating .. 361
- from sarcoma of larynx .. 361
- lung .. 361, 365
- tonsil simulating .. 359
- from scurvy .. 362
- seeming darkness after .. 923
- in septic pneumonia .. 361
- siderosis .. 363
- silicosis .. 363
- simulated by effects of tooth-brush .. 94
- tooth-plate .. 94
- from small-pox of larynx 361
- specific fevers .. 362
- sphenoidal sinus sepsis .. 359
- in spirochaetosis ictero-hæmorrhagica .. 420
- from splenomegallary leukæmia .. 362
- in splenomegalic polycythæmia .. 780
- from sporotrichosis .. 361
- sputum testing in .. 359
- stomatitis simulating .. 359
- from stomatoma's lung 361
- syphilis of larynx .. 361
- tickling in throat before 359
- tonsillitis simulating .. 359
- from tracheotomy tube 361
- tubercle bacilli in .. 359, 363
- from tuberculous larynx 361
- typhoid ulcer of larynx .. 361, 367
- variolous ulceration of larynx .. 367
- vertigo after .. 504
- from vicarious menstruation .. 362
- violent coughing .. 361, 364
- in whooping-cough 361, 364
- X rays after .. 359, 362
- Hæmorrhage, amblyopia after** .. 922, 923
- anaemia from .. 43, 515
- into ankle in hæmophilia .. 435, 456
- Henoch's purpura .. 456
- peliosis rheumatica .. 456
- antepartum, metrorrhagia from .. 489
- in anthrax .. 345

Hæmorrhage, contd.

- arachnoid, convulsions from .. 183
- in blackwater fever .. 345
- blanching from .. 157
- from bowel, coma from .. 154
- extreme blood loss from .. 154
- fainting due to .. 297
- (and see Blood per Anum)
- into bowel wall in blood diseases .. 148
- colic from .. 148
- in Henoch's purpura 102, 148, 931
- from injury .. 148
- in leukaemia .. 148
- in pernicious anaemia .. 148
- purpura .. 148
- scurvy .. 148
- carcinoma of liver 465, 468
- from caruncle .. 855
- cerebellar, priapism from .. 657
- vomiting due to .. 931
- into cerebral abscess .. 385
- tumour .. 385
- cerebral, absolute rest for .. 154
- age incidence of .. 155
- albuminuria and 109, 155, 382, 627
- albuminuric retinitis with .. 155
- anosmia from .. 756
- aphasia from .. 772
- apoplexy from 15, 184
- arterial degeneration and .. 627
- arteriosclerosis and .. 184, 382
- Babinski's sign from .. 627
- bilateral .. 626
- paraplegia from .. 626
- birth palsy from .. 169
- bradypnea from .. 110
- casts with .. 155
- from cerebral aneurysm .. 787
- cerebral compression from .. 110, 111
- cerebrospinal fluid under pressure in 383
- Cheyne-Stokes breathing from .. 139
- in chronic nephritis .. 15
- coma from 110, 153, 154, 155, 331, 382, 384
- deafness from .. 205
- delirium from .. 212
- in diabetes .. 335
- diabetes insipidus from .. 655
- in elderly men .. 109
- encephalitis simulating .. 157
- fainting due to .. 297
- from fungating endocarditis .. 787
- general paralysis simulating 157, 384
- glycosuria from 330, 331
- granular kidney and 109, 155, 382
- headache from 110, 370, 371
- heart enlarged in 155, 382
- hemianopsia from .. 379
- hemiparæsthesia with 379
- hemiparesis with .. 379
- hemiplegia from 88, 155, 321, 381, 382
- high blood-pressure and 106, 109, 155, 184, 382, 627
- in Hodgkin's disease 346
- hyperpyrexia from 109, 390
- hypothermia with .. 392
- increased intracranial pressure from .. 109
- from instruments at birth .. 169
- Jacksonian epilepsy from .. 174
- knee-jerk absent from 452
- loss of consciousness from .. 184

Hæmorrhage, cerebral, contd.

- lumpy first sound with 155
- malaria simulating .. 213
- in middle life .. 184
- optic neuritis from 109, 110
- paralysis of arm from 612
- paraplegia from .. 626
- pulse slow from .. 109
- pyramidal tract lesion from .. 88
- pyrexia from 109, 385
- renal degeneration and .. 627
- retinitis and .. 627
- ringing aortic second sound with 155, 382
- saturnine encephalopathy simulating .. 155
- from senile changes .. 627
- stupor from .. 110
- systolic bruit with .. 155
- tumour simulating .. 385
- unilateral paralysis from .. 154
- uræmia simulating .. 111
- vertigo from .. 110
- preceding .. 911
- vomiting from 110, 929, 931
- (and see Apoplexy)
- in chronic nephritis .. 14
- cirrhosis of liver .. 783
- collapse from .. 392
- colour index after .. 44
- from congenital obliteration of bile ducts .. 411
- constipation from .. 165
- into cord from bullet or stab .. 627
- commonest at 8th cervical segment .. 620
- dissociative anaesthesia from .. 620
- from injury 77, 620, 870
- Klumpke's palsy distinguished from .. 620
- oculopupillary phenomena with .. 620
- paralysis of arm from .. 620
- paraplegia from .. 626
- priapism from .. 656
- spastic paralysis of legs from .. 620
- from corpus luteum, hæmatocele due to .. 840
- delirium due to .. 211
- duodenal (see Ulcer, Duodenal, Bleeding)
- from ear (see Ear, Blood from)
- epithelioma .. 886
- extreme, coma from .. 154
- from duodenal bleeding .. 154
- hæmatemesis .. 154
- hæmoptysis .. 154
- intestinal bleeding .. 154
- post-partum hæmorrhage .. 154
- ruptured aneurysm .. 154
- tubal gestation .. 154
- faeces hard from .. 165
- fainting due to .. 297
- in familial acholic jaundice .. 415
- flame-shaped, in retina .. 519
- into gastric mucosa in acute infections .. 148
- blood diseases .. 148
- colic from .. 148
- in Henoch's purpura 148, 931
- leukaemia .. 148
- pernicious anaemia .. 148
- purpura .. 148
- Graafian follicle, dysmenorrhœa simulated by .. 239
- pain in pelvis from 573
- from gums (see Gums, Bleeding)
- in hæmophilia 44, 346
- round hairs in scurvy 346
- in Hanot's cirrhosis .. 466
- Henoch's purpura .. 428
- into hip-joint from hæmophilia .. 457
- Henoch's purpura .. 457
- limping from .. 457

Hæmorrhage into hip, contd.

- from peliosis rheumatica .. 457
- hydrocele .. 849
- in Hodgkin's disease .. 346
- hypothermia from .. 392
- in infective endocarditis 46
- into inner ear, apoplectiform Menière's disease from .. 208
- in blood diseases .. 208
- deafness from .. 208
- in leukaemia .. 208
- perniciosa anæmia .. 208
- purpura .. 208
- internal, after abdominal injury .. 735
- amaurosis from .. 157
- coma from .. 157
- convulsions from .. 157
- in duodenal ulcer .. 157
- from extra-uterine gestation .. 489
- after operation, fainting due to .. 297
- in pelvic hæmatocele .. 157
- from ruptured tubal gestation .. 157, 735
- in typhoid fever .. 157
- uræmia simulated by .. 157
- intramuscular, in hæmophilia .. 679
- intraperitoneal, delirium after .. 211
- from ruptured ectopic gestation .. 211
- in jaundice .. 407
- into joints in hæmophilia 346, 435, 679
- knee in hæmophilia 435, 456
- Henoch's purpura .. 456
- limping from .. 456
- in peliosis rheumatica 456
- leucocytosis from .. 453
- in leukaemia .. 34, 346
- from malignant groin glands .. 831
- into mediastinal sarcoma, cyanosis from .. 198
- in medulla, bulbar paralysis from .. 607
- symptoms of .. 773
- meningeal, birth palsy from .. 169
- bradypnea from .. 110
- cerebral compression from .. 110
- coma from 110, 153, 184
- convulsions from .. 183
- delirium from .. 212
- glycosuria from .. 330
- from head injury .. 212
- headache from .. 110
- infantile hemiplegia from .. 145
- from instruments at birth .. 169
- optic neuritis from .. 110
- palsy from .. 169
- paraplegia from .. 676
- pyrexia due to .. 688
- stupor from .. 110
- talipes from .. 145
- trephining for .. 154
- vertigo from .. 110
- vomiting from .. 110
- into mesentery in Henoch's purpura .. 931
- from mouth, hæmatemesis from .. 336
- hæmoptysis simulated by .. 359
- in Hodgkin's disease .. 346
- from mercury .. 94
- in purpura hæmorrhagica .. 346
- splenomegalic polycythæmia .. 780
- (and see Gums, Bleeding)
- mucous membranes in pseudo-leukaemia .. 50
- purpura hæmorrhagica .. 346
- scurvy .. 50
- rickets .. 819
- nose (see Epistaxis)
- œdema of legs after .. 515, 517
- in optic disc .. 519

Hæmorrhage, contd.

- into optic thalamus, hyperpyrexia from 390
- orbital, diplopia from 222
- eye displaced by .. 222
- periosteal, in infantile scurvy .. 128
- after injury .. 870
- scurvy .. 50
- tenderness of bones from .. 51
- from pharynx, hæmoptysis simulated by 359
- in phosphorus poisoning 421
- phosphuretted hydrogen poisoning .. 421
- from placenta prævia .. 923
- fainting due to .. 297
- pontine, acute alcoholism distinguished from 390
- bradypnea from .. 110
- cerebral compression from .. 110
- coma from 110, 390, 391
- extensor plantar reflex in .. 391
- headache from .. 110
- hyperpyrexia in 155, 385, 390, 391
- opium poisoning distinguished from .. 390, 391
- optic neuritis from 110
- pin-point pupils in .. 155, 391
- pyrexia with .. 709
- stupor from .. 110
- temperature chart in (Fig. 133) 155
- vertigo from .. 110
- vomiting from .. 110
- into portal fissure, colic from .. 147
- post-partum, anæmia from .. 27, 515
- colour index after .. 44
- coma from .. 154
- delirium after .. 211
- extreme blood loss from .. 154
- fainting due to .. 297
- leucocytosis from .. 453
- noises in head after 504
- œdema of legs after 515
- secondary, metastasis from .. 489
- seeming darkness after 923
- vertigo after .. 504
- from prolapsed urethra .. 855
- pulse rapid from .. 157
- in purpura hæmorrhagica .. 346
- renal, casts from .. 8
- unilateral, from new growth .. 10
- retinal .. 519
- in Bright's disease .. 263
- erythrospia due to .. 926
- high blood-pressure and .. 106, 595
- in infective endocarditis .. 9, 46
- in scurvy .. 50, 93
- seeming darkness after 923
- into semicircular canal, Menière's disease from .. 912
- severe, delirium from .. 212
- list of causes of .. 297
- low blood-pressure from .. 212
- into skin (see Purpura)
- in small-pox .. 345
- spinal, after injury 77, 870
- into spinal membranes, retention of urine from .. 495
- in spirochaetosis icterohaemorrhagica .. 420
- into spleen from injury .. 788
- in splenic anæmia 466, 783
- splenomegalic cirrhosis .. 780
- polycythæmia .. 780
- from stomach (see Hæmatemesis)
- subarachnoid, from injury .. 709
- pyrexia from 709, (Fig. 567) 710

Head, contd.

- rolling, occipital baldness from .. 866
- in rickets .. 182, 866
- segmental areas of (Figs. 658, 659) 867
- sensory areas of (Figs. 442-445) 550
- sepsis on, cervical adenitis from .. 763
- small in, microcephalic dwarf .. 234
- spasm in, in tetanus .. 190
- sweats in, infantile scurvy .. 128
- in rickets .. 182
- swelling of, from aneurysm .. 198
- swellings on, in chloroma .. 679
- throbbings in, from arteriosclerosis .. 371
- uthrombosis .. 371
- cerebral aneurysm .. 371
- high blood-pressure .. 371
- tumor of, see Tremor
- unilateral sweating of .. 803
- wood tick invading .. 626
- (and see Scalp; Skull, etc.)

HEADACHE

- from abscess of brain .. 370
- academy .. 372
- from acetone .. 371
- acidosis .. 371
- in anemias .. 371
- Addison's disease .. 372
- from adenoids .. 372
- affected by movement .. 369
- from alcohol .. 371
- alimentary disturbance .. 369
- in anemia .. 372
- from, antral disease .. 370
- in anuria .. 58, 57
- aortic regurgitation .. 759
- apoplexy preceded by .. 184
- from arsenic .. 83
- arteriosclerosis .. 370, 371, 372
- astigmatism .. 370, 549, 867
- atropine relieving .. 549
- from bad ventilation .. 369
- bilious .. 371
- in botulism .. 243
- from carbon dioxide .. 371
- monoxide .. 371
- carrying weights on head .. 372
- cerebellar abscess .. 110, 630
- tumour .. 110, 630
- cerebral abscess .. 110, 184, 385, 613, 772
- aneurysm .. 370
- embolism .. 371
- hemorrhage .. 110, 370, 371
- irritation .. 396
- lesions .. 110
- syphilis .. 184
- thrombosis .. 370, 371, 380
- tumour .. 110, 184, 385, 396, 613, 640, 655, 772
- in cerebrospinal meningitis .. 278, 627
- from chloroform .. 371
- in cholera .. 371
- chronic nephritis .. 14, 370
- from clavus hystericus .. 372
- coal-gas .. 370, 371
- concussion .. 370
- conjunctivitis .. 370
- constipation .. 369, 371
- after convulsions .. 181
- convulsions with .. 370
- in cryptomenorrhoea .. 23
- from cyst of brain .. 370
- in dengue .. 571
- from dental disease .. 370
- in diabetes .. 371
- digitalis relieving .. 372
- from disseminated sclerosis .. 370, 613
- drowsiness with .. 370
- from drugs .. 371
- dyspepsia .. 371
- in eclampsia .. 183
- from emphysema of frontal sinus .. 370
- in encephalitis .. 156, 223, 278, 370, 613, 640
- endarteritis .. 370, 380
- epilepsy .. 183, 372

Headache, contd.

- in epidemic cerebrospinal meningitis .. 371
- from error of refraction .. 370, 371, 548, 549
- ether .. 371
- ethmoidal sinus disease .. 370

- dilatation of, acute, abdominal pain from .. 151
- colic simulated by .. 151
- from fevers .. 266
- over-exertion .. 266
- from acute pneumonia .. 261
- anæmia .. 48, 729
- anæsthetics .. 263
- aortic disease .. 263
- in Bright's disease .. 71, 263
- canter rhythm, from .. 729
- D.A.H. and .. 119
- diffuse impulse with .. 258
- in diphtheria .. 266
- dyspnoea from .. 266
- in erysipelas .. 266
- from fatty change .. 264, 729
- fevers .. 263, 266
- first sound reduplicated with .. 266
- weak with .. 266
- heart dullness increased in .. 266
- impulse displaced in .. 266
- in lobar pneumonia .. 266
- mitral regurgitation .. 263
- from myocarditis .. 263
- over-exertion .. 263
- pain over heart from .. 266
- with pale granular kidneys .. 71
- palpitation from .. 266
- precordial distress from .. 266
- pulse irregular from .. 266
- rapid from .. 266
- weak from .. 266

Heart, dilatation of, contd.

- with red granular kidneys . . . 71
- in scarlet fever . . . 266
- systolic bruit from . . . 266
- in typhoid fever . . . 260
- typhus . . . 266
- dimensions of . . . 70
- disease, achlorhydria in . . . 341
- amenorrhoea from . . . 23
- asthma simulated by . . . 653
- blood-pressure low in . . . 372
- brachial neuritis simulated by . . . 52
- cerebral embolism from . . . 184, 627
- collapse from . . . 52
- congenital (see Congenital Heart Disease)
- cough from . . . 186, 188
- diarrhoea from . . . 217
- duodenal ulcer simulated by . . . 52
- dyspepsia simulating . . . 52
- dyspnoea from . . . 404
- discussion of . . . 247
- embolism from . . . 321
- epistaxis from . . . 273, 274
- exertion after meal causing pain in . . . 52
- fainting rare from . . . 296
- fatal syncope from . . . 296
- flatulence from . . . 52, 303
- flatulent dyspepsia simulating . . . 864
- functional cardiopathy distinguished from . . . 52
- gall-stones simulated by . . . 52
- gangrene from . . . 321
- gastric ulcer simulating . . . 864
- gastritis from . . . 398
- hamatemesis from . . . 336
- hæmoptysis from . . . 361, 363
- headache in . . . 372
- hypothermia in . . . 391, 392, 704
- indigestion simulated by . . . 52
- simulating . . . 114, 536
- infarct of lung from . . . 364
- insomnia in . . . 402, 404
- intestinal catarrh from . . . 217
- lack of exercise simulating . . . 114
- laparotomy in error for . . . 52
- menorrhagia from . . . 482, 484
- nutmeg liver from . . . 463
- pain in arm from . . . 546, 864
- breast from . . . 529
- chest from . . . 530, 533
- epigastrium from . . . 568
- limbs in . . . 871
- spine from . . . 867
- temple from . . . 594
- palpitation from . . . 210
- precordial pain from . . . 533
- tenderness from . . . 863
- pyrexia in . . . 704
- referred pain from . . . 871
- sense of band round chest from . . . 52
- chest tripped in vice from . . . 52
- heavy weight on chest from . . . 52
- severe, coma in . . . 181
- convulsions in . . . 181
- tenderness of chest from . . . 864
- spine from . . . 871
- temple from . . . 867
- tinnitus due to . . . 879
- tobacco-smoking simulating . . . 114
- uric acid in . . . 901
- valvular (see Valvular Disease)
- venous congestion of stomach from . . . 928
- vomiting from . . . 52, 928
- wind round heart and . . . 114

Heart, contd.

- disordered action of (see D.A.H.)
- displaced in bronchiectasis . . . 366
- with fibroid lung . . . 210, 366, 790
- by hydatid cyst . . . 470
- meteorism . . . 805
- new growth . . . 136
- pleural effusion . . . 209, 848
- pneumothorax . . . 209, 532, 647, (Fig. 511) 648, 801, 807
- subphrenic abscess . . . 801, 807
- dullness abolished in emphysema . . . 208
- diminished in emphysema . . . 260
- increased from dilatation of heart . . . 266
- in exophthalmic goitre . . . 266
- to left in aortic disease . . . 259
- right in mitral stenosis . . . 363
- upwards in mitral stenosis . . . 363
- in mitral stenosis . . . 268
- right ventricle enlargement . . . 267
- effort syndrome and . . . 115
- ENLARGEMENT OF . . . 257
- from adherent pericardium 2, 17, 70, 71, 258, 265
- alcohol . . . 18, 71, 258, 261, 266, 373
- aneurysm . . . 258, 260
- aortic disease . . . 2, 258, 263
- arteriosclerosis . . . 14, 71, 258, 264
- in athletes . . . 2, 258, 266
- from beer-drinking . . . 266, 375
- in blacksmiths . . . 2, 258
- from boxing . . . 266
- in brewers' draymen . . . 266
- Bright's disease . . . 71, 263
- Broadbent's sign from . . . 367
- bronchiectasis after . . . 71
- in bulbar paralysis . . . 606
- cerebral hæmorrhage . . . 14, 155, 184, 382
- chest bulging from . . . 258
- from chronic alcoholism . . . 2
- interstitial nephritis . . . 347
- lung disease . . . 71
- nephritis . . . 12, 14, 57, 506
- congenital heart disease . . . 182, 258, 267
- coronary artery sclerosis . . . 375
- cough from . . . 186, 188
- diabetes with . . . 334
- dyspnoea from . . . 247, 250
- in exophthalmic goitre . . . 258
- from fatty change . . . 18, 71, 264
- fibroid heart . . . 18, 71
- lung . . . 268
- fibroid lung after . . . 367
- in firemen . . . 258
- from football . . . 266
- in furnacemen . . . 258
- from granular kidney . . . 258
- hard work . . . 137, 71
- heaving impulse with . . . 258
- hicough from . . . 386
- with high blood-pressure . . . 595
- in laborious workers . . . 258
- malignant endocarditis . . . 9
- from mitral regurgitation . . . 258, 262
- in mountaineers . . . 258
- with myocardial changes . . . 18, 258
- from myocarditis . . . 254
- nephritis . . . 71
- occupation . . . 2, 258
- in old age . . . 387
- orthopnoea from . . . 250
- from over-exertion . . . 266
- pale granular kidney . . . 71
- pericardial adhesions . . . 374

Heart, enlargement of, contd.

- phrenic nerve irritated by . . . 186
- physical signs of . . . 257
- from physical work . . . 2
- precordia prominent from . . . 210
- prolonged first sound with . . . 2
- with red granular kidneys . . . 71
- from renal disease . . . 184
- in rowing men . . . 258, 266
- from running . . . 266
- signs of . . . 14
- skiagraph of (Fig. 302) . . . 374
- Skodan resonance due to . . . 755
- in splenomegalic polycythæmia . . . 780
- stokers . . . 2, 258
- subacute nephritis . . . 140
- from syphilis . . . 373
- uræmia and . . . 183
- vagus nerve irritated by . . . 186
- vomiting from . . . 188
- X rays in diagnosing . . . 186, 373
- examinations, posture and . . . 123
- extrasystoles of . . . 123
- extrasystoles of . . . 123
- failure, acute dilatation of stomach in . . . 218
- rheumatism and . . . 68
- from adherent pericardium 17, 69, 70, 246
- albuminuria with . . . 17, 68, 71
- from alcoholism . . . 268
- anasarca with . . . 135
- from aortic disease . . . 246, 268
- arterial disease . . . 68
- arteriosclerosis . . . 14, 201, 246, 264, 268
- ascites in . . . 14, 63, 847
- account of . . . 68-71
- from atheroma of coronary arteries . . . 246
- athlete's heart . . . 266
- backward pressure from, causes of . . . 62
- blood-pressure high from . . . 71
- borborygmi from . . . 107
- in Bright's disease . . . 71, 136, 263
- from bronchiectasis . . . 68, 201
- bronchitis . . . 201
- bullæ from . . . 123, 125
- Cheyne-Stokes breathing from . . . 139
- in children . . . 17
- from chronic Bright's disease . . . 268
- bronchitis . . . 68, 246
- nephritis . . . 14, 15
- chronic, from adherent pericardium . . . 62
- aortic regurgitation . . . 62
- stenosis . . . 62
- arteriosclerosis . . . 62
- chronic lung affections . . . 62, 201
- emphysema . . . 62
- fatty change . . . 62
- fibroid heart . . . 62
- lung . . . 62
- high blood-pressure . . . 62
- mitral regurgitation . . . 62
- stenosis . . . 62
- myocardial affections . . . 62
- pale granular contracted kidneys . . . 62
- primary alcoholic heart . . . 62
- pulmonary stenosis . . . 62
- red granular contracted kidneys . . . 62
- valvular disease . . . 62
- in cirrhosis of liver . . . 466
- classified causes of . . . 246
- conditions causing . . . 17
- from congenital heart disease . . . 246

Heart failure, contd.

- cyanosis from . . . 107, 196, 199, 200
- delirium from . . . 212
- dyspnoea from . . . 246
- emphysema and . . . 201, 246
- from emphysema and bronchitis . . . 17, 139, 199
- epigastric pulsation with . . . 268
- extreme œdema from . . . 123
- from fatty heart . . . 139, 246
- fibroid heart . . . 139, 212, 246
- lung . . . 68, 139, 201, 246
- general account of . . . 17
- œdema from . . . 516
- from granular kidneys . . . 17, 201, 246
- high blood-pressure in . . . 106
- from high blood-pressure . . . 106, 139, 201, 246
- conditions . . . 17
- hyperpnoea . . . 246
- intestinal flatulence from . . . 308
- jaundice from . . . 408
- liver tender with . . . 68
- lividity with . . . 847
- from lung affections . . . 17, 139, 246
- mitral regurgitation . . . 246, 262, 268
- stenosis . . . 71, 106, 212, 246, 268, 847
- myocardial affections . . . 17, 68, 69, 139, 201, 212, 246
- nutmeg liver in . . . 14, 68
- œdema of hands from . . . 514
- legs in . . . 14, 63, 68, 125, 136, 514, 514, 515, 517, 847
- oliguria with . . . 15
- orthopnoea in . . . 14, 136, 199, 847
- from over-exertion . . . 266
- pale granular kidney . . . 71
- pancreatitis from . . . 128
- paracentesis abdominalis in . . . 63
- from pericarditis . . . 246
- pericardium affection . . . 201
- pleural effusion with . . . 135, 136
- from polycythæmia . . . 246
- primary alcoholic heart . . . 246
- pulmonary congestion . . . 14
- pulsating liver with . . . 68, 847
- pulse feeble with . . . 106
- irregular with . . . 106
- with red granular kidneys . . . 71
- from renal disease . . . 68
- simulating nephritis . . . 71
- spleen not enlarged in . . . 778, 787
- in tetanus . . . 175
- thirst due to . . . 875
- from tricuspid stenosis . . . 847
- types of causes . . . 200, 201
- urates in . . . 900
- urine concentrated in . . . 900
- from valvular disease . . . 246
- winter cough and . . . 68
- fatty, account of . . . 264
- age incidence of . . . 17
- albuminuria with . . . 18
- from alcohol . . . 261, 264
- angina pectoris from . . . 18
- in aplastic anaemia . . . 70
- from arsenic . . . 70
- ascites from . . . 62
- asthma simulated by . . . 264
- blood-pressure high . . . 18
- no bruit with . . . 18
- from cancer . . . 264
- canter rhythm due to . . . 729
- Cheyne-Stokes breathing from . . . 139, 264
- coma from . . . 264
- convulsions from . . . 264
- death in sleep from . . . 115

Heart, fatty, contd.

- - degeneration of 62, 70, 94, 264
 - - depression from 264
 - - diagnosis of 17
 - - digitalis and 595
 - - dilatation of 264, 729
 - - dyspepsia simulating 595
 - - dyspnea from 246, 264
 - - electrocardiogram and 115
 - - emphysema simulating 595
 - - enlarged 18, 71, 264
 - - faintness from 264
 - - feeling of coldness from 264
 - - from fevers 264
 - - fibroid heart simulating 70
 - - first sound faint from 264
 - - heart failure from 62, 139, 246
 - - heartburn simulating 377
 - - inhalation of 62, 70, 264
 - - irregular 18
 - - from lead 70
 - - left ventricle enlarged from 374
 - - from long illness 70
 - - mitral regurgitation from 263
 - - from obesity 70, 264, 505
 - - palpitation from 594, 595
 - - in pernicious anemia 70, 729
 - - from phosphorus 70, 94, 264, 421
 - - phthisis 264
 - - poisoning 70
 - - precordial pain from 17, 377
 - - pulse feeble from 264
 - - irregular from 264
 - - rapid from 264
 - - slow from 264
 - - Schott's Nauheim treatment and 595
 - - from severe anemia 70, 264
 - - shortness of breath from 17, 70, 115
 - - skiagram and 115
 - - stertor from 264
 - - sudden death from 115
 - - superposition of 62, 70, 264
 - - syncope from 264
 - - systolic bruit with 18
 - - tachycardia due to 857
 - - from toxins 70
 - - twitching from 264
 - - from typhoid fever 264
 - - wasting disease 264
 - - fibroid (see Fibroid Heart)
 - - flabby, D.A.H. and 115
 - - fetal, in pregnancy 841, 842
 - - gumma of, heart-block due to 668
 - - hypertrophy of (see Heart, Enlargement of)
 - - **idioventricular rhythm of 670**
 - - impulse in children 372
 - - difficult to locate, from emphysema 372
 - - - - fat 372
 - - - - mamma 372
 - - - - pericardial effusion 372
 - - diffuse, from dilatation 258
 - - **DISPLACED 372**
 - - - - by abdominal tumour 373, 374, 376
 - - - - from adherent pericardium 265
 - - - - in anemia 373
 - - - - by aneurysm 373
 - - - - in aortic disease 259
 - - - - arteriosclerosis 373
 - - - - by ascites 59, 373, 374
 - - - - in athletes 374
 - - - - with bronchiectasis 373
 - - - - in chlorosis 374
 - - - - chronic bronchitis 374
 - - - - nephritis 14
 - - - - congenital transposition 373
 - - - - debilitating conditions 373

Heart impulse, displaced, contd.

- - - - from dilatation of heart 266
 - - - - in elderly people 374
 - - - - from emphysema 373, 374
 - - - - by emphysema 373, 374
 - - - - in exophthalmic goitre 266
 - - - - from fatty myocardial change 374
 - - - - fibroid lung 143, 269, 373, 375
 - - - - myocardial change 374
 - - - - by hernia of stomach through diaphragm 376
 - - - - from hypertrophy of heart 374
 - - - - left ventricle 14, 258
 - - - - right ventricle 267, 374
 - - - - in infective conditions 373
 - - - - from injury to chest 373
 - - - - lung disease 373
 - - - - massive collapse of lung 373, 375
 - - - - by mediastinal new growth 373
 - - - - from mitral stenosis 268
 - - - - muscular exertion 373
 - - - - in myocardial degeneration 70, 373
 - - - - with new growth of lung 373
 - - - - after operation on chest 373
 - - - - in pericardial disease 373
 - - - - **pericarditis 265**
 - - - - by pleural effusion 258, 373, 375
 - - - - pneumothorax 373
 - - - - pregnancy 373, 374
 - - - - in renal disease 373
 - - - - scoliosis 373
 - - - - toxemia 374
 - - - - by tympanites 373, 374
 - - - - in valvular disease 373
 - - - - fixed, in adherent pericardium 70
 - - - - forcetful, in angina 53
 - - - - with high blood-pressure 53
 - - - - heaving, from hypertrophy 258
 - - - - impalpable, from emphysema 258, 269
 - - - - **normal characters of 372**
 - - - - - site of 257, 258
 - - - - oscillating, with adherent pericardium 71
 - - - - in mitral stenosis 71
 - - - - see-saw, with adherent pericardium 71
 - - - - in mitral stenosis 71
 - - - - irregular, from absinthe 18, 596
 - - - - alcohol 596
 - - - - in aortic regurgitation 259
 - - - - from athlete's heart 266
 - - - - auricular fibrillation 2
 - - - - coffee 596
 - - - - fatty heart 18
 - - - - fibroid heart 18
 - - - - mitral stenosis 2, 69
 - - - - myocardial changes 18
 - - - - tea 596
 - - - - tobacco 596
 - - - - (and see Pulse, Irregular)
 - - - - **irritable 664**
 - - - - jerk due to extrasystole 668
 - - - - malformation of, cyanosis from 196
 - - - - **measurements of 258**
 - - - - - X rays in obtaining 70, 115, 258, 597
 - - - - **MURMURS 116**
 - - - - (and see Bruit)
 - - - - **myocardial affections of, varieties of 62**
 - - - - **nerve relations of 863**
 - - - - new growth within (Fig. 683) 909
 - - - - heart-block from 668
 - - - - **normal phenomena of contraction of 664**
 - - - - skiagram of (Fig. 303) 375

Heart, contd.

- overuse of, myocardial changes from 18
 - pain from, angiospastic factors in 54
 - **pains due to lesions of 51, 52**
 - - **round 536**
 - - paired beats of 673
 - - percussion of 258
 - - polypos in 910
 - - premature beats of (see Extrasystoles)
 - - primary alcoholic (see Alcoholic Heart)
 - - rapid (see Tachycardia)
 - - rupture of, from aneurysm 294
 - - senile, palpitation from 568
 - - sense of stopping of, from extrasystoles 668
 - - **sensory nerves of 533**
 - - single auricle to 267
 - - large vessel from 143
 - - ventricle to 267
 - - skiagrams (Fig. 155) 187, (Fig. 213) 248
 - - of normal (Fig. 303) 374
 - - slowed by belladonna 859
 - - soldier's (see D.A.H.)
 - - **SOUNDS, ACCENTUATION OF 1, 2**
 - - - - **during extrasystoles 669**
 - - - - faint in emphysema 269
 - - - - **first, accentuated 1, 2**
 - - - - in arteriosclerosis 2, 14
 - - - - cerebral hemorrhage and 155
 - - - - with chronic nephritis 2, 12, 14
 - - - - high blood-pressure 2, 105
 - - - - hypertrophied left ventricle 2, 373
 - - - - at impulse, in chronic parenchymatous nephritis 506
 - - - - in mitral stenosis 118, 268
 - - - - faint from fatty heart 264
 - - - - reduplicated, from arteriosclerosis 729
 - - - - with dilatation of heart 266
 - - - - from granular kidney 729
 - - - - with high-blood-pressure 729
 - - - - from hypertrophy of left ventricle 729
 - - - - slapping, in mitral stenosis 363, 595
 - - - - weak, with dilatation of heart 266
 - - - - from myocarditis 264
 - - - - fetal, in pregnancy 601
 - - - - **prolonged at impulse 1, 2**
 - - - - **pulmonary second, accentuated 1**
 - - - - in mitral stenosis 1, 363
 - - - - **reduplicated 1, 729**
 - - - - in mitral stenosis 363
 - - - - **REDUPLICATION OF 729**
 - - - - mid-diastolic bruit simulated by 729
 - - - - **second, accentuated 1**
 - - - - with arteriosclerosis 2, 14
 - - - - chronic nephritis 2, 14, 137, 506
 - - - - high blood-pressure 1, 2, 53, 105, 373
 - - - - hypertrophied left ventricle 2
 - - - - from mitral regurgitation 262
 - - - - stenosis 119, 363
 - - - - aortic, accentuated, in angina 53
 - - - - from atheroma 1
 - - - - calcareous changes 1
 - - - - **clanging 1**

Heart sounds, sec. aortic, contd.

- - - - ringing 1
 - - - - cerebral hemorrhage and 155, 382
 - - - - reduplicated, from high blood-pressure 373
 - - - - mitral regurgitation 262
 - - - - stenosis 1, 119, 363
 - - - - syphilitic, angina pectoris from 53
 - - - - hypertrophied 373
 - - - - tachycardia due to 857
 - - - - thumping on getting into bed 596
 - - - - tobacco, heartburn simulating 377
 - - - - precordial pain from 377
 - - - - transposition of 267
 - - - - fibroid lung simulating 269
 - - - - tumbling rhythm of 2
 - - - - valvular disease of (see Valvular Disease)
 - - - - weak, D.A.H. and 115
 - - - - X rays in determining size of 298, 373
 - - **Heart-block 666-668**
 - - in acute infections 668
 - - arteriosclerosis 109
 - - atheroma and 109
 - - in auricular flutter (Fig. 525) 665
 - - bradycardia from 671
 - - from carcinoma of bundle of His 109
 - - cardiosclerosis 668
 - - cloudy swelling 109
 - - complete, electrocardiograms (Fig. 101) 108, (Fig. 532) 667
 - - in diphtheria 668
 - - dropped beats from 667
 - - - - simulating 664
 - - early, electrocardiogram of (Fig. 529) 666
 - - electrocardiogram in diagnosing 109, 298, 596
 - - epileptiform attacks in 298, 668, 671
 - - extrasystoles simulating 668, 670
 - - fainting from 296, 297, 298
 - - in fevers 109
 - - from gumma 109, 668
 - - incipient, electrocardiogram of (Fig. 104) 109
 - - incomplete, polygram of (Fig. 528) 666
 - - in influenza 668
 - - methods of diagnosing 671
 - - myocardial degeneration and 109
 - - due to neoplasm 668
 - - one-in-three 667
 - - one-in-two 667
 - - electrocardiogram of (Fig. 102) 108
 - - partial, electrocardiogram of (Fig. 530) 667
 - - in pneumonia 668
 - - polygram of (Fig. 531) 667
 - - in diagnosing 109
 - - pulse irregular from 667, 672
 - - very slow from 668
 - - in rheumatism 668
 - - right bundle branch, electrocardiogram of (Fig. 72) 53
 - - from sarcoma of bundle of His 109
 - - simulating epilepsy 109
 - - sino-auricular block simulating 668
 - - **Stokes-Adams' disease from 109, 183, 298, 668**
 - - syncope attacks in 668, 671
 - - syphilis and 109
 - - three-in-four 667
 - - from toxins 109
 - - transient 109
 - - two-in-three 667
 - - in ulcerative endocarditis 668
 - - variations in (Figs. 101, 102) 108

- Heart-block, contd.*
- venous pulse in neck in diagnosing .. 667
HEARTBURN .. 376
- from appendix dyspepsia .. 376
- causation of .. 376
- from duodenal ulcer .. 376
- flatulent dyspepsia .. 376
- gall-stone dyspepsia .. 376
- gastric carcinoma .. 376
- ulcer .. 376
- gastro-intestinal neur-osis .. 376
- heart disease simulated by .. 376, 377
- from ilio-cæcal kinking .. 376
- pain behind sternum from .. 376, 536
- palpitation with .. 376
- precordial pain from .. 376
- from pyloric stenosis .. 376
- pyrosis and .. 376, 536
- from spasm of œso-phagus .. 54
- test meals in cases of .. 376
- from tobacco-smoking .. 376
- visceroprosis .. 376
- water-brash and .. 376, 536
- X-ray examination in cases of .. 376
Heat and cold, loss of sensibility to, in Brown-Séquard paralysis (Fig. 459) 608
- cramps .. 189
- in erythromelalgia .. 320
- extreme, erythema due to .. 275, 278
- gangrene from .. 317
- fainting due to .. 297
- prickly, itching in .. 658
- sense of, in flushing .. 303
- lost, from cerebellar artery thrombosis .. 76
- in Morvan's disease 302
- syringomyelia 81, 82, 125, 302, 435, 619, 628
- sensory paths of .. 750
- stroke, acute alcoholism distinguished from .. 390
- coma from 154, 156, 213, 390
- delirium from .. 211, 213
- hyperpyrexia in 156, 390
- malaria simulating .. 213
- opium poisoning distinguished from .. 390
Heberden's nodes 502, (Fig. 356) 247, 430
Hedera helix, dermatitis due to .. 916
Hedge mustard, dermatitis due to .. 916
Hedgehog crystals due to ammonium urate .. 899
- heel, bedsores over .. 321
- bursitis of (see Bursitis)
- chilblain of .. 551
- conical, in talipes .. 144
- corn on .. 552
- cornification of .. 551
- drawn up, in Friedrich's disease .. 176
- fibrositis of .. 552
- spine on os calcis simulating .. 552
- foreign body in .. 551, 552
- gout of .. 551, 552
- Jacquet's erythema of .. 498
PAIN IN .. 551
- and see Pain in Heel
- rubbed, limping due to .. 456
- pain in foot due to .. 456
- small, in talipes .. 144
- thorn in .. 551
Hegar's sign of pregnancy .. 489
Heights, ascent to, fainting due to .. 297
- hemianopsia at .. 377
- shortness of breath from .. 113
- tinnitus at .. 878
Helianthus, dermatitis due to .. 916
Heliotrope cyanosis in influen-zo-pneumonia (Fig. 175) 201
Helleborus niger, derma-titis due to .. 916
Heller's test .. 5
- albumose and .. 20
Helmitol for pyuria .. 798
- stranguiry due to .. 798
Hemeralopia .. 926
Hemianasthesia from
- apoplexy .. 753
- ataxy and .. 77
- in disseminated sclerosis 753
- epidemic encephalitis 1753
- hemianopsia with .. 753
- hemiplegia and .. 381, 753
- in hysteria .. 77, 171, 179, 570, 754
- from injury to cord .. 385
- internal capsule lesion 753
- optic radiation lesion 753
Hemianopic pupillary reflex 675
HEMIANOPIA .. 377
- from abscess of brain .. 379
- in acromegaly .. 379, 837
- alexia with .. 771
- bilateral homonymous 378
- account of .. 379
- from embolism of optic radiations (Fig. 313) 380
- perimeter chart of (Fig. 313) 380
- temporal (Fig. 305) 377
- account of .. 378
- in acromegaly 255, 378
- after fracture of basisphenoid .. 379
- from gumma at base of brain .. 379
- perimeter chart of (Fig. 306) 378
- from pituitary tumour (Fig. 306) 378
- from carcinoma .. 379
- cerebral embolism .. 380
- cuneus lesions .. 379, 380
- embolism .. 379
- encephalitis .. 173, 223
- glioma .. 379
- gunma .. 379
- hæmorrhage .. 379
- hemianasthesia with .. 753
- hemiparesis with .. 379
- hemiplegia with .. 381
- from inflammatory swelling .. 379
- intermittent claudication 379
- internal capsule lesion .. 379, 380
- in migraine .. 381, 922
- from neoplasm .. 379
- occipital cortex lesion (Fig. 312) 380, 675
- in one eye, in aeroplanes 377
- altitudinal .. 377
- in migraine .. 377
- mountaineers .. 377
- from optic radiation lesion 379, (Fig. 312) 380
- tract lesion .. 379, 925
- (Fig. 311) 380, 675, 925
- perimeter in .. 377
- from pituitary tumour (Fig. 305) 377
- posterior cerebral artery lesions .. 379
- pupil inactive with (Fig. 311) 380
- to light with (Fig. 305, 377
- reacting with (Fig. 312) 380
- reactions in .. 379
- quadrant, in migraine 922
- from sarcoma .. 379
- thrombosis .. 379
- tuberculous nodule .. 379
- visual cortex lesion .. 922
- word blindness and .. 772
Hemiataxia .. 76
Hemihæsthesia .. 382
Hemiatrophy of face .. 79
- facial paralysis simulated by .. 605
- illustrated (Fig. 468) 605
- tongue in syringomyelia (Fig. 85) 79
- trunk .. 79
Hemichorea .. 170
Hemichorea, contd.
- hemiplegia from .. 382
- simulated by .. 385
- paralysis of arm in .. 614
- Hemichorea in migraine 924
- Hemidrosis (see Sweating, Unilateral)
Hemipopia (see Hemianopsia)
- cerebral hæmorrhage .. 379
- hemianopsia with .. 379
- Hemiparesis from abscess .. 88
- Babinski's sign in .. 88
- from cerebral hæmorrhage .. 379
- embolism .. 88
- hæmorrhage .. 88
- hemianopsia and .. 379
- pyramidal tract lesion in .. 88
- from thrombosis .. 88
- tumour .. 314
HEMIPLEGIA .. 381
- from abscess .. 88
- Achillis jerk increased in 381
- age incidence of .. 382
- agtaphia and .. 772
- ankle-clonus in .. 381
- aphasia and .. 381, 772
- arm position in .. 176
- ataxy and .. 76, 77, 171
- from atheroma .. 384
- athetoid movements in 883
- athetosis after .. 170, 171
- bedsores in .. 321, 894
- biceps jerk in .. 381
- Broca's area and .. 381
- from caisson disease 382, 385
- causes of .. 381, 382
- from cerebral abscess .. 382, 385
- embolism .. 321, 385
- cerebral hæmorrhage and .. 155, 321, 381, 382
- from cerebral softening .. 385
- syphilis .. 184
- tumour .. 382, 385
- cerebrospinal fluid in .. 382
- choreiform movements .. 171
- after .. 883
- preceding .. 171
- from congenital malformation .. 382
- crossed, from pen-Varole lesion .. 381
- from disseminated sclerosis .. 382, 385
- double .. 176
- dysarthria in .. 773
- exaggerated laughter in .. 294
- explosive laughter in 290
- tears in .. 290
- dragging of foot in .. 314
dysarthria and .. 381
- elbow-jerk in .. 381
- from embolism 88, 381, 382
- encephalitis 157, 173, 223, 382, 613
- endarteritis obliterans 630
- extensor plantar reflex in .. 88, 381
- eye closure deficient in 381
of face on one side, limbs on other .. 604
- facial paralysis with .. 603
- flexor spasticity in .. 176
- from fungating endocarditis .. 381, 787
- gangrene from .. 317
in general paralysis .. 382, 384, 770
- from hæmorrhage .. 88
- hand grips unequal in 381
- hemianasthesia with .. 381, 754
- hemianopsia with .. 381
- hemihæsthesia from .. 382
- from hemichorea .. 382
- hemichorea simulating .. 385
- hysterical 77, 178, 382, 385, 609
- infantile, ataxy in .. 76
- athetosis .. 604
- athetoid movements in .. 76
- from cerebral embolism .. 170
- thrombosis .. 170
Hemiplegia, infantile, contd.
- choreiform move-ments in .. 76
- from difficult labour 145
- face weakness in .. 604
- from forceps delivery 145
- meningeal hæmorrhage .. 145
- paralysis of arm in .. 145
- leg in .. 145
- spastic .. 169
- talipes equinus in (Fig. 129) 145
- tremor in .. 76
- from injury at birth .. 382
- to spinal cord .. 385
- intermittent claudication .. 382, 384
- knee-jerks unequal in .. 381, 451
- leg position in .. 176
- lupus in .. 314
- lambar puncture in .. 382
- from meningitis 382, 385
- meningococcal meningitis .. 382
- mitral stenosis .. 381
- nasolabial folds unequal in .. 381
- pain in shoulder in 580, 583
- pyramidal tract lesions in .. 88, 451, 603
- radial wrist-jerk in .. 381
- recurrent .. 384
- rigidity and .. 381
- from sinus thrombosis 382
- spinal cord injury .. 382
- syphilis .. 155, 382, 630
- syphilitic endarteritis 381
- tendon reflexes absent in 381
- from thrombosis 88, 155, 321, 381
- tremor from 171, 880, 882, 883
- triceps jerk in .. 381
- from tumour .. 88
- twitches preceding .. 171
- ulcer of leg in .. 894
- ulnar wrist-jerk in .. 381
- Wassermann reaction in 382
Henoch's chorea see Chorea
- purpura .. 676
- abdominal pains in .. 102, 428, 680, 931
- symptoms in .. 680
account of 101, 102, 428, 680, 931
- acute nephritis simulated by .. 680
- age incidence of .. 428
- blood per anum in .. 102, 680
- cessation in adult life .. 102
- attacks of .. 480
- at puberty .. 680
- in children .. 102, 680
- colic in .. 680
- constipation in .. 102
- like cyclical vomiting and purpura .. 102
- diarrhoea in .. 102, 428
- duration of .. 102
- epistaxis in .. 102
- gastric colic in .. 148
- hæmatemesis in 102, 428, 931
- hæmaturia in 102, 428, 680
- hæmoglobinuria in .. 358
- hæmoptysis in .. 102
- hæmorrhage into .. 456
- atkle in .. 456
- bowel wall in 102, 931
- gastric mucosa in 148
- hip from .. 457
- knee in .. 456
- mesentery in .. 931
- illustrated (Fig. 337) 428
- intestinal obstruction simulated by .. 931
- intussusception caused by .. 102, 931
- simulated by 680, 931
- limping from 456, 457
- melanin in .. 102, 428
- mucus per rectum in 680
- pain in foot from 456
- joints in .. 428, 680
- peliosis rheumatica simulated by .. 680
- prostration in .. 102

Henoch's purpura, contd.

- purpura in ..	102
- pyrexia in ..	428
- recurrent attacks of ..	680
- rheumatic fever simulated by ..	428
- stomach-ache in ..	680
- submucous hemorrhages in ..	680
- swelling of joints in ..	428
- vomiting in ..	102, 428, 680, 929, 931
Hepatic abscess (see Abscess of Liver) ..	
- artery, aneurysm of (see Aneurysm) ..	
- duct, stone in, colic from ..	147
- flexure, carcinoma of, blood per anum from ..	96
- time at which barium reaches (Fig. 138) ..	160
Hepatitis, pain in epigastrium from ..	538
- hypocondrium from ..	553
- shoulder from ..	580
- tropical, jaundice from ..	408
Hepatoptosis, account of ..	462
Heracleum lanatum, dermatitis due to ..	916
Herald patch in pityriasis rosea ..	746
Hercules, infant ..	324
- type of pseudo-hyper-trophic muscular paralysis (Fig. 477) ..	624
Hereditary ataxia (see Friedrich's Ataxia) ..	
- optic atrophy, central scotoma in ..	923
- syphilis (see Syphilis, Congenital) ..	
- telangiectases, epistaxis from ..	273, 274
- trophedema (see Meigs's Disease) ..	
Heridity, anosteoplasia and ..	233
- baldness and ..	91
- Friedrich's ataxia and gout and ..	428
- Little's disease and ..	169
- Meigs's disease and ..	516
- myopathy and ..	78
- neurotic convulsions from ..	181
- obesity due to ..	505
- palpitation from ..	594
- paramyoclonus multiplex and ..	173
- paroxysmal hemoglobinuria and ..	358
- sick headache and ..	640
- Tooth's peroneal atrophy and ..	78
- (and see Familial Incidence) ..	
Hermaphroditism, gigantism with ..	325
- (and see Pseudo-hermaphroditism) ..	
Hernia, abscess in groin due to ..	831
- appendix in ..	834
- bladder in ..	834
- cerebri, pulsation of ..	847
- from coughing ..	832
- diaphragmatic, congenital ..	801
- from injury ..	801
- succussion in ..	800
- X rays in diagnosing ..	801
- epigastric, pain in epigastrium from ..	537
- femoral, account of ..	825, 831
- adherent omentum in ..	825
- age incidence of ..	832
- direction of reduction ..	832
- ectopic testis simulating ..	832
- enlarged glands with ..	826
- simulating ..	830, 832
- below groin fold ..	831
- groin swelling due to ..	830
- gurgling in ..	825
- hydrocele of ..	825, 826
- of sac of ..	832
- impulse on coughing in ..	825, 826

Hernia, femoral, contd.

- inguinal hernia distinguished from ..	831
- simulated by ..	825
- internal to femoral vessels ..	831
- irreducible ..	825, 832
- limping from ..	457
- neck external to spine of pubis ..	831
- never in labium ..	831
- of scrotum ..	831
- omentum in ..	832
- operation in diagnosis ..	832
- below Poupart's ligament ..	831
- psoas abscess simulating ..	825, 831
- bursa simulating ..	831
- rare before puberty ..	825
- reducible ..	825, 826
- resonance over ..	825
- saphena varix simulating ..	825, 831
- sex incidence of ..	825, 832
- strangulated ..	150, 825
- at femoral ring ..	804
- hydrocele of ..	832, 833
- impulse on coughing in ..	831
- in infancy ..	834
- inguinal ..	804, 830, 831
- age incidence of ..	832
- compression of spermatic cord by ..	85
- descent to labium ..	831
- of scrotum ..	831
- direct ..	832, 834
- direction of reduction ..	832
- femoral hernia distinguished from ..	831
- simulated ..	825
- above groin fold ..	841
- groin swelling due to ..	840
- hydrocele of canal of Nuck simulating ..	856
- cord simulating ..	832
- impulse on coughing in ..	832
- limping from ..	457
- lipoma of round ligament simulating ..	832
- neck internal to spine of pubis ..	831
- oblique ..	832, 833
- above Poupart's ligament ..	831
- in scrotum ..	831, 833
- sex incidence of ..	832
- strangulated ..	150
- testis atrophy from ..	85
- undescended testis ..	832
- vulval swelling due to ..	853
- at inguinal ring ..	804
- inguinocrotal ..	833
- congenital sac and ..	834
- gurgling in ..	833
- hydrocele of cord simulating ..	833
- sac simulating ..	833
- impulse on coughing in ..	833
- irreducible ..	833
- lymphangioma of ..	833
- cord simulating ..	833
- omentum in ..	833
- reducible ..	833
- testis below ..	834
- varicocele simulating ..	833
- internal, intestinal obstruction from ..	168
- vomiting from ..	168
- intestinal obstruction due to ..	804
- labial, vulval swelling due to ..	853
- of laparotomy scar ..	636
- in linea alba ..	537, 804
- semilunar ..	804
- lipoma simulating ..	804
- Littre's ..	149
- of lung, from coughing ..	210
- impulse on coughing in ..	210
- in marasmic children ..	210
- phthisis ..	210
- pulsation of ..	847
- from whooping-cough ..	210
- obstructed ..	855
- colic from ..	148

Hernia, contd.

- obturator, account of ..	831
- groin swelling due to ..	830
- obturator neuralgia from ..	540
- overlooked ..	832
- pain in iliac fossa from ..	558
- thigh with ..	832
- rectal examination in ..	832
- diagnosing ..	832
- strangulated ..	150, 832
- vaginal examination in ..	832
- diagnosing ..	832
- omental, varicocele simulating ..	851
- operation for, retention of urine after ..	58, 493
- perineal, vulval swelling due to ..	853
- posterior labial ..	855
- reducible ..	831, 855
- resonance over ..	831, 855
- retroperitoneal, colic simulated by ..	149
- intestinal obstruction from ..	149
- strangulated ..	150
- intestinal obstruction by ..	555
- laparotomy for ..	555
- pain in iliac fossa from ..	555
- urgent laparotomy for ..	149
- scrotal, haematocoele distinguished from ..	589
- hydrocele distinguished from ..	588
- impulse on coughing in ..	588
- irreducible ..	588
- reduction of ..	588
- resonance over ..	588
- testis below ..	588
- translucent in infant ..	588
- of stomach into chest (Fig. 514) ..	649
- bismuth and X rays in diagnosing ..	376, 649
- congenital ..	649
- from gunshot wound ..	376, 649
- heart impulse displaced by ..	376
- from injury ..	649
- pneumothorax simulated by ..	649
- from straining ..	832
- strangulated ..	855
- abdominal pain from ..	833
- acute intestinal obstruction from ..	167
- colic simulated by ..	149
- constipation with ..	833
- fainting due to ..	297
- femoral ..	150, 825
- inflamed hydrocele of ..	832
- sac simulating ..	150
- inguinal ..	150
- intestinal obstruction from ..	149, 485
- meteorism from ..	485
- misplaced testis simulating ..	589
- obturator ..	150, 555, 832
- twisted ovarian cyst simulating ..	559
- umbilical ..	150
- urgent laparotomy for ..	149
- vomiting with ..	833
- testis, account of ..	769
- epithelioma simulating ..	769
- gummatous ..	769
- papilloma simulating ..	769
- from syphilis ..	850
- tubercle bacilli from ..	769
- tuberculous ..	768, 769, 850
- torsio testis simulating ..	833
- at umbilicus ..	804
- in fat women ..	593
- impulse on coughing in ..	593
- in infants ..	593
- irreducible ..	593
- omentum in ..	593
- pain in ..	593
- sebaceous cyst simulating ..	593
- strangulated ..	150
- varicocele with ..	833

Heroin, coma from ..	154
- drug habit from ..	113
- habit, impotence from ..	393
- sudden stopping of, delirium from ..	212
- injections, taches bleues from (Fig. 503) ..	642
- leucopenia from ..	455
- noises in head from ..	504
- out of condition from ..	113
- shortness of breath from ..	113
- vertigo from ..	504
Herpes, brown stain after ..	913
- burning in ..	913
- cervical, account of ..	253
- deafness with ..	253
- mastoiditis simulated by ..	253
- middle-ear disease simulated by ..	253
- pain in ear with ..	253
- vertigo with ..	253
- vesicles on neck with ..	253
- chancreolids simulated by ..	913
- crusts in ..	742, 913
- of ear ..	253
- eczema distinguished from ..	915
- erythema in ..	913
- excoriations in ..	913
- facialis in cerebrospinal meningitis ..	278
- in crusts in ..	914
- in encephalitis lethargica ..	278
- impetigo simulated by ..	419
- in pneumonia ..	419
- spirochaetosis icterohæmorrhagica ..	419
- febrilis of lips ..	459
- genitalis, account of ..	891
- cornea insensitive in ..	891
- corneal opacity from ..	891
- ulcer due to ..	891
- intra-ocular tension raised in ..	891
- panophthalmitis due to ..	891
- perforation of cornea due to ..	891
- supra-orbital nerve and ..	891
- vesicles on cornea in ..	891
- genitalis, account of ..	913
- burning in ..	914
- chancre with ..	914
- inguinal glands enlarged from ..	913
- itching in ..	914
- ulceration due to ..	913
- gestationis, account of ..	123
- bullæ in ..	123
- eosinophilia in ..	123, 271
- itching in ..	124
- pain in ..	124
- pyrexia in ..	709
- skin eruption of ..	126
- of glossopharyngeal nerve ..	253
- iris, bullæ in ..	919
- eosinophilia in ..	271
- eruption of ..	126
- vesicles in ..	919
- itching after ..	865
- in ..	913
- labialis, crusts in ..	693
- in lobar pneumonia ..	199
- perleche simulating ..	460
- in pneumonia ..	789
- spirochaetosis ..	693
- lesion of ..	913
- mastoiditis simulated by ..	253
- of mens veneris ..	913
- on mucous membranes ..	913
- ocular, pain in eye from ..	546
- ophthalmicus ..	865
- otitis media simulated by ..	253
- of perineum ..	913
- pigmentation after ..	865
- of prepuce ..	230
- pain in penis from ..	759
- proenitalis, account of ..	574
- bubo rare with ..	764
- after chancre ..	764
- erythema in ..	764
- pustules in ..	764
- recurrences of ..	764
- soft sore simulated by ..	764
- sore on penis from ..	763

Herpes progenitalis, contd.

- vesicles in .. 764
- no scarring from .. 913
- simplex, face affected by .. 913
- genitalia affected by .. 913
- vesicles in .. 913
- of small occipital nerve .. 253
- stages of .. 913
- tenderness after .. 865
- of scalp from .. 865
- spine from .. 868
- of thighs .. 913
- on tonsil .. 253
- ulceration from .. 913
- of urethra .. 230
- urethritis from .. 230
- vesicles in .. 913
- zoster, account of **531, 914**
- of arm, (Fig. 110) 124
- auricle, with facial paralysis .. 604
- from geniculate ganglion affection .. 604
- bilateral .. 914
- of brachial plexus .. 546
- bullae in .. 123, 914
- bullous (Fig. 110) 124
- of conjunctiva .. 914
- crops in .. 914
- crusts in .. 742
- dermatitis herpetiformis distinguished from .. 914
- without eruption .. 564
- erythema in .. 914
- multiforme distinguished from .. 914
- of eye .. 914
- forehead .. 914
- Grassian ganglion .. 549
- genitals .. 764
- glands enlarged in **531, 914**
- of hand (Fig. 110) 124
- hyperaesthesia from .. 546, 754
- illustrated (Fig. 683) 914
- in infants (Fig. 110) 124
- intercostal pain from .. 531, 862
- tenderness in .. 862
- of lips .. 459, 914
- lymphocytes in cerebrospinal fluid in .. 383
- malaise with .. 549
- of mouth .. 914
- neuralgia after **531, 546**
- neuralgic pain with .. 914
- pain from .. 553, 564
- in arm from **546, 583**
- back from **527, 528**
- chest from **530, 531**
- before eruption in .. 564
- in iliac fossa from .. 555, 558, 564
- loin from .. 564
- long after .. **583**
- in shoulder from .. 580, 583
- thigh from .. 564
- of palate .. 914
- papules in .. 914
- pleurisy simulated by .. 914
- pyrexia with .. 549
- not recurrent .. 914
- renal colic simulated by .. 564
- scabs in .. **531, 564**
- scars from .. **531, 742**
- shingles another name for .. 914
- spinal nerve roots and .. 914
- supra-orbital, photophobia in .. 639, 640
- vesicles in .. 919
- syphilis simulating .. 914
- tenderness with .. 914
- of chest from .. 861
- of tongue .. 914
- unilateral .. 914
- vesicles in **531, 549, 564, 742, 913, 914**
- zona another name for .. 91
- Herick's anaemia .. 51
- Herter's infantilisms **235, 236**
- Hesitant gait in paralysis agitans .. 614
- voice in cerebellar abscess .. 630
- tumour .. 630
- disseminated sclerosis **630**
- Heteroxanthin, uric acid and .. 901
- Hexagonal crystals of cystin (Fig. 177) 203
- Hexamethylenetetramine (see Urotropine)
- Hexamine, haematuria from .. 448
- Hexa-nitro-diphenylamine, dermatitis from .. 917
- in explosives .. 917
- HICCUGH .. **386**
- from abdominal disease .. 387
- abscess of liver .. 387
- acute epidemic .. 386
- from acute haemorrhagic peritonitis .. 386
- intestinal obstruction .. 386
- adherent pericardium .. 386
- alcohol .. 386
- in anuria .. 57
- from Bright's disease .. 387
- cancer of colon .. 387
- liver .. 387
- stomach .. 387
- womb .. 387
- caseous glands .. 386
- chin reflex .. 386
- coli bacilluria .. 387
- crises .. 387
- from cystitis .. 387
- degeneration of medulla .. 386, 387
- dilatation of stomach .. 218
- encephalitis 173, 223, 387
- enlarged prostate .. 387
- epidemic, account of .. **387**
- from fibrous mediastinitis .. 386
- a form of crisis .. 386
- functional .. **386**
- from gumma of liver .. 387
- hysteria .. 386
- intact in spleen .. 57
- in lardaceous disease .. 386
- from large heart .. 386
- laughter .. 386
- mediastinal growth .. 386
- myoclonus of diaphragm 173
- oesophageal growth .. 386
- peritonitis .. **386, 387**
- phrenic irritation .. 386
- post-operative dilatation of stomach .. 386
- prognosis of, in peritonitis .. 386
- from stricture .. 387
- subphrenic abscess .. 387
- suggestion curing .. 386
- in suppurative pyelonephritis .. 57
- from tubes dorsalis 386, 387
- tickling .. 386
- with tuberculous kidney .. 57
- in uraemia 57, 386, 387
- from vagal irritation .. 386
- Hides, anthrax from 683, 824
- Higginson's syringe in inflating stomach .. 400
- High explosives, acute yellow atrophy from .. 416
- frequency electricity, high blood-pressure relieved by .. 404
- insomnia relieved by 404
- High-stepping gait from paralysis of external popliteal nerve .. 610
- in peripheral neuritis .. 75
- tubes .. 314
- Highmore, antrum of (see Antrum of Highmore)
- Hill diarrhoea .. 217
- Himalayas, spotted fever .. 679
- Hindoos, diabetes in .. 335
- Hip, abductors of, nerve-supply .. **610**
- rotators of, nerve-supply .. **610**
- Hips, wide, in congenital dislocation of hip .. 195
- Hip-joint (see Joint)
- Hippocampal lesion, subjective smell due to .. 756
- Hippocratic facies of peritonitis .. **150, 485, 734**
- succussion in pneumothorax .. 209
- Hippomane mancinella, dermatitis due to .. 916
- Hippuric acid, Fehling's solution reduced by .. 327
- Hippus in alcoholism .. 675
- central scotoma .. 675
- in cerebral tumour .. 675
- definition of .. 675
- in disseminated sclerosis .. 675
- nystagmus and .. 675
- Hirschsprung's disease, abdominal distention .. 164, 167
- account of **163, 164, 486**
- achalasia of anal .. 163
- sphincter in .. 163
- pelvic-rectal sphincter in .. 163
- in children .. 486
- colon from .. 148
- colon in (Fig. 140) 164
- dilated in .. 486
- hypertrophied in .. 805
- congenital .. 805
- constipation from .. 164, 486, 802
- illustrated (Fig. 380) 386
- in infants .. 167
- intestinal obstruction from .. 167, 486
- kink of colon in .. 163
- laparotomy in .. 486
- sigmoid dilatation in .. 802
- succussion in colon in .. 802
- tympanites in 164, 486
- visible peristalsis in 164
- volvulus of sigmoid in 802
- X-ray and enemata diagnosis .. 486, 802
- His, atriculo-ventricular bundle of (see Bundle of His)
- Hissing in ear .. 872
- noises in head .. 523
- Histological examination see Microscopical Examination
- specimens, technique for preparing .. **487**
- HOARSENESS .. **387**
- in acromegaly .. 387
- from actinomycosis of neck .. 388
- alcoholism .. 387
- ammonia .. 388
- anaemia .. 387
- aneurysm .. 388

- polyuria from... 654
- from prostatic disease 353
- pyelography in 352, (Figs. 370-372) 446, (Fig. 376) 449
- pyonephrosis from... 449
- simulating... 654
- from renal calculus 351, 654
- renal enlargement from 654

Hydronephrosis, contd.

- renal tumour from... 352
- serous cyst simulating 450
- swelling in iliac fossa due to... 829
- from ureteral calculus 719
- urethral stricture... 353
- urine changes in... 352
- **varying size of** 61, 449
- from vesical disease... 353
- growth... 354
- X rays in diagnosing... 352
- Hydrophobia from animal bites... 213
- convulsions from... 181
- delirium in... 212, 213
- from dog-bite 175, 213, 243, 885
- dysphagia from 176, 243, 663
- encephalitis simulating 243
- from fox-bite... 213
- head-retraction in... 731
- incubation period in... 885
- leucocytosis in... 453
- mental symptoms in... 175
- priapism from... 657
- ptialism due to... 662
- respiration difficult in 176
- rigor rare in... 737
- tetanus distinguished from... 175
- trismus in... 885
- not present in... 176
- from wolf-bite 213, 885
- Hydropneumopericardium, churning sounds in... 800
- succussion in... 800
- Hydropneumothorax, apical... 800
- cyanosis in... 801
- from injury... 801
- metallic clinks in... 800
- needling in diagnosing 647
- pain in chest in... 801
- after paracentesis thoracis... 801
- phthisis causing... 801
- skiagram of (Fig. 513) 648
- subpleuric abscess simulating... 800
- **succussion in** 647, 800
- Hydrops amnii... 61
- Hydroquinone, dermatitis due to... 917
- used by photographers 917
- Hydroquinoneacetic acid (see Acid)
- Hydrosalpinx, pelvic swelling due to... 840
- Hydrothorax (see Effusion, Pleural)
- Hyvernia, cystic... 816
- Hymen, closed... 843
- amenorrhoea from... 23
- sterility due to... 793
- inflamed, dyspareunia due to... 239
- from gonorrhoea... 239
- unruptured, dyspareunia due to... 239
- Ilioid area, hyperaesthesia in, from ear disease... 550
- pain in (see Pain)
- bone, periostitis of, pain in tongue from... 590
- **styloid process** 590
- sensory area (Fig. 443) 550
- Hypocine, delirium from 212
- HYPERACUSIS**... 389
- from abscess of brain 389
- in arteriosclerosis 390
- chronic nephritis 390
- after concussion 389
- in convalescence 389
- facial paralysis 604
- after fevers... 389
- from glaucoma... 389
- in Graves' disease 389
- from gumma of brain... 389
- headache... 389
- after head injury 389
- in high blood-pressure 389, 390
- hypochondriasis... 389
- hysteria... 389
- from inflamed scalp 389
- iritis... 389
- **list of causes of** 389
- in malaria... 389

Hyperacusis, contd.

- in meningococcal meningitis... 389
- from migraine... 389
- in neurasthenia... 389
- pachymeningitis... 389
- from paralysis of stapedius... 604, 605
- in secondary syphilis... 389
- strychnine poisoning... 389
- suppurative meningitis 389
- syphilis and... 390
- in tetanus... 389
- tic douloureux... 389
- tuberculous meningitis 389
- from tumour of brain 389
- Wassermann test in... 390
- Hyperaesthesia, abdominal, from pyelitis... 554
- account of... 754
- in alcoholic neuritis... 177
- arm after herpes zoster 546
- arsenical neuritis... 177
- Brown-Sequard paralysis... 608
- combined sclerosis of cord... 754
- of face in neuralgia... 549
- from gastric ulcer... 330
- hamatomycia... 177
- herpes zoster... 754
- in hyoid area, from ear disease... 550
- hysteria... 573, 754
- of loin from pyelitis... 554
- in neuralgia... 862
- neurasthenia... 754
- neurones... 862
- with pain... 527
- from peripheral nerve lesions... 754
- in peripheral neuritis... 570
- pernicious anaemia... 754
- from spinal caries... 754
- of stomach, dyspepsia from... 390
- in tabes dorsalis 753, 754
- from transverse myelitis 177
- tumour of spinal meninges... 754
- vaginal, dyspareunia from... 239
- vesice... 495
- Hyperalgnesia, anaesthesia with... (Fig. 582) 749
- of chest... 863
- from optic thalamus lesions... 754
- in peripheral neuritis (Fig. 582) 749
- Hyperchlorhydria, appetite increased in... 58
- colic from... 148
- in duodenal ulcer... 343
- duodenal ulcer diagnosed from... 104
- dyspepsia from... 399
- fractional test meal in (Fig. 284) 344
- gastric ulcer diagnosed from... 104
- pain in epigastrium from 537
- test meal in... 58
- Hyperghmatosis of central canal of cord... 81
- Hyperidrosis**... 803
- of arm in brachial neuralgia... 543
- bromidrosis with... 803
- eggshell nail with... 497
- (and see Sweating)
- Hyperinvolution, amenorrhoea from... 794
- sound in... 794
- sterility due to... 793
- Hyperkeratosis from arsenic... 45
- of palms from arsenic 83, 94
- soles from arsenic 83, 94
- Hyperlactation, anaemia from... 48
- Hypermetropia, crescents with... 517
- eyestrain from... 547
- headache from 370, 547, 867
- migraine from... 547
- from optic nerve tumour 284
- pain in eye from... 547
- photophobia from... 639
- pupil small in... 674

Hypermetropia, contd.

- strabismus due to... 797
- tenderness of scalp from 867
- Hypermetropic astigmatism, optic disc in (Fig. 430) 520
- Hypermetropia... 25
- Hypernephroma in bone 823
- clitoris enlarged prematurely from... 508
- with hypertrophy of genitalia (Fig. 395) 508
- of kidney... 449
- aching in loin from 449
- colic from... 449
- hamaturia from 348, 350, 449
- kidney enlarged by 449
- premature puberty with... 776
- pyuria due to... 716
- obesity from... 505, 508
- premature pubic hair with... 413
- with pubic hair at six (Fig. 394) 508
- secondary in lungs (Fig. 394) 508
- spleen simulated by... 812
- Hypernephrosis (see Blood-pressure, High)
- Hypernephrotism, acromegaly from... 509
- Hyperplasia, large-celled, in lymphadenoma... 475
- of red marrow in blood diseases... 862
- tenderness of bones from... 862
- HYPERPYREXIA**... 390
- from acute myelitis 390, 391
- yellow atrophy of liver 390
- ascending nephritis... 390
- bronchopneumonia... 390
- after burns... 390
- from cerebral abscess 390
- from cerebrospinal meningitis... 390
- cholera... 390
- chorea insanienis... 390
- coma... 390
- from contusion of brain 390
- corpus striatum lesions 392
- definition of... 390
- in delirium tremens 390
- dysentery... 390
- epidemic jaundice 420
- erysipelas... 390
- from fractured skull... 390
- spine... 390, 391
- functional... 711
- in general tuberculosis 390
- from haemorrhage into optic thalamus... 390
- in heat-stroke 156, 390
- **hysteria** 390, 391
- infantile convulsions... 390
- **list of causes of** 390
- in lobar pneumonia... 390
- malaria... 39, 390
- malignant endocarditis 390
- malingerers... 391
- meningitis... 390
- from nervous system lesions... 390
- pontine haemorrhage 155, 385, 390, 391
- lesions... 392
- in posterior basal meningitis... 390
- pyaemia... 390
- pyelitis... 390
- relapsing fever... 390
- rheumatic fever... 390
- after scalds... 390
- in scarlatina... 390
- septicaemia... 390
- from subthalamic lesions 392
- sunstroke... 390
- suppurative meningitis... 390
- pyophlebitis (Fig. 554) 696
- tetanus... 390
- tuberculous meningitis 390
- tumour of pons Varolii 390
- in typhoid fever... 390
- typhus fever... 390
- uraemia... 390

Hyperpyrexia, contd.

- in yellow fever .. 390
- Hyper-resonance in emphysema .. 208, 269
- over pneumothorax 209, 647
- Hypertonus of colon, constipation from .. 308
- pain due to .. 308
- sense of fullness from .. 308
- X rays in diagnosing .. 308
- Stomach, characters of 307
- in duodenal ulcer .. 307
- (Fig. 284) 343, 554
- sense of fullness with .. 306
- Hypertrophic biliary cirrhosis .. 466
- rhinitis (see Rhinitis)
- stenosis of pylorus (see Pylorus)
- Hypertrophy of heart (see Heart, Enlargement of)
- left ventricle (see Ventricle, Left)
- right ventricle (see Ventricle, Right)
- Hypnosis, memory restored by .. 25
- Hypnotics, ataxy from .. 77
- bulle from .. 123
- noises in head from .. 504
- vertigo from .. 504
- Hypobromite of sodium, effervescence with urea .. 803
- in estimation of urea .. 19
- Hypochlorhydria, dyspepsia from .. 390
- flushing due to .. 303
- Hypochlorite of calcium in indian test (Fig. 476) 395
- Hypocholesterin in blue-brain cases .. 205
- cardiopasm and .. 535
- constipation in .. 161
- hyperacusis in .. 389
- insomnia from .. 404
- oxaluria and .. 524
- pruritus due to .. 658
- with undue pulsation of abdominal aorta .. 662
- Hypochondrium, carcinoma of colon in .. 809
- intussusception in .. 829
- left, enlarged spleen in .. 812
- hypernephroma in .. 812
- kidney tumour in .. 812
- liver felt in .. 811
- the organs situate in 808
- PAIN IN .. 553
- pancreatic tumour in .. 812
- retroperitoneal cyst in .. 812
- suprarenal tumour in .. 812
- tumour in, from carcinoma of colon .. 776
- tumours occurring in 775
- pain in (see Pain)
- right, discomfort in, in catarrhal jaundice .. 411
- dragging in, from carcinoma of liver .. 46
- the organs situate in 808
- PAIN IN .. 553
- reddened by hepatic abscess .. 804
- sense of fullness in, from cancer of liver .. 468
- weight in, from active congestion of liver .. 417
- in catarrhal jaundice .. 411
- swelling in, from hepatic abscess .. 804
- tumours in .. 809
- swelling in, from sub-phrenic abscess .. 807
- tenderness in (see Tenderness)
- tumour in, from pancreatic cyst .. 811
- suprarenal .. 439
- Hypophylla .. 400
- Hypocythemia defined .. 26
- Hypodermic injections, purpura due to .. 676
- taches bleuâtres from (Fig. 503) 642
- Hypogastrium, bladder in 815

Hypogastrium, contd.

- bulged by ascites .. 59
- intussusception in .. 815
- the organs situate in 808
- pain in (see Pain)
- pelvic tumours rising into .. 815
- tumour in, due to .. 61
- bladder .. 61
- retention of urine .. 55
- Hypoglossal nerve (see Nerve, Cranial, Twelfth)
- Hypomnesia .. 25
- Hypopituitarism, abundant stools with .. 509
- impotence from .. 393
- infantilism with .. 509
- obesity from .. 505, 509
- sleepiness from .. 509
- Hypoplasia, congenital, of pulmonary artery .. 120
- of intestine .. 160
- Hypopyon .. 287
- with corneal ulcer .. 890
- from fifth nerve paralysis .. 891
- illustrated (Fig. 234) 287
- from iritis .. 287
- Hypopadiaz, urine stream abnormal with .. 491
- Hypostatic pneumonia, dyspnoea from .. 247
- Hypothenar muscles (see Muscles)
- region, pink hue of .. 803
- HYPOTHERMIA** .. 391
- in Addison's disease .. 492
- alcoholism .. 392
- after anaesthetics .. 392
- in Anglo-Indians .. 392
- anuria .. 57
- arteriosclerosis .. 392
- botulism .. 243
- from carbolic acid .. 392
- in carcinoma of stomach .. 447
- from cerebellar abscess .. 392
- tumour .. 392
- cerebral abscess .. 392, 613
- haemorrhage .. 392
- tumour .. 392
- in children .. 392
- chloral poisoning .. 392
- chronic debility due to .. 392
- maladies .. 392
- nephritis .. 392
- from collapse .. 150, 392
- in coma .. 392
- convalescence .. 392
- cretinism .. 290, 392
- diabetes .. 392
- from exposure .. 392
- after fevers .. 392
- from haemorrhage .. 392
- in heart disease .. 392
- (Fig. 314) 391, 392, 704
- after immersion .. 392
- in inanition .. 392
- from increased intracranial pressure .. 392
- in infective endocarditis .. 704
- after injury .. 392
- from intestinal obstruction .. 150, 392
- in lardaceous disease .. 57
- list of causes of .. 392
- in malignant disease .. 392
- (Fig. 315) 392
- with mediastinal sarcoma .. 392
- (Fig. 315) 392
- in mitral stenosis .. 392
- (Fig. 314) 391
- morning, in septic cases .. 392
- tuberculous .. 392
- in myxœdema .. 290, 392
- neurasthenia .. 392
- after operation .. 392
- in opium poisoning .. 392
- from oxalic acid .. 392
- peritonitis .. 150, 392
- with pleural effusion .. 392
- (Fig. 315) 392
- after pneumonia .. 392
- from poisoning .. 392
- after relapsing fever .. 392
- residence in tropics .. 392
- from severe diarrhoea .. 392
- vomiting .. 392
- shock .. 392
- snake-bite .. 422
- suppurative pyelonephritis .. 57

Hypothermia, contd.

- with tuberculous kidney .. 57
- after typhoid fever .. 392
- Hypothyroidism .. 50
- (Figs. 389, 390) 506
- anaemia in .. 50
- backward intelligence in .. 622
- delay in talking due to .. 622
- walking due to .. 622
- General account of .. 50
- high blood-pressure and .. 106
- obesity in .. 505
- ovarian insufficiency and .. 507
- sex incidence of .. 50
- thyroid extract in diagnosing .. 50
- in women .. 507
- (and see Myxœdema)
- Hypotonia from cerebellar lesions .. 76
- in tabes dorsalis .. 293
- Hypotonus of stomach, characters of .. 307
- Hypoxanthin, uric acid and 901
- Hysteria, abdominal reflexes natural in .. 614
- spasm from .. 179
- accoucheur's hand in .. 2
- age incidence of .. 58, 799
- agustia due to .. 754, 859
- amblyopia due to .. 884, 922, 923
- anæsthesia in 171, 573, 609, 614
- anæsthetic in diagnosing .. 178, 435
- aneurysm simulating .. 531
- no ankle-clonus in .. 386
- ankle-jerk exaggerated in 608
- amnesia from .. 58
- anosmia in .. 756
- anuria in .. 55, 58
- aphonia in 242, 570, 774, 799
- atonic administered .. 873
- asthmal simulated by .. 653
- ataxy in .. 77
- no Babinski's sign in .. 88, 178, 884
- biceps jerks in .. 614
- blindness due to .. 754, 925
- brachial palsy in .. 614
- bradypnea in .. 110, 111
- bruising in .. 677
- bulimia from .. 58
- bulle and .. 124
- cacœgeusia due to .. 860
- carcinoma of spine .. 531
- simulating .. 572
- stomach simulating .. 572
- cardiopasm and .. 535
- Characters of movements in .. 614
- Charcot's spasmogenic zones in .. 862
- clonus in .. 179, 570
- chorea imitated in .. 171
- major and .. 171
- choreiform contractions in .. 170, 171
- club-foot due to .. 147
- colour blindness due to .. 923
- coma in .. 154, 811
- consciousness impaired in .. 174
- not lost in .. 174
- constipation and .. 165
- contracture from 171, 178
- duration of .. 178
- convulsions in 181, 184, 391, 884
- cough from .. 187
- delirium in 211, 213, 391
- diagnosis of .. 77, 521
- disseminated sclerosis .. 753, 884
- simulating .. 753, 884
- double consciousness in .. 205
- dragging of leg in .. 608
- dyschezia and .. 165
- dysphagia in .. 242
- dyspnoea from .. 247
- epilepsy distinguished from .. 174
- simulated in .. 174
- excessive appetite from .. 58
- eye-opening resisted in 174
- facial paralysis simulated in .. 605
- fainting due to .. 297
- fits in .. 25

Hysteria, contd.

- flaccidity in .. 614
- flushings in .. 391
- foot strongly inverted in 608
- globus in 179, 242, 570, 799
- glove anaesthesia in 171, 615
- grimacing in .. 175
- headache in 372, 391, 867
- head-retraction in .. 731
- hearing lost in .. 754
- hemianæsthesia in 77, 171, 179, 570, 754
- hemiplegia in .. 77, 178, 382, 385, 609
- hiccup from .. 386
- hyperacusis in .. 389
- hyperæsthesia in 573, 754
- of breast in .. 754
- hyperpyrexia in 390, 391
- hypnosis curing .. 25
- hysterics in .. 171
- insomnia in .. 402, 404
- intention tremor in .. 884
- joint disease simulated in .. 435
- knee-jerks brisk in .. 573
- exaggerated in 386, 608
- leg flaccid in .. 608
- rigidly extended in .. 608
- leg-raising test in .. 386
- lock-jaw in .. 521
- malingering distinguished from .. 435
- memory loss in .. 25
- meteorism from .. 486
- monoplegia in .. 178
- muscular atrophy from .. 178
- neurasthenia and 870, 871
- neurosis distinguished from .. 597
- new growth simulating .. 179
- simulated by .. 504
- noises in head from .. 884
- no vagismus in .. 821
- opisthotonos in 176, 521
- optic discs not affected in .. 884
- organic cord disease simulated by .. 88
- ovarian hyperæsthesia in 754
- pain from .. 573
- pain in breast from .. 530
- face from .. 551
- hip in .. 179
- joint in .. 435
- knee in .. 179
- limbs in .. 568, 570
- muscles in .. 179
- pains in .. 867
- palate reflex absent in 573
- palpitations in 594, 597
- paræsthesia in .. 179
- paræsthesia due to .. 859
- paralyses of 171, 178, 435, 884
- paralysis agitans simulated by .. 614
- of eyelid in .. 178
- face in .. 178
- leg in .. 608
- lip in .. 178
- tongue in .. 178
- paraplegia in 77, 178, 609
- phenomena of .. 171
- photophobia from 639, 640
- plantar reflex flexor in 386, 608, 614
- polyuria in .. 653, 874
- pregnancy simulated by .. 179
- pruritus due to .. 658
- ptosis in .. 178
- ptalorrhœa in .. 661
- pupil reacts in .. 174
- purposive movements in 174
- purpuric bruising in .. 677
- pyrexia simulated in .. 711
- quivering of eyelids in 174
- reflexes exaggerated in .. 171, 884
- regurgitation of food through nose in .. 731
- restlessness in .. 391
- retention of urine in .. 493, 495
- rigidity in .. 614
- rigor simulated in .. 736
- risus sardonius in .. 741
- scoliosis from .. 191
- screaming in .. 174
- sensory signs in .. 884

Hysteria, contd.

- sex incidence of 58, 171, 396, 570, 741, 799
- skin eruptions produced in .. 124
- sleeve anaesthesia in .. 615
- smell lost in .. 754
- Snellen's coloured types in detecting .. 924
- spasm of face in .. 605
- neck muscles in .. 179
- orbicular palpebrarum in .. 178
- shoulder muscles in .. 179
- sternomastoid in .. 178
- sphincters not affected in .. 884
- relaxed in .. 174
- spiral contraction of visual field in .. 923
- spurious ankle-clonus in .. 178
- stigmata of .. 179
- stocking anaesthesia in .. 174
- and glove anaesthesia in .. 570
- strangury due to .. 797
- streptococcal glossitis simulating .. 861
- stridor due to .. 799
- strychnine poisoning simulated by 521, 741
- subjective smell in .. 756
- sudden starts in .. 173
- suggestion curing .. 25, 597, 640
- supinator jerks in .. 614
- swelling due to .. 435
- tachypnoea in .. 111
- talipes due to .. 144, 178
- taste abnormality due to .. 861
- lost in .. 754, 859
- temperament and .. 171
- tenderness of chest in .. 861, 862
- in muscles in .. 179
- of scalp from .. 865
- tetanic spasms in .. 176
- tetanus distinguished from .. 176
- simulated by 190, 521, 741
- simulating .. 175
- thirst in .. 874
- tongue not bitten in .. 174
- tonic and clonic spasms in .. 741
- torticollis in .. 178
- trance in .. 154, 158
- traumatic neurasthenia simulating .. 870
- tremor in .. 171, 879, 882
- triceps jerks in .. 614
- trismus in .. 176
- simulated by .. 884
- no true ankle-clonus in .. 608
- tuberculous lip simulated by .. 179
- knee simulated by .. 179
- head spine simulating .. 870
- vague pulsation of abdominal aorta and .. 662
- unilateral sweating in .. 803
- tremor in .. 880
- vertigo from .. 504
- vision changes due to .. 923
- visual fields contracted in .. 884, 923
- vomiting in .. 572, 931
- dyspepsia simulated by .. 396
- no wasting in .. 385
- wrist-drop in .. 435
- writhing in .. 521
- **Hysterical spine .. 870**
- **Hystero-epilepsy .. 174**
- head-retraction in .. 731

ICE-BAG, gangrene from 321

Iceland, hydatid cyst in 807

Ichthyosis, ichthyosis in .. 803

- finger affected by .. 301
- hysteria, age incidence of 599
- illustrated (Fig. 462) 599
- papules in .. 599
- pigmentation (Fig. 462) 599
- warty nail-heads in .. 599
- onychogryphosis with .. 497
- scales in .. 744

Ichthyosis, contd.

- tinea imbricata distinguished from .. 312
- Icterus (see Jaundice)
- Ideas of grandeur in general paralysis 157, 184, 305
- Idiocy, amaurotic familial .. 924
- blindness in .. 622
- coma from .. 181
- congenital optic atrophy in .. 622
- convulsions from 181, 183
- cretinism simulating .. 622
- after encephalitis .. 632
- kyphosis in .. 194
- microcephaly and .. 234
- Mongolian, and achondroplasia (Fig. 251) 293
- almond-shaped eyes in .. 294
- blepharitis in .. 293
- cretin distinguished from 236, 294
- mistaken for .. 622
- double-jointed thumbs in .. 236
- ears large in .. 293
- pitcher-shaped in .. 293
- epicanthus in .. 293
- **facies of .. 293**
- with fissured tongue .. 293
- florid complexion in .. 293
- forehead downy in .. 294
- hair mouse-coloured in .. 294
- scanty in .. 293
- wavy in .. 293
- head brachycephalic in .. 293
- imbecility in .. 236
- (Fig. 198) 235, 236
- infantism in .. 236
- knock-knee in .. 236
- ligaments lax in .. 236
- lips fissured in .. 293
- not thick in .. 236
- mottled complexion in 294
- **myxœdeme fruste distinguished from .. 236**
- nose broad and flat in 293
- oblique eyes in 236, 293
- tongue coarse in .. 293
- not large in .. 236
- protruded in 236, 293
- swollen in .. 852
- valvular disease in .. 231
- paraplegia in .. 662
- salivation in .. 662
- slobbering in .. 662
- speech defect in .. 769
- thyroid extract in distinguishing cretinism from .. 622
- **Idionossia .. 774**
- idiopathic dilatation of colon (see Hirschsprung's Disease)
- œsophagus (see Achalasia of Oesophagus)
- muscular atrophy (see Myopathy) .. 667, 670
- **Idioventricular rhythm .. 667, 670**
- electrocardiogram of (Fig. 532) 667
- Ileocecal glands (see Lymphatic Glands, Ileocecal)
- kink (see Kink) .. 107
- valve, borborygmi at .. 562
- tuberculous .. 562
- formation of .. 167
- obstruction of .. 167
- tuberculous of .. 562
- **Iliac abscess (see Abscess)**
- artery, aneurysm of (see Aneurysm)
- bone, myeloma of, albumuria from .. 20
- skiagram of (Fig. 24) 20
- colon, time at which barium reaches (Fig. 138) 160
- crest, bedsores over .. 321
- pain along .. from ureteric calculus 577

Iliac, contd.

- fossa, enlarged kidney in 814
- hydatid in .. 60
- **LEFT, PAIN IN .. 555**
- spleen in .. 827
- **SWELLING IN .. 826**
- tumour in, from carcinoma 98, 167, 168
- diverticulitis 168, 556
- movable kidney in .. 829
- pain in (see Pain)
- right, abscess in, in typhoid fever .. 564
- fullness in, in appendicitis .. 558
- from tuberculous caecum .. 562
- hydatid cyst in .. 564
- intussusception in .. 829
- **PAIN IN .. 557**
- resistance in, from chronic appendix 697
- spleen in .. 33
- suppurating gall-bladder in .. 829
- **SWELLING IN .. 814, 827**
- tumour in, from carcinoma .. 167
- rigidity in (see Rigidity)
- swelling in (see Swelling)
- tenderness in (see Tenderness)
- glands, see Lymphatic Glands, Iliac
- regions bulged by ascites 59
- vein, pelvic tumour obstructing .. 512
- thrombosis of (see Thrombosis)
- Iliacus internus, nerve-supply of .. 471, 611
- **nerve-supply of .. 609, 610**
- Ilio-hypogastric nerve, distribution of .. 580, 748
- Ilio-inguinal nerve, distribution of .. 580, 748
- Iliopsoas bursa (see Bursa)
- Ilium, carcinoma of, skiagram of .. 21
- chondroma of, pain in iliac fossa from 558, 564
- swelling in right iliac fossa from .. 564
- osteoma of (see Osteoma)
- osteomyelitis of, lumping from .. 457
- swelling in iliac fossa from .. 829
- peritonitis of (see Peritonitis)
- sarcoma of (see Sarcoma)
- **ILLUSTRATIONS:**
- acanthosis nigricans—coloured (Fig. 257) 295
- accoucheur's hand (Fig. 1) 2
- acetone tests—coloured (Fig. 2-8) 4
- achalasia cardia—skiagram .. (Fig. 207) 244
- achondroplasia .. (Fig. 194) 233
- and Mongolian idiocy .. (Fig. 251) 293
- acromegaly (Fig. 250) 293
- actinomycetes—coloured (Fig. 610) 779
- actinomycosis of cheek and neck—coloured (Fig. 450) 563
- neck and jaw—coloured (Fig. 645) 845
- adiposis dolorosa .. (Fig. 398) 509
- albuminuric retinitis—coloured (Fig. 423-425) 519
- alopecia due to syphilis—coloured (Fig. 93) 91
- anaesthesia from fracture of sacrum (Fig. 585) 752
- spine (Fig. 587) 752
- myelitis (Fig. 586) 752
- ulnar nerve division .. (Fig. 581) 749
- anangioplastic infantile .. (Fig. 199) 236
- aneurysm—skiagram .. (Fig. 219) 260
- eroding spine—skiagram .. (Fig. 454) 534

Illustrations: aneurysm, contd.

- opening superior vena cava (Fig. 169) 198
- aneurysms (two)—skiagram .. (Fig. 214) 249
- angioneurotic oedema simulating acute nephritis .. (Fig. 407) 513
- ankylostomiasis of duodenum .. (Fig. 497) 635
- Ankylostomum duodenale .. (Fig. 97) 102
- ape's hand in progressive muscular atrophy .. (Fig. 123) 141
- ascites and tuberculous peritonitis .. (Fig. 74) 59
- atrophy of shoulder muscles from poliomyelitis .. (Fig. 80) 78
- articular extrasynovial—electrocardiogram .. (Fig. 535) 669
- fibrillation—electrocardiogram .. (Fig. 461) 596
- flutter—electrocardiogram .. (Fig. 535) 665
- Bacillus coli communis—coloured .. (Fig. 92) 89
- bathism chemia in carcinoma of cervix—coloured—skiagram .. (Fig. 144) 827
- basophilic corpuscle—coloured .. (Fig. 42) 29
- bigeminy due to extrasystoles—electrocardiogram .. (Fig. 534) 668
- bilateral facial palsy .. (Fig. 464) 603
- bilharzia hematobia et bladder wall—coloured .. (Fig. 291) 354
- blepharitis, chronic—coloured .. (Fig. 232) 287
- blood film in lymphatic leukaemia—coloured .. (Fig. 45) 33
- pernicious anemia—coloured .. (Fig. 43) 31
- spino-medullary leukaemia—coloured .. (Fig. 44) 32
- blood-stained urine—skiagram .. (Fig. 294) 354
- blue sclerotic and brittle bones—coloured .. (Fig. 246) 304
- bones in molities ossium—skiagram .. (Fig. 261) 305
- bradycardia, simple—electrocardiogram .. (Fig. 106) 107
- bronchoscopic appearance of gland obstructing trachea .. (Fig. 168) 197
- Brown-Sequard paralysis, anaesthesia in—skiagram .. (Fig. 470) 608
- bullous herpes zoster .. (Fig. 110) 124
- calcareous concretions from phthisical sputum .. (Fig. 618) 792
- glands—skiagrams .. (Figs. 363-365) 443
- calcium oxalate crystals .. (Fig. 431) 523
- cancerum oris .. (Fig. 95) 95
- carcinoma of cardiac end of stomach—skiagram .. (Fig. 278) 340
- en cuirasse—coloured .. (Fig. 664) 887
- of descending colon—skiagram .. (Fig. 643) 827
- lip—coloured .. (Fig. 378) 460
- liver—temp. chart .. (Fig. 323) 408
- lung—skiagram .. (Fig. 105) 114
- œsophagus—skiagram .. (Fig. 204) 241
- pelvic colon—skiagram .. (Fig. 144) 164

Illustrations: carcinoma, contd.
 - of pylorus—*skigram* (Fig. 277) 340
 - and simple ulcer of stomach (Fig. 274) 338
 - near splenic flexure—*skigram* (Fig. 143) 163
 - of stomach—*skigram* (Fig. 279) 341
 - simulating aneurysm (Fig. 650) 846
 - transverse colon—*skigrams* (Fig. 140) 161
 - vertebrae—*skigrams* (Figs. 177, 178) 192
 - cardiospasm—*skigram* (Fig. 208) 244
 - caseous bronchial gland—*skigram* (Fig. 150) 187
 - mediastinal glands—*skigram* (Fig. 384) 481
 - cerebrosplinal meningitis—*temp. charts* (Figs. 557, 558) 701
 - cervical caries—*skigram* (Fig. 619) 795
 - ribs—*skigrams* (Figs. 440, 441) 544
 - chancre on eyelid (Fig. 382) 473
 - lip (Fig. 94) 94
 - Charcot's disease of knee—*joint* (Fig. 345) 433
 - elbow—*skigrams* (Figs. 347, 348) 434
 - in syringomyelia—*skigrams* (Figs. 349, 350) 434
 - hip joint—*skigram* (Fig. 346) 433
 - chest outline with fibroid lung (Fig. 183) 209
 - Cheyne-Stokes breathing (Fig. 121) 139
 - cholesterol crystals (Fig. 263) 317
 - chondromata of hand—*skigram* (Fig. 634) 821
 - chondrosarcoma of femur—*skigram* (Fig. 637) 822
 - cirrhosis of liver—*temp. charts* (Fig. 66) 47
 - cirroid aneurysm—*coloured* (Fig. 651) 847
 - claw-foot (Fig. 122) 141
 - claw-hand from polio-myelitis (Fig. 122) 142
 - clubbed fingers in cirrhosis of liver (Fig. 127) 143
 - pulmonary stenosis (Fig. 126) 143
 - coarsely granular eosinophil corpuscle—*coloured* (Fig. 39) 29
 - cribric infantilism (Fig. 197) 235
 - coli bacilluria—*temp. chart* (Fig. 448) 560
 - coloboma of the choroid—*coloured* (Fig. 412) 517
 - colon in visceroptosis—*skigram* (Fig. 433) 526
 - congenital crescent of optic disc—*coloured* (Fig. 410) 517
 - dislocation of hip (Fig. 164) 194
 - *skigram* (Fig. 165) 195
 - syphilis facies (Fig. 240) 290
 - talipes equinovarus (Fig. 128) 144
 - congestion round ureteric orifice in calculous pyelitis—*coloured* (Fig. 572) 717
 - conjunctivitis—*coloured* (Fig. 228) 286
 - contracture after a burn (Fig. 154) 180
 - of face after facial paralysis (Figs. 465-467) 604
 - crenated red corpuscles—*coloured* (Fig. 31) 29
 - cretin (Fig. 195) 234
 - (Fig. 476) 622

Illustrations: cretin, contd.
 - showing facies (Figs. 254, 255) 294
 - with frog-belly (Fig. 238) 290
 - crossed diplopia—*diagram* (Fig. 188) 221
 - cyanosis from anti-kamnia—*coloured* (Fig. 167) 197
 - cystin crystals (Fig. 177) 203
 - deal porter's bursa (Fig. 162) 194
 - dental apical abscess—*skigrams* (Figs. 61, 63) 43
 - cyst—*skigram* (Fig. 646) 836
 - sepsis—*temp. chart* (Fig. 570) 714
 - denticulous cyst—*skigram* (Fig. 648) 836
 - Dercum's disease (Fig. 399) 402 510
 - Dermacentor venustus—*coloured* (Fig. 479) 625
 - dermatitis exfoliativa—*coloured* (Fig. 510) 646
 - dermatographia (Fig. 654) 856
 - dermatomyositis—*coloured* (Fig. 559) 702
 - detachment of retina—*coloured* (Fig. 427) 520
 - diaphragm of Brown-Sequard paralysis (Fig. 469) 608
 - cervico-brachial plexus (Fig. 474) 618
 - colonic times in post dysenteric atony (Fig. 149) 160
 - epitheliomatous ulcer (Fig. 670) 895
 - gummatous ulcer (Fig. 668) 895
 - hemianopsia from optic radiation lesion (Fig. 412) 510
 - tract lesion (Fig. 311) 380
 - pituitary tumour (Fig. 305) 377
 - lumbo-sacral plexus (Fig. 471) 611
 - optic nerve and tract connections (Fig. 304) 377
 - reflex centres in spinal cord (Fig. 486) 631
 - rodent ulcer (Fig. 671) 895
 - sensory localization in spinal cord (Fig. 485) 631
 - tuberculous ulcer (Fig. 669) 895
 - diaphragm pushed up by liver abscess—*skigram* (Fig. 379) 465
 - difference blood-sugar curve in chronic pancreatitis—*chart* (Fig. 114) 129
 - diphtheria bacilli—*coloured* (Fig. 608) 770
 - severe—*coloured* (Fig. 595) 759
 - simulating follicular tonsillitis—*coloured* (Fig. 594) 759
 - diphtheritic sore throat, medium severity—*coloured* (Fig. 594) 759
 - diplopia from ocular muscle paralysis—*diagram* (Fig. 189) 222
 - distribution of sensory nerves in the skin—*coloured* (Fig. 580) 748
 - diverticula of colon—*skigram* (Fig. 141) 162
 - diverticulitis—*skigram* (Fig. 446) 557
 - duodenal ulcer—*skigram* (Fig. 282) 343
 - Dupuytren's contracture (Fig. 152) 179
 - in a deal porter (Fig. 153) 179
 - dyschezia—*skigram* (Fig. 137) 159

Illustrations, contd.
 - dyspituitary obesity (Fig. 239) 290
 - dystrophia adiposogenitalis due to dyspituitarism (Fig. 396) 508
 - echinococcal hooklets (Fig. 76) 65
 - elastic fibres from sputum—*diagram* (Fig. 616) 789
 - electrocardiogram of auricular extrasystole (Fig. 535) 669
 - fibrillation (Fig. 461) 596
 - flutter (Fig. 527) 666
 - bigeminy due to extrasystoles (Fig. 534) 668
 - complete heart block (Fig. 101) 108
 - early heart-block (Fig. 529) 666
 - left ventricle preponderance (Fig. 109) 122
 - normal (Fig. 522) 663
 - of normal P-R interval (Fig. 103) 109
 - one-in-two heart-block (Fig. 102) 108
 - paroxysmal tachycardia (Fig. 538) 670
 - partial heart-block (Fig. 530) 667
 - prolonged P-R interval (Fig. 104) 109
 - right bundle branch block (Fig. 72) 53
 - ventricular preponderance (Fig. 108) 122
 - in simple bradycardia (Fig. 100) 107
 - of sinus arrhythmia (Fig. 523) 664
 - ventricular disease (Figs. 71, 73) 53
 - extrasystole (Figs. 536, 537) 669
 - elephantiasis of scrotum (Fig. 633) 849
 - embolism of retinal artery—*coloured* (Fig. 426) 520
 - eosinophil myelocyte—*coloured* (Fig. 41) 29
 - epithelioma from leukoplakia—*coloured* (Fig. 674) 896
 - of neck (Fig. 340) 429
 - tongue, early—*coloured* (Fig. 672) 896
 - ulcerated—*coloured* (Fig. 673) 896
 - vocal cord (Fig. 211) 245
 - erysipelas—*temp. chart* (Fig. 556) 699
 - essential infantilism (atelliosis) (Fig. 200) 236
 - exophthalmic goitre (Fig. 247) 292
 - with general pigmentation of skin (Fig. 504) 641
 - exophthalmos from lymphosarcoma (Fig. 227) 284
 - exostosis of femur—*skigram* (Fig. 633) 820
 - eyelids in myxedema—*coloured* (Fig. 392) 507
 - facial paralysis (Fig. 463) 602
 - facies of congenital syphilis (Fig. 241) 290
 - familial lenticular degeneration (Fig. 256) 294
 - mitral stenosis—*coloured* (Fig. 78) 69
 - paralysis agitans (Fig. 248) 292
 - splenomegaly polycythemia—*coloured* (Fig. 515) 652
 - fat necrosis in acute pancreatitis—*coloured* (Fig. 625) 810
 - favus (Fig. 262) 309
 - ferric chloride reaction for diacetic acid—*coloured* (Fig. 184) 214

Illustrations, contd.
 - filaria embryo—*coloured* (Fig. 603) 779
 - fluorescence reaction of urobilin—*coloured* (Fig. 322) 406
 - follicular conjunctivitis—*coloured* (Fig. 231) 286
 - tonsillitis, mild—*coloured* (Fig. 597) 760
 - severe—*coloured* (Fig. 598) 760
 - fractional test meal in achlorhydria—*chart* (Fig. 286) 344
 - duodenal ulcer—*chart* (Fig. 284) 344
 - gastric ulcer—*chart* (Fig. 285) 344
 - Friedländer's bacilli—*coloured* (Fig. 91) 89
 - Friedreich's ataxia, kyphosis in (Fig. 148) 176
 - gall-bladder after tetraiodophenolphthalein—*skigram* (Fig. 693) 941
 - gall-stone—*skigrams* (Figs. 324, 325) 409
 - (Figs. 357-359) 441
 - shown by X rays and tetraiodophenolphthalein—*skigrams* (Figs. 698-701) 943
 - gangrene of fingers in Raynaud's disease—*coloured* (Fig. 265) 319
 - foot—*coloured* (Fig. 264) 318
 - gastric ulcer defined by X rays—*skigram* (Fig. 317) 398
 - gastroptosis—*skigram* (Fig. 436) 537
 - gigantism, infantile (Fig. 268) 324
 - primary (Fig. 269) 325
 - suprarenal (Fig. 267) 324
 - glaucoma—*coloured* (Fig. 236) 288
 - glaucomatous disc—*coloured* (Fig. 428) 520
 - Glossina morsitans—*coloured* (Fig. 50) 37
 - palpalis—*coloured* (Fig. 49) 37
 - Gmelin's reaction for bile—*coloured* (Fig. 321) 406
 - gonococcal arthritis—*temp. chart* (Fig. 329) 423
 - gout—*temp. chart* (Fig. 330) 424
 - chronic (Fig. 339) 429
 - of hand and olecranon bursa (Fig. 341) 429
 - subacromial bursa—*skigram* (Fig. 338) 428
 - growth in humerus—*skigram* (Fig. 156) 190
 - spine—*skigram* (Fig. 484) 630
 - gummatous ulcers of tongue—*coloured* (Fig. 676) 897
 - Günzburg's test for free HCl—*coloured* (Fig. 318) 401
 - hand in ateliosis (Fig. 147) 169
 - chronic gout—*skigram* (Fig. 342) 430
 - myxedema (Fig. 70) 51
 - *coloured* (Fig. 392) 507
 - progressive muscular atrophy (Fig. 84) 80
 - pseudo-hypertrophic muscular paralysis (Fig. 79) 75
 - rheumatoid arthritis—*skigrams* (Figs. 334, 335) 427
 - wasting from cervical rib (Fig. 475) 619
 - head of Bothriocephalus latus (Fig. 491) 633
 - Tania echinococcus (Fig. 490) 633
 - medioanellata (Fig. 489) 633
 - solium (Fig. 488) 633

Illustrations, contd.

- heart-block, complete—
 electrocardiogram
 (Fig. 101) 108;
 (Fig. 532) 667
- - - early—*electrocardio-*
 gram (Fig. 529) 666

 (Fig. 548) 692
- - - with complications—
 temp. chart (Fig. 549) 692

Illustrations, contd.

- influenza-pneumonia,
 facies in precyan-
 otic, heliotropic, and
 terminal stages—*col-*
 oured (Figs. 172-174) 201
- innominate aneurysm
 —*skia-*
 gram (Fig. 435) 535
- interlobar empyema—
 skia-
 gram (Fig. 115) 132
- - - pyopneumothorax—
 skia-
 gram (Fig. 512) 648
- interstitial keratitis—
 coloured (Fig. 233) 287
- iodine test for bile in
 urine—*coloured*
 (Fig. 302) 406
- - - iritis—*coloured* (Fig. 229) 286
- - - Kernic's sign (Fig. 577) 732
- - - kinking of ureter—*skia-*
 gram (Fig. 375) 447
- - - Kirkland's disease—*temp.*
 chart (Fig. 601) 762
- - - Koplik's spots—*coloured*
 (Fig. 190) 224
- - - large heart—*skia-*
 gram (Fig. 302) 374
- - - hyaline corpuscle—
 coloured (Fig. 37) 29
- - - intestine and time re-
 lations of opaque
 meal—*diagram*
 (Fig. 138) 160
- - - leather-bottle stomach
 —*skia-*
 gram (Fig. 281) 342
- - - left ventricle preponder-
 ance—*electrocardio-*
 gram (Fig. 109) 122
- - - Leishman-Donovan bodies
 —*coloured* (Fig. 605) 779
- - - leprosy, nodular
 (Fig. 588) 501
- - - leptothrix septicaemia—
 temp. chart (Fig. 551) 693
- - - leucin and tyrosin crystals
 —*coloured* (Fig. 326) 416
- - - leukoplakia simulating
 epithelioma—*coloured*
 (Fig. 675) 896
- - - lipaemia in chronic tubal
 nephritis—*coloured*
 (Fig. 273) 334
- - - lipidoid in bronchiectasis—
 skia-
 gram (Fig. 690) 938
- - - injection into spine—
 skia-
 gram (Fig. 270) 326
- - - in uterus and tubes—
 skiagrams
 (Fig. 691) 939;
 (Fig. 692) 940
- - - lipomatosis, diffuse
 (Figs. 403, 404) 511
- - - lobar pneumonia—
 skia-
 gram (Fig. 297) 364
- - - - *temp. chart* (Fig. 617) 789
- - - lymphatic leukaemia—
 temp. chart (Fig. 569) 713
- - - macular syphilide
 (Fig. 383) 478
- - - making a blood film
 (Fig. 27) 26
- - - malaria, chronic—
 temp. chart (Fig. 56) 39
- - - complex—*temp. chart*
 (Fig. 55) 39
- - - double tertian—
 temp. chart (Fig. 53) 38
- - - quartan—*temp. chart*
 (Fig. 52) 38
- - - quotidian—*temp. chart*
 (Fig. 53) 38
- - - tertian—*temp. chart*
 (Fig. 51) 37
- - - malignant left supra-
 clavicular gland
 (Fig. 77) 66
- - - Mediterranean fever—
 temp. chart (Fig. 547) 691
- - - megalocyte and micro-
 cytes—*coloured* (Fig. 29) 29
- - - melanuria—*coloured*
 (Fig. 689) 905
- - - meningococcal menin-
 gitis—*temp. chart*
 (Fig. 578) 733
- - - Miculicz's syndrome in
 leukemia (Fig. 46) 34
- - - Milroy's disease
 (Fig. 406) 512;
 (Fig. 408) 516

Illustrations, contd.

- miner's phthisis—*skia-*
 gram (Fig. 170) 199
- mitral fibrosis, physical
 signs—*diagram*
 (Fig. 106) 119
- mollities ossium
 (Fig. 260) 305
- molluscum fibrosum
 (Fig. 657) 866
- Mongolian idiot with
 fissured tongue
 (Fig. 253) 293
- - - protruding tongue
 (Fig. 252) 293
- - - Mongolism (Fig. 198) 235
- - - monocord (Fig. 178) 206
- - - morbus caruleus
 (Fig. 166) 196
- - - morphia poisoning—
 temp. chart (Fig. 134) 155
- - - morphia (Fig. 509) 645
- - - movements in ataxy—
 diagram (Fig. 662) 883
- - - intention tremor
 (Fig. 661) 883
- - - mucous cast of intestine
 (Fig. 386) 495
- - - multiple bleeding navi
 of cheeks—*coloured*
 (Figs. 299, 300) 368
- - - myelocyte—*coloured*
 (Fig. 39) 29
- - - myeloid sarcoma of femur
 —*skia-*
 gram (Fig. 641) 823
- - - - humerus—*skia-*
 gram (Fig. 638) 822
- - - jaw—*skia-*
 gram (Fig. 647) 836
- - - - tibia—*skiagrams*
 (Figs. 639, 640) 822
- - - myeloma of rib—*skia-*
 gram (Fig. 25) 21
- - - myelomata, multiple—
 skia-
 gram (Fig. 24) 20
- - - myopathic facies, fatigue
 type (Fig. 245) 291
- - - nasal smile type
 (Fig. 246) 291
- - - lordosis (Fig. 163) 194
- - - - - *put.* (Fig. 245) 291
- - - transverse smile
 (Fig. 244) 291
- - - myopic crescent of the
 disc—*coloured*
 (Figs. 416, 417) 518
- - - myxodema facies (Fig. 68) 50
- - - - *coloured* (Fig. 191) 506
- - - nail, transverse ridges
 on, from lobar pneu-
 monia—*coloured*
 (Fig. 387) 497
- - - nerve-supply of scalp
 —*diagram* (Fig. 656) 865
- - - normal chest—*skia-*
 gram (Fig. 301) 374
- - - colon—*skia-*
 gram (Fig. 432) 526
- - - difference blood-sugar
 curve—*chart*
 (Fig. 113) 129
- - - electrocardiogram
 (Fig. 522) 663
- - - gall-bladder after tetra-
 iodophenolphtha-
 lein—*skiagrams*
 (Figs. 694-697) 942
- - - kidney—*skia-*
 gram (Fig. 553) 439
- - - pelvis—*skia-*
 gram (Fig. 469) 445
- - - lateral ventricle—*skia-*
 gram (Fig. 687) 936
- - - pituitary fossa—*skia-*
 grams (Figs. 307, 308) 378
- - - polygram (Fig. 521) 663
- - - P-R interval—*electro-*
 cardiogram
 (Fig. 103) 109
- - - red corpuscles—*col-*
 oured (Fig. 28) 29
- - - stomach—*skia-*
 gram (Fig. 276) 339
- - - nucleated red corpuscles
 —*coloured* (Fig. 33) 29
- - - obesity from dyspitui-
 tarism (Fig. 397) 509
- - - oedema of arm after am-
 putation of breast
 (Fig. 405) 512

Illustrations, contd.

- - - oesophageal pouch—
 skia-
 gram (Fig. 206) 242
- - - oesophagus obstructed
 by bean—*skia-*
 gram (Fig. 203) 241
- - - - cancer of stomach
 —*skia-*
 gram (Fig. 205) 242
- - - opaque nerve fibres in
 retina—*coloured*
 (Figs. 413, 414) 518
- - - optic atrophy, post-neuritic
 —*coloured* (Fig. 421) 519
- - - - primary—*coloured*
 (Fig. 420) 519
- - - disc in hypermetropic
 astigmatism—*col-*
 oured (Fig. 430) 520
- - - neuritis—*coloured*
 (Figs. 418, 419) 518
- - - - and optic atrophy
 from plumbism
 —*coloured*
 (Fig. 135) 156
- - - osteitis deformans in a
 man (Fig. 159) 193
- - - - of radius (Fig. 632) 820
- - - - in a woman
 (Fig. 160) 193
- - - osteogenesis imperfecta
 (Fig. 194) 233
- - - outline of emphysema-
 tous chest—*diagram*
 (Fig. 182) 209
- - - normal chest—*diagram*
 (Fig. 180) 209
- - - pigeon chest—*diagram*
 (Fig. 181) 209
- - - rickets chest—*diagram*
 (Fig. 179) 209
- - - ova of Ankylostomum
 duodenale
 (Figs. 98, 99) 103
- - - Ascaris lumbricoides
 (Fig. 493) 634
- - - Bilharzia haematobia
 (Fig. 96) 102
- - - Taenia solium
 (Fig. 492) 634
- - - Trichocephalus dispar
 (Fig. 48) 103
- - - (Fig. 496) 635
- - - pads on dorsal aspects
 of phalangeal joints
 —*skia-*
 gram (Fig. 344) 431
- - - fingers (Fig. 343) 431
- - - papilloma of vocal cord
 —*coloured* (Fig. 212) 245
- - - paralysis of cervical
 sympathetic (Fig. 221) 270
- - - internal rectus muscle
 (Fig. 517) 659
- - - third nerve (Fig. 516) 659
- - - - and seventh nerves
 (Figs. 518, 519) 660
- - - paroxysmal tachycardia
 —*electrocardiograms*
 (Fig. 518, 670);
 (Fig. 655) 858
- - - pedunculated bald car-
 cinoma of bladder
 —*coloured* (Fig. 289) 354
- - - carcinoma of bladder
 —*coloured* (Fig. 288) 354
- - - Pel-Ebstein pyrexia—
 temp. chart (Fig. 566) 708
- - - pellagra—*coloured*
 (Fig. 224) 280
- - - pelvic caecum and in-
 testinal stasis—*skia-*
 gram (Fig. 146) 159
- - - pemphigus—*temp. chart*
 (Fig. 112) 127
- - - perforating ulcer of foot
 (Fig. 666) 893
- - - pericarditis with effusion
 —*skia-*
 gram (Fig. 220) 265
- - - perimeter chart of bi-
 lateral homonymous
 hemianopsia (Fig. 313) 380
- - - - temporal hemi-
 anopsia
 (Fig. 306) 378
- - - perinephric abscess bulg-
 ing loin—*coloured*
 (Fig. 555) 698
- - - periosteal sarcoma of
 femur—*skia-*
 gram (Fig. 635) 821

Illus.: periosteal sarcoma, contd.

- - - of humerus—*skiagram* (Fig. 636) 821
- periostitis, chronic—*skiagram* (Fig. 628) 818
- peripheral neuritis, glove and stocking anaesthesia in—*diagram* (Fig. 582) 749
- - - in leprosy (Fig. 472) 616
- pernicious anaemia—*temp. chart* (Fig. 565) 707
- phenyl glucosazone crystals—*coloured* (Fig. 271) 328
- pigmentation in mouth in—*coloured* (Fig. 64) 45
- phenyl lactosazone crystals—*coloured* (Fig. 272) 328
- phlegmonous diphtheria—*coloured* (Fig. 596) 759
- phlyctenular conjunctivitis—*coloured* (Fig. 230) 286
- phthisis, early—*skiagram* (Fig. 117) 133
- - - extensive—*skiagram* (Fig. 118) 134
- - - though thought to be early—*skiagram* (Fig. 119) 135
- physiological cup—*coloured* (Fig. 409) 517
- pigmentation in mouth in Addison's disease—*coloured* (Figs. 500-502) 641
- - - pernicious anaemia—*coloured* (Fig. 64) 45
- - - of skin in Addison's disease—*skiagram* (Fig. 506) 644
- - - from arsenic—*coloured* (Fig. 305) 643
- pigmented crescent of optic disc margin—*coloured* (Fig. 411) 517
- pituitary fossa, enlarged—*skiagram* (Fig. 310) 379
- - - shallow—*skiagram* (Fig. 309) 379
- - - infantilism (Fig. 196) 234
- Plasmochrom talcparum—*coloured* (Fig. 59) 41
- - - quotidianum—*coloured* (Fig. 60) 41
- - - malaria—*coloured* (Fig. 58) 40
- - - vivax—*coloured* (Fig. 57) 40
- pleural adhesions—*skiagram* (Fig. 303) 375
- pleurisy with effusion—*temp. chart* (Fig. 561) 703
- pneumonia with lysis and empyema—*temp. chart* (Fig. 171) 200
- pneumothorax—*skiagram* (Fig. 511) 648
- poikilocytes—*coloured* (Fig. 32) 29
- polygram of auricular fibrillation (Fig. 526) 666
- - heart-block (Fig. 531) 667
- - incomplete heart-block (Fig. 528) 666
- - sinu-auricular block (Fig. 524) 665
- polymorphonuclear corpuscle—*coloured* (Fig. 38) 29
- polymyositis—*temp. chart* (Fig. 560) 702
- pontine hemorrhage—*temp. chart* (Fig. 133) 155
- P-R interval, prolonged—*electrocardiogram* (Fig. 104) 109
- progeria (Fig. 201) 237
- prostate, enlarged, cystoscopic appearance—*coloured* (Fig. 290) 354
- prostatic calculi—*skiagram* (Fig. 367) 444
- pseudo-hypertrophic muscular paralysis (Fig. 477) 624
- - (Fig. 478) 625
- pseudo-leukæmia infantum (Fig. 67) 50

Illustrations, contd.

- ptosis of colon—*skiagrams* (Figs. 437, 438) 537
- - - from paralysis of cervical sympathetic (Fig. 520) 660
- pulmonary osteoarthropathy (Figs. 351, 352) 436
- pulsus histericus—*polygram* (Fig. 539) 672
- punctate basophilia and polychromasia—*coloured* (Fig. 34) 29
- purpura in fungating endocarditis (Fig. 540) 678
- purulent urine issuing from ureter—*coloured* (Fig. 571) 717
- pustular dermatitis (Fig. 544) 686
- pyæmia—*temp. chart* (Fig. 553) 694
- pycnography of early hydronephrosis (Figs. 373, 374) 447
- - - in hydronephrosis (Figs. 370-372) 446
- - - of kinking of ureter (Fig. 376) 449
- - - of normal renal pelvis (Fig. 369) 445
- quinsy—*coloured* (Fig. 592) 758
- radicular sensory areas—*coloured* (Fig. 584) 751
- rat-bite fever—*temp. chart* (Fig. 579) 740
- Raynaud's disease, stage of local asphyxia (Fig. 266) 320
- rectum opening into urethra—*diagram* (Fig. 575) 728
- - - vulva (Fig. 576) 728
- red cells badly fixed—*coloured* (Fig. 30) 29
- referred pains in spine—*diagram* (Fig. 600) 871
- regions of abdomen—*diagram* (Fig. 624) 808
- relapsing fever—*temp. chart* (Fig. 48) 36
- renal calculi—*skiagrams* (Figs. 354, 355) 440
- - - (Fig. 356) 441
- - - growth extending to inferior vena cava and heart (Fig. 681) 909
- - - tube-casts (Figs. 9-16) 6-7
- retracted ureter in renal tuberculosis—*coloured* (Fig. 573) 717
- rheumatic fever—*temp. chart* (Fig. 328) 423
- - - nodules (Figs. 225, 226) 282
- rheumatoid arthritis—*temp. chart* (Fig. 331) 426
- - - hands in (Fig. 332) 426
- rickets, extinct (Fig. 192) 232
- right bundle branch block—*electrocardiogram* (Fig. 72) 53
- - ventricular preponderance—*electrocardiogram* (Fig. 108) 122
- sarcinæ ventriculi (Fig. 258) 302
- sarcoma invading radius and ulna—*skiagram* (Fig. 642) 823
- - - of lung—*skiagram* (Fig. 120) 136
- - - mediastinum—*temp. chart* (Fig. 564) 706
- - - spine—*skiagram* (Fig. 620) 796
- scolices of Tænia echinococcus (Figs. 623a, 623b) 806
- secondary carcinoma in bone—*skiagram* (Fig. 26) 21
- segmental areas of head—*diagrams* (Figs. 658, 659) 867
- sensory areas of face, head, and neck—*diagrams* (Figs. 442-445) 550

Illustrations: sensory, contd.

- - - impulses, paths in cord—*diagram* (Fig. 583) 750
- septic dermatitis simulating smallpox (Fig. 543) 686
- sinus arrhythmia—*electrocardiogram* (Fig. 523) 664
- **skiagrams:**
- - - achalasia cardiacæ (Fig. 207) 244
- - - aneurysm (Fig. 214) 249
- - - (Fig. 219) 260
- - - eroding spine (Fig. 434) 534
- - - barium enema in carcinoma of sigmoid colon (Fig. 644) 827
- - - bones in mollities ossium (Fig. 261) 305
- - - calcareous glands (Figs. 363-365) 443
- - - calculus in ureter (Figs. 360, 361) 442
- - - (Fig. 362) 443
- - - (Fig. 447) 558
- - - carcinoma of cardiac end of stomach (Fig. 278) 340
- - - descending colon (Fig. 643) 827
- - - lung (Fig. 105) 114
- - - œsophagus (Fig. 204) 241
- - - pelvic colon (Fig. 144) 164
- - - pylorus (Fig. 277) 340
- - - near splenic flexure (Fig. 143) 163
- - - of stomach (Fig. 279) 341
- - - transverse colon (Fig. 140) 161
- - - (Fig. 142) 163
- - - vertebra (Figs. 157, 158) 192
- - - cardiospasm (Fig. 208) 244
- - - caseous bronchial gland (Fig. 155) 187
- - - mediastinal glands (Fig. 384) 481
- - - cervical caries (Fig. 619) 795
- - - rib (Figs. 440, 441) 544
- - - Charcot's elbow (Figs. 347, 348) 434
- - - in syringomyelia (Figs. 349, 350) 434
- - - hip-joint (Fig. 346) 433
- - - chondromata of hand (Fig. 634) 821
- - - chondrosarcoma of femur (Fig. 637) 822
- - - colon in viscerotaxis (Fig. 433) 526
- - - composite vesical calculus (Fig. 294) 355
- - - congenital dislocation of hip (Fig. 165) 195
- - - dental apical abscess (Figs. 61-63) 43
- - - cyst (Fig. 646) 836
- - - dentigerous cyst (Fig. 648) 836
- - - diaphragm pushed up by liver abscess (Fig. 279) 465
- - - diverticula of colon (Fig. 141) 162
- - - diverticulitis (Fig. 446) 557
- - - duodenal ulcer (Fig. 282) 343
- - - dyschezia (Fig. 137) 159
- - - early hydronephrosis (Figs. 373, 374) 447
- - - phthisis (Fig. 117) 133
- - - enlarged pituitary fossa (Fig. 310) 379
- - - thymus gland (Fig. 213) 248
- - - exostosis of femur (Fig. 633) 820
- - - extensive phthisis (Fig. 118) 134
- - - gall-bladder after tetraiodophenolphthalein (Fig. 693) 941

Illustrations: skiagrams, contd.

- - - gall-stone (Figs. 324, 325) 409
- - - (Figs. 357-359) 441
- - - after tetraiodophenolphthalein (Figs. 698-701) 943
- - - gastric ulcer (Fig. 317) 398
- - - gastropnoxis (Fig. 433) 537

- - ureteral calculus and phleboliths (Fig. 366) 444
- - urethral calculus (Fig. 368) 445
- - skull in leontiasis ossea—skiagram (Fig. 215) 255
- - small lymphocytes—coloured (Fig. 35) 29
- - smallpox, confluent (Fig. 542) 685
- - discrete (Fig. 541) 685:
- - - (Fig. 686) 920
- - sore throat, hyperæmic—coloured (Fig. 591) 758
- - spectrum of acid hæmatin—coloured (Fig. 21) 13
- - alkali hæmatin—coloured (Fig. 20) 13
- - carboxyhaemoglobin—coloured (Fig. 19) 13
- - hæmoglobin—coloured (Fig. 18) 13
- - methæmoglobin—coloured (Fig. 22) 13
- - oxyhæmoglobin—coloured (Fig. 17) 13
- - urobilin—coloured (Fig. 23) 13
- - speech centres in brain—diagram (Fig. 602) 770
- - spermatozoa (Fig. 454) 588
- - sperules and dumbbells of sodium urate—coloured (Fig. 679) 899

Illustrations, contd.

- - spinal caries, antero-posterior view, missing the disease—skiagram (Fig. 481) 629
- - - early—skiagram (Fig. 480) 628
- - - lateral view—skiagram (Fig. 482) 629
- - spindled fingers from gout (Fig. 333) 426
- - spine with growth, but not showing it—skiagram (Fig. 483) 630
- - - on os calcis—skiagram (Fig. 439) 541
- - Spirochæta Obermeieri—coloured (Fig. 606) 779
- - spirochætosis ictero-hæmorrhagica—temp. chart (Fig. 552) 693
- - spleen and liver enlarged in fungating endocarditis (Fig. 615) 787
- - splenic anæmia spleen (Fig. 611) 781
- - splenomedullary leucæmia—temp. chart (Fig. 47) 34
- - spondylitis deformans (Figs. 621, 622) 796
- - stance in tuberculous hip (Fig. 377) 458
- - Staphylococcus aureus—coloured (Fig. 90) 89
- - stellar phosphate crystals (Fig. 498) 638
- - Still's disease (Fig. 481) 472
- - stomach herniated into chest—skiagram (Fig. 514) 649
- - with pyloric stenosis—skiagrams (Figs. 185, 186) 219
- - streptococcal glossitis—coloured (Figs. 459, 460) 593
- - painful tongue—coloured (Figs. 455-458) 592
- - Streptococcus pyogenes longus—coloured (Fig. 89) 80
- - subarachnoid hæmorrhage—temp. chart (Fig. 567) 710
- - subconjunctival hæmorrhage—coloured (Fig. 235) 287
- - subdiaphragmatic abscess—skiagrams (Fig. 116) 133:
- - - (Fig. 623) 801
- - superior vena cava obstructed by aneurysm (Fig. 218) 260
- - suppurative pyelophlebitis—temp. chart (Fig. 554) 696
- - suprarenal gigantism (Fig. 267) 324
- - syphilitic choroiditis—coloured (Fig. 415) 518
- - fibrosis of mediastinum—skiagram (Fig. 684) 910
- - leucomelanoderma (Figs. 507, 508) 644
- - radius—skiagram (Fig. 631) 819
- - sore throat—coloured (Fig. 600) 760
- - syringomyelia, anæsthesia in—diagram (Fig. 588) 753
- - syringomyelic claw-hand (Fig. 124) 142
- - tabes dorsalis, anæsthesia in—diagram (Fig. 589) 753
- - tabetic facies (Fig. 249) 292
- - taches bleues—coloured (Fig. 503) 642
- - Tænia solium (Fig. 487) 632
- - talipes equinus from congenital spastic paraplegia (Fig. 130) 145
- - - in peripheral neuritis (Fig. 150) 178

Illustrations: talipes, contd.

- - equinovarus and equinovagulus in spina fida (Fig. 131) 146
- - - from infantile paralysis (Fig. 149) 177
- - valgus and hallux valgus (Fig. 132) 146
- - telangiectases from X rays—coloured (Fig. 222) 277
- - temperature charts:
- - - in acute gout (Fig. 330) 424
- - - carcinoma of liver (Fig. 323) 408
- - - cerebrospinal meningitis (Figs. 557, 558) 701
- - - chronic malaria (Fig. 56) 39
- - - cirrhosis of liver (Fig. 66) 47
- - - coli bacilluria (Fig. 448) 560
- - - complex malaria (Fig. 55) 39
- - - dental sepsis (Fig. 570) 714
- - - double tertian malaria (Fig. 53) 38
- - - erysipelas (Fig. 556) 699
- - - gonococcal arthritis (Fig. 329) 423
- - - Hodgekin's disease (Fig. 612) 783
- - - hypothermia in heart disease (Fig. 514) 391
- - - malignant disease (Fig. 315) 392
- - - infective endocarditis (Fig. 65) 46:
- - - influenza (Fig. 548) 692
- - - with complications (Fig. 549) 692
- - - in Kirkland's disease (Fig. 601) 762
- - - leptothrix septicaemia (Fig. 551) 693
- - - lymphatic leucæmia (Fig. 569) 713
- - - lobar pneumonia (Fig. 617) 789
- - - Mediterranean fever (Fig. 547) 691
- - - meningococcal meningitis (Fig. 578) 733
- - - morphia poisoning (Fig. 134) 155
- - - negative tuberculin reaction (Fig. 296) 360
- - - Pel-Ebstein pyrexia (Fig. 566) 708
- - - pellagra (Fig. 223) 279
- - - pemphigus (Fig. 112) 127
- - - pernicious anæmia (Fig. 565) 707
- - - pleurisy with effusion (Fig. 561) 703
- - - pneumonia with lysis and empyema (Fig. 171) 200
- - - pontine hæmorrhage (Fig. 133) 155
- - - polymyositis (Fig. 560) 702
- - - positive tuberculin reaction (Fig. 295) 360
- - - prolonged typhoid fever (Fig. 546) 690
- - - pyæmia (Fig. 555) 694
- - - quartan malaria (Fig. 52) 38
- - - quotidian malaria (Fig. 53) 38
- - - rat-bite fever (Fig. 579) 740
- - - relapsing fever (Fig. 48) 36
- - - rheumatic fever (Fig. 328) 423
- - - rheumatoid arthritis (Fig. 331) 426
- - - sarcoma of mediastinum (Fig. 564) 706

Illus.: temp. charts, contd.

- - - spirochætosis ictero-hæmorrhagica (Fig. 552) 693
- - - splenomedullary leucæmia (Fig. 47) 34
- - - subarachnoid hæmorrhage (Fig. 367) 710
- - - suppurative pyelophlebitis (Fig. 554) 696
- - - tertian malaria (Fig. 51) 37:
- - - tetragenous septicæmia (Fig. 54) 39
- - - tetragenous septicæmia (Fig. 550) 692
- - - trench fever (Fig. 568) 710
- - - tuberculous peritonitis (Fig. 563) 705
- - - of ascetic type (Fig. 75) 64
- - - typhoid fever (Fig. 545) 689
- - - typhus fever ending by crisis (Fig. 614) 786
- - - - in lysis (Fig. 613) 786
- - tetragenous septicæmia—temp. chart (Fig. 550) 692
- - thorn-apple crystals—coloured (Fig. 678) 899
- - threadworms (Fig. 494) 634
- - thrombosis of central retinal vein—coloured (Fig. 422) 519
- - posterior inferior cerebellar artery, sensory changes from—diagram (Fig. 709) 754
- - thymus gland, enlarged—skiagram (Fig. 213) 248
- - tibia in osteitis deformans—skiagram (Fig. 161) 193
- - Tooth's peroneal atrophy in a boy (Fig. 81) 79
- - - girl (Fig. 82) 79
- - tooth-plate impacted in larynx (Fig. 202) 240
- - tophus of ear (Fig. 440) 429
- - trachoma—coloured (Fig. 237) 288
- - transillumination of antra—coloured (Fig. 191) 226
- - traumatic cyanosis—coloured (Figs. 175, 176) 202
- - trench fever—temp. chart (Fig. 568) 710
- - Trichinella spiralis in human muscle (Fig. 452) 569
- - triple phosphate crystals (Fig. 499) 638
- - Trypanosoma gambiense—coloured (Fig. 604) 779
- - tube-casts—coloured (Figs. 9-16) 6-7
- - tubercle bacilli—coloured (Fig. 607) 779
- - - and pus cells—coloured (Figs. 87, 88) 89
- - tubercles in the choroid—coloured (Fig. 429) 520
- - tuberculin reaction, negative—temp. chart (Fig. 296) 360
- - - positive—temp. chart (Fig. 295) 360
- - tuberculous cæcum (Fig. 449) 562
- - dactylitis—skiagram (Fig. 629) 818
- - kidney—skiagram (Fig. 287) 352
- - larynx (Fig. 110) 245
- - metacarpal bone—skiagram (Fig. 630) 819
- - peritonitis—temp. charts (Fig. 75) 64:
- - - spine—skiagram (Fig. 451) 565
- - ulcers of bladder—coloured (Fig. 574) 717
- - larynx (Fig. 209) 245
- - tongue—coloured (Fig. 677) 897

Illustrations, contd.

- typhoid fever—temp. chart... (Fig. 545) 689
- - - prolonged—temp. chart (Fig. 546) 690
- typhus fever eruption—coloured (Fig. 527) 418
- - - ending by crisis—temp. chart (Fig. 614) 786
- - - lysis—temp. chart (Fig. 615) 786
- ulcer of leg, malnourished with nitric acid—coloured (Fig. 667) 894
- ulnar paralysis (Fig. 85) 82
- ureteral calculi—skagrams (Figs. 360, 361) 442; (Fig. 362) 443; (Fig. 447) 558
- - calculus and phlebotomy—skagram (Fig. 366) 444
- urethral calculi—skagram (Fig. 368) 445
- uric acid calculus in bladder—coloured (Fig. 292) 354
- - crystals—coloured (Fig. 680) 900
- varicose thoracic and abdominal veins from syphilitic mediastinitis (Fig. 682) 908
- ventricular disease—electrocardiogram (Figs. 71, 73) 53
- - extrasystole—electrocardiogram (Figs. 336, 537) 669
- vesical calculus, composite—skagram (Fig. 294) 355
- Vincent's anemia—coloured (Fig. 599) 760
- - organisms—coloured (Fig. 609) 770
- viscerotropism (Fig. 146) 165
- Volkmann's contracture (Fig. 151) 178
- whipworms (Fig. 475) 634
- winged scapula from paralysis of serratus magnus (Fig. 473) 617
- wrist-drop after diptheria (Fig. 86) 84
- xanthelasma palpebrarum—coloured (Fig. 319) 406
- xanthoma diabeticorum (Fig. 665) 889
- X-rays—see Illustrations—Skagrams
- Imbecility amenorrhoea in 23
- dwarfism with 234
- microcephaly and 234
- in Mongolism (Fig. 198) 235, 236
- salivation in 662
- slobbering in 662
- Immersion, gangrene of lung after 323, 791
- hypothermia from 392
- Impacted faeces (see Faecal Impaction)
- gall-stone in bowel, colic from 148
- wisdom tooth (see Wisdom Tooth)
- Impetiginous syphilides 684
- Impetigo, account of 681
- Bacillus coli in 682
- mallei in 682
- pyocyaneus in 124, 682
- bullosa 124, 681
- capitis, occipital glands enlarged from 472
- circinata 681
- conjunctivitis with 681
- contagiosa 125, 681
- bullae in 123, 125, 498
- crusts in 918
- eczema distinguished from 918
- finger affected by 301
- honey-like crusts in 125
- papules in 918
- perlèche and 460
- pustules in 743
- scabs in 743
- of Tilbury Fox 498

Impetigo contagiosa, contd.

- vesicles in 918
- crusts in 681, 686, 914
- cutaneous diptheria with 681
- of ear, carache from 252
- ecthyma from 681, 743
- from eczema 865
- erythema in 681
- no fever in 686
- follicular, account of 682
- hair follicles infected in 682
- Impetigo vulgaris distinguished from 682
- pustules in 682
- staphylococci in 682
- gyrata 681
- herpes facialis simulated 914
- herpeticiformis in Austria 125
- pregnancy 125
- Klebs-Löffler bacillus in 681
- leucocytosis slight in 453
- lips seldom attacked in 914
- occipital glands enlarged from 473
- otorrhea with 681
- pemphigus simulated 682
- from puritis 865
- pustular eczema distinguished from 682
- pustules in 124, 681, 686
- pyrexia in 681
- rhinitis with 681
- scabs in 681, 742
- from scratching 865
- small pox simulated by 686
- staphylococci in 124, 682
- streptococci in 682
- suppurating lymphatic glands from 695
- syphilide distinguished from 684
- tinea tonsurans simulated 311
- vesicles in 681, 686
- vulgaris 681
- follicular impetigo distinguished from 682
- Implantation cyst, vulval swelling due to 853
- IMPOTENCE 392
- from absence of erections 303
- penis 303
- alcoholism 303
- in amyotrophic lateral sclerosis 303
- ataxic paraplegia 303
- from atrophy of testes 303
- cancerous cachexia 303
- carcinoma of penis 303
- cocaine habit 303
- compression of cord 303
- congenital frigidity 303
- in dementia 303
- diabetes 303
- disseminated sclerosis 303
- from elephantiasis 303
- exhaustion from excesses 303
- fetishism and 393
- in general paralysis 303
- after gonorrhoea 303
- from heron habit 303
- hypopituitarism 303
- inability to have erection at right time 303
- infantism 303
- injury to testes 303
- list of causes of 393
- in malarial cachexia 303
- from masturbation 303
- mechanical defect 303
- morphine habit 303
- neurasthenia 303
- orchitis 303
- paraldehyde habit 303
- in pernicious anemia 303
- from phthisical cachexia 303
- plumbism 303
- in primary spastic paraplegia 303
- psychic 303
- from senility 303
- sterility distinct from 303
- in syphilitic cachexia 303
- tabes dorsalis 303

Impotence, contd.

- from transverse softening of cord 393
- X-ray effects 393
- Impulse, cardiac (see Heart Impulse)
- on coughing (see Coughing)
- INCONTINENCE OF FÆCES 393
- from carcinoma of pelvic colon 394
- perineum 394
- rectum 394
- sigmoid colon 394
- cauda equina lesion 394
- after childbirth 394
- in children 394
- during coma 394
- in healthy persons 394
- from injury to perineum 394
- rectum 394
- mechanical 394
- in meningitis 394
- after operation 394
- in paraplegia 627
- from perineal tear 394
- primary lateral sclerosis 631
- spinal cord lesions 394
- in tabes dorsalis 874
- urine in amyotrophic lateral sclerosis 176
- from combined sclerosis 61, 176
- compression of cord 495
- paraplegia 61
- definition of 492
- in disseminated sclerosis 176
- encephalitis lethargica 176
- from enlarged prostate 61
- in Erb's syphilitic paraplegia 176
- Friedrich's ataxy 176
- hamatomyelia 176
- from injury to cord 495
- lateral sclerosis 61
- in meningitis 732
- retention with overflow 61, 492
- retroverted gravid uterus 61
- softening of cord 495
- spinal cord lesions 61
- in syringomyelia 176
- from tabes dorsalis 61
- various causes of 61
- and see Sphincter Trouble
- Inco-ordination due to ataxic paraplegia 313
- cerebellar disease 314
- chronic alcoholism 184
- combined sclerosis 313
- disseminated sclerosis 313
- Friedrich's ataxy 145, 313
- gait of 313
- due to multiple neuritis 313
- occupation neuroses 189
- paralysis of eye muscles 314
- tabes dorsalis 313
- tests for 313
- (and see Ataxy)
- Incubation period of botulism 223, 243
- chancre 764
- hydrophobia 885
- serum rash 935
- soft sore 764
- tetanus 885
- yellow fever 420
- Incus 205
- Index, opsonic, in tuberculous 932
- India, ankylostomiasis 103, 635
- dysentery in 99
- kala-azar in 780
- Madura foot in 893
- malaria from 213
- relapsing fever in 420, 748
- residence in, low blood-pressure from 106, 709
- sprue in 47
- India-rubber bottle stomach (see Carcinoma of Stomach, Diffuse)

India-rubber, contd.

- workers in, peripheral neuritis in 84
- works, carbon bisulphide and 84
- Indian bean, dermatitis due to 915
- ink for Spirochaeta pallida 854
- Indian, alcohol in testing for 905
- blackened by bleaching powder 905
- chloroform in testing for 905
- ferrie chloride not blackening 904
- indigo blue from 395, 905
- red from 905
- nitric acid blackening 904
- test for 905
- tests for 395, 904, 905
- INDICANURIA 395
- account of 904
- in appendicitis 554
- from bronchiectasis 395
- carcinoma of colon 395
- cholera 395
- chronic constipation 395
- dark brown ring with nitric acid 6
- from diarrhoea 395
- dysentery 395
- empyema 395, 905
- gangrene of lung 395
- in healthy people 395
- from intestinal obstruction 395
- putrefaction 129, 395, 905
- intussusception 395
- melanuria simulated by 904, 905
- nitric acid test and 395
- from pancreatitis 129
- in phthisis 395
- from putrid bronchitis 395
- pus 905
- test for (Fig. 316) 395
- from tuberculous colitis 395
- typhoid fever 395
- ulcerative colitis 395
- urine black from 904
- brown from 904
- Indies, West, dysentery in 99
- INDIGESTION 395
- acute, colic from 148
- aerophagy simulating 397
- anaemia from 43
- aneurysm simulating 528
- angina pectoris and 396
- bicarbonate of soda and 566
- calomel and 566
- from carcinoma of stomach 397
- casein, stools in 215
- cerebral vomiting simulating 396
- in chlorosis 49
- cholecystitis simulating 396
- chronic appendicitis simulating 396
- intestinal obstruction simulating 396
- congestion of liver and 463
- from duodenal ulcer 397
- enlarged prostate 396
- eructatio nervosa simulating 397
- fainting due to 297
- fat, stools in 215
- flushing due to 303
- from gall-stone 410
- gall-stones simulating 396
- heart disease simulated by 536
- simulating 52, 114
- insomnia from 402, 403
- intestinal, colic from 148
- lumbar puncture in 396
- migraine simulating 396
- from nephritis 396
- out of condition from 113
- oxaluria and phosphaturia alternating in 523
- pain in breast from 529
- round heart from 536
- in shoulder from 580
- between shoulders from 565, 566
- with pancreatic cyst 811

- Indigestion, contd.*
- from pancreatitis . . . 131
 - in phthisis . . . 396
 - **pregnancy simulating** . . . 396
 - from pyloric stenosis . . . 160, 219
 - pyuria . . . 396
 - shortness of breath from . . . 113
 - sugar, stools in . . . 215
 - uræmia simulating . . . 396
 - vomiting of pregnancy simulating . . . 396
 - (and see Dyspepsia; Flatulence; etc.)
 - Indigo blue from indican** . . . 905
 - phosphates tinged by . . . 907
 - purple urine from . . . 907
 - sediment in urine . . . 907
 - in treating epilepsy . . . 907
 - carmine in renal diagnosis . . . 446
 - from indican . . . 395
 - red from indican . . . 905
 - Indol formation in intestine** . . . 395
 - indicanuria from . . . 395
 - in urine . . . 904
 - Indoor workers, anaemia in** . . . 42, 43, 49
 - Indoxyl sulphate in indicanuria** . . . 904
 - Inequality of pulses (see Pulses, Unequal)**
 - pupils (see Pupils, Unequal)
 - Inertia of uterus** . . . 250, 252
 - Infantile convulsions** . . . 181
 - hyperpyrexia from . . . 390
 - unilateral . . . 185
 - diarrhoea and vomiting, acetonuria from . . . 3
 - diplegia (see Diplegia)

 - - peritonitis from 735
 - - simulated in 735
 - - phlebitis from 481
 - - pulse small and rapid from 735
 - - receptaculum chyli obstruction from 62
 - - - ruptured from 140
 - - rigidity due to 735
 - - ruptured liver from 149
 - - from spleen from 149
 - - viscera from 735
 - - skin cold and clammy after 735
 - - anaesthesia after 870
 - - anuria from 55, 58
 - - arteriovenous aneurysm of orbit from 285
 - - arthritis from 581
 - - ataxy from 77
 - - axillary aneurysm after 817

Injury, contd.

- to back, pain after 528
 - - strangury due to 798
 - - at birth (see Birth Injury)
 - - to bladder, haematuria from 348, 351
 - - rupture of bladder from 351
 - - strangury due to 797
 - - surgical emphysema from 254
 - - ulceration due to 722
 - - bleeding gums from 93
 - - to breast, pain in breast from 529
 - - bruising of cord from 870
 - - of circum, surgical emphysema from 254
 - - cerebral, anosmia from 756
 - - - glycosuria from 330, 341
 - - infantile diplegia from 169
 - - Jacksonian epilepsy from 174
 - - memory loss from 25
 - - paraplegia from 621
 - - testis atrophy after 85, 86
 - - to chest, chylous ascites from 62
 - - cyanosis from 200
 - - dyspnoea from 247
 - - emphysema from 134, 135
 - - haemoptysis from 361, 364
 - - haemothorax from 135, 649
 - - heart impulse displaced after 373
 - - herniation of stomach due to 649
 - - pneumothorax from 649
 - - shortness of breath after 114
 - - surgical emphysema from 254
 - - thoracic duct obstruction from 62
 - - collapse from 55
 - - compression paraplegia from 626
 - - cold haemorrhages from 77
 - - cornical ulcer from 890
 - - D.A.H. from 597
 - - diaphres from 334
 - - diaphragmatic hernia from 801
 - - dislocation of lens from 674
 - - to duodenum, blood per anum from 97
 - - surgical emphysema from 254
 - - ear, deafness from 207
 - - earache from 252
 - - meatus obstructed after 207
 - - ectropion from 273
 - - epididymitis from 85
 - - epididymo orchitis from 584
 - - epiphora from 273
 - - epiphysal, arrest of growth after 147
 - - overgrowth after 147
 - - epistaxis from 274
 - - to eye, double pupil from 220
 - - photophobia from 649
 - - fainting due to 297
 - - to foot, limping due to 456
 - - by forceps, paraplegia from 622
 - - fracture of penis from 140
 - - rib from 862
 - - sternum from 862
 - - vertebra from 870
 - - of frænum linguae 590
 - - gangrene from 817
 - - girdle pain after 870
 - - hamatemesis from 336
 - - haematoma of jaw from 834
 - - haematomyelia from 620
 - - haematuria from 347, 349
 - - haemorrhage into cord from 627, 870
 - - to head, beard falling out after 86
 - - cerebrospinal fluid from nose after 224
 - - concussion from 212
 - - delirium from 212
 - - fainting from 297
 - - fractured base from 224
 - - skull from 212
 - - hair falling out after 86

Injury to head, contd.

- headache after 372
 - - hyperacusis after 389
 - - Jacksonian epilepsy from 185
 - - jaundice from 422
 - - loss of sexual power 86
 - - meningeal haemorrhage from 212
 - - nystagmus from 505
 - - pyrexia from 709, 710
 - - subarachnoid haemorrhage from 709
 - - testis atrophy after 86
 - - twitches after 86
 - - hepatic abscess from 464
 - - to hip - joint, sciatic nerve paralysis from 610
 - - hydropneumothorax from 801
 - - hypothermia after 392
 - - insomnia due to 402
 - - of internal popliteal nerve, paralysis from 610
 - - joint, pneumococcal arthritis from 424
 - - kidney, abscess due to 718
 - - blood-clot from kidney due to 147
 - - colic from 147
 - - haematuria from 348, 351
 - - renal enlargement from 351
 - - knee-jerks increased after 870
 - - to larynx, haemoptysis from 361, 367
 - - hoarseness from 384
 - - perichondritis after 763
 - - sore throat due to 758
 - - levator ani, prolapse of uterus due to 657
 - - loin, haematoma from 438
 - - perinephric abscess from 438
 - - long thoracic nerve 616
 - - loss of memory from 25
 - - to lung from broken rib 254
 - - surgical emphysema from 254
 - - mallet finger from 479
 - - massive collapse of lung after 375
 - - to mouth, haemoptysis simulated by 359
 - - necrosis of jaw from 834
 - - of nerves, contracture from 178
 - - muscle atrophy from 80, 82
 - - R.D. from 80, 82
 - - neurasthenia after 870
 - - node after 817
 - - to nose, epistaxis from 273
 - - necrosis of nasal bones from 225
 - - occupation neurosis from 189
 - - of oesophagus, surgical emphysema from 254
 - - onychia from 497
 - - ophthalmoplegia interna from 674
 - - to optic nerve, blindness due to 925
 - - orchitis from 85, 86, 587
 - - pain in iliac fossa from 555, 557, 561
 - - to pancreas, colic from 148
 - - paralysis of external popliteal nerve from 610
 - - to pelvis, limping from 457
 - - of penis, chordee from 140
 - - from forcible coitus 579
 - - haematoma of cavernous tissue from 579
 - - sore due to 763
 - - perforation of palate from 730
 - - perineal sore from 766
 - - perinephric abscess from 697
 - - to perineum, incontinence of faeces from 394
 - - prolapse of uterus due to 657
 - - periosteal haematoma from 817
 - - periostitis of fibula from 456

Injury, contd.

- peritonitis of jaw from 834
 - - sternum from 862
 - - tibia from 456
 - - to portal fissure, colic from 147
 - - pupil irregular after 674
 - - purpura due to 676
 - - rectovesical fistula from 296
 - - of rectum, blood per anum from 96
 - - incontinence of faeces from 394
 - - surgical emphysema from 254
 - - rupture of sphincter iridis from 674
 - - sarcoma after 821
 - - to sciatic nerve, talipes from 145
 - - septicaemia from 739
 - - severe, bradypnoea from 110
 - - collapse from 110
 - - delirium tremens after 214
 - - shock after 110, 392
 - - to shoulder, pain due to 580, 581
 - - spine, abdominal pain from 151
 - - colic simulated from 151
 - - compression myelitis from 628
 - - effects of 870
 - - haematoma from 151
 - - haematrachis from 146
 - - haemorrhage into cord from 656
 - - hemianesthesia from 385
 - - **hemiplegia** from 382, 385
 - - hyperpyrexia from 391
 - - incontinence of urine from 495
 - - intercostal pain after 531
 - - micturition difficult from 402
 - - myelitis from 391
 - - pain in legs from 176
 - - paralysis of diaphragm from 385
 - - paraplegia from 656
 - - **priapism** from 656
 - - spastic legs from 176
 - - - paraplegia from 145
 - - talipes from 145, 146
 - - testis atrophy after 85, 86
 - - transverse myelitis from 486
 - - spleen, pain in spleen due to 788
 - - rupture of spleen due to 788
 - - splenic enlargement from 778, 788
 - - strangulation of spleen due to 788
 - - stenosis of vagina from 23
 - - still neck after 795
 - - to stomach, blood per anum from 97
 - - colic from 148
 - - hamatemesis from 336
 - - surgical emphysema from 254
 - - subconjunctival haemorrhage from (Fig. 235) 287
 - - subdural haemorrhage from 870
 - - subperiosteal haemorrhage from 870
 - - tenderness of chest from 861, 862
 - - - scalp from 865
 - - **spine** from 868, 870
 - - testis atrophy from 85, 86
 - - of testis, atrophy after 393
 - - epididymo-orchitis from 585
 - - hamatocele from 587, 588, 589
 - - hydrocele from 588
 - - orchitis from 587
 - - sarcoma from 587
 - - vomiting due to 929
 - - thoracic duct, chylous pleuritic effusion from 138
 - - tibia, arrested growth of the bone after 147
 - - overgrowth of the bone after 147

Injury, contd.

- tongue swollen from .. 851, 852
- torsio testis from .. 850
- torticollis from .. 795

- - - Riedel's lobe simulating .. 438
- - - from sarcoma .. 351, 448
- - - shape of .. 437
- - - spleen distinguished from .. 775
- - - simulated by .. 775, 812
- - - suprarenal tumour distinguished from .. 776
- - - simulating .. 413, 439

Kidney, enlargement of, contd.

- from tuberculous .. 448, 449, 578, 721
- uterine fibroid simulating .. 438
- varicocele with .. 437
- from vesical growth .. 354
- tumour .. 349
- fatty degeneration of, in phosphorus poisoning .. 421
- floating .. 813
- Riedel's lobe simulating .. 461
- **FUNCTION, TESTS OF** .. 19
- granular (see Granular Kidney)
- hydatid cyst of, hydro-nephrosis simulated by .. 450
- hooklets from .. 450
- hypernephroma of (see Hypernephroma)
- infant of (see Infant)
- injury of (see Injury)
- lardaceous (see Lardaceous Kidney)
- large white, in large white patient .. 47
- method of palpating .. 350
- movable, account of .. 813
- albuminuria from .. 9, 564
- appendicitis simulating .. 564, 814
- ascending nephritis from .. 9
- biliary colic simulating .. 554
- in blue brain cases .. 205
- carcinoma of colon simulating .. 813
- colic from .. 147, (Fig. 373) 447, 554
- constipation and .. 164
- cystoscopy in diagnosing .. 564
- Dietl's crises from .. 117, 352, 814
- duodenum dragged by .. 352
- flanked by .. 413
- enteroptosis with .. 413
- fecal mass simulating .. 813
- Fallopian tube lesion simulating .. 813
- frequency of micturition from .. 352
- gall-bladder enlargement from .. 315, 316, 813
- gastro-intestinal symptoms due to .. 352
- gastroptosis with .. 399
- hamaturia from .. 348, 352, 564
- with hepatosis .. 463
- hydatid cyst simulating .. 813
- hydronephrosis from (Fig. 373; 447, 554, 654, 814
- in iliac fossa .. 829
- jaundice from .. 413
- kinked ureter from .. 9
- liver displaced with .. 461
- lumbar aching from .. 352
- mesenteric tumour simulating .. 813
- mucocoele of gall-bladder simulating .. 317
- noises in head with .. 504
- omental mass simulating .. 813
- ovarian cyst simulating .. 438
- tumour simulating .. 813
- pain in hypochondrium from .. 554
- iliac fossa from .. 558, 564
- loin from .. 528, 564
- in pelvis .. 827
- **physical signs of** 315, 316
- polyuria from .. 352, 814
- pyelography in diagnosing .. 554, 564, 814
- renal colic from .. 352
- tumour from .. 554
- Riedel's lobe simulating .. 315, 812, 813
- sickening sensation in .. 413
- tight lacing and .. 461

Kidney, movable, contd.

- undue pulsation of abdominal aorta with .. 662
- ureteral catheterization in diagnosing .. 564
- vomiting due to .. 929
- new growth of, albuminuria from .. 9, 10, 16
- blood-clot from .. 351
- kidney in .. 147, 351
- casts due to .. 147
- colic due to .. 147
- cystoscope in diagnosing .. 10
- fragments of, in urine .. 10
- hamaturia from .. 10, 349, 351, 910
- inferior vena cava invaded from .. 10, (Fig. 683) 909, 910
- involving renal veins .. 10
- operation in diagnosing .. 10
- renal colic in .. 147
- tumour due to .. 10
- varicocele with .. 449
- normal excursion of, on respiration .. 440
- oxygen injection .. 938
- pain in (see Pain)
- pale granular (see Granular Kidney)
- papilloma of (see Papilloma)
- pelvis, carcinoma coli opening into .. 647
- dilated, from ureteric calculus .. 577
- and see Hydro-nephrosis and Pyonephrosis
- normal (Fig. 369) 445
- capacity of .. 445
- polycystic (see under Cystic Kidneys)
- **pyelography in investigating** .. 439, 445-447
- red granular (see Granular Kidney)
- retention cysts in .. 14, 15
- rhabdomyoma of .. 449
- colic from .. 147
- **Rose-Bradford** .. 14
- after scarlet fever .. 282
- sarcoma of (see Sarcoma)
- scarred .. 11
- serous cyst of, hydro-nephrosis simulated by .. 450
- sickening sensation on palpating .. 316
- **single, good health with** .. 56
- skiagram of normal .. 439
- (Fig. 353)
- stone in (see Calculus, Renal)
- suppuration, subphrenic abscess from .. 807
- tender, from stone .. 554
- in tuberculous disease .. 448
- tenderness over, from .. 91
- bacteriuria .. 91
- tuberculous (see Tuberculosis of Kidney)
- **tumour of** .. 350
- aching in loin from .. 351
- albuminuria with .. 67
- ascites from .. 61, 67
- from cystic disease .. 15
- dilatation of stomach from .. 218
- in epigastrium .. 811
- hamaturia with .. 348
- jaundice from .. 407
- loin filled by .. 814
- from polycystic disease .. 57
- portal vein obstruction by .. 61, 67
- pyloric stenosis from .. 67
- pyuria with .. 67
- simulating enlarged liver .. 67

- uræmia in .. 211
- no wasting in .. 631
- shuffling gait in .. 314
- sinus thrombosis (see
- Thrombosis)

Lateral, contd.

- ventricle (see Ventricle)
- Lateralizing test of hear-
- ing .. 206
- Lateralpulsion in paralysis
- agitans .. 881
- Latissimus dorsi (see under Muscle)
- Laughter, exaggerated, in
- double hemiplegia .. 294
- laminal lenticular de-
- generation .. 294
- explosive, in double
- hemiplegia .. 290
- exuberant, in paralysis
- agitans .. 292
- luccough from .. 386
- regurgitation of food
- through nose from .. 730
- Laundry work, dermatitis
- due to .. 916
- Laurel, dermatitis due to .. 916
- Lavage of bladder in dia-
- gnosing origin of pyuria .. 716
- stomach in coma .. 154
- diagnosing hour-glass
- stomach .. 399
- opium poisoning .. 154
- Laverania malaria, astro-
- autumal malaria from .. 38, 41
- characters of .. 42
- illustrated (Fig. 76, 41)
- Maurer's dot in .. 42
- Lawsuit, neurosthena and .. 871
- Lead, abdominal pains
- from .. 594
- abortion from .. 45
- acute mania from .. 184
- albuminuria from .. 16, 45
- amblyopia due to .. 922
- amebiasis from .. 23
- anæmia from .. 43, 44, 45
- anuria from .. 55, 57
- bleeding gums from .. 94, 94
- brachial neuritis from .. 541
- cachexia from .. 138
- cacopustia due to .. 860
- central scotoma due to .. 922, 923
- cerebral symptoms
- from .. 882
- colic from .. 45, 148, 151, 163, 525
- renal colic simulating .. 554
- coma from .. 154
- constipation from .. 45, 161, 168
- convulsions from .. 45, 184
- cramps from .. 594
- delirium from .. 212
- dysphagia from .. 243
- dyspnoea from .. 246
- encephalopathy from .. 45
- epigastric pain from .. 45
- epilepsy from .. 45
- faces analysis for .. 85
- fatty degeneration of
- heart from .. 70
- foot-drop from .. 146
- gout from .. 45
- granular kidney from .. 45
- headache from .. 45, 184, 371
- impaired sight from .. 45
- impotence from .. 393
- infantism from .. 235
- insomnia from .. 45
- intracranial bruit from .. 878
- irritability from .. 405
- leucopenia from .. 455
- lips tremulous from .. 882
- mania from .. 45
- mental changes from .. 45
- mimes, ankylostomiasis
- in .. 103
- musculo-spiral nerve
- affected in .. 616
- nausea from .. 45
- neuritis from .. 610
- noises in head from .. 504
- nystagmus from .. 505
- ophthalmoplegia from .. 45
- optic atrophy due to
- (Fig. 135) 156, 922
- neuritis from .. 45
- (Fig. 135) 156, 371, 922
- out of condition from .. 113
- paralysis of external
- popliteal nerve from .. 610

Lead, contd.

- peripheral neuritis from .. 45, 80, 84, 178, 214, 570, 616
- poisoning, acute appen-
- dicitis with .. 151
- blue line on gums from .. 45, 84, 149, 151, 155, 161, 168, 525, 616
- without blue line on
- gums .. 85
- cerebral tumour simu-
- lated by .. 371
- general account of .. 45
- paralysis simulated
- by .. 882
- from hair-wash .. 85
- occupation and .. 149, 151, 155, 168, 184, 594
- perforated gastric ulcer
- with .. 151
- supinator longus ex-
- caping in .. 616
- triiceps escaping in .. 616
- urine analysis in .. 85
- from water .. 85
- punctate basophilia from .. 30
- retrobulbar neuritis from .. 547
- saturnine encephalopathy
- from .. 155, 184, 214
- shortness of breath from .. 113
- sixth nerve paralysis from .. 45
- in stool .. 45, 94, 155, 184
- test, ammonium sulphide
- in .. 85
- tetany from .. 189
- tongue tremulous from .. 882
- toxæmia from .. 113
- tremor due to .. 879, 881, 882
- in urine .. 45, 94, 155, 184
- vertigo from .. 504
- vomiting from .. 45
- wrist-drop from .. 45, 216
- Lead, bottle stomach
- (see Carcinoma of Stomach, Diffuse)
- tanners, dermatitis in .. 917
- Leatherwork, dermatitis
- due to .. 915
- Leber's optic atrophy .. 923
- Lecithin in chylous ascitic
- fluid .. 73
- phosphate in urine from .. 637
- Lecture-room, fainting in .. 297
- Leech-bite, purpura due
- to .. 676, 677
- Leech, cacopustia due to .. 860
- Leg, oedema of, one, from
- thrombosis .. 68
- PARALYSIS OF ONE .. 607
- (and see Paralysis)
- right, drawn up in appen-
- dicitis .. 828
- spastic paralysis of one,
- in syringomyelia .. 142
- white (see Phlegmasia
- Alba Dolens)
- Legs affected in Little's
- disease .. 169
- anaesthesia of (see Anas-
- thesia)
- atetosis of .. 604
- atrophic palsy of .. 609
- atrophy of, from alcohol
- .. 84
- in mercury .. 893
- from peripheral neur-
- itis .. 85
- bending of, in osteitis
- deformans .. 194
- bow- in achondroplasia .. 233
- rickets .. 232
- cellulitis of (see Cellulitis)
- cramps in (see Cramps)
- crossing of, difficult in
- obturator nerve para-
- lysis .. 610
- deformed in mollities
- ossium (Fig. 260) 305
- dragging of, in hemi-
- plegia .. 314
- hysteria .. 608
- infantile paralysis .. 314
- monoplegia .. 314
- paraplegia .. 314
- drawing up of, in colic .. 525
- infants .. 402
- intussusception .. 101, 829
- in entomelus .. 234

Legs, contd.

- elephantiasis of, in filariasis . . . 36
- epithelioma of (see Epithelioma)
- erythema of, from standing . . . 502
- - nodosum affecting . . . 502
- - papulatum affecting . . . 600
- extension of, impaired in paralysis of anterior crural nerve . . . 609
- - flaccid, in hysteria . . . 608
- - flexed, to relieve pain . . . 815
- fracture of, compound, cellulitis from . . . 147
- - talipes after . . . 147
- - delirium tremens after . . . 214
- gangrene of (see Gangrene)
- gumma of . . . 895
- - iodide curing . . . 500
- hereditary trophedema of . . . (Fig. 406) 512
- inequality of, method of determining . . . 191
- inverted, to relieve pain . . . 815
- lightning pains in, in tabes dorsalis . . . 253
- - lupus of . . . 895
- lymphatic drainage of . . . 830
- Madura disease of . . . 893
- nodules on, from varicose veins . . . 502
- oedema of (see Oedema)
- pain in (see Pain)
- paralysis of (see Paralysis)
- peroneal atrophy affecting . . . 620
- - in phocomelus . . . 234
- - pigmented scars on, from syphilis . . . 261, 382
- - pruritus of, after bathing . . . 659
- pseudo-oedema of, in myxoedema . . . 656
- - rickets affecting (Fig. 192) . . . 232
- - rigid, in hysteria . . . 608
- sensory centre for . . . (Fig. 485) 631
- - short, in achondroplasia . . . 233
- - shortened in talipes . . . 144, 145
- - sore on, inguinal glands enlarged from . . . 476
- - popliteal gland enlarged from . . . 477, 845
- - spastic (see Spasticity)
- - swollen in myxoedema . . . 50
- - in tetany . . . 189
- thrombosis in (see Thrombosis)
- - tremor of (see Tremor)
- trophedema of (Fig. 406) . . . 512
- **ULCERATION OF** . . . 893
- - (and see Ulceration of Leg)
- - varicose ulcer of . . . 393
- - xeroderma pigmentosum affecting . . . 888
- **Leah's test for acetone** . . . 3
- - - - - (Fig. 2-7) 4
- - - - - stain (see Stain)
- - - - - human-Donovan bodies . . . (Fig. 605) 779
- - - in blood films . . . 37
- - - - kala-azar . . . 37, 709, 780
- - - - liver pulp . . . 455
- - - - - puncture and . . . 37
- - - - in spleen . . . 709
- - - - - pulp . . . 455
- - - - spleen puncture and . . . 37
- **Leishmaniasis** . . . 37, 455
- - - - - anaemia in . . . 455
- - - - - eosinophil cells in . . . 455
- - - - - Leishman - Donovan bodies in . . . 455
- - - - - leucopenia in . . . 455
- - - - - visceral . . . 37
- **Lemon-yellow colour in pernicious anaemia** . . . 294
- **Lens, coloboma of** . . . 517
- - dislocation of (see Dislocation)
- - iris adherent to, after iritis . . . 288
- - opacity in, defect of vision due to . . . 924
- - pigment particles on . . . 288
- **Lenticular cancer of skin** . . . 886
- - - - - degeneration, familial, exaggerated laughter in . . . 294

Lenticular degen., fami., contd.

- - - - - facies of (Fig. 256) . . . 294
- - - - - liability to fall to one side in . . . 294
- **Lentigo (see Freckles)**
- **Leontiasis ossea** . . . 254
- - - - - acromielyal distinguished from . . . 255, 837
- - - - - face bones enlarged in . . . 820, 837
- - - - - facies in . . . 255
- - - - - hands and feet not affected in . . . 837
- - - - - head enlarged in . . . 254
- - - - - increasing size of hats in . . . 820
- - - - - lower jaw enlarged in . . . 834
- - - - - noises in head in . . . 504
- - - - - osteitis deformans related to . . . 255
- - - - - petrous bone thickened in . . . 504
- - - - - sella turcica normal in . . . 255
- - - - - skiagraph of skull in . . . (Fig. 215) 255
- - - - - skull changes in . . . 255
- - - - - - enlarged in . . . 820, 837
- - - - - syphilis and . . . 255
- - - - - tibiae enlarged in . . . 255
- - - - - vertigo from . . . 504
- - - - - X rays in diagnosing . . . 255
- **Leopard's bane, dermatitis due to** . . . 915
- **Lepra bacilli** . . . 478
- **Leprosy, account of** . . . 478, 501
- - - - - acid-fast bacilli in . . . 82
- - - - - acne rosacea simulated by . . . 501
- - - - - anaesthesia in . . . 82, 478, 645
- - - - - anæsthetic . . . 321, 501
- - - - - bacilli (see Bacillus)
- - - - - bullæ in . . . 743
- - - - - crusts in . . . 743
- - - - - erythema in . . . 276, 278, 478
- - - - - - nodosum simulated by . . . 501, 502
- - - - - - simplex simulated by . . . 478
- - - - - finger affected by . . . 256
- - - - - forehead enlarged in . . . 317, 321
- - - - - hoarseness in . . . 388
- - - - - invasion period in . . . 478
- - - - - of larynx, hæmoptysis from . . . 361
- - - - - leucoderma distinguished from . . . 645
- - - - - lupus simulated by . . . 501
- - - - - lymphatic glands enlarged in . . . 478
- - - - - macules in . . . 478, 501
- - - - - microscope in diagnosis . . . 892
- - - - - necrosis in . . . 82
- - - - - nerve trunks thickened in . . . 478
- - - - - nodular . . . (Fig. 388) 501
- - - - - nodules in . . . 82, 501
- - - - - of nose, epistaxis from . . . 273
- - - - - pains about joints in . . . 502
- - - - - paresis not marked in . . . 82
- - - - - pemphigus simulated by . . . 743
- - - - - perioritis due to . . . 818
- - - - - peripheral neuritis in . . . 80, 82, (Fig. 472) 616
- - - - - pigmentation of skin in . . . 313, 644
- - - - - psoriasis rupioides simulating . . . 743
- - - - - rupia simulated by . . . 743
- - - - - scabs in . . . 743
- - - - - scales in . . . 743
- - - - - scars in . . . 501, 743
- - - - - sweating absent in . . . 478
- - - - - patches of . . . 478
- - - - - sycosis simulated by . . . 501
- - - - - syphilis simulated by . . . 501, 502, 743
- - - - - - simulating . . . 82
- - - - - - syringomyelia simulating . . . 82, 478
- - - - - - telangiectases in . . . 501
- - - - - - tinea versicolor simulating . . . 313
- - - - - - ulceration in . . . 82, 743
- - - - - - of face in . . . 892
- - - - - - larynx from (see Ulceration of Larynx)
- - - - - - skin in . . . 501
- - - - - - tongue from . . . 244
- **Wassermann reaction positive in** . . . 502

Leprosy, contd.

- - white areas in . . . 478, 645
- - - - - Leptothrix fever . . . 687
- - - - - perioritis due to . . . 818
- - - - - septicæmia . . . 692
- - - - - temperature chart of . . . (Fig. 571) 693
- **Leucanthemum vulgare, dermatitis due to** . . . 916
- **Leucin crystals (Fig. 526)** . . . 416
- - - - - in urine in acute yellow atrophy . . . 345, 416, 928
- **Leucocyte count, differential (see Differential Leucocyte Count)**
- **Leucocytes, basophil (see Basophil Corpuscles)**
- **In blood, abnormal types of** . . . 28
- - - - - numbers of . . . 27
- - - - - chlorosis . . . 346
- **coloured illustrations of** . . . 72
- - - - - diplococci in . . . 742
- - - - - diurnal variations in . . . 452
- - - - - fat globules from . . . 8
- - - - - gonococci in . . . 228, 732
- - - - - high in children . . . 453
- - - - - pregnancy . . . 453
- - - - - in lymphatic leukaemia . . . 34
- - - - - malaria . . . 39, 347
- - - - - pernicious anaemia . . . 30
- - - - - polycythæmia . . . 650, 651
- - - - - pustules . . . 681
- - - - - red cells increased by . . . 51
- - - - - in splenomedullary leukaemia . . . 32
- - - - - stools . . . 681
- - - - - tube-casts . . . 8
- - - - - urine in acute nephritis . . . 12, 17
- - - - - bacteriuria . . . 91
- - - - - from coli bacilluria . . . 559, 699, 712, 933
- - - - - inferior vena cava obstruction . . . 238
- - - - - uterine cast . . . 938
- - - - - vaginal discharge . . . 231
- **Leucocythæmia (see Leukaemia)**
- **Leucocytic casts (Fig. 107)** . . . 7
- **LEUCOCYTOSIS** . . . 452
- - - - - with abscess of kidney . . . 453
- - - - - lung . . . 453
- - - - - acute congestion of liver in . . . 454
- - - - - in acute meningitis . . . 454
- - - - - rheumatism . . . 453
- - - - - sepsis . . . 454
- - - - - from appendicular abscess . . . 453, 454
- - - - - in bronchiectasis . . . 453
- - - - - from cantharides . . . 651
- - - - - in carcinoma . . . 453
- - - - - of liver . . . 468
- - - - - penis . . . 454
- - - - - stomach . . . 454, 777
- - - - - cellulitis . . . 511
- - - - - from cerebral abscess . . . 453
- - - - - in cerebrospinal meningitis . . . 454
- - - - - cervical adenitis . . . 454
- - - - - children . . . 35
- - - - - cholera . . . 453
- - - - - from cinnamon . . . 453
- - - - - in cirrhosis of liver . . . 468
- - - - - congenital syphilis . . . 454
- - - - - from dental abscess . . . 454
- - - - - in diphtheria . . . 453
- - - - - from drugs . . . 453
- - - - - emphyema . . . 47, 453, 454
- - - - - of gall-bladder . . . 316, 453
- - - - - in erysipelas . . . 454
- - - - - from essential oils . . . 453
- - - - - in fetid bronchitis . . . 453
- - - - - follicular tonsillitis . . . 453
- - - - - after hæmatemesis . . . 453
- - - - - from hepatic abscess . . . 417, 453, 454, 695, 464, 695
- - - - - in infective cholangitis . . . 453
- - - - - processes . . . 453
- - - - - intestinal obstruction . . . 453
- - - - - Kaposi's disease . . . 454
- - - - - leukaemia . . . 83, 272, 453
- - - - - lobar pneumonia . . . 47
- - - - - from localized pus . . . 693
- - - - - in lymphatic leukaemia . . . 32, 34, 35, 66, 71, 412, 652, 656, 779
- - - - - measles . . . 453

Leucocytosis, contd.

- in meningococcal meningitis . . . 454
- - - - - gitis . . . 454
- - - - - after mumps . . . 454
- - - - - in myxoedema . . . 453
- - - - - from peppermint . . . 453
- - - - - perioritis . . . 817, 845
- - - - - in peritonitis . . . 524
- - - - - pneumonia . . . 453, 454, 735
- - - - - after post-partum hæmorrhage . . . 453
- - - - - from protargol . . . 453
- - - - - pus . . . 715
- - - - - in pyæmia . . . 738, 739
- - - - - from pyæmic abscess . . . 453
- - - - - with pyælitis . . . 453
- - - - - pylonephritis . . . 453
- - - - - pyonephrosis . . . 453
- - - - - from pyosalpinx . . . 453, 454
- - - - - in pyrexia cases . . . 687
- - - - - rabies . . . 453
- - - - - rat-bite fever . . . 740
- - - - - from ruptured tubal gestation . . . 735
- - - - - salpingo-oophoritis . . . 843
- - - - - sapræmia . . . 453
- - - - - sarcoma . . . 453
- - - - - from scarlet fever . . . 453, 454
- - - - - in septicopyæmia . . . 453
- - - - - after severe blood loss . . . 453
- - - - - small-pox . . . 454
- - - - - in splenomedullary leukaemia . . . 32, 71, 656, 779
- - - - - from subcutaneous abscess . . . 453
- - - - - subdiaphragmatic abscess . . . 555, 807
- - - - - succinic acid . . . 453
- - - - - suppurating lymphatic glands . . . 453
- - - - - in ovarian cyst . . . 453
- - - - - in suppuration . . . 454, 843
- - - - - suppurative cholangitis . . . 697
- - - - - meningitis . . . 454
- - - - - pyelophlebitis . . . 453, 697
- - - - - **symptomatic leukaemia** . . . 454
- - - - - from thrombosed vein . . . 453
- - - - - tonsillar abscess . . . 454
- - - - - in trichinosis . . . 569
- - - - - tuberculous meningitis . . . 454
- - - - - from turpentine . . . 453
- - - - - in typhus fever . . . 417
- - - - - urethritis . . . 453
- - - - - after venesection . . . 453
- - - - - from whitlow . . . 453, 454
- - - - - whooping-cough . . . 453, 454
- **Leucoderma** . . . 459
- - - - - albinism distinguished from . . . 645
- - - - - chloasma distinguished from . . . 645
- - - - - leprosy distinguished from . . . 645
- - - - - macules in . . . 477
- - - - - morphea distinguished from . . . 645
- - - - - scleroderma distinguished from . . . 645
- **Leucomelanoderma, syphilitic (Fig. 507, 508)** . . . 644, 645
- **Leuconychia** . . . 496
- **LEUCOPENIA** . . . 454
- - - - - from alcohol . . . 455
- - - - - in aplastic anaemia . . . 455
- - - - - from arsenic . . . 455
- - - - - chloral . . . 455
- - - - - chronic intoxications . . . 454
- - - - - cocaine . . . 455
- - - - - in dengue fever . . . 455
- - - - - from ether . . . 455
- - - - - heroin . . . 455
- - - - - in kala-azar . . . 455
- - - - - leishmaniasis . . . 455
- - - - - lymphadenoma . . . 455
- - - - - malaria . . . 455, 464, 695, 715, 749
- - - - - from mercury . . . 455
- - - - - in military tuberculosis . . . 455
- - - - - from morphia . . . 455
- - - - - omphop . . . 455
- - - - - in pernicious anaemia . . . 30, 455
- - - - - from plumbism . . . 455
- - - - - in pneumonia in negroes . . . 455
- - - - - from radium . . . 455
- - - - - in splenic anaemia . . . 466
- - - - - from starvation . . . 454
- - - - - stenosis of œsophagus . . . 454
- - - - - trinitrotoluol . . . 455

Leucopenia, contd.

- in tuberculous peritonitis .. 455
- **typhoid fever** 216, 419, 455, 715, 739, 784
- undulant fever .. 455
- from X rays .. 455
- Leucorrhoea, bacchae with** 483
- cachexia with .. 128
- from endometritis 238, 483
- menorrhagia with .. 483
- pigmentation of face with .. 128
- pyosalpinx and .. 724
- pyuria due to .. 716, 723
- septic urethritis from .. 584
- urethritis from .. 228
- Leukæmia, aches and pains in** .. 572
- albumosuria in .. 21
- **aleukæmic type** .. 35
- amenorrhoea in .. 23

- X rays in diagnosing
- cause of .. 457
- Linea alba, hernia in 537, 804
- semilunar, hernia at 804
- LINEÆ ALBICANTES .. 459
- over ascites .. 59, 459
- Lingual nerve, lesion of,
- taste changes due to .. 859, 860
- LIPS, AFFECTIONS OF .. 459**
- angioneurotic oedema .. 513, 824
- ataxy of .. 77
- bleeding in stomatitis .. 95
- blubber, from lymph-
-angitis .. 824
- macroglossia with .. 852
- blueness of, in pneu-
-monia .. 735
- (and see Cyanosis)
- bulbar paralysis affect-
-ing .. 242
- burning .. 460
- capillary pulsation in .. 259
- carcinoma of .. 225

(Fig. 172)

Lips, contd.

- chancere of (Fig. 94) 94, 460, 824
- chapping of .. 459
- condylomata of .. 460
- congested, from mitral
- regurgitation .. 262
- crusts on .. 95, 742, 743
- deep red, in mitral sten-
-osis .. (Fig. 78) 69, 294
- dermatitis herpetiformis .. 95
- affecting .. 459, 742
- eczema of .. 225
- endotheloma of .. 225
- epitheloma of (see
- Epithelioma)
- erythema bullosum .. 95
- fissured in Mongolian
- idiosy .. 203
- Fordyce's disease of .. 460
- herpes febrilis of .. 459
- Zoster of .. 459, 914
- hot in perleche .. 460
- impetigo not attacking .. 914
- itching .. 460
- Koplik's spots inside
- (Fig. 190) 224, 282
- lechen planus of .. 459
- lupus erythematosus of .. 459
- vulvaris of .. 459
- milium bodies on .. 460
- pain in, from chapping .. 459
- mercury .. 94
- paralysis of, in hysteria .. 178
- paresis of, in bulbar
- paralysis .. 751
- pemphigus affecting .. 95
- perleche affecting .. 460
- picking of .. 459
- pigmentation of (see
- Pigmentation)
- pouting, in myopathy .. 201
- protruding in stomatitis .. 95
- psoriasis of .. 459
- rhinoscleroma affecting .. 459
- sarcoma of .. 225
- scorbuthic affection of .. 459
- sepsis on, cervical aden-
-itis from .. 763
- stiffness of .. 460
- stomatitis affecting .. 95
- submaxillary glands
- enlarged from .. 474
- swelling of, from mer-
-cury .. 94
- in stomatitis .. 95
- syccosis vulgaris affect-
-ing .. 743
- syphilis of .. 459, 601
- tenderness of, in stom-
-atitis .. 95
- thick, in acromegaly .. 293
- cretin .. 236, 290, 294
- myxœdema (Fig. 254) 294
- tinca circinata of .. 459
- tremor of, due to alcohol .. 881
- in general paralysis .. 881
- due to lead .. 882
- ulcer of, in secondary
- syphilis .. 898
- ulceration about, in
- yaws .. 501
- upper, excoriation of,
- from diptheria .. 224
- urticaria of .. 459
- varicella affecting .. 919
- vesicles of .. 913
- white patches on .. 460
- Lipamia, chylous ascites
- with .. 72, 140
- pleuritic effusion with 138
- chyliuria with .. 140
- clear ascites with .. 72
- in diabetes .. 72, 334
- from leukemia .. 138
- nephritis 72, 138, 140, 334
- (Fig. 273) 334
- ophthalmoscope in de-
-tecting .. 334
- unsuspected .. 72, 334
- Lipin-globulin combina-
-tion in chylous ascitic
- fluid .. 73
- Lipiodol in bronchiectasis
- (Fig. 690) 938**
- iodine in .. 326
- carcinoma of cord
- (Fig. 270) 326

Lipiodol, contd.

- in skiagraphy of lungs 936
- uterus and tubes
- (Fig. 691) 939, (Fig. 692) 940
- and X rays in locating
- spinal lesions .. 326
- lung cases .. 936
- Lipoma of abdominal wall 804
- axilla, tuberculous ab-
-scess simulating .. 816
- bone .. 821
- breast .. 839
- characters of .. 816
- of face .. 824
- in femoral region .. 826
- groin, cold abscess
- simulated by .. 833
- needing in diagnos-
-ing .. 833
- hernia simulated by .. 804
- neuro-, in von Reckling-
-hausen's disease .. 840
- pelvic swelling due to .. 840
- popliteal .. 845
- psosa abscess, simu-
-lated by .. 831
- retroperitoneal, opera-
-tion in diagnosing .. 843
- ovarian cyst simu-
-lated by .. 843
- of round ligament,
- hernia simulated by .. 842
- impulse on cough-
-ing in .. 832
- sebaceous, et. distan-
-guished from .. 888
- of spermatic cord .. 589
- vulvar swelling due to .. 853
- Lipomatosis, diffuse 509, 801**
- illustrated .. 511
- obesity from .. 505
- Liquor ammoniac in
- Rother's test .. 3
- amino deficient, dystecia .. 250
- arsenicalis, anemia from .. 44
- in pernicious anemia .. 44
- epispastic, bulbe from 124
- hysterical patient
- using .. 124
- malingering using .. 124
- ferri perchloridi in di-
-acetic acid test .. 214
- Ullmann's re-
-agent .. 401
- potassium in melanuria
- test .. 905
- methylene blue test .. 906
- phosphates not dis-
-solved by .. 899
- pus ropy with .. 716
- urates soluble in .. 899
- soda in Legal's test .. 3
- phosphates precipi-
-tated by .. 3
- Lithotomy, perineal fistula
- after .. 766
- Lithority, epididymo-
-orchitis from .. 585
- Litmus, acidity of urine
- to .. 637**
- Little's disease .. 169, 884
- Little's hernia, strangu-
-lated .. 149
- Liver, abscess of (see
- Abscess)
- actinomycosis of (see
- Actinomycosis)
- active congestion of .. 417
- acute yellow atrophy of
- (see Acute Yellow
- Atrophy)
- adenoma of, hydatid
- simulated by .. 469
- albumosuria from lesions
- of .. 21
- angioma of .. 469
- carcinoma simulated
- by .. 469
- Bacillus aerogenes cap-
-sulatus infecting .. 254
- beaded edge, in cirrhosis
- of liver .. 67
- bilharziosis of .. 470
- capsule thickened .. 68
- carcinoma of (see Car-
-cinoma)
- cirrhosis of (see Cir-
-rhosis)

Liver, contd.

- congestion of, in dys-
-pepsia .. 463
- mitral disease .. 538
- pain in epigastrium
- from .. 538
- tropical .. 463
- venous (see Liver,
- Nutricee)
- cyst of kidney simu-
-lated by .. 438
- degeneration of, due to
- drugs .. 422
- chloroform .. 416
- in mushroom poison-
-ing .. 422
- depressed by pleuritic
- effusion .. 209
- 'dipping' to palpate .. 59
- diseases causing ascites .. 62, 67
- displaced by abdominal
- tumour .. 462
- ascites .. 462
- carcinoma of liver .. 438
- from curvature of
- spine .. 461
- downwards by tight
- lacine .. 460
- enlargement simulated
- by .. 461
- by kidney tumour .. 437
- movable kidney and .. 461
- palpable in viscero-
-ptosis .. 526
- from pericardial effu-
-sion .. 461
- pleural effusion .. 461
- pneumothorax .. 461
- by renal enlargement .. 438
- from tickets .. 461
- subphrenic abscess .. 461
- tight lacine .. 461
- distorted, in perihep-
-atitis .. 68
- dragging pain over, from
- hepatoposia .. 463
- dropped, account of .. 462
- carcinoma simulated
- by .. 461
- constipation and .. 164
- when enlarged .. 461
- hepatic dullness in .. 460
- from nutrient change .. 461, 463
- in wasting disease .. 461
- DULLNESS, DEFICIENT .. 460**
- dimnut-bed, in acute
- yellow atrophy 345, 460, 460
- cirrhosis .. 600
- emphysema 208, 269, 460, 462
- by gas in bowels .. 461
- colon .. 462
- from hepatoposia .. 462
- in meteorism .. 805
- perforative peri-
-tonitis .. 460, 462
- by pneumothorax .. 461
- limits of .. 461
- lost, due to gas in
- peritonium .. 805
- in general periton-
-itis .. 734
- raised by abscess of
- liver .. 462
- hydatid cyst 462, 470
- subdiaphragmatic
- abscess .. 462
- edge beaded in cirrhosis
- of liver .. 414
- curled under in peri-
-hepatitis .. 68
- rounded, in peri-
-hepatitis .. 68
- turned up in peri-
-hepatitis .. 68
- eighth dorsal nerve sup-
-plying .. 864
- embryoma of .. 469
- ENLARGEMENT OF 461**
- by abscess 63, 408, 465
- in acholic jaundice 781
- by actinomycosis 412, 470
- from active congestion 417
- by angoma .. 469
- ascites with .. 63

Liver, enlargement of, contd.

- from backward pressure .. 63
- bile-duct obstruction .. 408, 411, 463, 468

Lymph. glands, inguinal, contd.

enlarged from sarcoma	830, 831
scoury	477
sepsis	476
soft sore	764, 765
sore on back	476
buttock	476
tooth	476
leg	476, 830
penis	476
perineum	476
scrotum	476
thigh	476
toe	476, 830
vulva	476
in syphilis	472, 830
due to truss	830
trypanosomiasis	37
tubercle	473, 830
urethral discharge	476
hydrocele of hernial sac simulating	830
inflamed, limping from	457
from sore on skin	562
melanotic sarcoma of	831
parts draining to	830
secondary carcinoma in	727
suppurating	695, 831
pyrexia due to	687
from soft sore	764, 765
tuberculous, abscess due to	831
lumbar, enlarged, from carcinoma of testis	850
sarcoma of testis	587
secondary carcinoma in	727
mastoid, enlarged, from boil in ear	422
mediastinal, carcinoma of, chyluria from	140
thoracic duct obstructed by	140
caseous, cough from	712
delicacy from	386
febrile bouts from	386
glands in abdomen with	386
neck with	386
hiccough from	386
irrupted into bronchus	249
from milk	386, 712
phrenic irritation from	386
pyrexia due to	712
skiagram of	(Fig. 384) 481
in tuberculous peritonitis	(Fig. 563) 705
vagal irritation from	386
von Pirquet test with	712
X rays in diagnosing	386, 712
enlarged, bronchus obstructed by	471, 476
from epithelioma of oesophagus	606
inferior vena cava stenosis by	476
innominate vein stenosed by	476
laryngeal paralysis from	476
in lymphadenoma	66
lymphatic leukaemia	66
from lymphosarcoma	472
superior vena cava stenosed by	476
vocal cord paralysis from	606
X rays in diagnosing	471
lymphadenomatous, bronchiectasis from	367

Lymph. glands, mediast., contd.

lymphadenomatous, fibroid lung from	367
stenosis of bronchus by	367
lymphosarcoma of	152
sarcoma of, second-ary in lung	365
starting in	910
mesenteric, calcified, calculus simulated by	440, 441
caseous	65, 706
adhesions from	167
obstruction from	167
in tuberculous peritonitis	65
Fig. 563	705
enlarged, from carcinoma	476
in dysentery	476
inflammatory	476
in lymphatism	477
seldom palpable	476
in tuberculous of bowel	476
tuberculous	806
in tuberculous peritonitis	476
typhoid fever	476
ulcerative colitis	476
tuberculous, pyrexia due to	712
occipital, enlarged, in German measles	283, 472, 473
Hodgkin's disease	473
from impetigo	472, 473
Kernion	472, 473
in leukaemia	473
lymphadenoma	473
leukemia	472
nits with	473
from pediculosis	472, 473, 695
ringworm	473
seborrhoea	473
sores on scalp	473
suppurating ringworm	472
worm	473
wen	473
wound	473
in syphilis	473
tuberculous	473
pelvic, calcareous	(Figs. 363-365) 443
calcified, ureteric calculus simulated by	442, 443
enlarged, from carcinoma of bladder	350, 577, 721, 722
prostate	350
felt as nodule	476
per rectum	350, 476
malignant	476
from new growth of testis	850
secondary carcinoma in	727
popliteal, abscess from	844
enlarged	844
from arthritis	477
sepsis	477
sore on foot	477
leg	477, 845
toe	477
portal, carcinoma of, colic from	147
caseous, jaundice from	412
enlarged, ascites from	66
bile-ducts obstructed by	66, 422, 784
from carcinoma of colon	68, 476
liver	413
jaundice from	66, 422, 784
leukemic	66, 412
jaundice from	407, 412

Lymph. glands, portal, contd.

enlarged, lymphadenomatous	60, 422
ascites from	61
jaundice from	407, 412
portal vein obstructed by	61
lymphatic leukaemia, ascites from	61
portal vein obstructed by	61
lymphosarcomatous, jaundice from	412
malignant, ascites from	61, 412
jaundice from	407, 412
portal vein obstructed by	61
from ovarian growth	413
portal vein obstructed by	66, 778, 781
sarcomatous	68
secondary to carcinoma	412
syphilitic, jaundice from	407
tuberculous	66
ascites from	61, 67
bile-ducts obstructed by	67
jaundice from	67, 407, 412
portal vein obstructed by	61, 67
lymphadenoma of, colic from	147
sarcoma of, colic from	147
syphilitic, colic from	147
tuberculous, colic from	147
jaundice from	412
pre-articular, enlarged, from acne	473
boils in ear	252
chancere on eyelid	473
epithelioma	473
lupus vulgaris	473
melanotic sarcoma	473
parotid growth simulating	848
pyogenic	848
from rodent ulcer	473
septic infection	473
sore on cheek	473
ear	473
eyelid	473
temple	473
syphilis	848
tubercle	523, 848
tender	252
retroperitoneal, carcinoma in	9, 476
new growth in, haematuria from	910
inferior vena cava obstructed by	909, 910
secondary to ovary	910
testis	910
secondary epithelioma in	886
submaxillary, calculus in	848
chorda tympani supplying	605
enlarged, abscess from	474
from carious tooth	474
diphtheria	474
epithelioma	474, 897
facial inflammation	474
hospital sore throat	474
lichen scrofulosorum with	598
pain in	474
from quinsy	474

Lymph. glands, submaxil., contd.

enlarged from scarlet fever	474
septic absorption	474
stromatous	474
syphilis	474
tonsillitis	474
tubercle	474
Vincent's angina	474
suppurating, causes of	695
leucocytosis from	453
sites of	695
skin reddened over	695
tenderness of	695
supraclavicular, carcinoma in	9
(Fig. 77)	66, 138, 277, 315, 316, 397, 475, 776, 777, 897
enlarged, account of	475
from growth in abdomen	475
tender, in rheumatoid arthritis	47
thoracic, enlarged in Hodgkin's disease	782
tuberculous, account of	712
acc. incidence of	475
anaemia with	43
ascites from	67
in children	712
colic from	147
in prom.	830
round ear	523
jaundice from	67
lymphadenoma distinguished from	475
simulated by	473
microscopical examination in diagnosis	473, 474
from milk	474, 481, 932
in neck in children	480
nodules in neck with	481
portal	66
vein obstructed by	67
not predisposing to phthisis	474
pyrexia due to	481, 706, 711, 712, 713
tuberculous peritonitis with	65
ureter obstructed by	147
von Pirquet's skin test and	481
(and see Adenitis)	
leukemia (see Leukemia)	
obstruction from burn	894
chylous ascites from	72
in elephantiasis	894
by filaria	512, 855, 894
fracture	894
after labour	894
oedema due to	511
in phlegmasia alba dolens	894
solid oedema from	512
ulcer of leg due to	894
Lymphatism, account of	477
Lymphocytes, age variations in	28
in ascitic fluid	65
cerebrospinal fluid (see Cerebrospinal Fluid)	
Hodgkin's disease	49
indeterminate, coloured figure of (Fig. 36)	29
in Kaposi's disease	454
large	27
hyaline, coloured figure of (Fig. 37)	29
Jenner's stain and	28
in lymphatic leukaemia	35
malaria	738
in lymphatic leukaemia	34, 66, 71, 83, 412, 652, 779
pleuritic fluid	132
in tuberculosis	135
relatively high in children	35
small	27
coloured figure of (Fig. 35)	29
Jenner's stain and	28
in lymphatic leukaemia (Fig. 45)	33, 35
in symptomatic leukaemia	454
transitional	28

- dementia simulated by 213
- geographical distribution .. 213
- heat-stroke simulated by .. 213
- from India .. 213
- insanity simulated by .. 157, 213
- mania simulated by .. 213
- from West Africa .. 213
- Cheyne-Stokes breathing in .. 139
- chloretic diarrhoea in .. 39
- chronic, temperature chart in .. *(Fig. 56)* 39
- cirrhosis from .. 417
- cold stage of .. 38, 654
- collapse in .. 39
- colour index low in .. 37
- coma in .. 39, 153
- complex, temperature chart of .. *(Fig. 55)* 39
- congestion of liver in 417
- crescents in blood in .. 420
- deafness from .. 207
- death from .. 39
- delirium in .. 211
- in diabetes .. 335
- diazo-reaction from .. 218
- dysentery simulating .. 709
- eosinophilia after .. 271
- erythema in .. 276, 278

Malaria, contd.

- fainting in .. 297
- flushing in .. 38
- frontal headache in .. 369
- gangrene from .. 317
- general wasting in .. 78
- glycosuria in .. 322
- hæmatemesis from 336, 346, 347
- hamatozoæ in 36, 38, 85, 213, 278
- hæmaturia in .. 348
- hæmoglobinuria from .. 358
- headache in .. 38, 371
- hepatic abscess dis-tinguished from .. 454
- simulated by .. 417
- simulated .. 464, 695
- hot stage of .. 38, 654
- hyperacris from .. 389
- hyperpyrexia in .. 39, 390
- ill health after .. 933
- impotence in .. 393
- in Italy .. 213, 779
- **jaundice in** .. 498, 417
- large hyaline cells in .. 47, 417, 455, 654, 695, 738, 739, 785
- latency .. 42
- due to *Laverania malarie* .. 38, 41
- leucocytes in .. 39, 347
- leucocytosis rare in .. 453
- no leucocytes in 417, 454, 651, 738, 785
- **leucopenia in** 455, 464, 695, 715, 739
- malignant .. 38
- parasites of .. 38
- quotidian .. *(Fig. 60)* 41
- subtertian .. *(Fig. 59)* 41
- tertian .. 39
- parasite of .. *(Fig. 59)* 41
- yellow fever simulated by .. 445
- malarial after .. 482
- malarial fever and .. 38
- multiple infection .. 39
- muscular atrophy in .. 78
- pain in back in .. 48
- eye in .. 547
- limbs in .. 568
- scalp in .. 867
- parasites of .. 38, 39
- umbilical acroty of .. 42
- in blood in 345, 417, 654, 708, 738, 739, 785
- crescent forms of .. 41, 42
- **distinctive points of** .. 42
- gametocytes of .. 41, 42
- illustrated .. *(Figs. 57-60)* 40-41
- life-cycle of .. 42
- Maurer's dots in .. 42
- merozoites of .. 42
- pigment of .. 40, 41, 42
- quinine and .. 39
- ring forms of .. 40, 41, 42
- schizonts of .. 40, 41, 42
- Schuffner's dots in .. 42
- trophozoites of .. 42
- vacuoles in .. 42
- peripheral neuritis in .. 80
- peritonitis in .. 62
- photophobia in .. 639
- pigment granules in urine in .. 39
- in parasites of .. 40
- pigmentation of skin due to *Plasmodium falciparum* .. 41
- malaric .. 38, 40
- vivax .. 38, 40
- polyuria in cold stage of .. 654, 654
- prolonged pyrexia in .. *(Fig. 56)* 39
- purpura in .. 676
- **pyæmia distinguished from** 739
- pyrexia in 37, 38, 39, 688
- **quartan** .. 38, 738
- acute nephritis in .. 11
- parasites of .. 38
- *Plasmodium malarie* causing .. 40
- temperature chart of .. *(Fig. 52)* 38
- quinine in 39, 417, 654, 738
- in diagnosing 687, 785

Malaria, contd.

- quinine test for .. 739
- quotidian, due to double tertian .. 38
- temperature chart of .. *(Fig. 53)* 38
- recrudescences of .. 42
- rigors in 38, 278, 737, 738
- ring parasites in .. 40
- schizonts of .. 40
- severe anaemia in .. 16
- spleen enlarged in 346, 347, 778, 785
- sweating stage in .. 38
- tenderness of scalp in .. 867
- tertian .. 38
- double infection of .. *(Fig. 54)* 39
- jaundice in .. 417
- parasites of 38, *(Fig. 57)* 40
- quotidian type .. 38
- temperature charts in .. *(Fig. 51)* 37, *(Fig. 53)* 38, *(Fig. 54)* 39
- thyroid gland enlarged in .. 877
- tinnitis due to .. 879
- tripanosomiasis simulating .. 708
- urobilinuria in 39, 417, 902
- vomiting in .. 39
- Wright-Romanowsky stain for .. 40, 41
- yellow fever simulating 420
- Malay States, ulcerative dermatomycosis in 312
- Male climacteric, flushing due to** .. 303
- priapism at .. 657
- faint collapse from .. 421
- jaundice due to 408, 421
- tapeworm .. 421
- Malin's cachexia (see Cachexia)
- diarrhoea, cachexia from 16
- of colon, account of .. 98
- hypothermia in .. *(Fig. 317)* 392
- of joint .. 435
- lung .. 132
- pleura .. 132
- bloody effusion from 132
- rectum, account of .. 98
- severe anaemia in .. 16
- and see Carcinoma, etc.
- endocarditis (see Endocarditis, Infective)
- malaria (see Malaria)
- measles .. 345, 362
- oedema, gas production in .. 647
- pneumothorax from 647
- peritonitis (see Peritonitis)
- polymorphonitis .. 138
- pustule .. 682, 683
- (and see Anthrax)
- scarlet fever .. 345
- small-pox .. 345, 362
- specific fevers, bleeding gums in .. 362
- epistaxis in .. 362
- hæmoptysis in .. 362
- stomatitis, pyralism from 661
- Malin's syndrome .. 51
- Malinger, aneurysm simulating** .. 531, 572
- anuria simulated in .. 58
- blood from ear in .. 522
- bruising in .. 677
- bulle in .. 124
- cantharides used in .. 124
- capsicum used in .. 124
- carbolic acid used in .. 124
- carcinoma of spine simulating .. 531
- stomach simulating 572
- coma in .. 181
- convulsions in 181, 184, 741
- cordite used in .. 596, 859
- croton oil used in .. 124
- epilepsy simulated in 174
- erythema due to 275, 276
- eye-opening resisted in 174
- foaming at mouth in .. 184
- fowl's blood in .. 359
- vomited in .. 337
- hæmatemesis from 336, 337
- hæmoptysis in .. 359
- heatedness in .. 174
- hyperpyrexia in .. 391

Malingering, contd.

- **hysteria distinguished from** .. 435
- insomnia in .. 402, 404
- iodine used in .. 124
- **jaundice produced in** .. 421
- liquor epispasticus used in .. 124
- lock-jaw and .. 885
- mylbrabris used in .. 124
- nitric acid used in 124, (Fig. 667) 894
- **paraplegia due to** 626, 632
- photophobia from 639, 640
- **pleric acid used in** .. 421
- purpuric bruising in .. 677
- pyrexia due to 391, 688
- **pretended in** .. 711
- quivering eyelids in .. 174
- reaction to painful stimuli in .. 174
- redness in .. 174
- risus sardonius in .. 741
- stertor in .. 184
- thumb position in fits of .. 184
- traumatic neurasthenia simulating .. 870
- trench fever simulating .. 710
- ulcer of leg in (Fig. 667) 894
- varicose ulcer simulated in .. 894
- vesicants used in .. 124
- Mallein injection in diagnosing glands .. 683
- **MALLET FINGER** .. 479
- Malleus .. 205
- Malpresentation, breech .. 250, 251
- brow .. 250
- dystocia from .. 250
- early rupture of membranes from .. 250
- face .. 250, 251
- occipito-posterior .. 250, 251
- **recognition of** .. 251
- transverse .. 250, 251
- Malt liquors, obesity from 505
- polyuria from .. 653
- Malta fever (see Fever)
- Mamma (see Breast)
- Manchester emphysema of arsenic in beer 85, 642, 645
- Manchinel, dermatitis due to .. 916
- Mandible (see Jaw)
- Mandibular sensory area (Figs. 42, 45) .. 550
- Mandrake, dermatitis due to .. 916
- Manganese, ataxy from .. 212, 882
- colossal, delirium from .. 212
- rigor from .. 737
- combined sclerosis simulated by .. 212
- delirium from .. 212
- memory defect from .. 25
- mental changes due to .. 882
- nystagmus from .. 212, 505, 882
- .. 879, 881, 882
- .. 212
- .. 402
- .. 45, 184
- .. 181
- .. 503
- .. 404
- .. 157, 213
- .. 675
- .. 155
- .. 214
- .. 173
- .. 312
- .. 312
- Manubrium, pain behind, from cardiac causes .. 51
- **MARASMUS** .. 479
- acidosis in .. 479
- from caseous bronchial glands .. 480
- in children .. 479
- from congenital syphilis .. 480
- diarrhoea .. 479
- dirt .. 480
- fontanelle depressed in .. 479
- gangrene from .. 317
- general wasting from .. 78

Marasmus, contd.

- hernia of lung in .. 210
- keratomalacia from .. 891
- muscular atrophy from .. 78
- recovery from .. 480
- from starvation .. 480
- vomiting .. 479
- (and see Wasting; Weight, Loss of, etc.)
- Marching, glycosuria from 330
- Marie, spondylose rhizomelique of .. 869
- Marigold, dermatitis from 915
- Marriage, unhappy, dyspareunia from .. 240
- urethritis and .. 229, 230
- Marrow, albumose and affection of .. 22
- long bone, not red in aplastic anaemia .. 31
- red in pernicious anaemia .. 31
- red, hyperplasia of, in blood diseases .. 862
- tenderness of bones from .. 862
- Marsh cachexia .. 128
- gas, hunting due to .. 297
- fire-damp and .. 154
- in wind belched .. 302
- Marsh's test for arsenic .. 103
- Maruta, cutula, dermatitis from .. 916
- Masculinism, gigantism with .. 325
- Mask faces in paralysis agitans .. 292
- Mason, dermatitis in .. 917
- Massage, contracture prevented by .. 178
- high blood-pressure relieved by .. 404
- insomnia relieved by .. 404
- for oedema of legs .. 516
- of prostate in detecting prostatitis .. 229
- in rheumatoid arthritis .. 427
- Masseter (see under Muscles)
- **Massive collapse of lung, account of** .. 375
- Mastication affected in bulbar paralysis .. 172
- muscles of, atrophied in bulbar paralysis .. 773
- **Mastitis, acute, account of** 837
- axillary glands enlarged from .. 838
- carcinoma simulated by .. 838, 839
- **chronic, account of** 838
- cysts in breast from 227, 835
- fibro-adenoma of breast distinguished from .. 839
- fluctuation in .. 838
- in lactation .. 837
- microscope in diagnosis .. 835
- oedema of breast in .. 838
- pain in breast .. 529, 837
- chest from .. 530
- in pregnancy .. 837
- pus from nipple due to .. 227
- pyrexia in .. 837, 838
- serous discharge due to .. 227
- shivering in .. 837
- skin reddened over .. 838
- tenderness of breast in .. 838
- chest from .. 861
- tuberculous, pus from nipple due to .. 227
- weight in breast in .. 837
- **Mastodynia, account of** 531
- pain in breast from .. 529
- chest from .. 530
- Mastoid abscess (see Abscess)
- bone, overgrown in acromegaly .. 293
- disease, cerebral abscess from .. 613
- unilateral headache with .. 370
- gland enlarged from boil in ear .. 252
- oedema from sigmoid sinus thrombosis .. 739
- process, carcinoma infiltrating .. 253
- tender, in otitis media .. 253

Mastoid, contd.

- sinus, new growth in .. 370
- headache from .. 370
- suppuration in, head-ache from .. 370
- swelling from cavernous sinus thrombosis .. 284
- tender, from mastoiditis .. 522
- sigmoid sinus thrombosis .. 739
- Mastoiditis, acute, from otitis media .. 253
- pain behind ear from .. 253
- pointing in meatus .. 252
- herpes simulating .. 253
- **otorrhoea from** .. 522
- tenderness of mastoid from .. 522
- Masturbation, impotence from .. 393
- priapism from .. 657
- Match manufacture, phosphorus and .. 94
- in urethra .. 230
- Matches, phosphorus poisoning and .. 421
- Maurer's dots in malaria parasites .. 42
- Maxilla (see Jaw)
- Maxillary area, pain in, from glaucoma .. 550
- iritis .. 550
- nerves, distribution of .. 865
- sensory area (Fig. 666) 550
- May-weed, dermatitis due to .. 916
- Meadow saffron, dermatitis due to .. 915
- Measles, test see Test Measles
- Measles, albuminuria in .. 17
- albumosuria in .. 30
- anaemia due to .. 756
- arthritis from .. 425
- black .. 345
- bleeding gums in .. 362
- cancerous oris after .. 95
- cerebrospinal meningitis simulating .. 278
- coma in .. 153
- **common cold simulated by** .. 224, 282
- convulsions in .. 181
- **coryza in** 223, 221, 479, 547
- cough in .. 479
- delirium in .. 211
- diabetes after .. 334
- diazo-reaction in .. 218
- diphtheria with .. 246
- dyspnoea in .. 246
- empyema after .. 739
- encephalitis simulating .. 278
- eosinophilia after .. 271
- epiphora from .. 272
- epistaxis in .. 274, 362
- erythema in .. 276
- eyes swollen in .. 515
- gangrene from .. 317
- general tuberculosis from .. 480
- German (see German Measles)
- hamatemesis in .. 345
- haemoptysis in .. 362
- jaundice in .. 420
- **Koplik's spots in** .. 224, 282
- laryngitis in .. 246
- leucocytosis rare in .. 453
- macules in .. 685
- maculopapular rash in .. 282
- malignant .. 345, 362
- meningitis from .. 480
- metrorrhagia after .. 482
- noma in .. 318
- oedema of face from .. 515, 516
- pain in eye in .. 547
- limbs in .. 570
- peroneal atrophy after .. 624
- photophobia in .. 639, 640
- purpura in .. 345, 676
- pyrexia in .. 640
- rash in .. 640
- rigor in .. 737, 739
- running at nose and eyes in .. 282
- scales in .. 744
- several attacks of .. 283
- sore throat due to .. 757

Measles, contd.

- syphilis simulated by .. 479
- talipes from .. 145
- thrombosis of cerebral veins from .. 145
- Tooth's peroneal atrophy after .. 79
- Meat, distaste for, in gastric carcinoma .. 58, 397
- fibres in faeces .. 300
- Tania solum from .. 633
- trichinosis from .. 569
- Meatal sinus, boil in ear simulated by .. 522
- from mastoiditis .. 522
- Meatitis, diffuse .. 252
- pus from ear due to .. 522
- Meatus, auditory, ivory exostosis of .. 820
- external (see External Auditory Meatus)
- urinary, external, red in gonorrhoea .. 228
- herpes of .. 913
- small, enuresis from 270
- increased frequency of micturition from .. 491
- Meckel's diverticulum, obstruction from .. 167
- Median nerve (see Nerve)
- paralysis, Volkmann's contracture simulating .. 617
- Mediastinal abscess (see Abscess)
- adhesive .. 71
- carcinoma, chyluria from 40
- thoracic duct obstructed by .. 140
- crepitations .. 535
- dermoid cyst, dyspnoea from .. 247
- fibrosis, adherent pericardium with .. 265
- aneurysm simulating .. 198
- cutaneous .. 910
- new growth simulated by .. 137
- simulating .. 198
- oedema of arms from .. 514, 516
- face from .. 514, 516
- neck from .. 514, 516
- papulation from .. 295
- after pericarditis .. 910
- pleurisy .. 910
- rheumatic .. 910
- skagram of Fig. 684 .. 910
- superior vena cava obstructed by 137, 514, 516
- syphilitic 137, Fig. 684 910
- tachycardia from .. 856
- tuberculous .. 910
- vagal irritation by .. 856
- varicose veins on chest from .. 137
- X rays in diagnosing .. 137
- glands (see Lymphatic Glands, Mediastinal)
- gumma (see Gumma)
- gummatous .. 137
- hydatid cyst, dyspnoea from .. 247
- larvinal paralysis from .. 606
- lesions, tenderness of sternum from .. 863
- X rays in diagnosing .. 863
- lymphadenoma (see Lymphadenoma)
- lymphosarcoma (see Lymphosarcoma)
- masses, X rays in diagnosing .. 188
- **new growth, account of** 135, 136
- anaemia from 534, 535
- aneurysm simulated by .. 337
- simulating 198, 535
- aorta opened by 336, 337
- ascites from .. 62, 68
- asthma simulated by .. 653
- bronchiectasis from 367
- bronchus obstructed by 365, 367, 386, 534
- cachexia from 534, 535

- cervical sympathetic
- irritated by
- clubbed fingers
- from
- cough from 188, 534
- cyanosis from
- dilated superficial
- veins from
- dyspnoea from
- 246, 247, 250, 534
- epithelioma of oesophagus simulated
- by
- fibroid lung from
- fibrosis simulating
- fullness in chest
- from
- hæmatemesis from
- hæmoptysis from
- heart impulse displaced with
- interfered with
- by
- hiccuping from
- hoarseness from
- inequality of pulses
- from
- inferior vena cava
- obstructed by
- innominate vein
- obstructed by
- laryngeal paralysis
- from
- oedema of arms
- from
- face from
- neck from
- oesophagus opened
- by
- stenosed by
- ophthalmia from
- pain in abdomen
- from
- arm from
- chest from
- head from
- neck from
- palpitations due to
- paralysis of vocal
- cord from
- pupil dilated with
- pyrexia with
- shortness of breath
- from
- Skodak's resonance
- due to
- stridor due to
- superior vena cava
- obstructed by
- 248, 260, 534, 516
- syphilis simulating
- tachycardia from
- tightness in chest
- from
- trachea compressed
- by
- obstructed by
- unilateral sweating
- of head from
- vaginal irritation by
- varicose veins on
- chest from 248,
- 260, 386
- venous obstruction
- by
- vertebrae eroded by
- voice altered by 188,
- vomiting from
- X rays in diagnosis
- 206, 248,
- 506, 562, 654
- (and see Intrathoracic New Growth)
- sarcoma (see Sarcoma)
- syphilis
- syphilitic fibrosis, skiagraph of (Fig. 684) 910
- tumour, intercostal pain
- from
- Mediastinitis in acute
- rheumatism
- acute, mediastinal crepitations with
- pain in back from
- shoulder from
- behind sternum
- from
- syphilitic
- tenderness of sternum
- from
- tuberculous
- chronic
- adherent pericardium
- and
- 70, 71, 265
- ascites from
- inferior vena cava
- obstruction by
- new growth simulating
- from
- from pericarditis
- pleurisy
- in polyrrhometitis
- rheumatic
- without signs
- clubbed fingers from
- fibrous, laceration from
- pain in chest from
- syphilitic, varicose abdominal veins from
- (Fig. 682) 908
- Mediastino-pericarditis
- Mediastinum, aneurysm
- ruptured into
- hæmorrhage into, cyanosis from
- Medical men, chairs on
- finger in
- Medical-legal questions, epilepsy and
- Medial, bradypnoea from
- coma from
- noses in head from
- stupor from
- vertigo from
- Mediterranean fever (see Fever, Malta)
- Medulla oblongata affected by cerebellar artery thrombosis
- bulbar paralysis from
- lesions of
- compressed by cerebellar tumour
- cough centre in
- degeneration of
- from alcohol
- arterial degeneration
- in diabetes
- laceration from
- in old age
- from syphilis
- disease of, spastic
- palsy from
- encephalitis affecting
- hæmorrhage into, bulbar paralysis from
- symptoms of
- lesions of, ataxy from
- in bulbar paralysis
- diabetes insipidus
- from
- quadriplexia from
- neoplasm of, bulbar
- paralysis from
- nuclear degenerations
- in
- puncture of, glycosuria from
- sensory impulses and
- softening of, Cheyne-Stokes breathing
- delirium from
- symptoms of
- due to thrombosis
- of posterior inferior cerebellar artery
- syphilitic degeneration
- tumour of, Cheyne-Stokes breathing
- symptoms of
- vomiting centre in
- Megaloblast, coloured figure of
- Megaloblasts in pernicious anaemia
- severe anaemia
- Megalocyte, coloured figure of
- Megalocytes
- in pernicious anaemia
- 27, 30, (Fig. 43) 31, 83
- severe anaemia
- Meigs's disease, account of
- acute attacks of
- exacerbations of
- backache in
- Bright's disease simulated by
- diarrhoea in
- erythema simulated in
- erythema in
- family history in
- gnosis
- gastric disorder in
- heredity in
- illustrated (Fig. 406) 512
- limb pains in
- malaise in
- oedema in
- pyrexia in
- some symptoms of
- vomiting in
- MELÆNA
- from abdominal injury
- phlebitis
- in acute yellow atrophy
- anaemia from
- from aneurysm
- ankylostomiasis
- bilberries simulating
- bismuth simulating
- from carcinoma of stomach
- charcoal simulating
- from cirrhosis of liver
- delirium after
- from duodenal ulcer
- 48, 97, 298, 342, 343,
- 481, 482, 554
- embolism of superior mesenteric artery
- epistaxis
- after fainting
- from gall-stone
- gastric ulcer
- after hæmatemesis
- from hæmoptysis
- in Henoch's purpura
- infants
- iron simulating
- from mesenteric embolism
- thrombosis
- neonatorum
- paternal serum in
- curing
- in phosphorus poisoning
- from pylephlebitis
- in small-pox
- spirochaetosis icterohæmorrhagica
- splenomegalic polycythæmia
- from swallowed blood
- test for blood in
- in typhoid fever
- (and see Blood per Anum)
- Melancholia, catalepsy
- with
- delusions in
- in diabetes
- high blood-pressure in
- irritability in
- loss of appetite in
- malaria simulating
- saturnine encephalopathy simulating
- speech lost in
- suicide in
- unpardonable sin in
- voices in
- Melanin in urine
- in melanotic sarcoma
- Melanogen in urine
- Melanoderma, syphilitic
- (Figs. 507, 508) 644
- (and see Pigmentation of Skin)
- Melanotic carcinoma (see Carcinoma)

Metacarpophalangeal joints in rheumatoid arthritis (Fig. 332) .. 426
Metallic taste in the mouth
 - leucæmic .. 548
 - tinkling over pneumothorax .. 209
Metatarsal bones, nodules in .. 501
 - neuralgia .. 540
Metatarsalgia, limping in .. 456
 - pain in foot in .. 456
Metatarsus, tenderness of, in Morton's disease .. 540
METEORISM .. 485
 - abdominal distention due to .. 250, 805
 - - embolism causing .. 485
 - - swelling from .. 80
 - - thrombosis causing .. 485
 - from acute pancreatitis .. 485
 - anæsthetic in diagnosing .. 486
 - ascites simulated by .. 60
 - - simulating .. 486
 - from atelectasis .. 485
 - of cæcum in spastic constipation .. 161
 - from carcinoma coli .. 413
 - in cirrhosis of liver .. 466
 - celiac disease .. 216
 - degæue .. 485
 - diabetes mellitus .. 486
 - diaphragm pushed up in .. 374, 805
 - in dysentery .. 485
 - dyspnea from .. 247, 250
 - in general peritonitis .. 485, 734
 - grave omen of .. 485
 - from hæmorrhagic pancreatitis .. 736
 - heart displaced in .. 373, 374, 376, 805
 - in Hirschsprung's disease .. 164, 486
 - from hysteria .. 486
 - intestinal obstruction .. 485
 - intussusception .. 485
 - liver dullness diminished in .. 805
 - - pushed up by .. 805
 - from mesenteric plexus infiltration .. 486
 - new growth .. 485
 - orthopnea from .. 250
 - ovarian cyst simulating .. 486
 - palpitation from .. 595, 597
 - from peritoneal band .. 485
 - peritonitis simulated by .. 485
 - phantom tumour from .. 485
 - physical signs of .. 60
 - pregnancy simulating .. 486
 - from solar plexus infiltration .. 486
 - spinal cord lesions .. 486
 - strangulated hernia .. 485
 - in tabes mesenterica, obstruction simulated by .. 486
 - transverse myelitis .. 486
 - tympanites due to .. 805
 - in typhoid fever .. 485
 - visible peristalsis with .. 60
 - from volvulus .. 485
Methæmoglobin in hæmoglobinuria .. 347, 357

Methaemoglobin, contd.

- spectroscopy test for .. 12
- spectrum of (Fig. 22) 13
- Methaemoglobinemia from:**
- acetanilide 202, 650, 651
- aniline derivatives .. 202
- brown boat polish .. 202
- chlorate of potash .. 202
- cyanosis from 196, 201, 202
- from drugs 202, 650, 651
- nitrobenzene .. 202
- nitrobenzol .. 202
- oil of mirbane .. 202
- phenacetin .. 202
- phenazone .. 202
- polycythemia with 650, 651
- no polycythemia in .. 201
- shortness of breath from 113
- spectroscopy in diagnosis .. 202
- from veronal .. 650
- Methaemoglobinuria after**
- acetanilide .. 196
- in acute nephritis .. 12
- after drugs .. 196
- phenacetin .. 196
- phenazone .. 196
- spectroscopy in diagnosis .. 196
- after sulphonal .. 196
- trional .. 196
- veronal .. 196
- Methyl orange test for acid** 401
- Methyl-salicylic acid,**
- erythema from .. 275
- Methylene blue, Amcoba**
- histolytica and .. 99
- blue urine from .. 906
- carbol, in Ziehl-Neelson staining .. 788
- chloroform dissolving .. 906
- epithelial cells and .. 99
- green urine from .. 906
- in investigating urinary fistula .. 494
- mucus stained by .. 496
- in pills .. 906
- pus cells and .. 99
- spectroscopy and .. 906
- in sweets .. 906
- testing pancreatic function .. 410
- urine, tests for .. 906
- Methylxanthin, uric acid and** .. 901
- Metol, dermatitis due to** .. 917
- used by photographers .. 917
- Metritis, chronic, from**
- subinvolution .. 483
- METORRHAGIA** .. 486
- in acute yellow atrophy .. 416
- anaemia from .. 43
- from arteriosclerosis .. 487
- calcium and .. 487, 488
- from carcinoma of uterus .. 487, 488
- chorion-epithelioma .. 487, 488
- distant causes of .. 487
- deficient coagulability of blood and .. 488
- definition of .. 486
- from endometritis .. 487, 488
- epithelioma .. 487
- erosion of cervix .. 487, 488
- fainting due to .. 297
- from fibroid of uterus .. 487, 488, 842
- hamophilia .. 487, 488
- high blood-pressure .. 487
- internal secretory defect .. 487
- leukaemia .. 487, 488
- menopause .. 487, 488
- menorrhagia distinguished from .. 482
- polypus of uterus .. 487, 488
- at puberty .. 488
- from purpura .. 487, 488
- sarcoma of uterus .. 484, 487, 488
- scorbutus .. 487, 488
- sexual excess .. 487, 488
- tubercle of cervix .. 488
- tuberculosis of uterus .. 487
- METROSTAXIS** .. 488
- anaemia from .. 43
- from antepartum haemorrhage .. 489
- carneous mole .. 489
- chorion-epithelioma .. 489

Metrostaxis, contd.

- classified causes of .. 489
- definition of .. 482, 488
- from erosion .. 489
- extra-uterine gestation .. 489, 842
- hydatidiform mole .. 489
- incomplete abortion .. 489
- malignant growths .. 489
- in newborn .. 489
- from placenta praevia .. 489
- polypi .. 489
- during pregnancy .. 489
- from pyometra .. 489
- ruptured tubal gestation .. 735
- secondary post-partum haemorrhage .. 489
- senile endometritis .. 489
- granular vaginitis .. 489
- subinvolution .. 489
- threatened abortion .. 489
- Mexico, ankylotomiasis in 103
- Mica-like scales in pityriasis rubra pilaris .. 600
- Microblasts in pernicious**
- anaemia .. 27
- severe anaemia .. 27
- Microcephaly** .. 234
- Micrococcus catarrhalis,**
- bacteriuria due to .. 90
- common cold due to .. 223
- coryza from .. 224
- febrile cold due to .. 224
- in nasal discharge .. 223, 224
- phthisis .. 788
- simulating influenza .. 224
- sore throat due to .. 757
- tonsillitis due to .. 757
- urethritis due to .. 90
- melitensis, bacteriuria from .. 90
- general infection by .. 90
- in Malta fever .. 571, 785
- serum test for .. 785
- rheumatism from blood .. 261
- in infective endocarditis .. 261
- tetragenus, bacteriuria from .. 90
- general infection by .. 90
- septicemia due to (Fig. 55) .. 692
- in sputum .. 792
- Microcystis, coloured figure of** .. Fig. 29 29
- illustrated (Fig. 43) .. 41
- in pernicious anaemia .. 27, (Fig. 43) 31
- severe anaemia .. 27
- Micromelia** .. 233
- Micropsia** .. 926
- Microscopical examination**
- in anthrax .. 824
- of ascitic fluid .. 65
- axillary glands .. 475
- breast nodules .. 530
- chylous ascitic fluid .. 72
- diagnosing actinomycosis .. 95, 470, 828, 835, 892, 893
- adenoma of rectum .. 874
- angiomata .. 852
- anthrax .. 824
- bilharzia .. 102, 722
- carcinoma .. 226, 230, 727
- of breast .. 838, 840
- cervix .. 488
- pylorus .. 802
- testis .. 586, 769
- tonsil .. 761
- uterus .. 842
- cholesterolin .. 138
- cystic hygroma .. 816
- cysticerci .. 503
- dysentery .. 99
- eczema marginatum .. 312
- embryoma of testis .. 587, 769, 850
- encephalitis .. 157
- endometritis .. 483, 488
- endothelioma .. 226
- epithelioma .. 95, 225, 388, 474, 477, 765, 767, 836, 854, 886, 895, 897
- epulis .. 95
- erosion of cervix .. 488
- erythrasma .. 313
- favus .. 309

Microscopical exam., contd.

- in diagnosing fibroadenoma of breast .. 839
- hydatidiform mole .. 232
- laryngeal lesions .. 245
- leprosy .. 82, 892
- lymphadenoma .. 473, 475
- mastitis .. 838
- melanotic carcinoma .. 886
- sarcoma .. 886
- mucous polyp of womb .. 232
- multiple benign sarcoma .. 502
- myeloid sarcoma .. 95
- myeloma .. 21
- nature of palate ulcer .. 730
- odontoma .. 95
- ovarian tumour .. 842
- oxaluria .. 523
- Paget's disease .. 887
- papilloma .. 95
- of larynx .. 388
- placental polyp .. 232
- pyuria .. 15, 90
- rectal conditions .. 98
- polypus .. 874
- rodent ulcer .. 225
- sarcoma .. 818, 888, 895
- of jaw .. 836
- testis .. 586, 769
- tonsil .. 761
- stomatitis .. 661
- tinca creinata .. 312, 479
- syccosis .. 311
- versicolor .. 313, 479
- torsio testis .. 850
- trichinosis .. 591
- tubercle of cervix .. 488
- tuberculous breast .. 838
- glands .. 473, 474
- ulcer of tongue .. 898
- tumours of jaw .. 835
- uric acid .. 900
- uterine lesions .. 487
- of pleuritic fluid .. 136
- semen .. 794
- stools .. 215
- in pancreatitis .. 130
- technique of .. 634
- supraclavicular gland .. 475
- for urates .. 899
- of urine in albuminuria .. 8
- Microscopists, eyestrain in** 547
- muscae volitantes and .. 92
- MICROSOMIA** .. 232
- (and see Dwarfism)
- Microspora, eleven species** 310
- Microsporon Audouinii** .. 310
- canis .. 310
- canosum .. 310
- equinum .. 310
- felinum .. 310
- minutissimum .. 312
- erythrasma due to .. 313
- furfur .. 312
- tinca imbricata due to .. 312
- versicolor due to .. 313
- Microsporosis** .. 309
- characters of .. 310
- MICTURITION, ABNORMALITIES OF** .. 490
- brain control of .. 494
- difficult, in aluminium workers .. 495
- from atony of bladder .. 492
- blood-clot in bladder .. 492
- calculus in urethra .. 492
- carcinoma of vagina .. 492
- vulva .. 492
- combined sclerosis of cord .. 492
- constipation with .. 165
- from disseminated sclerosis .. 492
- enlarged prostate .. 355
- injury to spine .. 492
- myelitis .. 492
- pelvic tumour .. 492
- pregnant retroverted uterus .. 492
- prostatic abscess .. 575, 723
- calculus .. 492
- prostatitis .. 492, 575
- spinal cord compression .. 492
- syringomyelia .. 492
- in tabes dorsalis .. 492

Micturition, difficult, contd.

- from tuberculous prostate .. 492
- tumour of cord .. 492
- spinal meninges .. 492
- uterine fibroid .. 492
- (and see Sphincter Trouble, and Strangury)
- through fistulae .. 494
- increased frequency of, from abscess outside bladder .. 723
- account of .. 490
- from acidity of urine .. 491
- appendicitis .. 151, 491, 724, 828
- bacilluria .. 491
- bacteriuria .. 91
- balanitis .. 491
- though bladder normal .. 490
- from blood-clot .. 491
- carcinoma of bladder .. 56, 353, 490, 576, 577, 722
- invading bladder .. 724
- of prostate .. 490
- rectum .. 491
- uterus .. 491
- in children .. 491
- chronic interstitial nephritis .. 490
- coli bacilluria .. 699, 901
- cystitis .. 239, 476, 646, 699, 720, 901
- diabetes insipidus .. 490
- mellitus .. 490
- diverticulitis .. 556
- from enlarged prostate .. 355, 490, 493, 652, 901
- epithelioma of bladder .. 355, 722
- functional .. 495
- in general peritonitis .. 734
- gonorrhoea .. 228
- haematuria with .. 349
- from movable kidney .. 452, 491
- oxaluria .. 491, 524
- parametritis .. 151
- pelvic disease .. 901
- penile calculus .. 491
- petronitis .. 151
- phimosi .. 491
- phisphaturia .. 491
- polyuria simulated by .. 652
- from prostatic abscess .. 575
- prostatitis .. 575, 720, 723
- pyelitis .. 490, 718, 901
- pyosalpinx .. 151, 491
- renal calculus .. 351, 490, 491
- colic .. 151, 491
- salpingitis .. 491
- simple ulcer of bladder .. 722
- small urinary meatus .. 491
- stricture of urethra .. 652
- in trench fever .. 710
- from tuberculous bladder .. 577, 652, 719, 720, 721, 901
- kidney .. 349, 352, 448, 490, 719, 721, 901
- ureteric calculus .. 577, 719
- ureteritis .. 578
- uric acid and .. 901
- from uterine disease .. 901
- vesical calculus .. 355, 490, 576, 719, 721
- colic .. 151
- worms .. 491
- interrupted by calculus .. 575
- pedunculated tumour of bladder .. 576
- vesical calculus .. 355, 576
- muscles, nerve-supply of .. 610
- nocturnal, in chronic nephritis .. 15
- with vesical calculus .. 355
- nocturnal frequency of .. 490

Micturition, contd.

- normal presses of .. 490
- ordinary frequency of .. 490
- pain on (see Pain)
- in penis after .. 574
- during .. 574
- not possible, from rupture of urethra .. 351
- precipitate .. 394
- in amyotrophic lateral sclerosis .. 176
- combined sclerosis .. 176
- disseminated sclerosis .. 176
- encephalitis lethargica .. 176
- Erb's syphilitic paraplegia .. 176
- Friedreich's ataxy .. 176
- haematomyelia .. 176
- syringomyelia .. 176
- scalding, from bacteriuria .. 91
- gonorrhoea .. 854
- spinal centre for .. 490, 494
- straining at, due to enlarged prostate .. 493
- sudden stoppage of, by calculus .. 230
- third sacral nerve and .. 490
- Mikulicz's syndrome** .. 848
- in gout .. 848
- lacrimal glands enlarged in (Fig. 46) 34
- in lymphadenoma .. 848
- lymphatic leukaemia (Fig. 46) 34, 848
- salivary glands enlarged in (Fig. 46) 34
- in syphilis .. 848
- tuberculosis .. 848
- Mid-brain, encephalitis affecting .. 701
- facial reflex centre in .. 603
- lesion, facial paralysis from .. 603
- tumour of, anaesthesia of fifth nerve from .. 882
- eccentric pupil due to .. 882
- paralysis of, third nerve from .. 882
- pupil reaction to light defective with .. 882
- unilateral tremor from .. 882
- Mid-diastolic bruit (see Bruit)
- thrill from mitral stenosis .. 268
- Mid-orbital area (Fig. 65) 867
- headache from astigmatism .. 549
- sensory area (Fig. 44) 445
- tenderness from astigmatism .. 549
- Middle cerebral artery (see Artery)
- cutaneous nerve, distribution of (Fig. 586) 748
- ear, carcinoma of, pain from .. 253
- spread to mastoid process .. 253
- disease, from nasal catarrh .. 253
- pharyngeal catarrh .. 253
- and see Otitis Media
- Midwives, bullock impetigo and .. 124
- chance on finger in .. 301
- Migraine, acetabular from .. 922
- amblyopia due to .. 922
- aphasia in .. 772
- biliousness and .. 640
- blindness in .. 924, 925
- central scotoma in .. 922, 924
- fortification figures in .. 922, 925
- glaucoma simulating .. 288
- headache from 372, 922, 925
- hemianopsia in 377, 381, 922
- hemicrania in .. 924
- from hypermetropia .. 547
- indigestion simulated by .. 396
- monocular blindness in .. 922
- periodicity of .. 396
- photophobia from 639, 640
- polyuria due to .. 653
- quadrant, hemianopsia in .. 922
- ring scotoma in .. 922

Migraine, contd.

- sick headache and .. 640
- tinnitus due to .. 879
- unilateral headache from .. 369
- vertigo due to .. 911
- visual phenomena of .. 922
- vomiting in .. 924, 925, 929
- xanthoma planum with .. 889
- Miliaria .. 803
- dysodrosis and .. 918
- hydrocystoma and .. 918
- rubra, account of .. 918
- eczema distinguished from .. 918
- itching slight in .. 918
- pricking in .. 918
- tingling in .. 918
- vesicles in .. 913, 918
- Miliary abscesses of newborn .. 681
- syphilide .. 683
- tubercles in tuberculous peritonitis .. 64
- tuberculosis in children .. 719
- leucopenia in .. 455
- rigor in .. 737
- Milium in acne vulgaris .. 600
- colloid .. 889
- papules in .. 598
- Milk from breasts .. 847
- in galactoele .. 848
- lactation .. 227
- newborn .. 227, 848
- pregnancy .. 227
- at puberty .. 277, 848
- bromide transmitted by .. 125
- delirium due to .. 213
- goat's, Malta fever from .. 571, 691
- iodide transmitted by .. 125
- preserved, scurvy rickets .. 819
- spinal caries and .. 628
- surgical tuberculosis and .. 932
- tinged in jaundice .. 406
- tinned, scurvy from .. 93
- tuberculous glands from .. 386, 474, 480, 481, 712, 858
- peritonitis and .. 777
- Milkers, cow-pox in .. 302
- cramp in .. 189
- Milky urine from chyluria .. 140
- and see Chyluria
- phosphaturia .. 140
- Milroy's disease (see Meigs's Disease)
- Mimicry, limping due to .. 456
- nervous, of joint disease .. 435
- photophobia .. 640
- Mines, after-damp in .. 154
- coma in .. 154
- fire-damp in .. 154
- going down, fainting due to .. 297
- marsh gas in .. 154
- Miners, lead, ankylostomiasis in .. 103
- manganese, tremor in .. 882
- myasthenia in .. 505
- silicosis in .. 363
- tinnitus in .. 878
- Minter's phthisis (see Phthisis)
- Miseric epilepsy, muscular twitches in .. 174
- Mirbane, oil of, in boot polish .. 202
- methaemoglobinemia from .. 202
- Mirror in diagnosing .. 111
- trance .. 111
- excluding death .. 111
- makers, mercurialism in .. 44
- Mirth, excessive expression of, in bilateral facial paralysis .. 603
- cerebral diplegia .. 603
- pseudo-bulbar paralysis .. 603
- Miscarriage (see Abortion)
- Mite, kedani disease due to .. 679
- Mitosis, atypical, in cancer cells .. 365
- Mitral bruit (see Bruit)
- disease, cerebral embolism from .. 170

Mitral disease, contd.

- congestion of liver in .. 538
- diminished appetite in .. 58
- gastritis in .. 58
- nutmeg liver from .. 463
- old and recent, distinguished by pulmonary second sound .. 1
- pain in epigastrium from .. 538
- polycythemia with .. 423
- in rheumatic fever .. 45
- murmurs, general account of .. 117-119
- regurgitation, accentuated pulmonary second sound with .. 2
- account of .. 262
- from adherent pericardium .. 258, 263, 265
- albuminuria from .. 262
- from anaesthetics .. 263
- aortic disease .. 246, 263, 363
- arteriosclerosis .. 262, 264, 373
- ascites from .. 62, 262
- from athlete's heart .. 266
- Bright's disease .. 262, 263
- bruits of .. 117
- from cardioclerosis .. 118
- causes of .. 262
- from chronic nephritis .. 373
- clubbed fingers from .. 142
- congested face and lips from .. 262
- cough from .. 262
- from dilatation of heart .. 263
- left ventricle .. 258
- disease of mitral valve .. 258
- dyspnoea from .. 246, 262
- from endocarditis .. 262
- epigastric pulsation from .. 262
- exocardial bruit simulating .. 118
- from fatty heart .. 263
- fevers .. 263
- fibroid heart .. 263
- haemic bruit simulating .. 262
- haemoptysis from .. 262, 363
- heart enlarged from .. 262
- failure from .. 262
- impulse displaced outwards with .. 374
- from high blood-pressure .. 262
- hydrothorax from .. 262
- from infective endocarditis .. 262
- left ventricle enlarged from .. 258, 374
- liver enlarged from .. 262
- from myocardial degeneration .. 69, 258, 263
- edema of feet and legs from .. 262
- from over-exertion .. 263, 266
- palpitation from .. 262, 594
- patent interventricular septum simulating .. 118
- from pericarditis .. 263, 265
- physical signs of .. 262
- polycythemia in .. 651
- precordial bulging from .. 262
- pulse irregular from .. 262
- from rheumatism .. 118
- right heart enlarged from .. 374
- second sound accentuated with .. 262
- reduplicated with .. 262
- from stretched auriculo-ventricular ring .. 117
- systolic bruit with .. 69, 262
- thrill from .. 262
- thrill with .. 875
- tricuspid regurgitation from .. 262
- simulating .. 118
- from ulceration .. 118
- valve deformity .. 117
- stenosis, absence of bruit with .. 2, 595

Mitral stenosis, contd.

- accentuation of first sound from .. 118
- pulmonary second sound with 1, 2, 119, 363
- account of .. 268, 363
- acute dilatation of stomach in .. 218
- rheumatism and .. 69, 595, 857
- ante-mortem clot in heart in .. 363
- aortic disease with .. 261
- regurgitation with .. 119
- arrhythmia from .. 119
- ascites from .. 62, 69, 417, 847
- asphyxia in .. 17, 71, 106
- atheroma of pulmonary arteries from .. 268, 363
- auricular extrasystoles in .. 670
- fibrillation with .. 2, 69, 268, 665
- blood-pressure high in .. 17, 71, 106
- blood-streaked sputum in .. 187
- bradycardia simulated in .. 108
- bronchiectasis in .. 367
- brown induration of lung from .. 268
- bruits of .. 118, 119
- disappearing in .. 69
- chorea and .. 363, 857
- clubbed fingers from .. 142
- congestion of lungs from .. 268
- cyanosis from .. 417
- delirium from .. 212
- digitalis and .. 69
- dyspnoea in .. 113, 246
- embolism in .. 363, 381
- emphysema and bronchitis simulating .. 13
- endocarditis causing .. 261, 263
- epigastric pulsation from .. 268
- faces of (Fig. 73) 69, 294
- fibroid lung in .. 367
- haemoptysis in .. 360, 361, 363
- heart dullness with .. 268
- increased to right with .. 363
- upwards with .. 363
- failure from .. 62, 69, 71, 212, 246, 268, 847
- impulse displaced from .. 268
- hemiplegia from .. 381
- hypothermia in (Fig. 314) 391
- infective endocarditis from .. 704
- irregular heart with .. 2, 69
- jaundice from .. 417
- laryngeal paralysis from .. 606
- left auricle hypertrophy from .. 268
- lips deep red in (Fig. 78) 69, 294
- liver enlarged from .. 417
- pulsating from .. 417, 847
- tender from .. 417
- lividity with .. 847
- malar flush with .. 50, (Fig. 78) 69, 294, 595, 857
- mid-diastolic bruit of .. 118, 119, 268
- thrill from .. 268
- nutmeg liver from .. 417, 463
- edema in .. 417, 653, 847
- orthopnoea in .. 246, 847
- oscillating impulse with .. 71
- pallor in .. (Fig. 78) 69
- palpitation from .. 594
- panting in .. 17
- paroxysmal tachycardia in .. 670
- peri-nasal pallor in .. 294
- peri-oral pallor in .. 294

Mitral stenosis, contd.

— physical signs of .. 268, 363
 (Fig. 106) 119, 268, 363
 — polycythemia with .. 45, 650, 651
 — prestolic bruit of 69, 118, 119, 268, 363, 875
 — disappearing in 666
 — thrill from .. 268
 — disappearing in 666
 — pulmonary apoplexy in 363
 — blood - pressure .. 363
 — raised in .. 363
 — diastolic murmur .. 121
 — from .. 363
 — infarct in .. 269
 — regurgitation from .. 269
 — pulse feeble in 17, 71, 106
 — irregular in .. 17, 71, 106, 268
 — normal in .. 268
 — rapid from .. 268
 — small from .. 268
 — red induration of lung from .. 268
 — rheumatism and .. 363
 — right ventricle hypertrophy in .. 71, 268
 — second sound accentuated in .. 119, 363
 — reduplicated in .. 1, 119, 363, 729
 — see-saw impulse with .. 71
 — serous effusion in .. 653
 — slapping first sound with 2, 268, 363, 595
 — stenosis of bronchus in .. 367
 — systolic murmur with 268
 — tachycardia from 69, 856, 857
 — thrill with .. 268, 875
 — tricuspid stenosis and 463
 — tumbling rhythm with 2
 — systolic bruit (see Bruit)
 Moaning in Cheyne-Stokes breathing .. 212
 — colic .. 150
 Modesty, blushing from .. 303
 Moebius's myopathy .. 172
 — sign in exophthalmic goitre .. 267, 283
 Molar, unerupted, pain in ear from .. 253
 — jaw from .. 567
 Mole, carnosous, metastasis from .. 489
 — epithelioma starting in 886
 — hairy, over lumbar spine 622
 — spina bifida occulta 622
 — hydatidiform, chorion-epithelioma from .. 488
 — metastasis from .. 489
 — microscope in diagnosing .. 232
 — vaginal discharge due to .. 232
 — melanotic carcinoma from .. 886
 — sarcoma from 477, 886
 — nod. over lumbar .. 622
 — nod. the sarcoma from .. 473
 — over spina bifida occulta .. 622
 — sarcoma from .. 888
 — tubal, from extra-uterine gestation .. 489
 Mollities ossium, geographical distribution of .. 305
 — illustrated (Fig. 209) 305
 — after pregnancy .. 305
 — skiagram of bones in (Fig. 261) 305
 — spontaneous fracture in .. 305
 Molluscum contagiosum 889
 — fibrosus 865, (Fig. 657) 866
 Mongolian idiocy (see Idiocy)
 Monocord illustrated (Fig. 178) 206
 — in testing upper-tone limit .. 206
 Monocular blindness in migraine .. 922
 — diplopia (see Diplopia)
 Monoplegia (see Paralysis)

Monotonous speech in

Friedreich's ataxy .. 624
 — paralysis agitans .. 881
 Mons veneris, herpes of 913
 Monster, double, dystocia from .. 250
 Montgomery's glands .. 529
 swollen in pregnancy .. 891
 Mooren's ulcer .. 891
 Moral change due to alcohol .. 881
 — encephalitis .. 223
 — in general paralysis .. 881
 Moran-Axenfeld, diplobacillus of, in conjunctivitis .. 286
 Morbilli (see Measles)
 Morbus cereuleus, Fig. 166 196
 — abnormal subclavian artery with .. 241
 — clubbed fingers with .. 142
 — from congenital heart .. 267
 — haemoglobin in .. 650
 — polycythemia in 650, 651
 — transposition of viscera with .. 241
 — cordis (see Heart Disease)
 — coxae semilis .. 431
 — maculosus of Werlhof .. 676, 680
 Morgagni, hydatid of .. 587
 Morgan's bacillus .. 479
 — ptomaine poisoning due to .. 872
 Morning cough .. 188
 — diarrhoea .. 217
 — sickness (see Vomiting)
 Morpha, abdominal pain from .. 526
 — amenorrhoea from .. 526
 — avoided in peritonitis .. 524
 — bradypnoea from .. 110
 — Cheyne-Stokes breathing from .. 139
 — coma from .. 110, 154
 — convulsions from .. 181
 — delirium from .. 213
 — drug habit from .. 113
 — Fehling's solution reduced after .. 327
 — habit, albuminuria from .. 16
 — impotence from .. 393
 — sudden stopping of, delirium from .. 212
 — injections, taches bleues from (Fig. 503) 642
 — leucopenia from .. 455
 — noses in head from .. 504
 — out of condition from .. 118
 — palpitation from .. 594, 596
 — poisoning, temperature chart in (Fig. 134) 155
 — prick marks from taking 596
 — shortness of breath from .. 118
 — stupor from .. 116
 — tremor due to .. 879, 881
 — vertigo from .. 509
 Morphaea 459, (Fig. 599) 645
 — atrophic striae in .. 65
 — baldness from .. 96
 — characters of .. 131
 — cheloid simulated by .. 131
 — dilated vessel at border of .. 645
 — leucoderma, distinct, gashed from .. 645
 — Morton's dermatitis due to .. 915
 Morton's affection of foot 540
 — disease, limping in .. 456
 — pain in foot in .. 456
 Mortuary attendants, post-mortem warts in .. 301
 Morvan's disease, sore fingers in .. 302
 — syringomyelia and .. 81, 125, 302, 320, 628
 — whitlows in .. 320
 Mosaic skin in prurigo .. 601
 Mosquito-bite (see Bite)
 Moth hairs, dermatitis from .. 659
 — itching from .. 659
 Motions, black (see Melana)
 Motor aphasia .. 772
 — boat cabin, tinnitus due to .. 878
 — coma in .. 154
 — car accident, spinal symptoms after .. 870
 — dust, sore throat from 761

Motor car, contd.

— exhaust fumes, fainting due to .. 297, 299
 — headache from .. 371
 — sickness, headache from .. 372
 — vomiting in .. 929
 — smash, ataxy after .. 77
 — fainting due to .. 297
 — nystagmus from .. 505
 — drivers, chilblain on heel in .. 552
 — pain in heel in .. 540
 — Motoring, malgria from .. 572
 — pain between shoulders from .. 567
 — in shoulder from 567, 580
 Moulds, lung infections due to .. 365
 — in sputum .. 792
 Mountaineering, epistaxis due to .. 274
 — fainting due to .. 297
 — glycosuria after .. 330
 — hemianopsia due to .. 377
 — left ventricle enlarged from .. 258
 — noises in head in .. 504
 — vertigo due to .. 504
 Mouse, ravus from .. 309
 Mouse-bite, spirochaetosis from .. 213
 Mouse-nibbled appearance of larynx (Fig. 249) 245
 — epiglottitis .. 389
 Mousy smell of ravus 309, 311
 Mouth, acid-fast bacilli from .. 788
 — athetosis affecting .. 169
 — bacteriological investigation of .. 43, 83
 — bleeding (see Gums)
 — Bleeding and Haemorrhage from Mouth .. 225, 761
 — breathing, adenoids from .. 225, 761
 — cacogenia due to .. 860
 — enlarged tonsils from .. 225
 — from rhinitis .. 225
 — snoring due to .. 757
 — tonsillitis from .. 761
 — carcinoma of (see Epithelioma)
 — chicken-pox affecting .. 762, 919
 — coarse, from alcoholism 294
 — congenital syphilis of .. 493
 — dermatitis herpetiformis affecting .. 93, 95
 — drooping corner of, in facial paralysis .. 602
 — dry, cacogenia due to .. 860
 — in fevers .. 860
 — epithelioma of (see Epithelioma)
 — erythema .. 93, 95, 244
 — foaming at in epilepsy .. 183
 — malingerer .. 184
 — gate, pain in tongue from .. 590
 — tongue sore from .. 591
 — gaping, in cretin (Fig. 254) 294
 — haemorrhage from (see Gums, Bleeding, and Haemorrhage)
 — herpes zoster of .. 914
 — inability to open, due to alveolar abscess .. 884
 — — angina Ludovici .. 884
 — — arthritis of temporomandibular joint .. 884
 — — epithelioma .. 884
 — — impacted wisdom tooth .. 884
 — — mumps .. 884
 — — myxitis ossificans .. 884
 — — odontoma .. 884
 — — quinsy .. 884
 — — in scleroderma .. 886
 — — due to tonsillitis .. 884
 — — trismus .. 884
 — injury to, haemoptysis simulated by .. 359
 — Koplik's spots in .. 224, 282
 — myasthenia gravis affecting .. 243
 — navi of (see Navi)
 — noma affecting .. 318
 — open, in cretin .. 290

Mouth, contd.

— pain in, after acute irritants .. 244
 — from corrosive poison 338
 — very hot or cold food 244
 — pemphigus affecting 93, 95, 127, 244
 — PIGMENTATION in .. 641
 — (and see Pigmentation in Mouth)
 — putrefaction in, foul breath from .. 112, 113
 — red swelling in floor of, due to ranula .. 590
 — retention cyst in .. 590
 — sepsis in, foul breath from .. 112
 — small-pox affecting .. 762
 — sore in, cervical glands enlarged from .. 474
 — in sprue .. 47, 709
 — sore angles of, in congenital syphilis (Fig. 241) 290
 — streptococci from, difficulty of interpreting .. 83
 — tremor of, in chronic alcoholic .. 289
 — trichinosis of .. 885
 — ulcer of (see Ulceration)
 Movable kidney (see Kidney)
 Movement, sense of, lost in Brown-Sequard paralysis (Fig. 469) 608
 Mucocele of gall-bladder .. 316, 317
 Muco-dermato-mycosis .. 886
 Mucomebraneous colic (see Colic)
 — colitis (see Colitis)
 Mucous cast of intestine (Fig. 386) 495
 — colic, colic from .. 148
 — colitis (see Colitis)
 — cyoadenitis in gonorrhoea 7
 — Illustrated (Fig. 15) 7
 — cystic, vulval swelling due to .. 853
 — membranous, bulbous dermatoses affecting .. 127
 — dermatitis herpetiformis affecting .. 95
 — erythema .. 95
 — erythema .. 95
 — affecting .. 95
 — favus affecting .. 309
 — haemorrhage from (see Haemorrhage)
 — herpes of .. 913
 — nodules in, in leprosy 501
 — penapneus affecting .. 95, 127
 — pigmentation of, in Addison's disease .. 106, 295, 934
 — polymyositis affecting .. 295, 702
 — rhusosclerosis affecting .. 889
 — ringworm affecting .. 309
 — small pox affecting .. 684
 — varicella affecting .. 919
 — vesicles on .. 913
 — papule in syphilis .. 601
 — polypus of cervix preventing per vaginam .. 658
 — tubercles in perineum .. 766
 — of scrotum .. 767
 — in syphilis .. 601
 Mucosa pruriens, dermatitis due to .. 916
 Mucus in Curschmann's spirals .. 191
 — eosin staining .. 496
 — in gastric contents in gastritis 58, 338, 398, 401
 — methylene blue staining .. 496
 — from stomach due to alcohol .. 881
 — IN THE STOOLS 215, 495
 — (and see Stools, Mucus in)
 — uric acid with .. 900
 — IN THE URINE .. 496
 — (and see Urine, Mucus in)
 — vaginal discharge .. 231
 — vomit (see Vomit, Mucus in)
 Mulberry rash .. 691
 Mule spinners, epithelioma of scrotum in .. 767
 Multilobular cirrhosis .. 67

Multiple benign sarcoid of Boeck ... 502
 - neuritis (see Neuritis, Peripheral)
 - serositis ... 62, 138
 - hydrocele in ... 588
Mummification, account of 318
Mumps, abscess of testis in 768
 - albuminuria in ... 16
 - cervical adenitis simulating ... 763
 - deafness from ... 207
 - dysphagia from 244, 661, 763
 - epididymitis from ... 85
 - epididymo-orchitis from ... 585, 849
 - hydrocele from ... 585
 - inability to open mouth in ... 884
 - leucocytosis in ... 454
 - rare in ... 453
 - lymphocytes in cerebrospinal fluid in ... 383
 - oedema of neck simulated by ... 763
 - orchitis from ... 85, 86
 - pancreatitis from ... 128
 - pyralism in ... 661
 - rigor rare in ... 737
 - salivary glands enlarged in ... 763, 848
 - sore throat due to 758, 763
 - symptomatic leukaemia after ... 454
 - testicular atrophy after ... 85, 86, 507
Murder, arsenic and 85, 94, 103
Murmurs, see Heart
Muscle, volitantes, epistaxis, relieving ... 274
 - general account of ... 92
Muscle, abductor hallucis, nerve-supply of ... 609
 - indicis, wasted in progressive muscular atrophy (Fig. 84, 80)
 - pseudo-hypertrophic muscular paralysis ... 518 (Fig. 79) 78
 - minimi digiti, nerve-supply of ... 609, 616
 - pollicis, affected in progressive muscular atrophy ... 141
 - nerve-supply of ... 615
 - wasted, from cervical rib (Fig. 47) 619
 - accessory, nerve-supply of ... 609
 - adductor brevis, nerve-supply of ... 609
 - longus, nerve-supply of ... 609
 - ossification in ... 845
 - magnus, nerve-supply of ... 609
 - obliquus hallucis, nerve-supply of ... 609
 - pollicis, nerve-supply of ... 616
 - pollicis ulnar nerve supplying ... 141
 - in ulnar paralysis ... 141
 - transversus hallucis, nerve-supply of ... 609
 - pollicis, nerve-supply of ... 616
anconeus, nerve-supply of ... 616
 - biceps, myoclonus of ... 174
 - nerve-supply of 615, (Fig. 47) 618, 620
 - paralysis of, in Erb's palsy ... 618
 - wasted in pseudo-hypertrophic muscular paralysis ... 625
 - biceps femoris, nerve-supply of 609, (Fig. 47) 611
brachialis anticus, nerve-supply of ... 615, (Fig. 47) 618, 620
 - ciliary, paralysis of, from diphtheria 84, 242
 - paresis of, accommodation made difficult by ... 84

Muscle, contd.
 - coracobrachialis, nerve-supply of ... 615, (Fig. 47) 618, 620
 - cremaster, nerve-supply of ... 610, (Fig. 47) 611
 - degeneration of, fibrillar contractions in ... 880
 - deltoid, nerve-supply of ... 616, (Fig. 47) 618, 620
 - pain at insertion of, from reading in bed 583
 - paralysis of, in Erb's palsy ... 618
 - pseudo-hypertrophy of ... (Fig. 47) 625
 - tender in fibrositis ... 544
 - wasted in phthisis ... 79
 - detrusor urinae, nerve-supply of (Fig. 47) 611
 - paralysis of, retention of urine from ... 493, 495
 - diaphragm, nerve-supply of ... (Fig. 47) 618, 620
 - dilator tube, cracking in ear due to ... 878
 - extensor brevis digitorum, nerve-supply of ... 609
 - pollicis, nerve-supply of ... 616
 - carpi radialis brevis, nerve-supply of ... 616
 - longior, nerve-supply of ... 616
 - ulnaris, nerve-supply of ... 616
 - communis digitorum, claw-hand and ... 141
 - nerve-supply of ... 610, 616
 - hallucis, nerve-supply of ... 610
 - indicis, nerve-supply of ... 610
 - ionius digitorum, nerve-supply of ... 609, (Fig. 47) 611
 - paralysis of ... 611
 - hallucis, hypertrophied in Friedrich's disease ... 170
 - pollicis, nerve-supply of ... 616
 - minimi digiti, nerve-supply of ... 616
 - ossis metacarpi pollicis, nerve-supply of ... 616
 - proprius hallucis, nerve-supply of ... 609
 - external rectus, paralysis of see Paralysis
 - fibres in faces, see Faces
 - fibrosis of, talipes due to ... 144
 - flexor brevis digitorum, nerve-supply of ... 609
 - hallucis, nerve-supply of ... 609
 - minimi digiti, nerve-supply of ... 609, 616
 - pollicis, nerve-supply of ... 616
 - carpi radialis, nerve-supply of ... 615
 - ulnaris, nerve-supply of ... 616, 620
 - ulnar nerve supplying ... 141
 - longus digitorum, nerve-supply of 609, 610, (Fig. 47) 611
 - hallucis, nerve-supply of ... 609
 - pollicis, nerve-supply of ... 615
 - profundus digitorum, nerve-supply of 615, 616
 - sublimis digitorum, nerve-supply of ... 615
 - gastrocnemius, nerve-supply of ... 609, 610
 - pseudo-hypertrophy of ... 625
 - gemellus inferior, nerve-supply of ... 609
 - superior, nerve-supply of ... 609
 - gluteus maximus, nerve-supply of ... 609, (Fig. 47) 611

Muscle, contd.
 - gluteus, medius, nerve-supply of 609, (Fig. 47) 611
 - minimus, nerve-supply of ... 609, (Fig. 47) 611
 - gracilis, nerve-supply of 609, (Fig. 47) 611
 - iliacus, nerve-supply of ... 609, 610
 - internus, nerve-supply of (Fig. 47) 611
 - inferior oblique, paralysis of ... 222
 - rectus, paralysis of ... 222
 - infraspinatus, nerve-supply of 615, (Fig. 47) 618
 - pseudo-hypertrophy of ... 625
 - reaction of degeneration in ... 617
 - wasted, from neuritis of suprascapular nerve ... 617
 - in phthisis ... 79
 - insertions, tender, in fibrositis ... 544
 - internal rectus, paralysis of 222, (Fig. 517) 659
 - laceration of, from injury ... 735
 - latissimus dorsi, nerve-supply of ... 616, (Fig. 47) 618, 620
 - wasted, in pseudo-hypertrophic muscular paralysis 625
 - levator anguli scapulae, nerve-supply of ... 615
 - and, detachment and ... 164
 - injury of, prolapse of uterus due to ... 657
 - nerve-supply of (Fig. 47) 611
 - spasm of, vaginismus due to ... 239
 - palpebrae superioris, congenital absence 660
 - paralysis of (Fig. 516) 659
 - spasm of, in Graves' disease ... 283
 - masseter, atrophy of, in bulbar paralysis ... 603
 - trigeminal neuralgia ... 549
 - paralysis of, see Paralysis
 - normal electrical reactions of ... 725
 - obturator externus, nerve-supply of 609, 610, (Fig. 47) 611
 - internus, nerve-supply of 609, (Fig. 47) 611
 - occipito-frontalis, eyes opened by ... 660
 - omohyoideus, nerve-supply to (Fig. 47) 618
 - opponens minimi digiti, nerve-supply of ... 616
 - pollicis, nerve-supply of ... 615
 - orbicularis oculi, cramp in ... 189
 - oris, weak in myopathy ... 291
 - palpebrarum, paralysis of ... 891
 - epiphora from ... 273
 - spasm of, in hysteria ... 178
 - paralysis agnatus ... 292
 - weak in myopathy ... 291
 - palmaris brevis, nerve-supply of (see Paralysis)
 - longus, nerve-supply of ... 615
 - pectineus, nerve-supply of 609, (Fig. 47) 611
 - pectoralis major, nerve-supply of ... 615, (Fig. 47) 618, 620
 - wasted in phthisis ... 79
 - pseudo-hypertrophic muscular paralysis ... 625
 - minor, nerve-supply of 615, (Fig. 47) 618

Muscle, contd.
 - peroneus brevis, nerve-supply of ... 609, (Fig. 47) 611
 - longus, nerve-supply of 609, (Fig. 47) 611
 - tertius, nerve-supply of ... 609
 - plantaris, nerve-supply of ... 609
 - longus, rupture of ... 677
 - limping from ... 456
 - platysma, nerve-supply of (Fig. 47) 618
 - popliteus, nerve-supply of ... 609
 - pronator quadratus, nerve-supply of 615, (Fig. 47) 618
 - radialis teres, nerve-supply of ... 615
 - teres, nerve-supply of 618
 - teres, indurated with cancer ... 195
 - nerve-supply of 610, (Fig. 47) 611
 - suppurating, from cancer ... 195
 - pyriformis, nerve-supply of 609, (Fig. 47) 611
 - quadratus femoris, nerve-supply of ... 609, (Fig. 47) 611
 - lumborum, nerve-supply of 610, (Fig. 47) 611
 - quadriceps extensor femoris, myoclonus of 174
 - nerve-supply of 609, 610, (Fig. 47) 611
 - paralysis of, from poliomyelitis 623
 - wasted in anterior cruritis ... 540
 - Tooth's peroneal atrophy 79
 - reaction of degeneration in ... 725
 - rectus abdominis, myoclonus of, pain in iliac fossa from ... 557
 - necrosis of (see Necrosis)
 - rigid over liver abscess ... 465
 - tumour simulated by ... 809
 - rupture of (see Rupture)
 - Zenker's degeneration in ... 561
 - rhomboideus major, nerve-supply of ... 615
 - minor, nerve-supply of 615
 - risorius, weak in myopathy ... 291
 - rupture of (see Rupture)
 - salpingopharyngeus, cracking in ear due to 878
 - sarcoma starting in ... 845
 - sartorius, nerve-supply of 609, 610, (Fig. 47) 611
 - scalenus, nerve-supply of (Fig. 47) 618
 - semimembranosus, nerve-supply of ... 609, (Fig. 47) 611
 - semitendinosus, myoclonus of ... 174
 - nerve-supply of 609, (Fig. 47) 611
 - serratus anticus major, nerve-supply of (Fig. 47) 618
 - magnus, nerve-supply of 615, 620
 - paralysis of (see Paralysis)
 - wasted in pseudo-hypertrophic muscular paralysis 625
 - soleus, nerve-supply of 609
 - pseudo-hypertrophy of ... 625
 - sphincter ani, achalasia of ... 163
 - in Hirschsprung's disease ... 163
 - nerve-supply of (Fig. 47) 611

- Muscle, sphincter ani, contd.*
 - - - spasm of (see Spasm)
 - - - iridis, rupture of, from injury .. 674
 - - - pupil, irregular .. 674
 - - - vesicæ, nerve-supply of .. (Fig. 471) 611
 - - - paralysis of, dribbling of urine from .. 495
 - - - stapedius, paralysis of (see Paralysis)
 - - - sternocleidomastoid, nerve-supply to .. (Fig. 474) 618
 - - - sternohyoideus, nerve-supply to (Fig. 474) 618
 - - - sternomastoid, clonic spasm of .. 174
 - - - myoclonus of .. 174
 - - - rupture of, at birth .. 179
 - - - callus in .. 179
 - - - torticollis from .. 179
 - - - spasm of, in hysteria .. 178
 - - - in torticollis .. 795
 - - - sternothyroideus, nerve-supply to (Fig. 474) 618
 - - - subscapularis, nerve-supply of .. 616, 620 (Fig. 474) 618, 620
 - - - superior oblique, paralysis of .. 222
 - - - rectus, paralysis of .. 222
 - - - supinator brevis, nerve-supply of .. 616, 620 (Fig. 474) 618
 - - - longus, myoclonus of .. 174
 - - - nerve-supply of 616, 620 (Fig. 474) 618, 620
 - - - paralysis of, in Erb's palsy .. 618
 - - - supraspinatus, nerve-supply of 615, (Fig. 474) 618
 - - - pseudo-hypertrophy of .. 625
 - - - wasted in phthisis .. 79
 - - - temporal, atrophy of, in trigeminal neuralgia 549
 - - - paralysis of, from fifth nerve lesion 860
 - - - in trigeminal neuralgia .. 549
 - - - tensor fasciæ femoris, nerve-supply of 609, 610, (Fig. 471) 611
 - - - teres major, nerve-supply of 616, (Fig. 474) 618, 620
 - - - minor, nerve-supply of 616, 620
 - - - tibialis anticus, nerve-supply of .. 609, 610
 - - - posticus, nerve-supply of .. 609
 - - - tone .. 175
 - - - coracellum and .. 73
 - - - scapula and .. 175
 - - - scapula and .. 175
 - - - scapula, nerve-supply to .. (Fig. 474) 618
 - - - triceps, nerve-supply of 616, (Fig. 474) 618, 620
 - - - pseudo-hypertrophy of .. 625
 - - - Trichinella spiralis in (Fig. 452) 569
 - - - zygomatic, weak in myopathy .. 291
 Muscles, abdominal, nerve-supply of (Fig. 471) 611
 - - - on guard .. 734
 - - - paralysis of, in diphtheria .. 192
 - - - scoliosis from .. 192
 - - - spasm of, in hysteria 179
 - - - new growth simulated by .. 179
 - - - pregnancy simulated by .. 179
 - - - in vomiting .. 927
 - - - abductors of hip, nerve-supply of .. 610
 - - - adductors of thigh, nerve-supply of .. 610, 620 (Fig. 471) 611
 - - - paralysis of, from poliomyelitis .. 623
 - - - analgesia of, in tabes dorsalis .. 627
- Muscles, contd.*
 - - - anterior tibial, affected in infantile paralysis 145
 - - - Tooth's paralysis 146
 - - - arm, fibrillary contractions in .. 615
 - - - wasted with elbow-joint disease .. 79
 - - - from poliomyelitis (Fig. 80) 78
 - - - in syringomyelia 320
 - - - back, paralysis of (see Paralysis)
 - - - weakness of, lordosis from .. 195
 - - - in rickets .. 194
 - - - calcification in .. 703
 - - - in myositis ossificans 180
 - - - calf, cramp in .. 188
 - - - ischæmic contracture of .. 147
 - - - myokymia of, in intermittent claudication 542
 - - - nerve-supply of (Fig. 471) 611
 - - - pseudo-hypertrophy of .. (Fig. 477) 624
 - - - contracture of (and see Contracture; Talipes; etc.)
 - - - of defecation, nerve-supply of .. 610
 - - - dorsal, spasm of, from spondylitis deformans 870
 - - - dorsiflexor, paresis of, in peripheral neuritis 75
 - - - of erection, nerve-supply of .. (Fig. 471) 611
 - - - extensor of ankle, affected by peripheral neuritis .. 74
 - - - paralysis of, from poliomyelitis .. 623
 - - - fingers, affected in progressive muscular atrophy .. 141
 - - - nerve-supply of (Fig. 474) 618, 620
 - - - paralysis of, in Erb's palsy .. 618
 - - - toes, paralysis of, from poliomyelitis 623
 - - - wrists affected by peripheral neuritis 74
 - - - nerve-supply of (Fig. 474) 618, 620
 - - - paralysis of, in Erb's palsy .. 618
 - - - of eye, myasthenia gravis affecting .. 243
 - - - paralysis of (see Paralysis; Ocular)
 - - - fibrillary contractions in 615
 - - - fibrous, in myopathy .. 624
 - - - flexors of fingers, affected in progressive muscular atrophy .. 141
 - - - claw-hand and .. 141
 - - - nerve-supply of (Fig. 474) 618, 620
 - - - wasted from cervical rib .. 619
 - - - in forearm, wasted in cervical rib .. 545
 - - - in syringomyelia, 619
 - - - ulnar paralysis (Fig. 85) 82
 - - - of knee, wasted in pseudo-hypertrophic muscular paralysis 625
 - - - wrist, nerve-supply of (Fig. 474) 618, 620
 - - - wasted from cervical rib .. 619
 - - - of foot, nerve-supply of 610, (Fig. 471) 611
 - - - gemelli, nerve-supply of .. (Fig. 471) 611
 - - - glutei, cramp in .. 189
 - - - nerve-supply of .. 610
 - - - pseudo-hypertrophy of .. 625
 - - - wasted from tuberculous hip .. 457
 - - - hæmorrhage into, in hæmophilia .. 679
 - - - hamstring, cramp in .. 189
 - - - elongated, in contortionists .. 195
 - - - nerve-supply of .. 610
- Muscles, contd.*
 - - - of hand, nerve-supply of .. (Fig. 474) 618
 - - - wasted in amyotrophic lateral sclerosis .. 619, 630
 - - - bulbar paralysis .. 773
 - - - cervical rib .. 545
 - - - (Fig. 475) 619
 - - - Friedrich's ataxy 79
 - - - peroneal atrophy .. 620
 - - - progressive muscular atrophy 80, 141
 - - - pseudo-hypertrophic muscular paralysis (Fig. 79) 78
 - - - syringomyelia 320, 619
 - - - Tooth's peroneal atrophy (Fig. 82) 79
 - - - hypothenar, nerve-supply of .. 620
 - - - ulnar nerve supplying .. 80, 141
 - - - wasted from cervical rib .. 619
 - - - in progressive muscular atrophy .. 80, (Fig. 123) 141
 - - - from ulnar paralysis (Fig. 85) 82, 141
 - - - insensitive to squeezing in tabes dorsalis .. 541
 - - - intercostal, paralysis of, from transverse myelitis .. 81
 - - - interosseus of foot, external plantar nerve supplying .. 140
 - - - internal popliteal nerve supplying 140
 - - - nerve-supply of .. 609
 - - - paralysis of (see Paralysis)
 - - - hand, claw-hand and .. 141
 - - - nerve-supply of 616, 620
 - - - wasted from cervical rib .. 619
 - - - in progressive muscular atrophy .. 80
 - - - interstitial fat in, in myopathy .. 624
 - - - laryngeal, fibrositis of, hoarseness from .. 388
 - - - myasthenia gravis affecting .. 243
 - - - of leg, nerve-supply of 609, 610, 611
 - - - lumbricals of foot, external plantar nerve supplying .. 140
 - - - internal popliteal nerve supplying 140
 - - - nerve-supply of .. 609
 - - - paralysis of, hyperextension of toes from .. 146
 - - - in infantile paralysis .. 146
 - - - hand, claw-hand and .. 141
 - - - nerve-supply of 615, 620
 - - - two outer, median nerve supplying 141
 - - - of micturition, nerve-supply of .. 610
 - - - mouth, myasthenia gravis affecting .. 243
 - - - myokymia of, in intermittent claudication 542
 - - - of neck, affected in Henoch's chorea .. 171
 - - - clonic spasms of .. 174
 - - - myalgia of, occipital headache from .. 369
 - - - myasthenia gravis affecting .. 243
 - - - nerve-supply to (Fig. 474) 618
 - - - spasm of, in hysteria 179
 - - - obliqui capitis, nerve-supply to (Fig. 474) 618
 - - - ocular, error of insertion of .. 270
 - - - paralysis of, in disseminated sclerosis 923
 - - - ossification of, in spondylitis deformans .. 180
 - - - pain in (see Pain)
- Muscles, contd.*
 - - - parasites in, in trichinosis .. 885
 - - - of perineum, nerve-supply of 610, (Fig. 471) 611
 - - - peroneal, affected in infantile paralysis .. 145
 - - - Tooth's paralysis 146
 - - - nerve-supply of .. 610
 - - - paralysis of .. 611
 - - - polymyositis affecting 295
 - - - pronators of forearm, nerve-supply of .. 620
 - - - pseudo-hypertrophy of, in myopathy .. 620
 - - - recti abdominales, congenital absence of .. 636
 - - - divarication of (see Divarication)
 - - - capitis, nerve-supply to .. (Fig. 474) 618
 - - - rhomboids, nerve-supply of (Fig. 474) 618, 620
 - - - rigid (see under Rigidity)
 - - - rotators of hips, nerve-supply of .. 610
 - - - of shoulder, affected in Henoch's chorea .. 171
 - - - atrophy of, from poliomyelitis (Fig. 80) 78
 - - - spasm of, in hysteria 179
 - - - spinal, atrophy of, in syringomyelia .. 320
 - - - paralysis of, scoliosis from .. 192
 - - - spinati, nerve-supply of 620
 - - - paralysis of, in Erb's palsy .. 618
 - - - stiffness of, in polymyositis .. 702
 - - - trichinosis .. 885
 - - - swelling of, in rat-bite fever .. 740
 - - - scurvy .. 679
 - - - trichinosis .. 569
 - - - tenderness of (see Tenderness)
 - - - thenar, affected in Tooth's paralysis .. 146
 - - - median nerve supplying .. 80, 82
 - - - nerve-supply of 620
 - - - wasted from aneurysm 82
 - - - brachial plexus lesion .. 82
 - - - cervical rib .. 82, 619
 - - - in progressive muscular atrophy 80, (Fig. 123) 141
 - - - from thoracic new growth .. 82
 - - - of thigh, affected in infantile paralysis .. 146
 - - - cramp in .. 188
 - - - wasted with knee-joint disease 79, 457
 - - - tibial, paralysis of, talipes from .. 146
 - - - Trichinella spiralis in 569
 - - - weak in osteomalacia .. 233
 - - - scoliosis from .. 234
 - - - worm-like contractions of, in reaction of degeneration .. 74
MUSCULAR ATROPHY 78
 - - - (and see Atrophy, Muscular)
 - - - progressive (see Progressive Muscular Atrophy)
 - - - contractions (see Contractions)
 - - - dystrophy (see Myopathy)
 - - - rheumatism (see Rheumatism)
 - - - rigidity (see Rigidity)
 - - - twitchings (see Twitchings)
 Musculocutaneous nerve (see Nerve)
 Musculospiral nerve (see Nerve)
 Mushroom poisoning, collapse from .. 421
 - - - coma from .. 422
 - - - convulsions from .. 422
 - - - degeneration of liver cells in .. 422
 - - - delirium due to .. 213
 - - - diarrhoea from .. 421
 - - - hæmoglobinuria from 357

Mushroom poisoning, contd.

- jaundice due to 408, 422
- notes on 421
- stupor from 422
- vomiting from 421
- Musical bruit in infective endocarditis 46
- noises in ear 878
- Mussels, urticaria from 935
- Mustard, dermatitis due to 916
- erythema due to 918
- finger affected by 301
- gas (see Gas)
- hedge, dermatitis due to 916
- plasters, erythema from 275
- vesicles due to 918
- vomiting due to 928
- Mutism from deafness 772
- in dementia 770
- (and see Speech, Loss of)
- Myalgia in tabes dorsalis 627
- Myalgia from chill 572
- fibrositis 572
- intercostal, tenderness from 532
- of nape of neck, occipital headache from 369
- pain in chest from 530
- limbs from 568
- tenderness of chest from 861
- muscles in 531
- from trench fever 572, 716
- varieties of 572
- and see Pain
- Myasthenia gravis, account of 243, 726, 773
- dysarthria in 773
- dysphagia due to 662
- electrical reaction in 243, 726
- hoarseness in 387
- knee-jerk in 452
- nasal voice in 773
- ocular palsy in 773
- palate fatigue in 660
- ptosis in 660
- ptialism due to 662
- regurgitation of food in 223, 927
- thinning of tongue in 773
- Myelium in actinomycosis 835
- exema marginatum 747
- erythrasma 313, 747
- favus 309
- of ringworm 310
- in tinea versicolor 313
- Myetoma, account of 893
- Mycosis fungoides 658, 886, 888
- Myelemia, aplastic, purpura in 676
- Myelitis, acute, hyperpyrexia from 390, 401
- from injury 391
- anaesthesia from (Fig. 58) 752
- bedsores in 321, 452
- Brown Sequard paralysis from 608
- compression, abdominal pain from 594
- account of 628
- from aneurysm 629
- causes of 628
- girdle pain in 628
- primary lateral sclerosis simulated by 631
- constipation in 165
- cystitis from 452
- gangrene from 317
- girdle pain in 326
- knee-jerk absent from 451
- pain in legs from 176
- precipitate defaecation in 394
- pupil reacting to light but not to accommodation in 674
- pyclophoritis from 452
- retention of urine in 493, 495
- spastic legs from 176
- transverse, account of 628
- due to actinomycosis 626, 628
- amyotrophic lateral sclerosis simulated by 81
- anaesthesia from 536, 628

Myelitis, transverse, contd.

- from aneurysm 486, 629
- 626, 628, 629
- ankle-clonus in 81
- no ankle-clonus with 81
- anomalous cases of 81
- anterior corneal cells affected by 81
- bladder trouble with 81
- from bullet wound 486, 628
- cervical enlargement involved by 81
- from compression 486, 626, 628
- crushing 486
- cystitis in 720
- deep reflexes increased in 177
- from embolism 630
- extensor plantar reflex in 81, 88
- no extensor plantar reflex with 81
- due to fracture of spine 628
- girdle pain with 177, 536, 628
- due to hydatid cyst 626, 628
- hyperaesthesia with 177
- in infective endocarditis 630
- influenza 630
- from injury 486, 626, 628, 629
- intercostal paralysis from 81
- from kick of horse 629
- knee-jerk absent with 81
- increased in 81
- loss of sensation in 177
- lumbar enlargement involved by 81, 627
- man-en-grille from 81
- muscular atrophy with 81, 627
- no muscular wasting with 81
- from new growth 486, 626, 628
- pain in chest from 536
- paralysis before anaesthesia in 628
- paraplegia from 626, 627, 628
- peripheral neuritis simulating 81
- phrenic paralysis from 81
- presence or absence of pain in 628
- priapism from 657
- primary 626
- progressive muscular atrophy simulating 81
- R.D. from 81, 627
- no R.D. with 81
- rectal trouble from 81
- reflexes lost from 627
- retention of urine in 720
- due to scarlet fever 28, 630
- sensation recoveries before motor power in 628
- sensory changes in 81
- spastic paraplegia with 81
- sphincter trouble in 177
- from spinal caries 486, 626, 628
- thrombosis 486, 628
- stab 486, 628
- syphilis 486, 628
- syphilitic endarteritis 629
- "tooth's" peroneal atrophy simulating 81
- typhoid fever 486, 630
- in typhoid fever 628, 630
- no wasting with 81
- without wasting 622
- Myelocle, congenital 622
- Myelocyst in acholuria 30
- jaundice 30
- aplastic anaemia 30
- basophil 28
- from carcinoma 454
- characters of 28, 30
- in cirrhosis of liver 30
- coloured figure of (Fig. 40) 29
- eosinophil 28

Myelocytes, eosinophil, contd.

- coloured figures of (Fig. 41) 29, (Fig. 44) 32
- in familial splenomegaly 30
- Hodgkin's disease 30, 49, 471, 782
- lymphadenoma 30, 34
- lymphatic leukaemia 34
- mixed leukaemia 35
- neutrophil 28, (Fig. 44) 32
- in pernicious anaemia 30
- splenic anaemia 30, 72
- splenomedullary leukaemia 30, 32, 33, 71, 83, 779
- Myeloid sarcoma (see Sarcoma)
- Myeloma, callus simulating 823
- chronic abscess simulating 823
- clavicle affected by 822
- cracking of bone over 823
- femur affected by 822
- humerus affected by 822
- of iliac bone, skiagram of (Fig. 24) 20
- jaw affected by 822
- long bones affected by 822
- lymphatic glands not enlarged with 823
- malignant epulis and 823
- no metastases from 823
- of os calcis 552
- osteomyelitis simulated by 823
- periosteal sarcoma simulated by 823
- radius affected by 822
- rheumatism simulated by 823
- of rib, albumosuria in 21
- operation in diagnosis 21
- skiagrams of (Fig. 24) 20, (Fig. 25) 21
- sacrum, skiagram of (Fig. 24) 20
- spine, abdominal pain from 151
- albumosuria from 20
- coxal simulated from 151
- skiagram of (Fig. 24) 20
- tibia affected by 823
- X rays in diagnosing 823
- Myelomata, Benec-Jones' albumose and 20, 22
- of chest wall 210
- multiple, skiagram of (Fig. 24) 20
- of ribs 210
- skiagraphy in diagnosing 22
- Myeloblasts, bulia from 124
- hysterical patient using 124
- malingering using 124
- Myocardial affections, account of 264
- abdominal pain from 151
- in acute rheumatism 264
- age incidence of 17, 69
- albuminuria from 17, 69
- from alcohol 18
- angina pectoris from 18
- aortic systolic bruit with 69
- ascites from 62
- atheroma with 69
- in athletes 18
- blacksmiths 18
- blood-pressure high with 18
- no bruit with 18
- Cheyne-Stokes breathing from 139
- from chloroform 416
- colic simulated from 151
- collapse from 164
- death in sleep from 217
- delirium from 17
- diagnosis of 69
- difficulty in diagnosing dyspepsia simulating 595
- dyspnoea from 264
- electrocardiogram in diagnosing 18, (Figs. 71-73) 53
- endocarditis with 264
- fainting due to 298
- in fat people 18
- fevers 53
- from hard work 18

Myocardial affections, contd.

- heart enlarged from 18, 70, 264
- failure from 17, 62, 69, 139, 212
- impulse displaced in 373
- heart-block from 109
- interstitial 264
- left ventricle enlarged from 258
- mitral regurgitation from 69, 258, 263
- nutmeg liver from 463
- without objective evidence 53
- from occupation 18
- oedema of legs from 517
- in old age 53, 111
- pain in spine from 871
- palpitation from 263, 264, 594, 595
- parenchymatous 264
- pericarditis with 264
- precordial pain from 263, 264
- pulse feeble from 264
- irregular from 264
- pyemic 264
- shortness of breath from 111, 113, 114, 115
- skiagram and 115
- sudden death from 115
- from syphilis 18
- systolic bruit with 18, 69
- tenderness of spine from 871
- varieties of 62, 70
- weak first sound from 264
- (and see Fibroid Heart)
- Myocarditis, account of 264
- Myoclonus, account of 173
- convulsive from 181
- from encephalitis 173, 223
- epilepsy 173, 174
- laceration from 173
- parathyroid loss and 174
- Myokymia 542
- Myoma cutis, account of 889
- Myomata (see Fibromyoma)
- Myopathy 78, 172, 291
- age incidence of 78
- alternative names for 172
- arm affected by 625
- bilateral facial palsy in 774
- boys affected more than girls by 624
- distal, of Gowers' 172
- electrical reactions in 78
- Erb's juvenile 172
- eyelids drooping in (Fig. 245) 291
- face affected by 625
- facies in (Figs. 243, 244) 291
- fatigue type (Fig. 245) 291
- nasal snile type (Fig. 246) 291
- facio-scapulo-humeral 78, 172
- family history in 78, 146, 620, 624
- fibrillary contractions rare in 172, 615
- no fibrillary contractions in 620
- I Friedreich's ataxy simulating 78
- inability to whistle in 291
- infantile 78, 625
- paralysis diagnosed from 78
- paraplegia in 621
- insidious onset of 624
- interstitial muscular fat in 624
- jaw dropping in (Fig. 245) 291
- juvenile 78, 172, 625
- paraplegia in 621
- knee-jerk absent in 451
- kyphosis in 194
- Landouzy-Dejerine 78, 172, 625
- of Leyden and Moebius 172
- limping from 456
- lips pouting in 291
- lordosis from 195
- muscles fibrous in 624
- muscular atrophy in 620, 624, 625

Myopathy, contd.

- nerves normal in .. 624
- orbicularis oris weak in .. 291
- palpebrarum weak in .. 291
- paralysis of arm from .. 620
- back muscles in .. 191
- paraplegia from .. 621
- peripheral neuritis distinguished from 78, 625
- plantar reflex flexor in 88
- pseudo-hypertrophic .. 78, 172, 620, 624
- no R.D. in 78, 620, 624, 625
- reflexes in .. 624
- persistent in .. 625
- 'rite en travers' in .. 291
- risorius weak in .. 291
- scoliosis from .. 191, 192
- no sensory changes in 625
- shoulder affected by .. 620, 625
- slow onset of .. 620
- progress of .. 624
- staring in .. 291
- talipes in .. 146
- Tooth's paralysis simulated by .. 146
- transverse smile in .. 146 (Fig. 244)
- types of .. 78
- of Zimmerlin .. 172
- zygomatics weak in .. 291
- Myopia, crescents due to .. 517
- myopia from .. 104
- night blindness due to .. 926
- pupil large in .. 671
- strabismus due to .. 517
- Myopic crescent (Figs. 416, 417) .. 798
- Myositis .. 702
- fibrositis and .. 566, 581
- infective arthritis and .. 566
- intercostal pain in chest from .. 862
- neuritic pains from .. 566
- neuritis and .. 581
- occupation neurosis .. 581
- simulating .. 581
- ossificans .. 180, 703
- calcification of muscles in .. 180
- inability to open mouth due to .. 884
- lime deposits in .. 703
- pain in muscles in .. 703
- pyrexia in .. 180, 703
- pain in limbs from 568, 569
- shoulder from .. 580
- between shoulders from .. 566
- in tongue from .. 590
- of rectus abdominis, pain in iliac fossa from .. 557
- rheumatic, torticollis simulated by .. 179
- rheumatoid arthritis and .. 566, 581
- pain of back from .. 566
- stiffness of back from .. 566
- muscles from .. 861
- spine from .. 868, 869
- (and see Polymyositis)
- Myotonia atrophica .. 172
- Myrcia acris, dermatitis due to .. 916
- Myrtol, coma from .. 154
- dyspnoea from .. 246
- erythema from .. 275
- from eucalyptus oil .. 246
- Myxœdema, adiposis dolorosa simulating .. 510
- albuminuria in 16, 50, 516
- amenorrhœa in .. 23, 484
- anaemia in .. 127
- simulated by .. 50
- apathetic facies in .. 290
- baggy eyelids in .. 506 (Fig. 391)
- broad thick fingers and hands in .. 507
- cerebral tumour simulated by .. 50
- coma in .. 153, 156
- debility in .. 127
- delusions in .. 156
- dementia in .. 50
- depression in .. 156
- diabetes insipidus in .. 656

Myxœdema, contd.

- dry skin in .. 656
- dyspituitarism distinguished from .. 290
- ears thick in .. 290
- excitation in .. 156
- eyebrows deficient in .. 290
- falling out in .. 508
- eyelids in (Fig. 392) 507
- facies in .. 155, 290
- coloured figure of .. 506 (Fig. 391)
- puffiness in .. 50
- falling out of hair in .. 508
- fatty masses in .. 290
- features broadened in .. 50, 507, 656 (Fig. 68)
- feet broad in .. 510
- fingers broad in .. 507, 656
- flushed cheeks in .. 290
- general account of .. 50
- ill health in .. 127
- hair brittle in .. 50
- scanty in .. 50, 290
- hands in (Fig. 70) 51
- broad in .. 507, 510, 656
- swollen in .. 50
- hoarseness in .. 387
- illustrated (Fig. 68, 50, 506 (Fig. 391))
- increasing stoutness in .. 507
- insanity simulated by .. 50
- intellect dull in 50, 507, 656
- larynx changes in .. 50
- less swollen in .. 50
- lethargy in .. 50, 156
- leucocytosis in .. 454
- lips thick in .. 290
- loss of strength in .. 507
- malar flush in .. 50, 507 (Fig. 391)
- mental slowness in .. 156
- symptoms in .. 50, 156
- mitral stenosis simulated by .. 50
- nails brittle in .. 290
- striated in .. 290
- nephritis simulated by .. 50, 290
- nose broad in .. 290
- obesity in .. 505
- œdema of legs in 511, 517
- paralysis agitans simulated by .. 290
- perspiration deficient in .. 656
- polyuria in .. 654, 656
- pseudo-œdema of legs in .. 656
- puffiness eyelids in .. 290
- pulse slow in .. 109, 290
- rings tight in (Figs. 392, 507)
- sallowness in (Fig. 391) 506
- sex incidence of .. 50
- skin coarse in .. 290
- dry in .. 290
- sallowness in .. 290
- thickened in .. 50
- speech slow in .. 290
- symptoms of .. 507
- temperature subnormal in .. 290, 492
- thyroid extract in diagnosing 50, 155, 290, 508, 510, 516, 656
- tongue swollen in .. 852
- urine changes in .. 50
- voice affected in .. 50
- weight increased in 127, 656
- wrinkled skin in .. 507 (Fig. 392)
- (and see Hypothyroidism)
- Myxœdema fruste .. 235
- Mongolism distinguished from .. 236

Nail atrophy in syringo-

- myelia .. 320
- in heel .. 552

- dull, in psoriasis .. 496
- from ringworm .. 312
- eczema affecting 312, 496
- marginatum of .. 312
- egg-shell, hyperidrosis and .. 497
- epidermolysis bullosa affecting .. 496
- exfoliated, in eczema .. 496
- from ringworm .. 312
- favus of .. 309, 312, 496
- fissure by, chancre causing .. 302
- gout affecting .. 312
- grey-stained, from ringworm .. 312
- hypertrophy of .. 497
- in syringomyelia .. 320
- inflammation due to syphilis .. 497
- tuberculous .. 497
- lost in alopecia areata .. 92
- from epidermolysis bullosa .. 496
- occupation affecting .. 496
- orange-rind, in eczema .. 496
- over-curved, in clubbed fingers .. 112
- putrid, in eczema .. 496
- psoriasis affecting 312, 496
- ram's-horn like .. 497
- rate of growth of .. 933
- rheumatism affecting .. 312
- ridges on, as evidence of disease .. 933
- ringworm of .. 309, 312, 496
- shed in diabetes .. 335, 496
- psoriasis .. 496
- syphilis .. 496
- split in eczema .. 496
- psoriasis .. 496
- spoon .. 496
- striated in myxœdema .. 290
- suppuration below, from onychia .. 497
- thick and spongy, from ringworm .. 312
- thickened in eczema .. 496
- transverse furrows in .. 496
- ridges on, from lobar pneumonia .. 497 (Fig. 387)
- trophic changes in .. 496
- white spots on .. 496
- Nail-head skin in ichthyosis hystrix .. 599
- NANOSOMIA .. 232
- Naphtha, fainting due to .. 297
- hæmoglobinuria from .. 557
- peripheral neuritis from .. 80, 84
- workers, acne in .. 917
- pustules in .. 917
- ulcers in .. 917
- Napkin region eruptions .. 498
- Nares collapsing, snoring due to .. 757
- itching, sniffing tic from 173
- occluded, anosmia from 756
- posterior, bacteriological investigation of .. 81
- rhinoscleroma affecting .. 889
- pruritus of .. 659
- sepsis of, cervical adenitis from .. 763
- small, snoring due to .. 757
- working, in pneumonia (see Necrosis)
- Nasal bones, necrosis of .. 735
- overgrown in acromegaly .. 293
- syphilis of, epistaxis from .. 274
- catarrh, anosmia from 756

Nasal catarrh, contd.

- epistaxis from .. 273
- from iodides .. 94
- middle ear disease from .. 253
- snoring due to .. 757
- diphtheria .. 224, 225
- DISCHARGE .. 223
- (and see Discharge, Nasal)
- disease, cerebral abscess from .. 18, 4
- infection, D.A.H. from 859
- mucosa, dryness of, from fifth nerve paralysis 756
- nerve, distribution of (Fig. 389) 748
- obstruction, agustia due to .. 859
- septum (see Septum)
- sinuses, empyema of .. 694
- sinusitis (see Sinusitis)
- smile in myopathy .. 291 (Fig. 246)
- voice (see Voice)
- and see Nose
- Nasolabial folds obliterated in facial paralysis 602
- seborrhœic dermatitis affecting .. 498, 602
- unequal in hemiplegia .. 381
- pain from upper first bicuspid tooth .. 549
- sensory area .. 550 (Figs. 442, 443)
- tenderness from canine tooth .. 549
- Nasopharynx, adenoids in 173
- carcinoma of, earache from .. 253
- fibrosarcoma of, foul breath from .. 113
- snoring due to .. 757
- foreign body in, in children .. 113
- foul breath from .. 113
- sarcoma of, earache from .. 253
- sepsis in, suppurative meningitis from .. 732
- Nasutrium, arteriole, dermatitis due to .. 916
- Natal fold, oblique, from tuberculous lip .. 457, 458 (Fig. 377)
- Natiform skull .. 819
- Nauheim treatment in fatty heart .. 595
- Nausea from active congestion of liver .. 417
- acute gastritis .. 338
- in acute pancreatitis .. 931
- rheumatism .. 759
- yellow atrophy 345, 416
- angina pectoris .. 52
- from arsenic .. 83, 638
- bacterium .. 91
- in botulism .. 243
- from carcinoma of stomach .. 397, 340
- catarrhal jaundice 345, 411
- chronic gastritis .. 338
- in cirrhosis of liver .. 67
- flushing with .. 303
- from gastric ulcer .. 339
- with gastritis .. 398, 930
- before hæmatemesis .. 359
- from intestinal colic .. 525
- lead .. 45
- in Meniere's disease .. 912
- pellagra .. 279
- peritonitis .. 524
- phosphorus poisoning 421
- phylus .. 346
- from portal obstruction 844
- in scarlet fever 759, 928
- from snake-bite .. 422
- in tuberculous peritonitis .. 806
- with undue pulsation of abdominal aorta 662
- vomiting with .. 929
- Navel (see Umbilicus)
- Navies, left ventricle hypertrophied in .. 374
- pain in shoulder in .. 581
- Neck, abscess in, from adenitis .. 474
- acne affecting 600, 683, 865

Neck, contd.

- actinomycosis of (see Actinomycosis)
- brawny swelling of, in angina Ludovici .. 197
- bruit de diable in .. 49, 374
- cellulitis of, stridor due to .. 799
- crack in .. 523
- dislocation of, unilateral .. 797
- epithelioma of (Fig. 440) .. 429
- fistula in, from adenitis .. 474
- glands in, see Lymphatic Glands, Cervical
- injury of, fracture of spine from .. 796
- still neck due to .. 796
- muscles, see Muscles
- nodules in, tuberculous glands and .. 481
- oedema of, see Oedema
- pain in, see Pain
- paralysis of, in Landry's .. 632
- pigmentation of, in acanthosis nigricans .. 295
- carcinoma of, tomach .. 295
- pinching of, pupil dilating from .. 618
- pulsatile, in exophthalmic goitre .. 846
- rigid, from cervical caries .. 528, 795
- sarcoma of, temperature chart in (Fig. 364) .. 706
- scars in, in scleroderma .. 500
- scleroderm affecting .. 498, 745
- sensory ataxia of .. 444, 450
- central, in (Fig. 451) .. 631
- sepsis of, cervical adenitis from .. 763
- short, in emphysema .. 208
- and thick, apoplexy and .. 208
- sinuses in, from actinomycosis .. 334
- sore on, cervical glands enlarged from .. 474
- spasm in, in tetanus .. 190
- squat, in cretin .. 294
- **STIFF** (Fig. 294) .. 794
- and see Still Neck
- swelling of, see Swelling
- tenderness of, see Tenderness
- tetany involving .. 189
- tic affecting .. 173
- tremor of, from encephalitis .. 157
- in old age .. 880
- paralysis affecting .. 880
- trichinosis affecting .. 569
- tubercle of .. 683
- tumour in, tracheal neuritis simulated by .. 544
- ulceration of, from epithelioma .. 475
- stretch with .. 475
- veins, see Veins
- venous pulse in, in diagnosing heart block .. 667
- vesicles on, from cervical herpes .. 253
- wood tick invading .. 626
- wound of, surgical emphysema due to .. 805
- xeroderma pigmentosum affecting .. 888

- Necrosis of bone, anemia from** .. 47
- central .. 818
- lichen scrofulosorum with .. 598
- from periostitis .. 818
- rheumatic fever simulated by .. 423
- cartilage in, lupus vulgaris .. 500, 892
- fat (see Fat Necrosis)
- of femur, popliteal abscess due to .. 844
- jaw from alveolar abscess .. 834
- after exanthemat .. 834
- injury .. 834
- due to mercury .. 834
- periosteal abscess .. 834

Necrosis of jaw, contd.

- due to phosphorus .. 94, 834
- pyralism from .. 661
- due to syphilis .. 834
- after typhoid fever .. 834
- lacrimal bone .. 273
- nasal bones, anosmia due to .. 756
- bridge of nose .. 756
- fallen in from .. 113
- from injury .. 225
- pus from nose due to .. 225
- from syphilis .. 225, 261
- pubis, scrotal swelling due to .. 851
- from Kaynaud's disease .. 302, 320
- of rectus abdominis muscle, acute pain in .. 736
- appendicitis simulated by .. 561, 786
- discoloration over .. 561
- in influenza .. 561, 736
- operation in .. 736
- pain in iliac fossa .. 561
- pyrexia from .. 561
- rigidity due to .. 561, 736
- tenderness in .. 736
- from thrombosis .. 561, 736
- in typhoid fever .. 736
- skin in leprosy .. 82
- due to phenol .. 918
- soft parts in frostbite .. 125
- Raynaud's disease .. 125
- and see Gangrene
- spine, swelling in iliac fossa due to .. 829
- tibia, acute, cellulitis from .. 147
- contracture of leg after .. 147
- talipes from .. 147
- Necrospinal, sterility due to** .. 793, 794
- Needle in ear, blood due to** .. 522
- foot, limping due to .. 456
- pan in foot due to .. 436
- heel .. 551, 552
- knee, limping from .. 456
- punctures, purpura due to .. 676
- in rectum .. 726
- Needlewomen, atropia, anesthesia in** .. 515
- Needlework, eyestrain from** .. 547
- occupation neurosis from .. 546
- pain in arm from .. 546
- eye from .. 547
- Needling of chest in diagnosis of emphysema** .. 477, 695
- pyopneumothorax .. 647, 800, 801
- hemothorax from .. 361
- interlobar emphysema found by (Fig. 132) .. 133
- for pus .. 133
- surgical emphysema from .. 254
- in diagnosing abscess of antrum of Highmore .. 567
- liver .. 315, 696
- cold abscess .. 833
- hamipneumothorax .. 647, 800
- hydropneumothorax .. 826
- iliopsoas bursa .. 826
- lipoma .. 833
- meningocele .. 284
- pleuritic effusion .. 703
- salivary calculus .. 848
- subdiaphragmatic abscess .. 697, 807
- tuberculous abscess .. 831
- of joint .. 424
- in pleural effusions .. 135
- (and see Puncture)
- Negro ancestry, pigmentation in mouth from** .. 641, 643
- cachexy .. 128

Negroes, leucopenia in

- pneumonia in .. 455
- pica in .. 128
- stomach disease of .. 128
- Neisser's stain .. 196, 758
- Neokharisvan, toxic effects** .. 422
- Neoplasm (see Carcinoma; Epithelioma; Sarcoma, etc.)
- Neosalvarsan, arsenic in** .. 277
- erythema from .. 275, 277
- toxic effects of .. 422
- Nephritis, acute, albuminuria in** .. 9, 12, 17, 21, 57, 353
- albuminuria in .. 12, 21
- angioneurotic oedema .. 295
- simulating .. 295
- Fig. 497 .. 513
- anuria in .. 12, 55, 57
- bacteriuria in .. 88
- becoming chronic .. 12, 13
- blood casts in .. 57
- in urine in .. 57
- from boils .. 11
- brown, deposit in .. 11
- urine in .. 12
- from cantharides .. 11
- casts may be absent .. 11
- causes of .. 11
- Cheyne-Stokes breathing from .. 139
- from chill .. 353
- chlorides in urine in .. 12
- in cholera .. 11
- on chronic .. 11, 12
- from chronic appendicitis .. 11
- cold .. 13, 57
- colour of urine in .. 12
- from damp .. 13
- degrees of .. 17
- delirium in .. 211
- due to diphtheria .. 12
- duration of albuminuria of .. 12
- from emphysema .. 11
- enteric .. 57
- epithelial casts in .. 57, 353
- exhaustion disease .. 110
- simulating .. 295
- facies of .. 295
- general oedema in .. 11
- globulin in urine in .. 12, 513, 516
- Graves' disease simulated by .. 514
- guaiacum test positive from hematogenous infection .. 57
- hematuria in .. 12, 88, 348, 353
- Henoch's purpura .. 680
- hyaline tube-casts in .. 353
- from infected emboli .. 9
- influenza .. 11, 12
- intestinal toxemia .. 11
- leucocytes in urine in .. 12
- lumbar cushion in .. 513
- in malaria .. 11
- malignant endocarditis .. 9, 10
- many causes and types .. 11
- methemoglobin in .. 12
- urine in .. 12
- oedema in .. 653
- of ankles in .. 12
- back in .. 353
- eyelids in .. 12, 295, 353
- face in .. 12
- genitals in .. 12
- legs in .. 353
- loins in .. 12
- without oedema .. 12, 353
- from otitis media .. 11
- oxalic acid .. 11
- crystals in .. 12
- oxyhaemoglobin in .. 12
- urine in .. 57
- pallor in .. 57
- phosphates in urine in .. 12
- pneumococcal .. 11
- from pneumonia .. 11, 12, 57
- post-nasal catarrh .. 11
- pregnancy .. 11
- primary, differentiated from acute on chronic .. 11, 12
- general account .. 11, 12

Nephritis, acute, contd.

- puffiness of ankles in .. 57
- face in .. 57
- from purulent bronchitis .. 11
- pyorrhea alveolaris in .. 57
- pyrexia in .. 12
- reaction of urine in .. 12
- rectal examination .. 9, 10
- in .. 17
- red cells in urine in .. 17
- relation of febrile albuminuria to .. 17
- renal epithelial cells in urine in .. 12, 17, 353
- from renal emboli .. 10
- scarlet fever .. 11, 12, 57, 759
- septic tonsils .. 11
- serous effusion in .. 653
- simulated after excessive drinking .. 514
- by malignant endocarditis .. 9
- new growth .. 9
- thrombosis of inferior vena cava .. 10
- renal veins .. 10
- war oedema .. 110, 514
- smoky urine in .. 12
- from specific fever .. 353
- specific gravity of urine in .. 12
- high in .. 353
- spectroscopic test in .. 12
- streptococci causing .. 11
- in syphilis .. 11, 12
- things simulating .. 514
- tube-casts in .. 12, 17, 57
- with no tube-casts .. 12
- from turpentine .. 11
- uraemia from .. 57, 159, 211
- urea in urine in .. 12
- uric acid crystals in .. 12
- urine changes in .. 12
- scanty in .. 12, 353
- from uterine infection .. 11
- vaginal examination in .. 10
- from vaginal infection .. 11
- albuminuria with .. 64, 249
- amenorrhoea in .. 23
- anasarca with .. 135
- ascending, albuminuria from .. 9, 11, 16
- from aneurysm .. 9
- auria from .. 55
- from calculus .. 9
- casts in urine from .. 11
- causes of .. 9
- Cheyne-Stokes breathing from .. 139
- chronic, causes of .. 9
- general account of .. 11
- in combined sclerosis of cord .. 211
- compression paraplegia .. 211
- from cystitis .. 211
- delirium from .. 211
- from displaced womb .. 9
- in disseminated sclerosis .. 211
- from enlarged prostate .. 9, 183, 211
- fibromyoma .. 9
- fracture-dislocation of spine .. 211
- general account of .. 11
- from gonorrhoea .. 16
- granular kidney from .. 390
- hyperpyrexia in .. 390
- from kinked ureter .. 9
- ovarian cyst .. 11
- pale urine in .. 11
- from pelvic tumour .. 9
- pregnancy .. 9, 16
- primary lateral sclerosis .. 211
- prolapse of uterus .. 16
- retention of urine .. 211
- specific gravity of urine low from .. 11
- from stricture of urethra .. 9, 11, 183, 211
- in tabes dorsalis .. 211
- from tuberculous disease .. 9
- uremia from .. 139, 183, 211
- asphyxial .. 9
- due to Bacillus coli .. 90

Nephritis, contd.

- due to Bacillus pneumoniae .. 90
- - pyocyaneus .. 90
- - tuberculosis .. 90
- chronic peritonitis simulating .. 64
- chronic, accentuated .. 64
- aortic second sound in .. 2
- - from acute .. 13
- - acute exacerbations on .. 12
- - age incidence of .. 13
- - albuminuria from .. 9

Nephritis, chronic, contd.

- - pale urine in .. 15
- - palpitations in .. 14
- - parenchymatous, albuminuria in .. 506
- - - albuminuric retinitis in .. 506
- - - big heart in .. 506
- - - high blood-pressure in .. 506
- - - insidious origin of .. 506
- - - large pale person in .. 47, 506
- - - obesity due to .. 505, 506
- - - prolonged first sound at impulse in .. 506
- - - renal tube-casts in .. 506
- - - ringing aortic second sound in .. 506
- - - pericarditis with .. 15
- - - peritonitis with .. 15
- - - pleuritic effusion with .. 15
- - - polycystic disease simulating .. 57
- - - polyuria with .. 15, 57
- - - precordial pain in .. 14
- - - prolonged first sound with .. 2, 12, 14
- - - pulmonary congestion in .. 14
- - - red granular contracted kidneys in .. 14
- - - relation to arterio-sclerosis .. 14
- - - retinal changes in .. 57
- - - ringing second sound in .. 14
- - - from scarlet fever .. 13
- - - serous membranes inflamed in .. 14, 15
- - - shortness of breath in .. 14
- - - ringing in ears from .. 14
- - - specific gravity of urine with .. 15
- - - from syphilis .. 13
- - - systolic bruit in .. 14
- - - tinnitus due to .. 879
- - - tubal .. 334
- - - age incidence of .. 14
- - - albuminuria in .. 128
- - - anaemia in .. 42
- - - cachexia with .. 128
- - - chylous ascites with .. 72
- - - lipæmia in .. 72, Fig. 273, 334
- - - ulcerative colitis in .. 100
- - - tube-casts in .. 13, 14, 15, 140
- - - from undiagnosed acute .. 12
- - - unsuspected .. 15
- - - uræmia in .. 14, 57, 139, 174, 211
- - - Wassermann reaction in .. 14
- - - water-logging in .. 13
- - - convulsions from .. 181
- - - due to Friedländer's bacillus .. 40
- - - general œdema in .. 249
- - - hæmoglobinuria in .. 358
- - - heart large from .. 71
- - - high blood-pressure with .. 64
- - - inferior vena cava thrombosis simulating .. 909
- - - mercury dangerous with .. 661
- - - myxœdema simulating .. 50, 290
- - - œdema of face in .. 824
- - - legs from .. 515
- - - pain in limbs in .. 565
- - - physiological albuminuria simulating .. 18
- - - pleural effusion with .. 135
- - - due to pneumococcus .. 90
- - - of pregnancy, general account of .. 11
- - - retinitis with .. 64
- - - rigor in .. 737
- - - from scarlet fever .. 763
- - - in secondary syphilis .. 601
- - - spirochaetosis icterohæmorrhagica .. 419, 420
- - - due to Staphylococcus aureus .. 90
- - - Streptococcus pyogenes longus .. 90
- - - subacute, albuminuria in .. 140
- - - anaemia in .. 46, 140
- - - chylous ascites with .. 140

Nephritis, subacute, contd.

- - chyluria with .. 140
- - general œdema in .. 140
- - hæmaturia from .. 348
- - heart enlarged in .. 140
- - lipæmia with .. 140
- - renal epithelial cells in urine in .. 140
- - suppurative .. 57
- - - abdominal rigidity due to .. 736
- - - albuminuria in .. 736
- - - appendicitis simulated by .. 736
- - - bacteria in urine from .. 736
- - - casts in urine from .. 736
- - - from cystitis .. 699
- - - enlarged prostate .. 699
- - - general peritonitis simulated by .. 736
- - - hæmaturia in .. 736
- - - multiple abscesses in kidneys in .. 699
- - - pain in loins from .. 699
- - - pyrexia from .. 688, 699, 736
- - - pyuria from .. 699, 736
- - - rigors from .. 699
- - - from stricture .. 699
- - - tenderness in loin with .. 736
- - - vomiting due to .. 736
- - - (and see Cohn Bacillus; and Pylonephritis)
- - - syphilitic, mercury and .. 94
- - - tube-casts from .. 249
- - - unilateral .. 353
- - - uræmia from .. 396
- - - vertigo due to .. 911
- Nephropexy, ureteral obstruction after .. 447
- Nerium oleander, dermatitis due to .. 916
- Nerve, acoustic (see Nerve, Cranial, Eighth)
- - acromial, distribution of .. Fig. 589, 748
- - anterior crural, muscles supplied by .. 609
- - - origin of .. 609
- - - paralysis of (see Paralysis)
- - - thoracic .. Fig. 474, 618
- - - distribution of .. 615
- - - origin of .. 615
- - - tibial, distribution of .. Fig. 589, 748
- - areas, segmental, for teeth .. 519
- - Arnold's, cough from .. 185
- - - to external meatus of ear .. 185
- - - lobule of ear .. 185
- - - referred pain in .. 253
- - auditory (see Nerve, Cranial, Eighth)
- - auricularis superior .. Fig. 474, 618
- - auriculo-temporal, distribution of .. Fig. 589, 748
- - axillaris .. Fig. 474, 618
- - buccal, distribution of .. Fig. 589, 748
- - callus involving .. 80
- - - muscle atrophy from .. 82
- - - R.D. from .. 82
- - - cervical, eighth, affected in Klumpke's palsy .. 618
- - - - by cervical rib .. 618
- - - arm supplied by .. 543
- - - distribution of .. 615, 616
- - - fifth, arm supplied by .. 543
- - - distribution of .. 615, 616
- - - first, distribution of .. Fig. 474, 618
- - - fourth, aorta supplied by .. 533
- - - distribution of .. Fig. 474, 618
- - - shoulder supplied by .. 864
- - - second, distribution of .. Fig. 474, 618, Fig. 589, 748
- - - supplying ear .. 253

Nerve, cervical, contd.

- - seventh, arm supplied by .. 543
- - - distribution of .. 615, 616
- - - (Fig. 474) 618, 620
- - - sixth, arm supplied by .. 543
- - - distribution of .. 615, 616
- - - (Fig. 474) 618, 620
- - - paralysis in Erb's palsy .. 618
- - - sympathetic, compression of, by enlarged thyroid .. 877
- - - irritation of, by aneurysm .. 240, 675
- - - mediastinal growth .. 675
- - - pupil dilated from .. 675
- - - lesion of, unilateral sweating of .. 803
- - - paralysis of (see Paralysis)
- - - unequal pupils due to affection of .. 240
- - - third, aorta supplied by .. 533
- - - distribution of .. Fig. 474, 618, Fig. 589, 748
- - - supplying ear .. 253
- - - circumflex, distribution of .. 616, Fig. 589, 748
- - - pain in, from carrying load on shoulder .. 204
- - - reading in bed .. 583
- - - paralysis of, abduction of arm impaired in .. 617
- - - anaesthesia with .. 617
- - - arthritis simulating .. 617
- - - coccygeal, distribution of .. 611
- - - cranial, eighth, affected with facial nerve .. 604
- - - - callus affecting .. 208
- - - - chælia and .. 205
- - - - fibrosis of, after cerebrosplinal meningitis .. 208
- - - lesion of, deafness from .. 205, 604
- - - - intention tremor from .. 884
- - - tumour of, deafness from .. 208
- - - - tinnitus due to .. 879
- - - - vertigo due to .. 912
- - - vertigo from affection of .. 604, 912
- - - eleventh, affected in bulbar paralysis .. 172
- - - cervical branches to .. Fig. 474, 618
- - - paresis of in bulbar paralysis .. 172
- - - torticollis and .. 179
- - - fifth, anaesthesia of, due to mid-brain tumour .. 882
- - - distribution of .. Fig. 656, 865
- - - herpes of .. 549
- - - hyperidrosis in area of .. 803
- - - lesion of, anaesthesia of face from .. 860
- - - - paralysis of masseter from .. 860
- - - - temporal muscle from .. 860
- - - neuralgia of, ptialism from .. 661
- - - - paralysis of (see Paralysis)
- - - - ptialism from irritation of .. 661
- - - - supplying ear .. 253
- - - - tic douloureux affecting .. 253
- - - - tumour of, anaesthesia due to .. 866
- - - - trigeminal neurælia from .. 548
- - - first, congenital absence of, anosmia due to .. 756
- - - - savour and .. 861

Nerve, cranial, contd.

- ninth, lesion of, paresis of palate due to . . . 860
- - - - pharynx due to 860
- - - - taste changes
 - due to . . . 860
- - - neuralgia of . . . 253
- - - paralysis of, acustia due to . . . 859
 - in bulbar paralysis 172
 - supplying ear . . . 253
- - second, compression of, blindness due to 925
- - - connections of (Fig. 304) 377
- - - injury to, blindness due to . . . 925
- - - lesion of, light reflex lost from . . . 674
- - - primary tumour of 284
- - - seventh, affected in bulbar paralysis . . . 172
- - - carcinoma of parotid involving . . . 848
- - - in Chvostek's sign 3
- - - face atrophy from lesion of . . . 82
- - - Fallopiian canal and 605
- - - paralysis of (see Paralysis)
- - - sarcoma of parotid involving . . . 848
- - - in tetany . . . 3
- - - sixth, paralysis of, from lead . . . 45
- - - tenth, affected in bulbar paralysis . . . 172
- - - afferent fibres in . . . 928
- - - aneurysm compressing 186, 544
- - - branches of . . . 185
- - - cough and 185, 186
- - - diphtheria affecting 846
- - - after diphtheria . . . 856
- - - enlarged thyroid compressing . . . 877
- - - after influenza . . . 856
- - - irritation of, from aneurysm . . . 856
- - - big heart . . . 186
- - - caseous glands . . . 186, 856
- - - hicough from 386
- - - from mediastinal fibrosis . . . 856
- - - new growth . . . 186, 856
- - - tachycardia due to 856, 858
- - - in microbial infections . . . 856
- - - neuritis of (see Neuritis)
- - - paralysis of . . . 81
 - in bulbar paralysis . . . 172
 - supplying ear . . . 253
 - stomach . . . 927
- - third, paralysis of (see Paralysis)
- - - relations to optic nerve (Fig. 304) 377
- - - twelfth, affected in bulbar paralysis . . . 172
- - - cervical ramus from (Fig. 474) 618
- - - paralysis of (see Paralysis)
- - - tongue atrophy from lesion of . . . 82
- - - crural . . . (Fig. 471) 611
- - - deafness (see Deafness)
- - - dorsal, eighth, auricle supplied by . . . 533
 - gall-bladder supplied from . . . 864
 - liver supplied from 861
- - - fifth, auricle supplied by . . . 533
 - stomach related to 864
 - supplying ventricle 533
- - - first, affected in Klumpke's palsy 618
- - - aorta supplied by 533
- - - arm supplied by . . . 543
- - - cervical rib affecting . . . 619
- - - distribution of 615, 616, (Fig. 474) 618, 620

Nerve, dorsal, first, contd.

- - - to eighth, heart supplied by . . . 533
- - - fourth, stomach related to . . . 864
- - - ventricle supplied by . . . 533
- - - ninth, gall-bladder supplied by . . . 864
- - - liver supplied by . . . 864
- - - second, aorta supplied by . . . 533
- - - arm supplied by . . . 533
- - - distribution of . . . (Fig. 580) 748
- - - ventricle supplied by . . . 533
- - - seventh, auricle supplied by . . . 533
- - - epizygum and . . . 867
- - - gall-bladder supplied from . . . 864
- - - liver supplied from . . . 864
- - - sixth, auricle supplied by . . . 533
- - - third, aorta supplied by . . . 533
- - - ventricle supplied by . . . 533
- - - dorsalis penis, distribution of . . . (Fig. 580) 748
- - - scapulae . . . (Fig. 474) 618
- - - external cutaneous, distribution of . . . (Fig. 580) 748
- - - pain in . . . 540
- - - hamorrhoidal . . . (Fig. 471) 611
- - - plantar, internal popliteal giving off . . . 140
- - - interosseus supplied by . . . 140
- - - lumbricals supplied by . . . 140
- - - muscles supplied by . . . 609
- - - origin of . . . 609
- - - popliteal, distribution of . . . (Fig. 580) 748
- - - muscles supplied by . . . 609
- - - origin of . . . 609
- - - paravasis of . . . see Paralysis
- - - saphenous, distribution of . . . (Fig. 580) 748
- - - spermatic . . . (Fig. 471) 611
- - - facial, see Nerve, Cranial, Seventh
- - - genio-malar, distribution of . . . (Fig. 580) 748
- - - glossopharyngeal, see Nerve, Cranial, Ninth
- - - great auricular, distribution of . . . (Fig. 580) 748, (Fig. 656) 865
- - - occipital, distribution of . . . (Fig. 580) 748, (Fig. 656) 865
- - - gumma of, muscle atrophy from . . . 80
- - - R.D. from . . . 80
- - - hypoglossal, see Nerve, Cranial, Twelfth
- - - ilio-hypogastric . . . (Figs. 7) 611
- - - distribution of . . . (Fig. 580) 748
- - - ilio-inguinal . . . (Fig. 471) 611
- - - distribution of . . . (Fig. 580) 748
- - - inferior dental, neur-
- algia in . . . 567
- - - gluteal . . . (Fig. 471) 611
- - - distribution of . . . (Fig. 580) 748
- - - muscle supplied by . . . 609
- - - origin of . . . 609
- - - hamorrhoidal, distribution of . . . (Fig. 580) 748
- - - laryngeal, cough and . . . 185
- - - maxillary, distribution of . . . (Fig. 656) 865
- - - infra-orbital, distribution of . . . (Fig. 580) 748
- - - infratrochlear, distribution of . . . (Fig. 580) 748
- - - injury of (see Injury)
- - - intercostal, aneurysm irritating . . . 534
- - - intercostohumeral, distribution of . . . (Fig. 580) 748
- - - internal cutaneous, distribution of . . . (Fig. 580) 748

Nerve, intern. cutaneous, contd.

- - pain in, in brachial neuralgia . . . 543
- - **plantar, muscles supplied by** . . . 609
- - **origin of** . . . 609
- - popliteal, external
- - plantar a branch of 140
- - homologue of ulnar nerve . . . 140
- - interossei supplied by . . . 140
- - lumbricals supplied by . . . 140
- - **muscles supplied by** 609
- - **origin of** . . . 609
- - paralysis of (see Paralysis)
- - pudendal (*Fig. 471*) 611
- - saphenous, distribution of (*Fig. 580*) 748
- - lachrymal, distribution of (*Fig. 580*) 748
- - lingual, lesion of, turned tongue from . . . 860
- - taste changes due to 860
- - paralysis of, agustia due to . . . 859
- - **long thoracic, distribution of** . . . 615
- - neuritis of . . . 616
- - **origin of** . . . 615
- - paralysis of serratus magnus from lesion of . . . 616
- - **lumbar, fifth, distribution of** . . . 609, 610
- - first, distribution of . . . 610, 611
- - fourth, distribution of . . . 609, 610
- - second, distribution of . . . 609, 610
- - *Fig. 580* 748
- - third, distribution of . . . 609, 610
- - median (*Fig. 474*) 618
- - distribution of 615.
- - *Fig. 580* 748
- - **origin of** . . . 615
- - thoracic, muscles supplied by . . . 80, 82
- - two outer lumbricals supplied by . . . 141
- - mental, distribution of (*Fig. 580*) 748
- - middle cutaneous, distribution of (*Fig. 580*) 748
- - musculocutaneous (*Fig. 474*) 618
- - distribution of 615.
- - *Fig. 580* 748
- - numbness in . . . 539
- - **origin of** . . . 615
- - musculospiral, distribution of 616, (*Fig. 580*) 748
- - pain in, in brachial neuralgia . . . 543
- - paralysis (see Paralysis)
- - tender in brachial neuralgia . . . 543
- - nasal, distribution of (*Fig. 580*) 748
- - new growth involving, muscle atrophy from . . . 80
- - R.D. from . . . 80
- - **normal electrical reactions of** . . . 725
- - obturator (*Fig. 471*) 611
- - geniculate branch to knee . . . 457
- - hip supplied by . . . 457
- - **muscles supplied by** . . . 609
- - **origin of** . . . 609
- - paralysis of (see Paralysis)
- - **of the obturator internus, muscles supplied by** 609
- - **origin of** . . . 609
- - occipital, third, distribution of (*Fig. 656*) 865
- - oculomotor (see Nerve, Cranial, Third)
- - **oculopupillary, origin of** 620
- - olfactory (see Nerve, Cranial, First)
- - ophthalmic, distribution of (*Fig. 656*) 865
- - optic (see Nerve, Cranial, Second)

Nerve, contd.

- perineal (Fig. 471) 611
- peripheral, lesions of, causing muscular atrophy, list of .. 80
- - - R.D., list of .. 80
- - - hyperaesthesia due to .. 754

- - - - - pollicis .. 610
- - - - - abductors of hip .. 610
- - - - - accessorius .. 609
- - - - - adductor brevis .. 609
- - - - - longus .. 609
- - - - - magnus .. 609
- - - - - obliquus hallucis .. 609
- - - - - pollicis .. 616
- - - - - pollicis by ulnar nerve .. 141
- - - - - transversus hallucis .. 609
- - - - - pollicis .. 616
- - - - - adductores femoris .. 610, (Fig. 471) 611
- - - - - anconeus .. 616
- - - - - aorta .. 533
- - - - - arm .. 543
- - - - - auricle .. 533
- - - - - biceps of arm .. 615, (Fig. 474) 618, 620
- - - - - femoris .. 609, (Fig. 471) 611
- - - - - brachialis anticus .. 615, (Fig. 474) 618, 620
- - - - - calf muscles (Fig. 471) 611

Nerve supply, contd.

- - - - - of coracobrachialis .. 615, (Fig. 474) 618, 620
- - - - - cremaster .. 610, (Fig. 471) 611
- - - - - deltoid .. 616, (Fig. 474) 618, 620
- - - - - detrusor urine (Fig. 471) 611
- - - - - diaphragm (Fig. 474) 618, 620
- - - - - phrenic nerve and .. 185
- - - - - ear .. 253
- - - - - extensor brevis digitorum .. 609
- - - - - pollicis .. 616
- - - - - carpi radialis brevis .. 616
- - - - - longior .. 616
- - - - - ulnaris .. 616
- - - - - communis digitorum .. 610, 616
- - - - - hallucis .. 610
- - - - - indicis .. 616
- - - - - longus digitorum .. 609, (Fig. 471) 611
- - - - - pollicis .. 616
- - - - - minimi digiti .. 616
- - - - - ossi metacarpi pollicis .. 616
- - - - - proprius hallucis .. 616
- - - - - extensors of fingers (Fig. 474) 618, 620
- - - - - wrist (Fig. 474) 618, 620
- - - - - external meatus of ear, Arnold's nerve .. 185
- - - - - rotators of hip .. 610
- - - - - face .. 865
- - - - - first lumbrical of foot .. 609
- - - - - flexor brevis digitorum .. 609
- - - - - hallucis .. 616
- - - - - minimi digiti .. 616
- - - - - pollicis .. 615, 616
- - - - - carpi ulnaris .. 141, 615
- - - - - longus digitorum .. 609, 610, (Fig. 471) 611
- - - - - hallucis .. 609
- - - - - pollicis .. 615
- - - - - profundus digitorum .. 615, 616
- - - - - flexors of fingers (Fig. 474) 618, 620
- - - - - wrist (Fig. 474) 618, 629
- - - - - foot muscles (Fig. 471) 611
- - - - - gall-bladder .. 864
- - - - - gastrocnemius .. 609, 610
- - - - - gemelli (Fig. 471) 611
- - - - - gemellus inferior .. 609
- - - - - superior .. 609
- - - - - glutei .. 610
- - - - - gluteus maximus .. 609, (Fig. 471) 611
- - - - - medius .. 609, (Fig. 471) 611
- - - - - minimus .. 609, (Fig. 471) 611
- - - - - gracilis .. 609, (Fig. 471) 611
- - - - - hamstrings .. 610
- - - - - heart .. 533
- - - - - hypothenar muscles .. 620
- - - - - by ulnar nerve .. 141
- - - - - iliacus .. 609
- - - - - internus (Fig. 471) 611
- - - - - iliopectus .. 610
- - - - - infraspinatus .. 615, (Fig. 474) 618
- - - - - interossei of foot .. 140, 609
- - - - - hand .. 616, 620
- - - - - intrinsic muscles of foot .. 610
- - - - - larynx, superior laryngeal .. 185
- - - - - latissimus dorsi .. 616, (Fig. 474) 618, 620
- - - - - leg muscles .. 609, 610, 611
- - - - - levator anguli scapulae .. 615
- - - - - ani (Fig. 471) 611
- - - - - liver .. 864
- - - - - lobule of ear .. 185
- - - - - lumbricals of foot .. 140
- - - - - hand .. 615, 616, 620
- - - - - two outer, by median nerve .. 141
- - - - - muscles of defecation .. 610
- - - - - erection (Fig. 471) 611
- - - - - hand (Fig. 474) 618

Nerve supply of muscles, contd.

- - - - - of micturition .. 610
- - - - - neck (Fig. 474) 618
- - - - - perineum (Fig. 471) 611
- - - - - obliqui capitis (Fig. 474) 618
- - - - - obturator externus .. 609, 610, (Fig. 471) 611
- - - - - internus .. 609, (Fig. 471) 611
- - - - - oculopupillary .. 620
- - - - - of omohyoides (Fig. 474) 618
- - - - - opponens minimi digiti .. 616
- - - - - pollicis .. 615
- - - - - outer three lumbricals of foot .. 609
- - - - - palmaris brevis .. 616
- - - - - longus .. 615
- - - - - pectineus .. 609, (Fig. 471) 611
- - - - - pectoralis major .. 615, (Fig. 474) 618, 620
- - - - - minor .. 615, (Fig. 474) 618
- - - - - perineum muscles .. 610
- - - - - peronei .. 610
- - - - - peroneus brevis .. 609, (Fig. 471) 611
- - - - - longus .. 609, (Fig. 471) 611
- - - - - tertius .. 609
- - - - - pharynx, superior laryngeal .. 185
- - - - - plantaris .. 609
- - - - - platysma (Fig. 474) 618
- - - - - popliteus .. 609
- - - - - pronator quadratus .. 615, (Fig. 474) 618
- - - - - radii teres .. 615, (Fig. 474) 618
- - - - - pronators of forearm .. 620
- - - - - psoas (Fig. 471) 611
- - - - - pyriformis .. 609, (Fig. 471) 611
- - - - - quadratus femoris .. 609, (Fig. 471) 611
- - - - - lumborum .. 610, (Fig. 471) 611
- - - - - quadriceps extensor femoris .. 609, 610, (Fig. 471) 611
- - - - - recti capitis (Fig. 474) 618
- - - - - rhomboidi (Fig. 474) 618, 620
- - - - - rhomboideus major .. 615
- - - - - minor .. 615
- - - - - salivary glands .. 605
- - - - - sartorius .. 609, 610, (Fig. 471) 611
- - - - - scalenus (Fig. 474) 618
- - - - - scalp (Fig. 656) 865
- - - - - semimembranosus .. 609, (Fig. 471) 611
- - - - - semitendinosus .. 609, (Fig. 471) 611
- - - - - serratus anticus major (Fig. 474) 618
- - - - - magnus .. 615, 620
- - - - - soleus .. 609
- - - - - sphincter ani (Fig. 471) 611
- - - - - vesicae (Fig. 471) 611
- - - - - spinati .. 620
- - - - - sternohyoides (Fig. 474) 618
- - - - - sternomastoid (Fig. 474) 618
- - - - - sternothyroides (Fig. 474) 618
- - - - - subscapularis .. 616, (Fig. 474) 618, 620
- - - - - supinator brevis .. 616, (Fig. 474) 618
- - - - - longus .. 616, (Fig. 474) 618
- - - - - supraspinatus .. 615, (Fig. 474) 618
- - - - - tensor fasciae femoris .. 609, 610, (Fig. 471) 611
- - - - - teres major .. 616, (Fig. 474) 618, 620
- - - - - minor .. 616, 620
- - - - - thenar muscles .. 620
- - - - - tibialis anticus .. 609, 610
- - - - - posticus .. 609
- - - - - of tongue, superior laryngeal .. 185
- - - - - trapezius (Fig. 474) 618
- - - - - triceps .. 616, (Fig. 474) 618, 620
- - - - - ventricle .. 533

Nerve, contd.

- - - - - supraclavicular, distribution of (Fig. 580) 748
- - - - - supra-orbital, distribution of (Fig. 580) 748
- - - - - suprascapular (Fig. 474) 618
- - - - - distribution of .. 615
- - - - - herpes of .. 891
- - - - - neuritis of, difficulty in writing due to .. 617
- - - - - intraspinous fossa flattened with .. 617
- - - - - rotation of humerus impaired from .. 617
- - - - - origin of .. 615
- - - - - pain in, from cervical rib .. 545
- - - - - temporomalar, distribution of (Fig. 580) 748
- - - - - tibial (Fig. 471) 611
- - - - - trigeminal (see Nerve, Cranial, Fifth)
- - - - - ulnar (Fig. 474) 618
- - - - - adductor pollicis supplied by .. 141
- - - - - anaesthesia from division of (Fig. 581) 749
- - - - - distribution of .. 616, (Fig. 580) 748
- - - - - flexor carpi ulnaris supplied by .. 141
- - - - - homologous of internal popliteal .. 140
- - - - - hypotenar muscles supplied by .. 80, 141
- - - - - insensitive in tabes dorsalis .. 753
- - - - - pain in, in brachial neuritis .. 543
- - - - - paralysis of (see Paralysis)
- - - - - tender, in brachial neuritis .. 543
- - - - - vagus (see Nerve, Cranial, Tenth)
- - - - - of Wrisberg, distribution of (Fig. 580) 748
- - - - - Nerves, cervical, distribution of .. 615, (Fig. 474) 618, 620
- - - - - herpes of .. 253
- - - - - cranial, paralysis of (see under Paralysis)
- - - - - of heart .. 533
- - - - - intercostal, distribution of .. (Fig. 580) 748
- - - - - lumbar, distribution of .. 609, 610, 611
- - - - - nodules along, in von Recklinghausen's disease .. 503
- - - - - peripheral, ataxy from defects of .. 74
- - - - - sensory impulses carried by .. 73
- - - - - sacral, distribution of .. 609, 610, 611
- - - - - sensory, skin, distribution of the (Fig. 580) 748
- - - - - thickened in leprosy .. 478
- - - - - von Recklinghausen's disease .. 889
- - - - - Nervous diarrhoea .. 217
- - - - - Nervousness, abdominal rigidity from .. 734
- - - - - accentuated first sound from .. 2
- - - - - due to alcohol .. 881
- - - - - alcoholism simulated by .. 882
- - - - - D.A.H. from .. 115
- - - - - extravasates in .. 668
- - - - - in Graves' disease .. 283
- - - - - 596, 857, 877, 934
- - - - - at life insurance examination .. 2
- - - - - palpitation from .. 594, 596
- - - - - polyuria from .. 653
- - - - - pyrexia due to .. 711
- - - - - sinus arrhythmia from .. 664
- - - - - tachycardia from .. 2, 857
- - - - - tremor due to .. 879, 880, 882
- - - - - Nettle, dermatitis due to .. 916
- - - - - stinging, wheals due to .. 935
- - - - - Neuralgia, abdominal .. 826
- - - - - anterior crural .. 540
- - - - - brachial, account of .. 543
- - - - - from alcoholism .. 543
- - - - - no anaesthesia in .. 544
- - - - - cervical rib simulating .. 544
- - - - - from diabetes .. 544

Neuralgia, brachial, contd.

- in epidemic encephalitis .. 544
- fibrositis diagnosed from .. 544
- from gout .. 543
- after herpes zoster .. 546
- from influenza .. 543
- malaria .. 543
- no muscular atrophy in .. 544
- muscular rheumatism diagnosed from .. 544
- occupation neurosis simulating .. 189
- from overwork .. 543
- pain in arm from .. 543
- internal cutaneous nerve from .. 543
- musculospiral nerve from .. 543
- ulnar nerve from .. 543
- from rheumatism .. 543
- tenderness with .. 543
- from worry .. 543
- cervico-brachial, pain in shoulder from 580, 583
- conditions simulating .. 867
- from dental caries .. 472
- diaphragmatic .. 531
- in disseminated sclerosis 753
- from empyema of antrum of Highmore .. 226
- epileptiform see Tic Douloureux
- facial, trismus simulated by .. 884
- of fifth nerve, paralysis from .. 661
- genital, pain in ear from .. 253
- and see Tic Douloureux
- glossopharyngeal, pain in ear from .. 253
- throat from .. 253
- headache distinguished from .. 372
- after herpes .. 533
- in herpes zoster .. 914
- hyperæsthesia to .. 862
- in inferior dental nerve .. 567
- intercostal, account of .. 531
- auricular simulating 247
- series of spine simulating .. 193
- pain in episternum from .. 536
- hypochondriac from .. 553
- pleurisy distinguished from .. 862
- simulating .. 862
- pneumonic simulating 862
- tender points with .. 536, 553
- tenderness of chest from .. 861, 862
- X rays before diagnosing .. 536
- in lower jaw .. 866
- major .. 530, 541
- mammary .. 530, 541
- metatarsal .. 540
- minor .. 549, 866
- obturator, from hip disease .. 540
- obturator hernia .. 540
- in osteitis deformans .. 820
- ovarian, appendicitis simulated by .. 814
- at catamenia .. 814
- pain in chest from .. 530
- upper jaw from .. 567
- paroxysmal headache from .. 369
- renal, simulating calculus .. 525
- simulated from reading in bed .. 583
- tender foci in .. 372, 866
- tenderness of scalp from .. 865, 866
- tinnitus due to .. 879
- of tongue, often really glossitis .. 591
- pain in tongue from .. 590
- trigeminal 548, 549, 866
- anaesthesia of face in .. 549

Neuralgia, trigeminal, contd.

- atrophy of masseter in .. 549
- temporal muscle in .. 549
- coryza from .. 523
- from Gasserian herpes .. 549
- with glaucoma .. 924
- from growth in sphenomaxillary fossa .. 549
- gummatous meningitis .. 548
- periostitis .. 548
- headache with .. 548
- lumbar puncture in .. 548
- optic neuritis with .. 548
- paralysis of masseter in .. 549
- temporal muscle in .. 549
- pupils unequal in .. 675
- sensory impairment with .. 548
- tenderness of scalp in .. 866
- tic douloureux simulated by .. 548
- from tumour at base of brain .. 548
- of fifth nerve .. 548
- at foramen ovale .. 548
- rotundum .. 548
- Wassermann reaction with .. 548
- and see Tic Douloureux
- type of cutanea .. 539
- Neurasthenia, atrophy in .. 402
- in blue-brain cases .. 205
- brain fatigue in .. 571
- constipation in .. 161
- from dental sepsis .. 95
- dysmenorrhœa from .. 237, 238
- dyspepsia in .. 571
- fatigue in .. 570
- headache in .. 571, 870
- hyperacusis in .. 389
- hyperæsthesia in .. 754
- hysteria and .. 870, 871
- imaginary sexual desires in .. 571
- impotence in .. 493
- in omnia from .. 402, 404
- irritability in .. 405, 870
- knee-jerk exaggerated in .. 451, 571
- lack of interest due to .. 571
- law out and .. 871
- new growth simulating .. 869
- overwork and .. 571
- oedema and .. 524
- pain in face from .. 551
- limbs in .. 568, 570
- points in .. 867
- palpitation in 571, 594, 597
- phosphates in urine in .. 637
- plantar reflexes flexor in 571
- polysuria in .. 653
- sex incidence of .. 571
- after spinal injury .. 870
- stranguy due to .. 797
- suicide from .. 389
- temperature subnormal in .. 571
- tenderness of scalp from .. 865
- spine from .. 868, 870
- traumatic .. 870
- tremor in .. 879
- trench fever simulating .. 710
- worry and .. 571, 871
- Neuritis, alcoholic .. 83
- contractures from .. 177
- cramps in .. 190
- hyperæsthesia from .. 177
- talipes equinovarus from .. 177
- from arsenic .. 616
- contractures from .. 177
- hyperæsthesia from .. 177
- talipes equinovarus from .. 177
- brachial, account of .. 544
- adiposis doloresa simulating .. 544
- from alcohol .. 544
- aneurysm of subclavian artery simulating .. 544
- from arsenic .. 544
- cervical pachymeningitis simulating .. 544
- rib simulating .. 544

Neuritis, brachial, contd.

- in diabetes .. 544
- glands in axilla simulating .. 542
- heart disease simulating .. 544
- from lead .. 544
- malignant disease of spine simulating .. 544
- muscular atrophy from .. 544
- neuromata simulating .. 544
- pain in arm from .. 544
- sensory loss in .. 544
- spinal canals simulating .. 544
- from .. 544
- gliosis simulating .. 544
- tumour simulating .. 544
- tenderness in arm from .. 544
- tumour in neck simulating .. 544
- from diabetes .. 178, 610
- diphtheria .. 178
- fibrositis and .. 581
- from glycosuria .. 616
- influenza .. 178
- in omnia due to .. 402
- intercostal, tenderness of chest from .. 861, 862
- from lead .. 178, 610
- of long thoracic nerve .. 616
- loss of power from .. 612
- from mercury .. 616
- multiple (see Neuritis, Peripheral)
- myositis and .. 581
- occupation neurosis simulating .. 581
- olfactory, due to amnesia .. 756
- anosmia from .. 756
- due to noxious vapours .. 756
- part of peripheral neuritis .. 756
- due to stuff .. 756
- optic, from acute encephalitis .. 156
- albuminuria, retinitis simulated by .. 519
- from arteriosclerosis .. 771
- atoxyl .. 922
- atrophy after .. 519
- in cases of fainting .. 298
- from cerebellar abscess 110, 371, 630, 733
- tumour 110, 371, 630, 733
- cerebral abscess 109, 110, 184, 385, 613, 772
- hæmorrhage 109, 110
- lesions .. 110
- tumour 109, 110, 184, 385, 396, 528, 613, 640, 655, 772, 866
- in cerebrospinal meningitis .. 627
- convulsions and .. 183
- from diabetes .. 335
- disc blurred in .. 518
- lost in .. 519
- mushroom-shaped in .. 519
- in encephalitis .. 156, 640
- flame-shaped hæmorrhages in .. 519
- from fracture of skull .. 110
- gross brain lesions .. 111
- gumma of meninges .. 110
- headache with .. 570
- hypermetropic astigmatism simulating .. 320
- illustrated .. 518
- in infective endocarditis .. 46
- from lead .. 45
- (Fig. 155) 156, 371, 922
- meningeal hæmorrhage .. 110
- meningitis 156, 385, 640, 700, 732
- never functional .. 158
- oedema of retina in .. 518
- ophthalmoscope in detecting .. 93, 371
- from osteoma of cranium .. 110

Neuritis, optic, contd.

- in pachymeningitis .. 640
- pellagra .. 279
- pontine hæmorrhage .. 110
- in posterior basal meningitis .. 627
- retina greyish in .. 518
- striated in .. 518
- retinal veins dilated and tortuous in .. 519
- from retrobulbar neuritis .. 639, 925
- scotoma from .. 93
- from sphenoidal sinus distention .. 285
- in spinal meningitis .. 521
- from superior longitudinal thrombosis .. 156
- in syphilis .. 640
- with trigeminal neuralgia .. 548
- in tuberculous meningitis .. 627, 732, 787
- uramia .. 111
- vertigo with .. 912
- vomiting with .. 931
- white patches in .. 519
- pain in .. 612
- in shoulder from .. 580
- paralysis from .. 615
- acutans simulating .. 614
- of external popliteal nerve from .. 610
- peripheral, account of .. 570
- aching in limbs in .. 570
- from alcohol 74, 80, 85, 146, 320, 541, 570, 571, 616, 679, 934
- anaesthesia in 74, 82, 570, (Fig. 582) 749, 750
- ankle-jerk lost in .. 541
- from arsenic 45, 80, 81, 85, 104, 320, 541, 570, 571, 623
- ataxo from .. 74
- atrophy of limbs in .. 85
- back muscles affected in .. 191
- bacteriological investigations in .. 83, 84
- in beri-beri 80, 82, 83, 516
- bilateral facial palsy from .. 774
- blue line on gums in .. 571
- in cachexia .. 572
- carbon bisulphide and .. 80, 84
- from chemical substances .. 80, 81
- in a child .. 623
- chorea .. 623
- chronic pyæmia .. 80, 83
- contracture in .. 436
- cotton-wool anaesthesia in .. 74
- cramps in .. 85, 570
- cutaneous sensibility dulled in .. 541
- dead fingers in .. 570
- in diabetes .. 80, 83, 318, 335, 571
- from diphtheria .. 74, 80, 84, 146, 191, 192, 242, 456, 570, 623
- dropped wrist in .. 616
- from ether .. 80
- extensors affected more than flexors in .. 616
- of ankles affected by .. 74
- wrist affected by .. 74
- foot-drop from .. 146
- gait unsteady in 74, 75
- gangrene from 317, 318, 320
- general account of 74, 82
- paralysis simulating .. 78
- glove anaesthesia in .. 74
- and stocking anaesthesia in (Fig. 582) 749
- glycosuria in .. 571
- gnawing pains in limbs in .. 570
- gout and .. 80, 83, 571
- gumma of cauda equina simulating .. 627
- high steppage in .. 75
- in Hodgkin's disease .. 80
- hyperæsthesia in .. 570

Neuritis, peripheral, contd.

- hyperalgesia in (Fig. 582) 749, 750
- hyperextension of toes in 146
- impaired strength from 74
- inco-ordination in 313, 570
- in infective endocarditis 80
- influenza 80, 570, 571
- interosseal paralysis in 146
- joint changes in 436
- knee-jerk absent in 451, 541, 570, 626
- Korsakow's psychosis in 570
- from lead 45, 80, 84, 146, 214, 570, 571, 616
- in leprosy 80, 82, (Fig. 472) 616
- limping from 456
- list of causes of 80
- loss of power in 626
- sensation from 85
- weight due to 934
- lumbricals paralysed in 146
- in lymphatic leukaemia 80
- malaria 80
- memory affected in 570
- mental symptoms in 570
- from mercury 44, 80, 84
- microbial toxins 541
- muscle atrophy in 80, 82, 436, 541, 570, 626, 627, 934
- myopathy distinguished from 78, 625
- from naphtha 80, 84
- nasal voice from 624
- numbness in 570
- occupation and 84
- oedema with 83, 516
- olfactory nerve affected in 756
- from oral sepsis 80
- pachymeningitis simulating 583
- pain in 74, 85, 616, 623, 749, 750
- in legs in 541, 568, 571
- parasthesia in 627
- paraplegia from 621, 626, 627
- in paratyphoid fever 84
- paresis in 320
- of dorsiflexors in 75
- soft palate in 623
- pelvic growth simulating 627
- in pernicious anaemia 80
- 'pins and needles' in 570
- plantar reflexes absent in 74
- reflex flexor in 88
- polymyositis distinguished from 627
- simulated by 623
- pregnancy 80, 83
- pupil inactive in 626
- purpura with 627
- Raynaud's disease simulated by 320
- reaction of degeneration in 74, 78, 80, 82, 541, 570, 623, 626, 627
- rectal examination in 627
- reflexes diminished in 623
- exaggerated at first in 82, 570
- lost in 82, 570, 627
- reorganisation of fluids through nose in 623
- scoliosis from 191, 629
- sensory changes in 82, 85, 320, 570, 626
- in severe anaemias 80, 83
- from sore throat 84, 192
- sphincters not involved in 81, 570
- in splenic anaemia 80
- splenomedullary leukaemia 80
- stocking anaesthesia in 74
- symmetrical 74, 82
- in syphilis 80, 83, 570, 571

Neuritis, peripheral, contd.

- tabes dorsalis distinguished from 750
- simulated by 626
- simulating 78
- talipes from 145, (Fig. 150) 178
- tenderness due to 541, 570, 616, 749
- tendon reflexes absent in 74, 85
- throat cultures in 84
- tingling in 570, 749
- toes of boots worn in 75
- tophi in 571
- from toxemia 80, 572
- transverse myelitis simulating 81
- tremor in 320
- trophic changes in 320
- from tuberculosis 570
- tumour of cauda equina simulating 627
- in typhoid fever 80, 84
- from undetermined causes 80
- vasomotor symptoms in 570
- wasting in 320, 623
- of pudic nerve, dyspareunia due to 239
- tenderness in vagina from 239
- reaction of degeneration from 583
- retrobulbar, account of 547, 923, 924
- age incidence of 923
- blindness with 639, 925
- temporary from 924
- central scotoma from 923
- duration of 924
- from ethmoid sinus infection 924
- no increased intra-ocular tension with 639
- loss of sight from 546
- optic neuritis with 639, 925
- pain in eye from 546, 925
- photophobia from 639
- from sphenoid sinus infection 924
- tenderness of eye from 925
- rheumatoid arthritis and 581
- in sciatica 539
- of suprascapular nerve, effects of 617
- tenderness of spine from 868
- of vagus nerve 84
- after diphtheria 856
- influenza 856
- in microbial infections 856
- tachycardia from 856
- Neurofibroma of cord located by lipiodol (Fig. 270) 326
- in von Recklinghausen's disease 503, 865
- Neurofibromatosis 889
- pain in chest from 530
- Neurolipoma in von Recklinghausen's disease 503
- Neuroma, vulval swelling due to 853
- Neuromata 530
- of brachial plexus 544
- Neuromimesis of joint disease 435
- photophobia 640
- Neuro-muco-dermatomyositis 886
- Neuro-mucoso-mycosis 702
- Neuromyositis 702
- pain in limbs from 568
- of Senator 569
- Neurorretinitis in albuminuria 335
- diabetes 335
- malignant endocarditis 9
- Neurosis, accoucheur's hand in 2
- angioneurotic, electrical reaction in 726
- blood from ear in 522
- in blue-brain cases 205
- cerebral abscess simulating 158

Neurosis, contd.

- cerebral tumour simulating 158
- coloured sweat due to 803
- coma from 181
- convulsions from 223
- coryza from 185
- cough from 185
- disseminated sclerosis simulating 631
- dyspareunia from 240
- dyspnoea due to 247
- epiphora from 273
- Fallopiian colic due to 148
- gastro-intestinal, heart-burn from 376
- growth in spine simulating 583
- in hepatoptosis 463
- hiccup from 386
- hyperaesthesia in 862
- hysteria distinguished from 597
- of intestine, colic from 148
- ligature oedema from 512
- mucumembranous colic in 161
- nose-dripping from 224
- occupational, account of 189
- fibrositis simulated by 581
- from hair-cutting 546
- needlework 546
- pain in arm from 546
- shoulder affected by 581
- from telegraphy 546
- tremor in 879
- from typing 546
- writing 546
- palpitations in 597
- in pregnancy 662
- pruritus due to 533
- pseudo-angina from 223
- rheumatism from 662
- salivary 662
- spastic constipation in 161
- spinal curves simulating 583
- of stomach, colic from 148
- tongue, often really glossitis 591
- uterus, colic from 148
- vaginismus from 240
- vasomotor, albuminuria from 16
- electrical reactions in 726
- haemoglobinuria from 357
- in Morton's disease 540
- oedema of hands and arms in 515
- psoriasis from 662
- in Raynaud's disease 542
- Neutrophil myelocytes 28
- New growth, parasites of, in pleuritic fluid 132, 136, 138
- sputum 792
- urine 10, 349
- vomit 930
- and see Carcinoma; Epithelioma, Sarcoma, etc.
- New Zealand, hydatid cyst in 366
- Newborn, cystic kidneys in 15
- haemoglobinuria from 357
- jaundice in (see Jaundice)
- military abscesses of 681
- milk from breast in 838
- ophthalmia (see Ophthalmia)
- pemphigus in (see Pemphigus)
- tetanus in 885
- Nicholson on embryoma of testis 850
- Nicotine (see Tobacco)
- Night blindness 926
- due to choroiditis 926
- retinitis 926
- keratomalacia 891
- myopia 926
- quinine 926
- retinitis pigmentosa 926
- in sailors 926
- due to scurvy 926
- xerosis of conjunctiva 926
- starts 173
- from tuberculous hip 457
- sweats from dental abscess 694

Night sweats, contd.

- in infantile scurvy 803
- phthisis 362, 582, 803
- rickets 803
- terrors 499
- due to adenoids 403
- errors of diet 403
- insomnia from 403
- screaming due to 403
- due to worms 403
- workers, pallor in 26
- Night-flowering cereus, dermatitis due to 915
- NIGHTMARES 499
- Ninth cranial nerve (see Nerve, Cranial, Ninth)
- dorsal nerve, gall-bladder supplied from 864
- liver supplied from 864
- segment, sensory area for (Fig. 584) 751
- Nipple, cracked, pain in breast from 529
- dark brown, from pregnancy 529
- DISCHARGE FROM 227
- and see Discharge from Nipple
- epithelioma of, pain in breast from 529
- indurated in Paget's disease 887
- inflamed, pain in breast from 529
- Paget's disease of 887
- pus from 838
- retracted, with carcinoma of breast 839
- normally 839
- in Paget's disease 887
- scars affecting 918
- Nitrate of silver - see Silver Nitrate
- thorium in pycnography 445
- Nitric acid (see Acid)
- Nitrate of amyl (see Amyl Nitrate)
- sodium in diazo-reaction 217, 218
- Nitrobenzene, methemoglobinemia from 202
- Nitrogen of urine in phosphorus poisoning 421
- Nitroglycerine in angina pectoris 582
- Nitroprusside test for acetone 3
- in melanuria 905
- Nitrous oxide, delirium from 212
- fainting due to 297
- Nocturnal emission, albuminuria and 18
- enuresis (see Enuresis)
- Nodding movements in Friedrich's ataxia 883
- Node after injury 817
- periosteal, in typhoid fever 819
- syphilitic, of frontal bone 255
- Nodes, Heberden's 502
- illustrated (Fig. 336) 427
- in osteo-arthritis 430
- Parrot's 819
- syphilitic 819
- Nodosity of fingers in progeria (Fig. 241) 287
- Nodular cancer of skin in leprosy (Fig. 588) 501
- tubercles 683
- Nodule in breast, microscopical examination of 530
- epithelioma starting as 886
- gonococcal, in globus minor 851
- rodent ulcer starting as 892
- tuberculous, in globus minor 851
- seminal vesicle 723
- NODULES 500
- due to Acladum Castellani 312
- in acute rheumatism 502
- apple-jelly, in lupus 683, 743, 891, 892, 895
- in calves in Bazin's disease 502
- due to cysticerci 503
- definition of 500

Nodules, contd.

- in epididymis, from
 - syphilis 586
 - tuberculous 585, 723, 768
 - erythema keratodes 502
 - multiforme 600
 - nodosum 502
 - fibrous, tender, in fibro-
 - sitis 544
 - in gonococcal arthritis 423
 - on legs from varicose
 - veins 502
 - in leprosy 82, 501
 - liver, carcinomatous 414
 - umbilicated 68, 315, 414
 - lupus vulgaris 500
 - malignant, in peritonium 65
 - round ligament 804
 - at umbilicus 804
 - in urachus 804
 - in multiple benign sar-
 - coid 502
 - mycetoma 893
 - mycosis fungoides 888
 - neck, tuberculous
 - glands and 481
 - neurofibromatosis 889
 - of new growth at uni-
 - bilicus 593
 - in osteo-arthritis 423
 - prostate in renal tuber-
 - culosis 352
 - rheumatic, age inci-
 - dence of 502
 - Aschoff's nodes and 502
 - over knees (Fig. 275) 282
 - neurofibromatosis
 - simulating 889
 - over scapula (Fig. 226) 282
 - rheumatic fever and 423
 - in rhinoscleroma 889
 - scrofuloderma 500
 - skin from brucades 125
 - iodides 125
 - subcutaneous, in acute
 - rheumatism 186
 - valvular disease and
 - in syphilis 500
 - vesicular, seminales in
 - renal tuberculous 352
 - von Recklinghausen's
 - disease 503, 889
 - xanthoma multiplex 889
 - yaws 501
 - yellow, in xanthoma 889
 - Noise, fainting due to 296
 - headache from 372
 - tinnitus due to 878
 - undue sensitiveness to
 - (see Hyperacusis)
Noises in ear, various 878
- HEAD 503
 - from acetanilide 504
 - in acromegaly 504
 - age incidence of 504
 - in armen 504
 - with albuminuria 504
 - from alcoholism 504
 - anaemia 371
 - aortic regurgitation 504
 - arsenic 504
 - arteriosclerosis 371, 504
 - aspirin 504
 - atheroma 371
 - of cerebral arteries 504
 - in ballooning 504
 - from bleeding duo-
 - denal ulcer 504
 - after blood loss 504
 - from blow on ear 504
 - in boiler-makers 504
 - brick-makers 504
 - from bromides 504
 - caisson work 504
 - cerebral aneurysm 371
 - in chlorosis 504
 - from coal-gas 504
 - cocaine 504
 - coke fires 504
 - constipation 504
 - dental sepsis 504
 - dial 504
 - in divers 504
 - from drugs 504
 - fumes 504
 - functional 504
 - from glue-making 504
 - granular kidney 504
 - in Graves' disease 504
 - from hæmatemesis 504

Noises in head, contd.

- from hæmoptysis 504
 - heroin 504
 - high altitude 504
 - blood-pressure 371, 504
 - hypnotics 504
 - in hysteria 504
 - from inflamed audi-
 - tory meatus 504
 - in the insane 503
 - from iodide of potas-
 - sium 504
 - in leontiasis ossea 504
 - from lime-kiln fumes 504
 - luminal 504
 - medial 504
 - meningeal thickening 504
 - morphia 503
 - in mountaineers 504
 - from nerve exhaus-
 - tion 504
 - occupation 504
 - omniopon 504
 - opium 504
 - osteitis deformans 504
 - osteoporosis 504
 - otitis media 504
 - with otorrhoea 504
 - from otosclerosis 504
 - pachymeningitis 504
 - in pernicious anaemia 504
 - from petrol exhaust
 - fumes 504
 - phenazone 504
 - plumbism 504
 - after post-partum
 - hæmorrhage 504
 - with psychasthenia 504
 - from pyramid 503
 - quinine 504
 - in riveters 504
 - from salicylates 504
 - in the same varieties 503
 - from septic tonsils 504
 - severe anaemia 504
 - soap-boiling 504
 - speculum in diagno-
 - sis 504
 - from sulphonal 504
 - syphilis 504
 - toxæmia 504
 - trional 504
 - tumour of tempor-
 - ophenoidal lobe 504
 - uterine sepsis 504
 - vertigo with 504
 - Wassermann reaction
 - with 504
 - from wax in ear 504
 - in workers in deep
 - pits 504
 - and see Tinnitus
 - Noma 93, 317, 318
 - Normal saline, composi-
 - tion of 634
 - Normoblasts, coloured
 - figure of (Fig. 38) 29
 - in severe anaemia 27
 - Northumberland, ring-
 - worm of 310
 - Nose, acne affecting 600
 - angioma in, epistaxis
 - from 273
 - bacteriological investi-
 - gation of 43
- BLEEDING FROM 273
 - and see Epistaxis
 - blowing, epistaxis from
 - 273, 274
 - surgical emphysema
 - from 254
 - bottle, in cirrhosis of
 - liver 67
 - bridge of, depressed,
 - in achondroplasia 233
 - congenital syphilis
 - (Fig. 240) 290
 - fallen in, from ne-
 - crosis 225
 - syphilis 225
 - broad, in cretin 290
 - Mongolian idiocy 293
 - myxœdema 290
 - carcinoma invading 225, 226
 - cerebrospinal fluid from,
 - after fractured base
 - 155, 224
 - chancre on 824
 - coarse, from alcoholism 294
 - coloured sweat of 803

Nose, contd.

- crusts in, from atrophic
 - rhinitis 225
 - deformed by exostosis 255
 - destruction of, in lupus
 - vulgaris 892
 - difficulty in breathing
 - through, from hyper-
 - trophic rhinitis 225
- DISCHARGE FROM 223
 - (and see Discharge,
 - Nasal)
 - endothelioma invading
 - 225, 226
 - epithelioma of (see
 - Epithelioma)
 - fibroma in, epistaxis from 273
 - flat, in Mongolian idiocy 293
 - foreign body in (see
 - Foreign Body)
 - gangrene of, from em-
 - bolism 46
 - in infective endo-
 - carditis 46
 - Raynaud's disease 320
 - hereditary telangiectases
 - in, epistaxis from 273
 - injury to, epistaxis from
 - 273
 - necrosis of nasal bones
 - from 225
 - leprosy of, epistaxis
 - from 273
 - lupus of 225, 273, 500, 892
 - malignant disease of,
 - epistaxis from 273
 - massive, in acromegaly 293
 - pain in, from rodent
 - ulcer 225
 - pemphigus affecting 127
 - Pfeiffer's bacilli in 570
 - picking, epistaxis from
 - 273, 274
 - from worms 633
 - pigmented in pellagra
 - (Fig. 274) 280
 - polypus in, see Polypus
 - pus from, from abscess
 - of antrum of High-
 - more 567, 694
 - patrefaction in, foul
 - breath from 112
 - Raynaud's disease affect-
 - ing 320, 852
 - red, in children 803
 - cirrhosis of liver 466
 - regurgitation of fluids
 - through 623
 - from diphtheria 192
- FOOD THROUGH 730
 - (and see Regurgi-
 - tation of Food)
 - rodent ulcer of 225, 892
 - sarcoma invading 225
 - sepsis in, D.A.H. from 246
 - debility from 246
 - dyspnoea from 246
 - foul breath from 112
 - suppurative menin-
 - gitis from 732
 - syphilis of 225
 - foul breath from 113
 - thick, in cretin (Fig. 254) 294
 - thickened by rosacea 303
 - transillumination of 837
 - tuberculosis of, epis-
 - taxis from 273
 - ulceration of, epistaxis
 - from 273
 - varicose vein in, epis-
 - taxis from 273
 - Nostrils, bacteriological
 - investigation of 83
 - rhinoscleroma affecting 889
 - sore and exoriated,
 - from diphtheria 224
 - syphiloderm of 601
 - Notched teeth in congenital
 - syphilis (Fig. 241) 290
 - Hutchinson's (Fig. 242) 291
 - Note of exclamation hairs
 - in alopecia areata 311
**Novarsenobillon, toxic effects
 - of 422**
 - Nuck, canal of, hydrocele
 - of, fibromyoma of round
 - ligament simulating 832
 - notes on 856
 - vulval swelling due
 - to 853

*Nucleated red cells (see
 Red Corpuscles)*

Nuclein, phosphate in
 urine from 637
- products of 901
 Nucleoprotein, acetic acid
 precipitating 5
 - in cerebrospinal fluid 383
 - dissolved by nitric acid 5
 - opalescence in urine
 - from 5
 - test for 524
 - uric acid and 901
**- in urine, albuminuria
 simulated by 5, 6, 524**
 - from oxaluria 524
 - white ring with 6
 Nucleus cuneatus, sen-
 - sory impulses and 73
- facial, lesions affecting 604
 - in pons Varolii 603
 - gracilis, sensory im-
 - pulses and 73
 - red, lesion of, intention
 - tremor from 884
 - vagus, degeneration of,
 - acute dyspnoea from 606
 - laryngeal paralysis
 - from 606
 Numbness as an aura 86
 - in disseminated sclerosis 753
 - fingers in acropara-
 - thesia 545
 - flushing with 303
 - in foot in sciatica 539
 - musculo-cutaneous
 - nerve 539
 - paralysis with 612
 - in paroxysmal tachy-
 - cardia 857
 - peripheral neuritis 570
 - tabes dorsalis 753
Nummular sputum 788
 - in phthisis 187
 Nursmaids, hypertrophy
 of breast in 837
 - scoliosis in 192
 Nurses, chancre on finger
 in 301
 Nutmeg-grater skin in
 prurigo 601
 - xeroderma 599
 - liver see Liver
Nystagmus 926
NYSTAGMUS 505
 - after air crash 505
 - from albinism 505
 - amblyopia with 922
 - ataxy with 77
 - from aural irritation 505
 - cerebellar abscess
 - 371, 630, 733
 - lesions 77
 - tumour 371, 505, 630, 733
 - circular 505
 - from colour-blindness 505
 - congenital cataract 505
 - definition of 505
 - in disseminated sclerosis
 - 157, 185, 371, 505,
 - 613, 630, 883, 923
 - encephalitis 157
**- from eye disease in early
 life 922**
 - in Friedreich's ataxy
 - 145, 171, 176, 505, 624
 - hippus with 675
 - horizontal 505
 - from manganese 212,
 - 505, 882
 - in miners 505
 - after motor smash 505
 - in one eye only 505
 - from ophthalmia neon-
 - atum 505, 922, 924
 - plumbism 505
 - after railway accident 505
 - in syringomyelia 142,
 - 505, 619
 - vertical 505
 - vertigo with 505, 912
 - from work in dim light 505

OARS, blisters from 123
 Oarsmen, albu-
 - minuria in 18
 Obermeier, spirochaete of
 (see Spirochaeta Ober-
 - meieri)

OBESITY... 505
 - abdominal distention from 60, 61
 - swelling due to 804, 805
 - wall loaded with fat in 61
 - due to adiposis dolorosa 505, (Fig. 398) 509
 - amenorrhoea in 23
 - anaemia from 43
 - ascites simulated by 60
 - causes of 505
 - due to cerebellar tumour 505
 - in chronic parenchymatous nephritis 505, 506
 - constipation from 164
 - from deficient ovarian activity 794
 - definition of 505
 - due to Dercum's disease 505, (Fig. 398) 509
 - diabetes mellitus and 330, 506
 - due to diffuse lipomatosis 505
 - dyspituitary (Fig. 239) 290, (Fig. 396) 508, (Fig. 397) 509
 - in eunuchs 507
 - excision of ovaries and 505
 - testes and 505
 - fatty heart from 70, 244, 505
 - glycosuria and 332
 - due to heredity 505
 - hypernephroma 505, 508
 - hypopituitarism 505, 509
 - hypothyroidism 505
 - infantilism with 509
 - life insurance and 506
 - due to malt liquors 505
 - at menopause 507
 - meralgia parasthetica and 540
 - mesentery loaded with fat in 61
 - in myxedema 505, 507
 - omentum loaded with fat in 61
 - out of condition from 113
 - from ovarian insufficiency 505, 507
 - over-eating 505
 - preglycosuric state 505
 - shortness of breath from 113, 114
 - sleepiness with 509
 - sterility due to 793, 794
 - from suprarenal disease 508
 - in suprarenal gigantism 324
 - from testis atrophy 505, 507
 - too little exercise 505
 - umbilicus deep in 507
 - in women 507
 - X-rays of sella turcica in 509
Oblique inguinal hernia 832, 833
 Obliqui capitis, nerve-supply to (Fig. 474) 618
Obliquus inferior, paralysis of 222
 - paralysis of 222
 - externus, nerve-supply of 609, 610, (Fig. 471) 611
 - hernia (see Hernia) 611
 internus, nerve-supply of 609, (Fig. 471) 611
 - nerve (see Nerve)
 - neuralgia from hip disease 540
 - - obturator hernia 540
Occipital area (Figs. 658, 659) 867
 - pain in (see Pain)
 - bone, cracking of 188
 - thickened in leontiasis ossea (Fig. 215) 255
 - cortex, connections with optic nerve (Fig. 304) 377
 - lesion, hemianopsia from (Fig. 312) 380, 675
 - glands (see Lymphatic Glands, Occipital)
 - headache (see Headache)
 - lobe, tumour of, epilepsy from 87
 - - visual aura from 87
 - nerve, small, herpes of 253
 - nerves, distribution of (Fig. 656) 865

Occipital, cont'd.
 - pain (see Pain)
 - puncture in lipiodol injection 326
 - sensory area (Figs. 443, 445) 550
 - tenderness in neurasthenia 867
 Occipito-frontalis, eyes opened by 660
 Occipito-posterior malpresentation 250, 251
 Occult blood (see Blood)
 Occupation, acroparesis 545
 - actinomycosis and 792
 - acute yellow atrophy and 345, 416
 - anaemia and 32
 - anthrax and 683, 824
 - antimonyretted hydrogen poisoning and 421
 - antimony tremors and 882
 - aortic disease from 261
 - argyria from 295
 - arseniuretted hydrogen poisoning and 421
 - aspergillus and 792
 - ataxy from 792
 - bacillus mallei and 792
 - basophilic and 30
 - brachial plexus injury from 204
 - bulle from 123, 124
 - bursa from (Fig. 162) 194
 - calcaneodinia and 540
 - carcinoma of scrotum and 767
 - cervical rib symptoms and 544
 - chancre on finger from 301
 - chlorosis and 49
 - chronic pharyngitis in 757
 - cirrhosis of lung and 363
 - cough from 186
 - cow-pox and 188
 - cramp and 188
 - dead fingers from 204
 - deafness from 207
 - delirium from 212
 - dermatitis from 124, 515, 659, 915, 916, 917
 - - itching in 658
 - Dupuytren's contracture and 179
 - epistaxis from 274
 - epithelioma of scrotum from 819
 - erythema from 275, 515
 - exosarcoma and 829
 - eye train from 547
 - fainting due to 297
 - glands and 125, 225, 682, 683
 - granular pharyngitis from 186
 - haemoptysis from 361
 - heart enlarged from 2, 266
 - hoarseness and 387
 - itching and 659
 - kyphosis from 194
 - lead poisoning and 149, 151, 155, 168, 184, 594
 - left ventricle enlarged from 258, 374
 - manganese poisoning from 212
 - - tremors and 882
 - menorrhagia from 482
 - mercurialism from 48, 84, 882
 - micturition trouble from 495
 - miner's phthisis and 363
 - myocardial changes from 18
 - nail changes from 496
 - neuroses (see Neuroses)
 - noises in head from 504
 - nystagmus and 505
 - oedema of face from 515, 516
 - - hands from 515, 516
 - - neck from 515, 516
 - onychia from 497
 - pain in eye from 547
 - - shoulder from 580, 581
 - pallor from 26
 - paralysis of serratus magnus from (Fig. 473) 617
 - peripheral neuritis and 84
 - pharyngitis and 762

Occupation, cont'd.
 - phosphorus poisoning and 94
 - phosphuretted hydrogen poisoning and 421
 - photophobia from 639, 640
 - pneumoconiosis and 363
 - post-mortem warts from 301
 - prolonged first sound from 2
 - saturnine encephalopathy and 155, 214
 - seleniuretted hydrogen poisoning from 212, 757
 - sore throat from 365
 - sporotrichosis and 365
 - subacromial bursitis and 511
 - tenderness of spine from 870
 - tinnitus due to 878
 - tremor due to 881, 882
 - vertigo due to 504
 - vesicular dermatitis from 124, 515
 - winged scapula from (Fig. 475) 617
Occupations, dermatitis due to, list of 917
 Ochelond Madura foot 893
Ochronosis, account of 906
 - from alkaptonuria 644, 906
 - black urine in 906
 - from carbonic acid 644, 906
 - cartilages blackened in 644, 906
 - ears blackened in 906
 - pigmentation in 201, 644, 906
 - sclerotics blackened in 644
 - - pigmented in 906
 Ocular herpes, eruption eye from 546
 - paralyses, diplopia due to 222
 - paresis in encephalitis lethargica 156, 887
 - tension increased in 889, 675, 926
 - - herpes frontalis 894
 Oculopupillary nerve fibres (Fig. 174) 618

 - cellulitis 516
 - erysipelas 516
 - heart failure 514
 - innominate vein obstruction 910
 - mediastinal fibrosis 514, 516

Oedema of arm, cont'd.
 - from mediastinal growth 337, 512, 514, 516
 - - gumma 514, 516
 - occupational dermatoses 516
 - - Raynaud's disease 515
 - - subclavian aneurysm 512
 - - superior vena cava obstruction 198, 514, 516, 910
 - - thrombosis 516
 - - X-rays of chest in 512
 - arylene-epiglottidean folds 389
 - due to aspirin 511
ASYMMETRICAL 511
 - of back in acute nephritis 353
 - from inferior vena cava obstruction 9
 - - thrombosis 68, 152, 909
 - in beri-beri 83
 - of bladder from cystitis 720
 - from blockage of lymphatics 511
 - - veins 511
 - of body in Bright's disease 62
 - breast in mastitis 838
 - due to bromides 511
 - bullae from 123
 - due to cellulitis 511
 - with chancre 855
 - due to chlorine 917
 - in cirrhosis of liver 653
 - classified causes of 516
 - congenital asymmetrical 511
 - due to drugs 511
 - in erysipelas 824
 - extreme in Bright's disease 123
 - - heart failure 123
 - exudative, of lungs, from chlorine 200
 - - from poisoning 200
 - - in influenza 200
 - - from phosgene 200
 - exclude in acute nephritis 123, 295, 353, 513
 - - angioneurotic oedema 258, (Fig. 44) 513, 660
 - Bright's disease 849
 - from catarrh 515
 - cavernous sinus thrombosis 74
 - common cold 515
 - - coracoclavicular 285, 660
 - from crabs 515
 - - crabs 515
 - - Graves' disease 515
 - measles 515
 - trichinosis 660
 - trichinosis 509
 - whooping cough 515
 - face in acute nephritis 12, 513
 - from aneurysm 514, 516
 - - angina Ludovici 515, 516
 - angioneurosis 516
 - anthrax 515, 516
 - aspirin 514
 - bitter orange 515
 - in Bright's disease 62
 - from catarrh 515
 - cellulitis 515, 516
 - common cold 515, 516
 - coughing 515, 516
 - crabs 515, 516
 - emphyema of antrum 694
 - erysipelas 515, 516
 - fur dies 515
 - in gardeners 515
 - from iron making 515
 - malignant endocarditis 9
 - measles 515, 516
 - mediastinal fibrosis 514, 516
 - growth 514, 516
 - gumma 514, 516
 - in nephritis 824
 - occupational dermatoses 515, 516
 - orange-peelers 515
 - from Primula obconica 515
 - Raynaud's disease 515
 - in satinwood workers 515
 - from soap 515

Oedema of face, contd.

-- from superior vena cava obstruction	198, 514, 516, 910
-- -- thrombosis	516
-- toothache	511
-- in trichinosis	569
-- from waters	515
-- whooping-cough	515
-- famine, Bright's disease simulated by	73
-- of feet from ankylostomiasis	514
-- in Bright's disease	265
-- chlorosis	49, 543
-- erythromelalgia	543
-- Graves' disease	514
-- from mitral regurgitation	262
-- with nutmeg liver	463
-- due to filariasis	511
-- general, in acute nephritis	11, 12, 513, 516
-- -- anemic girls	514
-- from angioneurosis	513, 516
-- ankylostomiasis	14, 516, 635
-- arsenic	514
-- ascites with	71
-- from aspirin	516
-- beer-drinking	513, 516
-- in beri-beri	514, 516
-- Bright's disease	71, 136, 849
-- from cardiac disease	855
-- chronic nephritis	55
-- -- starvation	514
-- diet deficiency	110, 514
-- in exhaustion disease	110
-- from famine	73
-- food indigestion	516
-- galvi	514, 516
-- gastro-enteritis	514
-- in girls	514
-- Graves' disease	514, 516
-- from heart failure	135, 516
-- in infants	514
-- after infusion	513, 516
-- from iodine	514, 516
-- after Kharsan	514
-- in malignant endocarditis	9
-- from mediastinitis	535
-- nephritis	135, 249
-- pleural effusion with	135
-- from poison	514
-- pregnancy kidney	855
-- ptomaine poisoning	514, 516
-- renal disease	855
-- salvarsan	514, 516
-- shell-fish	514, 516
-- snake-bite	514, 516
-- starvation	516
-- in subacute nephritis	140
-- from toxins	516
-- after transfusion	513, 516
-- vulval swelling due to	853, 855
-- in war	73, 110, 514, 516
-- of genitalis in acute nephritis	12
-- from inferior vena cava obstruction	9
-- glottis in angina Ludovici	853
-- hands in angioneurotic oedema	515
-- from bitter orange	515
-- fur dyes	515
-- in gardeners	515
-- from heart failure	514
-- jam-making	515
-- occupational dermatoses	515
-- in orange-peelers	515
-- from Primula obconica	515
-- in Raynaud's disease	515
-- satin-wood workers	515
-- from soap	515
-- superior vena cava obstruction	910
-- vasomotor neurosis	515
-- waters	515
-- head due to superior vena cava obstruction	910
-- due to iodides	198, 511, 514, 516

Oedema, contd.

-- due to jelly-fish sting	278
-- of labia in acute nephritis	513
-- larynx, acute, in Bright's disease	197, 249
-- -- cyanosis from	197
-- -- dyspnoea from	246
-- -- from iodism	198
-- -- laryngitis	248
-- -- pneumococcal	248
-- -- streptococcal	248
-- in angioneurotic oedema	388
-- from aspirin	388
-- in Bright's disease	388, 799
-- -- dyspnoea from	246
-- -- hoarseness from	388
-- from irritant gases	388
-- laryngitis	245, 388
-- with leprosy ulceration	249
-- lupoid ulceration	249
-- malignant ulceration	249
-- post-typhoidal ulceration	249
-- due to potassium iodide	246, 388, 799
-- stridor due to	799
-- sulfacetic	606, 762
-- with syphilitic ulceration	249
-- traumatic ulceration	249
-- tuberculous ulceration	249
-- legs from abdominal new growth	515
-- in acute nephritis	353
-- acute rheumatism and	68
-- albuminuria with	513
-- from anaemia	515
-- from blood loss	517
-- in angioneurosis	516, 517
-- from ankylostomiasis	514, 515, 517, 635
-- aortic regurgitation	259
-- arterial affections	517
-- arteriosclerosis	14
-- ascites and	59, 62, 63, 68, 515, 517
-- from backward pressure	68
-- badly united fracture	512
-- in beri-beri	73, 516, 517
-- from Bothriocephalus latus	515, 517
-- in Bright's disease	62, 125, 136, 263, 513, 517, 849
-- bulla with	125
-- from cachexia	515, 517
-- in chlorosis	515, 517
-- from chronic lung affections	517
-- nephritis	14
-- in convalescence	515, 517
-- dermatomyositis	569
-- from drugs	515
-- after duodenal ulcer	515
-- in elderly people	516
-- from elephantiasis	512
-- emphysema	269
-- fibroid lung	417
-- after fractured leg	515
-- gastric ulcer	515
-- in Graves' disease	514
-- after haematemesis	515
-- haemoptysis	515
-- haemorrhage	515
-- from heart failure	14, 63, 125, 136, 513, 514, 515, 517, 847
-- in Hodgkin's disease	515, 517
-- from inferior vena cava obstruction	9, 63, 515, 517
-- -- thrombosis	152, 517, 909
-- ligature	512
-- after long rest in bed	515
-- in lymphatic leukaemia	515, 517
-- massage for	576
-- in Milroy's disease (Fig. 406)	512, 516, 517
-- from mitral regurgitation	262

Oedema of legs, contd.

-- from mitral stenosis	417, 847
-- myocardial affection	517
-- in myxoedema	516, 517
-- from nephritis	515
-- with nutmeg liver	463
-- in old age	517
-- from osteomyelitis	512
-- ovarian cyst	515, 517
-- parasitic affections	515, 517
-- after parturition	512
-- from pelvic tumour	512
-- in peripheral neuritis	516
-- pernicious anaemia	515, 517
-- from phlebitis	515, 699
-- polymyositis	569
-- popliteal aneurysm	512
-- portal obstruction	344
-- after post-partum haemorrhage	515
-- in pseudoleukemia infantum	515, 517
-- pseudo-trichinosis	569
-- pulsatile liver with	847
-- in Raynaud's disease	516, 517
-- rectal examination in	512
-- from renal affections	517
-- severe anaemia	63
-- splenic anaemia	515, 517
-- in splenomedullary leukaemia	515, 517
-- from Tinea medicana	515, 517
-- -- solum	515, 517
-- thrombosis	511, 512
-- tricuspid stenosis	847
-- tube-casts with	513
-- after typhoid fever	515
-- vaginal examination in	512
-- from valvular disease	511
-- varicose veins	511
-- due to ligature	511
-- linear albicans from	459
-- over liver abscess	465
-- local, over abscess	825, 844
-- in anthrax	824
-- from chancre	824
-- over perostasis	817
-- tuberculous bone	819
-- of loin over perinephric abscess	438
-- loins in acute nephritis	12, 513
-- with ascites	59
-- in Bright's disease	849
-- lung, acute, in Bright's disease	249
-- -- dyspnoea from	247
-- malignant, gas production in	647
-- pneumothorax from	647
-- mastoid, from sigmoid sinus thrombosis	739
-- of meatus urinarius	230
-- in Meigs' disease	279
-- due to mercury	511
-- in mitral stenosis	653
-- of neck from aneurysm	514
-- angina Ludovici	515, 516
-- angioneurosis	516
-- anthrax	515, 516
-- bitter orange	515
-- cellulitis	515, 516
-- erysipelas	515, 516
-- fur dyes	515
-- in gardeners	515
-- from jam-making	515
-- mediastinal fibrosis	514, 516
-- -- growth	337, 514, 516
-- -- gumma	514, 516
-- mumps simulating	763
-- from occupational dermatoses	515, 516
-- in orange-peelers	515
-- from Primula obconica	515
-- Raynaud's disease	516
-- in satin-wood workers	515
-- from soap	515
-- superior vena cava obstruction	514, 516, 910
-- -- thrombosis	516
-- thoracic aneurysm	516
-- waters	515

Oedema, contd.

-- of one labium minus	855
-- leg from iliac thrombosis	10
-- preceding inferior vena cava thrombosis	10
-- from saphenous thrombosis	10
-- optic disc from thrombosis of retinal vein	519
-- orbit from cavernous sinus thrombosis	739
-- due to osteomyelitis	511
-- of palms in erythema keratodes	502
-- penis in acute nephritis	513
-- Bright's disease	849
-- phimosis	765
-- perinephric	697
-- peripheral neuritis and	83
-- polyuria after	654
-- from clearing up of posture and	513
-- of prepucial from balanitis	763
-- in Bright's disease	849
-- phimosis	765
-- pseudo- in cretinism	234, 236
-- due to pyrogallie acid	918
-- of retina in optic neuritis	518
-- from thrombosis of retinal vein	519
-- scalp in acute nephritis	513
-- Bright's disease	62
-- due to scalp wound	511
-- superior longitudinal sinus thrombosis	740
-- of scrotum in acute nephritis	513
-- with ascites	59
-- in Bright's disease	849
-- elephantiasis	747
-- from inflammation	747
-- lymphatic obstruction	747
-- peri-urethral abscess	851
-- renal disease	747
-- severe, blisters from	124
-- of soles in erythema keratodes	502
-- solid, from lymphatic obstruction	512
-- SYMMETRICAL	513
-- of thighs, with ascites	59
-- from inferior vena cava obstruction	9
-- -- thrombosis	152
-- thirst with	875
-- due to thrombosis of vein	511
-- of umbilicus from pneumococcal peritonitis	59
-- tuberculous peritonitis	59
-- universal, account of	513
-- of ureter in pyelitis	717
-- ureteric orifice	350
-- uvula, cough from	186
-- due to varicose veins	511
-- of vulva from pressure on pelvic veins	855
-- war	110, 514
-- Bright's disease simulated by	73, 110
-- due to white-leg	511
-- Oesophageal branches of vagus nerve	185
-- Oesophagismus	535
-- Oesophagoscope	240
-- in diagnosing foreign body in oesophagus	337
-- -- oesophageal obstruction	241
-- removing foreign body	241
-- Oesophagus, achalasia of (see Achalasia)	
-- aneurysm opening into	157, 336, 337, 534
-- bone in	240
-- carcinoma of (see Carcinoma, and Epithelioma)	
-- chicken-pox affecting	762
-- cicatricial contraction of	240, 535, 927
-- coin in	240
-- compressed by aneurysm	927

Esophagus, compressed, contd.
 - by enlarged thyroid 778
 - new growth 927
 - diverticulum of (see Diverticulum)
 - epithelioma of (see Carcinoma; and Epithelioma)
 - fistula to trachea from 323
 - foreign body in (see Foreign Body)
 - idiopathic dilatation of (see Achalasia of Esophagus)
 - infiltrated by carcinoma of stomach 241
 - injury of, surgical emphysema from 254
 - lesions, bismuth and X rays in diagnosing 927
 - bougie in diagnosing 927
 - mediastinal growth opening 356, 347
 - obstruction to, acetonuria from 3
 - anemia from 44
 - by aneurysm 240, 534
 - bean (Fig. 203) 241
 - a bone 240
 - bougie and 240
 - cachexia from 44
 - by carcinoma 240, 535
 - of stomach (Fig. 205) 242
 - cicatricial 535
 - by a coin 240
 - constipation from 160
 - after corrosive 240
 - dysphagia from 240, 535
 - emaciation from 535
 - by epithelioma 792
 - fibrous 240
 - from foreign body 240
 - leucopenia from 454
 - by mediastinal growth 534
 - oesophagoscope in diagnosing 240
 - pain in chest from 530
 - behind sternum from 535
 - spasmodic 535
 - starvation from 454
 - symptoms of 240
 - by tooth-plate 240
 - X rays in diagnosing 240, 241, 535
 - pemphigus affecting 127
 - pouch of (see Diverticulum)
 - prolapse of, into stomach 244
 - small-pox affecting 762
 - spasm of (see Achalasia and Spasm)
 - th-plate in 240
 - of, dyspnea 246
 - operation of, surgical emphysema from 254
 - varicose veins in (see Veins, Varicose)
Oidium albicans in sputum 792
 - stomatitis from 95
 - thrush from 95
 - tropical in Ceylon 792
 - phthisis simulated by in sputum 792
Oil of cade, erythema from 275, 918
 - folliculitis due to 918
 - calaput, heart symptoms and 377
 - castor, cacogeusia from 860
 - colic from 148
 - of cinnamon, leucocytosis from 453
 - cod liver, cacogeusia due to 860
 - croton, bullae from 123, 124
 - colic from 148
 - erythema from 275, 918
 - hysterical patient using 124
 - malingering using 124
 - pustular folliculitis due to 918
 - eucalyptus, coma from 154
 - erythema from 275
 - myrtol in 246

Oil, contd.
 - of mirbane in boot polish 202
 - methaemoglobinemia from 202
 - peppermint, leucocytosis from 453
 - sandal-wood, erythema from 275
 - of turpentine, leucocytosis from 453
Oils, essential, leucocytosis from 453
 - volatile, bullae from 123
 - dermatitis from 124
 - erythema from 275
 - vesicles from 124
Old age, albuminuria in 16, 387
 - anoxemia in 756
 - arcus senilis in 387
 - arteries thick and tortuous in 387
 - arteriosclerosis in 322
 - ataxia from 77
 - atheroma of aorta in 152
 - blood-pressure high in 387
 - cardiac degeneration in 53
 - hypertrophy in 374, 387
 - Cheyne-Stokes breathing in 139
 - constipation in 160
 - cystic kidneys in 15
 - degeneration of medulla oblongata in 19, 387
 - delirium in 212
 - emphysema and bronchitis in 17
 - epiphora in 273
 - epistaxis in 274
 - gangrene in 322
 - of lung in 322
 - glycosuria and granular kidneys in 14
 - heart failure in 17
 - hiccup in 387
 - insomnia in 404
 - hyphosis in 194
 - loss of weight in 934
 - memory defects due to 25
 - edema of legs in 516, 517
 - priapism from 657
 - prostate enlarged in 11
 - recurrent hemiplegia in 384
 - retention cysts in kidneys in 15
 - shortness of breath in 113
 - sterility due to 793
 - testicular atrophy in 85
 - tremor of head and neck in 880
 - ulcer of leg in 894
 - winter cough in 17
 - (and see Age Incidence; and Senile)
Olecranon bursa, gout of (Fig. 341) 429
Olfactory aura 87
 - nerve (see Nerve, Cranial, First)
 - neuritis (see Neuritis)
Oligæmia, definition of 26
Oligochromæmia, definition of 26
Oligopœthæmia, Babinski's sign from 88
 - cord changes from 88
 - definition of 26
 - in pernicious anemia 83, 88
Oligospermia, sterility due to 793, 794
Oliver-green facies in malignant jaundice 414, 468
Oliver-ponto-cerebellar atrophy 883
 - intention tremor due to 884
Omental hernia, varicocele simulating 851
 - sac, lesser, cyst of 61
Omentum, abscess in, from gastric ulcer 810
 - adherent to abdominal wall 810
 - caseous in tuberculous peritonitis 65

Omentum, contd.
 - cyst of 810
 - pelvic swelling due to 840
 - fat necrosis in 736, 931
 - in femoral hernia 825, 832
 - hydatid cyst in 806
 - infiltrated in malignant peritonitis 65
 - tuberculous peritonitis 806
 - in inguinoscrotal hernia 833
 - loaded with fat 61
 - mass in, movable kidney simulated by 813
 - new growth of, pelvic swelling due to 840
 - palpable in chronic peritonitis 525
 - thickened in chronic peritonitis 462, 525, 809
 - liver enlargement simulated by 462
 - in tuberculous peritonitis 64, 216, 777, 809
 - tumour of, adherent to liver 413
 - enlarged liver simulated by 413
 - jaundice from 407, 413
 - malignant 413
 - spleen simulated by 814
 - tuberculous 413
 - in umbilical hernia 593
Omnipon, coma from 151
 - injections, taches bleues from (Fig. 968) 642
 - leucopenia from 455
 - noises in head from 504
 - vertigo from 504
Omphalo-mesenteric duct, cyst of 591
 - On guard' muscles 754
Omnous, cacogeusia due to 861
 - epiphora from 273
 - foul breath from 112
Onychia 497
Onychia due to Bacillus coli 302
 - diphtheria bacilli 302
 - injury 497
 - occupation 497
 - pain from 497
 - due to syphilis 497
 - tuberculous 497
 - (and see Whitlow)
Onychomycosis, ichthyosis with 497
Onychomycosis 312
 - due to fungus 312
Onychorrhexis 497
Oophoritis, pain in iliac fossa from 555
 - vaginal examination in diagnosing 559
Opaque nerve fibres in retina (Figs. 413, 414) 518
Operation, acetonuria after 3
 - acute dilatation of stomach after 218
 - amenorrhœa from 23
 - in anemia Ludovici 853
 - anuria after 55, 57
 - on anus, bacteriuria after 90
 - in appendicitis 558
 - aspiration pneumonia after 323
 - on bladder, coma after 58
 - convulsions after 58
 - prostration after 58
 - pyrexia from 58
 - rigors from 58
 - bradypnea from 110
 - bronchopneumonia after 364
 - for cardiopneumia 535
 - cervix occluded after 23
 - cheloid from 131
 - on chest, heart impulse displaced after 373
 - for cholesteatoma of ear 522
 - collapse from 110
 - death, lymphatism and 477
 - in diagnosis between abscess and cancer 296
 - of adhesions 562
 - angina of kidney 351
 - appendicitis 554
 - appendicular abscess 697
 - cholecystitis 554, 696

Operation in diagnosis, contd.
 - of diverticulitis 98, 356, 557, 698, 827
 - duodenal ulcer 153, 443, 554
 - empyema of gall-bladder 696
 - encysted ascites 806, 843
 - femoral hernia 832
 - fibromyoma of round ligament 832
 - hydrocele of hernial sac 832
 - intestinal obstruction 303
 - melanotic sarcoma 477
 - mucocoele of gall-bladder 317
 - myeloma of rib 21
 - nature of breast tumour 227
 - new growth of kidney 10
 - testis 850
 - ovarian cyst 843
 - retroperitoneal lipoma 843
 - sarcoma of os calcis 552
 - strangulated obturator hernia 150
 - retroperitoneal hernia 150
 - subphrenic abscess 697
 - suppurative peritonitis of ilium 558
 - torsion of testis 587
 - for diverticulitis 556
 - in dysentery 99
 - emboli of lung after 109
 - 147, 278
 - extravasation of bladder due to 658
 - on eye, double pupil from 220
 - first attendance at, fainting due to 296
 - for fissure, incontinence of faeces after 394
 - fistula, incontinence of faeces after 394
 - general peritonitis from 734
 - on generative organs, bacteriuria after 90
 - for gland, in neck 474
 - hamatæmia after 336, 347
 - hæmoptysis after 465
 - hypothermia after 392
 - infective parotitis after 848
 - internal bleeding after, fainting due to 297
 - for intestinal obstruction 485
 - jaundice and 447
 - kinking of ureter from (Fig. 375) 447
 - on larynx, hæmoptysis from 367
 - in lymphadenoma 475
 - massive collapse of lung after 375
 - for necrosis of rectus abdominis muscle 736
 - oozing after, in jaundice 679
 - orchitis after 86
 - paralysis of palate after 730
 - pharynx after 695
 - parotid abscess after 766
 - perineal fistula after 394
 - for piles, incontinence of faeces after 137
 - for pneumococcal arthritis 424
 - on prostate, epididymitis from 584
 - pyæmia from 419, 392
 - on rectum, bacteriuria after 90
 - regurgitation of food through nose after 730
 - renal calculus diagnosed by 56
 - renal, shock from 57
 - retention of urine after 158, 493
 - scar from 131
 - septicæmia from prick during 704
 - shock from 110, 392
 - on skull, glycosuria from 330
 - spleen in familial alcoholic jaundice 415

Operation, contd.

- stomach, colic from .. 148
- on supraclavicular gland, .. 475
- surgical emphysema from .. 254
- on testes, obesity due to .. 505
- testis atrophy from .. 85
- on thyroid, stridor after .. 607
- vocal cord paralysis after .. 607
- tonsil, pain in ear from .. 254
- for tuberculous caecum .. 562
- typhoid arthritis .. 424
- urinary fistula from .. 494
- (and see Laparotomy; Trephining, etc.)
- Ophthalmia, catarrhal .. 285**

- neonatonic, anterior
- polar cataract from .. 922
- arthritis with .. 425
- blindness from .. 285, 924
- corneal opacity from .. 922, 924
- nystagmus from .. 505, 922, 924
- perforation of cornea from .. 922
- purulent discharge with .. 924
- ulceration in .. 285
- photophobia from .. 649
- Ophthalmic artery, arterio-venous aneurysm of .. 847
- nerve, distribution of .. *Fig. 865*
- veins, dilated, from cavernous sinus thrombosis .. 284
- Ophthalmoplegia in bulboparalysis .. 172
- inter alia after diphtheria .. 674
- neuritis .. 674
- from phlyctis .. 674
- from lead .. 45
- and see Strabismus
- OPHTHALMOSCOPIC APPEARANCES .. 517**
- examination in asthina .. 654
- for blind spots .. 92
- in blindness, cases .. 925
- detection albuminuric retinitis .. 93
- cataract .. 93, 920
- corneal opacity .. 93
- detached retina .. 93
- embolism of retinal artery .. 93
- haemorrhage into vitreous .. 93
- mite .. 93
- keratitis .. 93
- lepra .. 334
- melanotic sarcoma .. 93
- optic atrophy .. 93
- neuritis .. 93, 371
- quinine amblyopia .. 93
- synechia .. 93
- thrombosed retinal vein .. 93
- diagnosing carcinoma of liver .. 68
- cause of fainting .. 298
- headache cases .. 371
- meningitis .. 627
- retinitis pigmentosa .. 926
- sarcoma of liver .. 68
- Opiates, glycosuria after .. 332
- glycuric acid after .. 521
- OPISTHONOS .. 521**
- in hysteria .. 176, 521
- meningitis .. 521, 732
- from strychnine .. 521, 741
- tetanus .. 175, 521, 741, 885
- uræmia .. 521
- Opium, bradypnoea from .. 110
- Cheyne-Stokes breathing from .. 139
- coma from .. 110, 154, 390, 391
- constipation relieved by .. 161
- delirium from .. 212
- diazo-reaction from .. 218
- headache from .. 371
- noises in head from .. 504
- poisoning, heat-stroke distinguished from .. 390
- hypothermia in .. 391, 392
- lavage of stomach in .. 154
- Opium poisoning, contd.*
- pin-point pupils in .. 155, 391
- pontine hæmorrhage distinguished from .. 390, 391
- stupor from .. 110
- vertigo from .. 504
- Oppler-Roas bacilli in gastric contents in carcinoma of stomach .. 497, 401, 929, 930
- Opponens minimi digiti, nerve-supply of .. 616**
- pollicis, nerve-supply of .. 615
- Opsome index in tuberculosis .. 932
- Optic atrophy (see Atrophy, Optic)
- chiasma lesion, blindness due to .. 925
- central scotoma due to .. 923
- pituitary tumour interfering with .. 378
- disc, blurred, in optic neuritis .. 518
- from retinal embolism .. 520
- changes in tobacco amblyopia .. 922
- choked, from cerebral abscess .. 184, 385
- tumour .. 184, 385
- and see Neuritis, Optic
- coloboma of .. 517
- congenital crescents round .. *Fig. 490* 517
- congested from sinus thrombosis .. 739
- excavated in glaucoma .. 285, 520, 924
- **glaucomatous .. 520**
- illustrated .. *Fig. 428* 520
- hæmorrhage in .. 519
- in hypermetropic astigmatism .. *Fig. 490* 520
- lost in optic neuritis .. 519
- mushroom-shaped .. 519
- myopic, crescents of .. *Fig. 476, 477* 518
- normal .. *Fig. 499* 517
- oedematous, from thrombosis of retinal vein .. 519
- **ophthalmoscopic appearances of .. 517**
- oval in hypermetropic astigmatism .. 520
- pale in disseminated sclerosis .. 883, 923
- optic atrophy .. 519
- from quinine .. 923
- **physiological cup of .. 517**
- pigmented crescent of .. *(Fig. 411)* 517
- red in hypermetropic astigmatism .. 520
- small in retinitis pigmentosa .. 924, 926
- waxy-looking in retinitis pigmentosa .. 924
- white in glaucoma .. 288, 520
- from retinal embolism .. 520
- nerve (see Nerve, Cranial, Second)
- neuritis (see Neuritis)
- radiations, embolism of, hemianopsia from .. *(Fig. 313)* 380
- gunna of, headache from .. 380
- hemianopsia due to .. 380
- vomiting from .. 380
- lesion of, hemianesthesia with .. 753
- hemianopsia from .. 379, *(Fig. 312)* 380
- **pupil reactions in .. 379, *(Fig. 312)* 380**
- neoplasm of, headache from .. 380
- hemianopsia due to .. 380
- vomiting from .. 380
- thalamus, hæmorrhage into, hyperpyrexia from .. 390
- Optic thalamus, contd.*
- lesion, atethosis from .. 170
- intention tremor from .. 884
- **sensory effects of .. 754**
- tract connections .. *(Fig. 304)* 377
- lesion, blindness due to .. 925
- hemianopsia from .. 379, *Fig. 311* 380, 675, 925
- pupil inactive from .. *(Fig. 311)* 380
- **reactions in .. 379**
- reflex with .. 675
- Oral sepsis, ataxia from .. 43
- D.A.H. from .. 246
- debility from .. 246
- dyspnoea from .. 400
- dyspnoea from .. 246
- gastritis from .. 398
- parotid abscess after .. 695
- periparal neuritis from .. 80
- (and see Dental Sepsis)
- Orange, finger affected by .. 301
- peelers, dermatitis in .. 515, 915
- erythema in .. 275, 515
- oedema in .. 515
- vesicles in .. 515
- Orange-rind nails in eczema .. 496
- Orators, pharyngitis in .. 762
- Oribularis (see under Muscles)
- Orbit, abscess of, diplopia from .. 222
- eye displaced by .. 222
- aneurysm of .. 285
- arteriovenous aneurysm of .. 847
- exophthalmos from .. 284
- bruised, due to arterio-venous aneurysm .. 847
- cellulitis of, cavernous sinus thrombosis from .. 284
- distinguished from .. 284
- exophthalmos from .. 284
- dermoid cyst of .. 284
- cystosis in, exophthalmos from .. 284
- growth of, diplopia from .. 222
- eye displaced by .. 222
- gunna of, exophthalmos from .. 284
- hæmorrhage into, diplopia from .. 222
- eye displaced by .. 222
- inflammation of, epiphora from .. 273
- lymphosarcoma of, exophthalmos from .. *(Fig. 227)* 284
- new growth in, exophthalmos from .. 284
- oedema of, from cavernous sinus thrombosis .. 739
- osteosarcoma of .. 847
- periostitis of, exophthalmos from .. 284
- X rays in diagnosing .. 284
- pulsatile tumour of .. 847
- suppuration in, headache from .. 370
- suppurative meningitis from .. 732
- tubercle in, exophthalmos from .. 284

 - stools (see Faeces, Ova in) of Tania solium (*Fig. 492*) 634
 - Trichocephalus dispar (*Figs. 98, 103, Fig. 496*) 635
 - in urine in bilharzia .. 356, 577, 722
Ovarian activity, deficient 794
 - amenorrhœa from .. 23, 24
 - hypothyroidism and .. 507
 - obesity from 505, 507
 - cysts (*Fig. 430*) .. 929
 - discharge, vomiting due to .. 524
 - hyperæsthesia in hypotonia .. 754
 - neuræmia, appendicitis simulated by .. 814
 - at catamenia .. 814
 - pain, arterial calculus simulating .. 719
 - pelvic torsion of abdominal pain from .. 555
 - - appendicitis simulated by .. 559
 - - simulating .. 843
 - - dullness in flanks from .. 559
 - - fluid in abdomen from .. 559
 - - laparotomy for .. 559
 - - pain in iliac fossa from .. 555, 559
 - - pelvis from .. 573
 - - peritonitis from .. 559
 - - strangulated hernia simulated by .. 559
 - region .. 573
Ovaries, absence of, sterility due to .. 793
 - congestion of, pelvic pain from .. 573
 - extension of, obesity and ill-developed, in ateliosis .. 237
 - lesions of, causing amenorrhœa .. 24
 - prolapsed, bimanual examination in diagnosing .. 239
 - - pelvic pain from .. 573
 - - tender, dyspareunia due to .. 239
 - - sclerosed, pelvic pain from .. 573
 - tenderness of .. 239
Ovaritis, appendicitis simulated by .. 829
 - undue pulsation of abdominal aorta simulating .. 662
Ovary, adenomyoma of .. 238
 - affections of, eosinophilia from .. 271
 - appendix adherent to .. 829
 - atrophy of, with unicornuate uterus .. 24

- Ovary, contd.*
- carcinoma of (see Carcinoma)
 - cystic, felt per rectum 728
 - dermoid of (see Cyst, Dermoid)
 - fibroma of, twisted pedicle of, ascites from 842
 - fibromyoma of round ligament simulating 832
 - inflamed, amenorrhoea from 23
 - - appendicitis simulated by 814
 - - pain in back from 814
 - - pelvis from 814
 - lesions of, pain in back from 528
 - new growth of, abdominal tumour from 24
 - - amenorrhoea from 23, 24
 - - ascites from 413
 - - jaundice from 413
 - - pelvic swelling due to 840
 - - portal glands enlarged from 413
 - - rectal examination in diagnosis 413, 728
 - - secondary retroperitoneal enlargement 910
 - - vaginal examination in diagnosis 413
 - - skin area for 573
 - - tarry excreta of, pelvic pain from 473
 - - thyroid gland related to 507
 - - tumour of, amenorrhoea with 483, 777, 841
 - - ascites simulated by 64
 - - bearing-down pain from 529
 - - bearing-down, anæmia from 47
 - - chronic peritonitis simulated by 64
 - - dyschezia from 166
 - - dystocia due to 250
 - - enlarged spleen distinguished from 777
 - - fibroid of uterus simulating 841
 - - jaundice from 407
 - - kidney enlargement simulated by 438
 - - menstruation and 841
 - - microscope in diagnosis 842
 - - movable kidney simulated by 813
 - - phantom tumour simulating 61
 - - physical signs of 777
 - - secondary deposits in peritoneum from 60
 - - - spleen simulated by 775
 - - sterility due to 793
 - - vaginal examination in diagnosis 777
 - Over-eating, obesity from 505
 - - out of condition from 113
 - - shortness of breath from 113
 - - uric acid from 901
 - Over-exertion, acute dilatation of heart from 266
 - - cramp from 188
 - - left ventricle enlarged from 258
 - - mitral regurgitation from 263, 266
 - Overwork, brachial neuralgia from 543
 - - diabetes from 331
 - - dyspepsia from 400
 - - eyestrain from 547
 - - headache from 370
 - - impotence from 393
 - - insomnia due to 403
 - - loss of weight due to 933
 - - malaria recrudescence from 42
 - - muscle volitantes and 92
 - - neurasthenia from 571
 - - pain in back from 528
 - - spasmodic contractions from 173
 - - tinnitus and 878
 - Owls, rods in eyes of 921
- Ox-eye daisy, dermatitis due to 916*
- Oxalate, calcium (see Calcium Oxalate)*
- calculus in bladder (Fig. 294) 355
 - - crystals in urine (see Oxaluria)
 - - of lime, crystals of 523
 - - normal amounts excreted daily 523
- Oxalates, urates, simulating 899*
- Oxalic acid (see Acids)*
- OXALURIA 523**
- account of 353
 - - aching in loin from 453
 - - in acute nephritis 12
 - - at any age 524
 - - creatinin and 523
 - - diet and 453
 - - dyspepsia with 353
 - - enuresis simulated by 271
 - - from gooseberries 353
 - - gout and 524
 - - hæmaturia from 348, 453
 - - hypochondriasis and 524
 - - increased frequency of micturition from 491, 524
 - - irritable bladder from 524
 - - mucus in urine from 496

- acute peritonitis simulated by .. 810
- alcoholism and .. 168
- collapse in .. 810
- constipation in 810, 931
- fat necrosis in 168, 485, (Fig. 625) 810, 811, 931
- fever in .. 810
- haemorrhagic, abdominal distention from .. 149, 736
- colic from .. 148
- simulated by .. 149
- constipation from .. 736
- fainting due to .. 297
- fat necrosis in .. 736
- hiccup from .. 386

Pancreatitis, acute, hæm., contd.

intense abdominal pain in .. 736
 intestinal obstruction simulated by .. 736
 laparotomy for 149, 736
 notes on .. 736
 peritonitis simulated by .. 736
 no rigidity with .. 149
 symptoms of .. 536
 tympanites from .. 736
 vomiting from .. 736
 intestinal obstruction simulated by 168, 485, 810, 931
 laparotomy for 485, 536, 810
 in diagnosing 108, 931
 meteorism from .. 485
 nausea in .. 931
 pain in epigastrium from 485, 536, 810
 perforated gastric ulcer simulated by tenderness over pancreas in .. 931
 tumour rare in .. 810
 vomiting in 810, 929, 931
 from alcoholism .. 128
 arteriosclerosis .. 128
 back-pressure .. 128
 bile-pigment in urine from .. 129
blood-sugar difference value in .. 130
 Cammidge's reaction with .. 316
 from carcinoma .. 128
 chronic indigestion due to .. 131
 chronic Cammidge's reaction from .. 810
 catarrhal jaundice distinguished from 411
 clayey stools from .. 810
 colic from 147, 148, 153, 316, 410
 without diabetes .. 335
 difference blood sugar curve in *Fig. 174* 129
 duodenal ulcer simulated by .. 153
 epigastric tumour from .. 810
 fat in stools in .. 130, 410
 gall bladder enlarged from .. 316, 408
 gall-stones in .. 538
 simulated by 153, 316, 410
 glycosuria from .. 810
 jaundice from 153, 316, 407, 410, 538, 810
 laparotomy in diagnosing 153, 410, 538
 oxalate crystals in urine in .. 129
 pain in epigastrium from .. 538, 810
 pancreatic cyst from 811
 prognosis in .. 810
 tenderness in epigastrium from .. 810
 from cirrhosis of liver .. 128
 cyanosis from .. 196
 diabetes from .. 131
 from duodenal catarrh .. 128
 ulcer .. 128, 130
 duodenal ulcer simulated by .. 153
 epigastric pain from .. 316
faeces peculiarities in .. 130
 fatty stools from .. 410
 from gall-stones .. 128
 gall-stones simulated by .. 153, 700
 from gastric ulcer 128, 700
 glycosuria with .. 129
 illustrated (*Fig. 625*) 810
 indicanuria from .. 128
 from influenza .. 128
 iodine coefficient of urine in .. 129
 jaundice due to .. 131
 laparotomy in diagnosing .. 153
 microscopic examination of faeces in .. 130

Pancreatitis, contd.

from mumps .. 128
 occult blood in stools from .. 130
 pain in shoulder from .. 580
 pigmentation of skin in .. 700
 pyrexia due to .. 688, 700
 salivation from .. 662
 seldom primary .. 706
 in septicæmia .. 706
 stool examinations in .. 700
 stools acid with .. 130
 as a surgical emergency .. 128
 from syphilis .. 128
 tests for .. 128
 from tubercle .. 128
 tuberculous glands simulated by .. 700
 peritonitis simulated by .. 700
 from typhoid fever .. 128
 urobilin in urine from 129
 Pannus, cornoid ulcer with 891
 from trachoma 286, 891
 Panophthalmitis .. 890, 891
 Papilloma of bladder, carcinoma simulating .. 722
 cystitis with .. 722
 cystoscopy in diagnosing 493, 576, 577, 722
 enlarged prostate simulated by .. 493
 fragment in urine 349, 722
 hæmaturia from 348, 349, 353, 576, 577
 pain in penis from .. 576
 pyuria due to 716, 722
 retention of urine from .. 493
 stranguary due to .. 797
 breast, blood from .. 227
 nipple due to .. 227
 epithelioma starting in .. 767
 of gum, bleeding gums from .. 93
 kidney, hæmatonephrosis from .. 351
 hæmaturia from 348, 351
 hydronephrosis from 351
 renal enlargement from .. 351
 ureter obstructed by .. 351
 larynx, asthma simulated by .. 653
 histology in diagnosis .. 388
 scrotum .. 767
 hæma testis simulated by .. 769
 ureter .. 351
 urethral discharge due to .. 230
 endoscope in diagnosing .. 230
 from gonorrhœa .. 230
 hæmaturia from 348
 villous, of bladder, pain in penis from .. 574
 of vocal cord (*Fig. 212*) 245
 hoarseness from .. 388
 vulva from gonorrhœa 854
 swelling due to .. 853
 Papillomatous in ascitic fluid .. 66
 of peritoneum .. 66
 Papillomatous ovarian cyst .. 66
 Papule, definition of .. 597
 epithelioma starting as 886
PAPULES .. 597
 in acne vulgaris .. 598, 600
 chicken-pox .. 762, 919
 congenital syphilis .. 498
 dermic .. 598
 in eczema .. 598, 915
 epidermic .. 598
 in erythema multiforme 600
 finger affected by .. 301
 on fingers in pityriasis rubra pilaris .. 600
 in glanders .. 683
 goose-skin .. 598
 granulosis rubra nasi .. 803
 herpes zoster .. 914
 ichthyosis hystrix .. 599
 impetigo contagiosa .. 918
 itching with .. 598
 in Jaquet's erythema .. 498
 keratosis pilaris .. 599
 lichen planus 598, 600, 601, 746, 919
 ruber planus 598, 602, 746
 scrofulosorum .. 597

Papules, contd.

in lupus vulgaris 500, 891, 892
 melanotic carcinoma .. 598
 milium .. 598
 oedematous .. 598
 in pityriasis rubra pilaris .. 598, 599, 598, 600
 prurigo .. 598, 600
 psoriasis .. 745
 ringworm .. 311
 scabies .. 918
 seborrhœa .. 498, 744
 small-pox 678, 684, 683, 684, 686, 854, 919
 syphilis 499, 598, 601, 683, 684, 686, 854, 919
 due to turpentine .. 918
 in typhoid fever .. 784
 typhus fever .. 786
 umbilicated, in lichen ruber planus .. 598
 in urticaria .. 598, 600
 vaccina .. 920
various colours of .. 598
 due to verruca plana .. 598
 in xeroderma .. 599
 yaws .. 743
 yellow, in xanthoma .. 598
 Papulo-pustules .. 597, 681
 Papulo-vesicles .. 597
 Paracentesis abdominis for ascites .. 63, 67
 chronic peritonitis from .. 63
 in cirrhosis of liver .. 67
 repeated, in malignant peritonitis .. 66
 perihæpatitis .. 67
 in tuberculous peritonitis .. 65
 in diagnosing ovarian cyst .. 60
 repeated, chronic peritonitis from .. 68
 perihæpatitis from .. 68
 in polyarthritides .. 138
 thoracic, blood in fluid due to .. 132
 hæmo-pneumothorax from .. 801
 hæmoptysis from .. 361
 hydropneumothorax after .. 801
 pneumothorax after .. 647
 and see Needle
 Paracentral scotoma in chronic glaucoma .. 288
 Paracusis Willisii, definition of .. 207
 in otosclerosis .. 207
 Paradoxical diarrhœa .. 217
 dilatation of stomach .. 399
 pupil light reflex .. 675
 Paræsthesia .. 83
 due to alcohol .. 881
 in arm from cervical rib .. 674
 pachymeningitis .. 142
 in tabes dorsalis .. 545
 combined sclerosis of cord .. 545
 diabetes mellitus .. 83
 disseminated sclerosis .. 631
 of feet in subacute combined degeneration .. 176
 hand from cervical rib .. 674
 hands in subacute combined degeneration .. 176
 in hysteria .. 179
 paralysis agitans .. 681
 peripheral neuritis 570, 627
 (and see Anæsthesia, etc.)
 Parafila in faeces .. 299
 wax in histology .. 487
 workers, acne in .. 917
 epithelioma of scrotum in .. 767
 pustules in .. 917
 ulcers in .. 917
 Parageusia .. 859
 Paragonimus Westermanni .. 792
 Parachyde, cacogeusia due to .. 860
 foul breath from .. 112
 habit, impotence from .. 393
 Paralysis of abdominal muscles from diphtheria .. 192
 scoliosis from .. 192
 abductor, asphyxia from 197

Paralysis, abductor, contd.

bilateral, urgent symptoms from .. 605
 ptosis from .. 197
 cyanosis from .. 248
 dyspnoea from 246, 248
 stridor due to .. 799
 from syphilis .. 197, 799
 after thyroidectomy .. 799
 due to vagal centre degeneration 197, 799
 and see Paralysis, Laryngeal
 of accommodation in disseminated sclerosis 923
 acute ascending, of Lantry .. 623
 adductor, coughing possible with .. 606
 of adductors of thighs from poliomyelitis .. 623
 agitated .. 880, 881
 absence of arm swing in walking in .. 614
 aching in limbs in .. 881
 arm flexed in .. 614
 bent rigid carriage in .. 881
 bread-crumbling movements in .. 880
 cigarette-rolling movements in .. 880
 cortical degeneration simulating .. 881
 dysphagia due to .. 662
 emotion uncontrolled in .. 292
 encephalitis simulating .. 157, 292
facies in .. 292, 609, 881
 falling in .. 881
 festination in 314, 881
 hesitant gait in .. 614
 hysteria simulated by 614
 insomnia from .. 404
 intention tremor in 880
 lack of facial expression in .. 614
 lateropulsion in .. 881
 mental faculties not affected in .. 881
 mercurial tremors simulating .. 882
 movements slow in 614
 muscular rigidity in 292
 weakness in .. 881
 myxedema simulating .. 290
 neuritis simulated by 614
 paræsthesia in .. 881
 paresis of one leg in 609
 Parkinsonian syndrome in .. 292
 propulsion in .. 881
 ptalism due to .. 662
 reflexes increased in 881
 normal in 609, 614, 881
 retropulsion in .. 674
 rigidity in .. 881
 running after own centre of gravity in 881
 shuffling gait in 609, 881
 spasm of orbicularis palpebrarum in .. 292
 sphincters not affected in .. 881
 stiffness in .. 609, 614
 tremor in 609, 614, 879, 880, 881, 883
 without tremor .. 881
 voice monotonous in 881
 weakness of arm in 614
 winking deficient in 292
 writer's cramp simulated by .. 189
 anæsthesia, simulating of anterior crural nerve, extension of leg impaired in .. 609
 flexion of thigh impaired in .. 609
 due to growth .. 609
 knee-jerk lost in 609
 from parturition 609
 wasting of anterior thigh muscles in .. 609
ARM .. 611
 abdominal reflex absent with .. 612, 613

Paralysis of arm, contd.

- - - from acute poliomyelitis . . . 620
- - - in ankyrotrophic lateral sclerosis . . . 145, 619
- - - ankle-clonus with . . . 613
- - - with atrophy . . . 615
- - - without atrophy . . . 612
- - - from cerebral abscess . . . 613
- - - embolism . . . 612
- - - hæmorrhage . . . 612
- - - thrombosis . . . 612
- - - tumour . . . 613
- - - cervical rib . . . 619
- - - in chorea . . . 614
- - - from circumflex nerve lesion . . . 617
- - - cramp . . . 188
- - - in disseminated sclerosis . . . 613
- - - Duchenne's . . . 618
- - - from encephalitis . . . 613, 612
- - - Erb's . . . 618
- - - face weakness with . . . 613
- - - from forceps at birth . . . 622
- - - hamatomyelia . . . 620
- - - hysterical . . . 614
- - - in infantile hemiplegia . . . 145
- - - from internal capsule lesion . . . 612
- - - jerks increased in . . . 613
- - - knee-jerk increased with . . . 612, 613
- - - in Landry's paralysis . . . 612
- - - leprosy (Fig. 472) . . . 616
- - - from lesion of long thoracic nerve . . . 616
- - - suprascapular nerve 617
- - - method of examining . . . 612
- - - from myopathy . . . 620
- - - neuritis . . . 615
- - - in peroneal atrophy . . . 620
- - - plantar reflex extensor with . . . 612, 613
- - - from poliomyelitis . . . 623
- - - progressive muscular atrophy . . . 80
- - - pyramidal tract lesion . . . 612
- - - small palmar fissure with . . . 612
- - - pupil with . . . 612
- - - from spinal cord lesion . . . 618
- - - in syringomyelia . . . 619
- - - talipes with . . . 145
- - - from tumour of cord . . . 620
- - - meningitis . . . 620
- - - Volkmann's contracture . . . 617
- - - Werdnig-Hoffmann type . . . 172
- - - arthritis simulating . . . 612
- - - ascending, porphyria and . . . 904
- - - ataxy simulating . . . 612
- - - of back muscles after diphtheria . . . 191
- - - in infantile paralysis . . . 191
- - - lordosis from . . . 195
- - - in muscular dystrophy . . . 191
- - - peripheral neuritis . . . 191
- - - scoliosis from . . . 191
- - - Bell's facial, contracture from . . . 178
- - - of biceps in Erb's palsy . . . 618
- - - bowel in peritonitis . . . 524
- - - Brown-Sequard (see Brown-Sequard)
- - - bulbar (see Bulbar Paralysis)
- - - of calf . . . 610
- - - cerebral, coma from . . . 181
- - - convulsions from 181, 182
- - - of infants . . . 169
- - - talipes with . . . 145
- - - from cerebral tumour . . . 396, 866
- - - of cervical sympathetic, absence of blushing due to . . . 270
- - - sweating due to . . . 270
- - - due to enlarged thyroid . . . 877
- - - enophthalmos from . . . 270, 660, 675
- - - hair affected by . . . 270
- - - illustrated (Fig. 221) . . . 270

Paralysis cervical sym., contd.

- - - loss of psychic pupil reflex from 675
- - - sensory pupil reflex from . . . 675
- - - from mediastinal sarcoma . . . (Fig. 221) 270, (Fig. 520) 660
- - - palmar pulse diminished with . . . (Fig. 221) 270
- - - ptosis from . . . (Fig. 520) 660, 675, 877
- - - pupil contracted from 270, 660, 877
- - - pupils unequal from 675
- - - symptoms of . . . 270
- - - chorda tympani, æsthesia due to . . . 605, 859
- - - salivary secretion deficient from . . . 605
- - - sublingual gland supplied by . . . 605
- - - submaxillary gland supplied by . . . 605
- - - ciliary muscle, accommodation difficult from . . . 84
- - - from diphtheria 84, 242
- - - circumflex nerve, abduction of arm impaired in . . . 617
- - - anesthesia with . . . 617
- - - arthritis simulating . . . 617
- - - contracture after . . . 605
- - - from cramp . . . 188
- - - of cranial nerves in encephalitis . . . 701
- - - Landry's paralysis . . . 632
- - - syphilis 184, 243, 660, 730
- - - crossed . . . 604
- - - definition of . . . 611
- - - of deltoid in Erb's palsy . . . 618
- - - detrusor urinæ, retention of urine from . . . 493, 495
- - - diaphragm from cord injury . . . 385
- - - diphtheria . . . 84
- - - phrenic nerve paralysis . . . 84
- - - diphtheritic . . . 192
- - - dysphagia due to . . . 662
- - - ptyalism due to . . . 662
- - - regurgitation of food through nose from . . . 223
- - - of eleventh nerve in bulbar paralysis . . . 172
- - - from embolism of brain . . . 46
- - - of extensor longus digitorum . . . 611
- - - extensors of ankle from poliomyelitis . . . 623
- - - fingers in Erb's palsy . . . 618
- - - toes from poliomyelitis . . . 623
- - - wrist in Erb's palsy . . . 618
- - - external popliteal nerve . . . 610
- - - in diabetes . . . 610
- - - drop-foot from . . . 610
- - - from forcible extension of contracted knee . . . 146
- - - fracture . . . 146
- - - high-stepping . . . 610
- - - from injury . . . 610
- - - in lead poisoning . . . 610
- - - from neuritis . . . 610
- - - peroneal atrophy 624
- - - splint . . . 146
- - - tabes dorsalis . . . 610
- - - talipes from . . . 146
- - - from wound of thigh . . . 146
- - - rectus muscle . . . 222
- - - effects of (Fig. 187) 221
- - - in facial paralysis 604
- - - ONE EXTREMITY, LOWER . . . 607
- - - (and see Paralysis of One Leg)
- - - UPPER . . . 611
- - - (and see Paralysis of Arm)
- - - eye (see Paralysis, Ocular)
- - - eyelid in hysteria . . . 178

Paralysis, contd.

- - - FACIAL . . . 602
- - - asymmetry of face from . . . 602, 605
- - - athetosis with . . . 604
- - - bilateral, in cerebral diplegia . . . 603
- - - dysarthria from . . . 774
- - - dysphagia due to . . . 662
- - - emotional expression uncontrolled in . . . 603
- - - expressionless facies in . . . 603
- - - illustrated (Fig. 464) . . . 603
- - - in myopathy . . . 774
- - - peripheral neuritis . . . 774
- - - pseudo-bulbar paralysis . . . 603
- - - ptyalism due to . . . 662
- - - blepharitis from . . . 604
- - - cheek baggy with . . . 602
- - - flapping with . . . 602
- - - flattened with . . . 602
- - - conjunctivitis from . . . 604
- - - contracture after . . . (Figs. 465-467) 604, 605
- - - corneal reflex in . . . 603
- - - crossed paralysis with . . . 604
- - - ear movement lost in . . . 603
- - - eighth nerve affected with . . . 604
- - - electrical reactions altered in . . . 604
- - - emotional movements in . . . 603
- - - from encephalitis 156, 612
- - - epiphora from 273, 604
- - - face muscles atrophied in . . . 604
- - - hearing impaired with . . . 604
- - - hemiatrophy of face simulating . . . 605
- - - hemiplegia with . . . 603
- - - of other side with . . . 604
- - - herpes of ear with . . . 604
- - - hyperacusis from . . . 604
- - - in hysteria . . . 178
- - - hysteria simulating . . . 605
- - - illustrated (Fig. 463) . . . 602
- - - involuntary wink after . . . (Fig. 467) 604, 605
- - - from mid-brain lesion . . . 603
- - - mouth-corner drooping with . . . 602
- - - nasolabial fold obliterated with . . . 602
- - - nuclear . . . 603, 604
- - - palmar fissure wider with . . . 602
- - - paralysis of external rectus with . . . 604
- - - from parotid new growth . . . 848
- - - peripheral . . . 603, 604
- - - ptosis with . . . (Figs. 518, 519) 660
- - - from pyramidal tract lesion . . . 603
- - - reaction of degeneration from . . . 604
- - - saliva deficient with . . . 605
- - - dribbling from . . . 604
- - - signs of . . . 602
- - - sites of lesions producing . . . 603
- - - stapedius paralysed in . . . 604
- - - supranuclear . . . 603
- - - from syphilis . . . (Figs. 518, 519) 660
- - - taste affected in 604, 605
- - - from temporal lobe lesion . . . 603
- - - tinnitus . . . 604
- - - vertigo with . . . 604
- - - whistling difficult with . . . 602
- - - winking difficult in . . . 603
- - - wrinkles less marked with . . . 602
- - - of facial nerve, æsthesia due to . . . 859
- - - fifth cervical root in Erb's palsy . . . 618
- - - nerve, æsthesia due to . . . 859
- - - anosmia due to . . . 756
- - - in bulbar paralysis . . . 172
- - - dryness of nasal mucosa due to . . . 756
- - - eye changes due to 891

Paralysis of fifth nerve, contd.

- - - necrosis of cornea from . . . 891
- - - forearm from poliomyelitis . . . 623
- - - functional, of vocal cord . . . 606
- - - of gastric walls, dilatation of stomach due to 218
- - - general, of the insane (see General Paralysis)
- - - of half the body (see Hemiplegia)
- - - hand from cervical rib . . . 619, 674
- - - in Klumpke's palsy . . . 618
- - - hypoglossal nerve, dysphagia due to . . . 662
- - - ptyalism due to . . . 662
- - - in hysteria 171, 178, 435, 884
- - - infantile, account of . . . 177
- - - anterior tibial muscles affected in . . . 145
- - - back muscles affected in . . . 191
- - - contractures, from . . . 177
- - - dragging of foot in . . . 314
- - - fever in . . . 177
- - - flaccid paralysis in . . . 177
- - - Friedrich's ataxy simulating . . . 78
- - - hyperextension of toes in . . . 146
- - - interossei paralysed in 146
- - - irregular distribution . . . 145
- - - limping in . . . 314, 456, 457
- - - lumbricals paralysed in . . . 146
- - - malaise in . . . 177
- - - myopathy distinguished from . . . 78
- - - pains in . . . 177
- - - paraplegia in . . . 621
- - - peroneal muscles affected in . . . 145
- - - plantar reflex flexor in 88
- - - from poliomyelitis 78, 145
- - - reaction of degeneration in . . . 78, 145
- - - scoliosis from . . . 191
- - - sensibility unaffected in . . . 177
- - - shoulder atrophy from . . . (Fig. 80) 78
- - - spastic . . . 166
- - - splinters in . . . 177
- - - sudden onset . . . 78, 177
- - - talipes from . . . 145, (Fig. 49) 177
- - - thigh affected by 146, 457
- - - Tooth's paralysis simulated by . . . 146
- - - simulating . . . 78
- - - trophic lesions in . . . 145
- - - ulcer of leg in . . . 894
- - - vasomotor lesions in . . . 145
- - - in infective endocarditis . . . 46
- - - of inferior oblique, effects of . . . 222
- - - rectus, effects of . . . 222
- - - intercostal, from transverse myelitis . . . 81
- - - of internal popliteal nerve . . . 610
- - - calf paralysed in . . . 610
- - - claw-foot from . . . 610
- - - extension of foot impaired from . . . 610
- - - from injury . . . 610
- - - interossei paralysed in . . . 610
- - - springing impossible in . . . 610
- - - standing on tip-toe impossible in . . . 610
- - - by tumour . . . 610
- - - rectus muscle (Fig. 517) 659
- - - effects of . . . 222
- - - interossei of foot . . . 610
- - - in infantile paralysis . . . 146
- - - peripheral neuritis . . . 146
- - - toes hyperextended from . . . 146
- - - ischæmic, of hand . . . 617
- - - joint changes due to . . . 436
- - - labio-glossopharyngeal-laryngeal . . . 80, 662, 731
- - - Landry's (see Landry's Paralysis)

Paralysis, contd.

LARYNGEAL ..	605
- from actinomycosis of lung ..	606
- acute dyspnoea from ..	606
- sulfoacetic oedema of larynx simulated by ..	606
- albuminuria with ..	606
- from aneurysm ..	240, 605, 606
- aphonia from ..	774
- bilateral ..	606
- abductor ..	605
- bovine cough from ..	605, 606
- brassy cough from ..	605, 877
- bulbar paralysis with ..	606
- cerebral softening with ..	606
- coughing possible with ..	605
- diphtheria simulated by ..	606
- from enlarged bronchial glands ..	476
- enlarged heart with ..	606
- from enlarged mediastinal glands ..	476
- thyroid ..	877
- epithelioma of oesophagus ..	606
- fibroid phthisis ..	606
- fixation of arytenoid joints simulating ..	605
- functional ..	606
- general paralysis with ..	606
- glycosuria with ..	606
- from gumma ..	606
- hydatid cyst in chest inflammation simulating ..	605
- laryngoscope in diagnosing ..	605, 606
- from lobar pneumonia ..	606
- locomotor ataxia with ..	606
- from lymphadenoma ..	606
- malignant glands ..	606
- thyroid ..	606
- mediastinal fibrosis ..	606
- new growth ..	606
- mitral stenosis ..	606
- sound cord crossing middle line in ..	605
- speech possible with ..	605
- strabismus with ..	606
- stridor due to ..	877
- from syphilis ..	606, 730
- thickened arteries with ..	606
- after thyroidectomy ..	607
- tracheotomy for ..	606
- from tuberculous cervical glands ..	606
- ulceration simulating ..	605
- from vocal nucleus degeneration ..	606
- vocal cord paralysis from ..	240
- voice change from ..	605, 877
- X rays in diagnosing cause of ..	606
- (and see Paralysis of Vocal Cord).	
OF ONE LEG. ..	607
- with atrophy ..	609
- from cramp ..	188
- in disseminated sclerosis ..	607
- dragging of foot in epiphysitis simulating ..	819
- hysterical ..	178, 608
- in infantile hemiplegia ..	145
- limping from ..	314
- from new growth in spine ..	610
- poliomyelitis ..	611
- progressive muscular atrophy ..	611
- spastic ..	607
- in disseminated sclerosis ..	613
- syringomyelia ..	142
- from spinal caries ..	610
- syphilis ..	611
- syphilitic meningitis ..	611

Paralysis of one leg, contd.

- from syringomyelia ..	611
- talipes with ..	145
- from tumour of cord ..	611
- legs from caries of spine ..	143
- in Friedrich's ataxia ..	171
- rectal examination in spastic, in amyotrophic lateral sclerosis ..	172
- from superior longitudinal sinus ..	733
- from tumour of cauda equina ..	81
- with typhoid spine ..	870
- vaginal examination in ..	81
- Werdnig-Hoffmann type ..	172
- (and see Paraplegia)	
- levator palpebrae superioris ..	(Fig. 516) 659
- limping due to ..	456
- of lingual nerve, agcstia due to ..	859
- lips in bulbar paralysis ..	731
- hysteria ..	178
- lumbricals of foot, hyperextension of toes from ..	146
- in infantile paralysis ..	146
- peripheral neuritis ..	146
- masseter from fifth nerve lesion ..	860
- in trigeminal neuralgia ..	549
- masseters in bulbar paralysis ..	603
- median, Volkmann's contracture simulating ..	617
- in meningitis ..	732
- of musculospiral nerve, anaesthesia of hand in ..	617
- from callus ..	84, 615
- crutch ..	84, 615
- fracture of humerus ..	615
- lead ..	616
- 'Saturday night' ..	84
- wrist drop from ..	84, 616
- neck in Landry's paralysis ..	632
- ninth nerve, agcstia due to ..	859
- in bulbar paralysis ..	172
- numbness with ..	612
- of obturator nerve, adduction of thigh impaired in ..	610
- crossing legs difficult in ..	610
- gait normal in ..	610
- from new growth ..	609
- after parturition ..	609
- thigh rotation impaired in ..	610
- ocular, diplopia due to ..	222
- in disseminated sclerosis ..	239
- double vision from ..	314
- inco-ordination from ..	314
- in myasthenia gravis ..	774
- (and see Ophthalmoplegia; Strabismus)	
- orbicularis palpebrarum ..	891
- epiphora from ..	273
- pain simulating ..	612
- of palate after adenoid operation ..	730
- in bulbar paralysis ..	730
- from diphtheria ..	84, 192, 242, 623, 730, 927
- glossopharyngeal nerve lesion ..	860
- nasal voice from ..	84, 192
- from peripheral neuritis ..	623
- in pseudo-bulbar paralysis ..	730
- regurgitation of fluids through nose from ..	84, 192, 242, 730
- syphilitic ..	730
- after tonsillectomy ..	730
- unilateral, without symptoms ..	774
- without obvious cause ..	730

Paralysis, contd.

- of peronei ..	611
- pharynx in bulbar paralysis ..	730
- from glossopharyngeal nerve lesion ..	860
- post-diphtheritic ..	730
- post-operative ..	730
- in pseudo-bulbar paralysis ..	730
- regurgitation of food through nose from ..	730
- syphilitic ..	730
- without obvious cause ..	730
- phrenic nerve from diphtheria ..	84
- paralysis of diaphragm from ..	84
- in poliomyelitis ..	623
- from transverse myelitis ..	81
- pseudo- in congenital syphilis ..	433
- pseudo-bulbar ..	773
- age incidence of ..	731
- bilateral facial paralysis with ..	603
- bulbar distinguished from ..	242, 603
- due to cortical softening ..	242, 731
- dysphagia due to ..	662
- emotional expression uncontrolled in ..	603
- expressionless facies with ..	603
- paralysis of palate in ..	730
- pharynx in ..	730
- ptialism due to ..	662
- regurgitation of food through nose from ..	223, 730, 731, 927
- no tongue wasting in ..	243, 662, 731
- pseudo-hypertrophic muscular ..	(Fig. 477) 624
- account of ..	625
- 'climbing up himself' in ..	146, 314, 625
- facial incidence ..	624
- hand wasted in ..	(Fig. 79) 78
- inability to stand on tip-toe in ..	625
- insidious onset of ..	624
- muscles atrophied in ..	625
- hypertrophied in ..	625
- paraplegia in ..	621
- no R.D. in ..	78
- sensory changes in ..	625
- of shoulders ..	(Fig. 478) 625
- 'slipping through hands' in ..	625
- slow progress of ..	624
- no sphincter trouble in ..	625
- waddling gait in ..	314, 625
- of quadriceps extensor femoris from poliomyelitis ..	623
- 'Saturday night' ..	84
- of sciatic nerve ..	610
- anaesthesia of foot in ..	610
- leg in ..	610
- ankle-joint movements lost in ..	610
- flexion of knee difficult in ..	610
- from forcible extension of contracted knee ..	146
- fracture ..	146, 610
- gait affected in ..	610
- from injury to hip joint ..	610
- pelvic inflammation ..	610
- tumour ..	610
- splint ..	146
- talipes from ..	146
- from thigh wound ..	146
- serratus magnus ..	616
- occupation and ..	(Fig. 473) 617
- winged scapula from ..	(Fig. 473) 617

Paralysis, contd.

- of seventh nerve, agcstia due to ..	859
- in bulbar paralysis ..	172
- keratitis due to ..	891
- ptosis from ..	659, (Figs. 518, 519) 660
- from syphilis ..	(Figs. 518, 519) 660
- third paralysed with ..	(Fig. 518, 519) 660
- (and see Paralysis, Facial)	
- shoulder from poliomyelitis ..	623
- sixth cervical root in Erb's palsy ..	618
- nerve from lead ..	45
- soft palate from diphtheria ..	623
- peripheral neuritis ..	623
- stertor due to ..	794
- spastic, account of ..	607
- of infants, choreiform contractions in ..	170
- one leg in syringomyelia ..	142
- legs in amyotrophic lateral sclerosis ..	80
- from superior longitudinal sinus ..	733
- from medulla oblongata lesions ..	613
- pons lesions ..	613
- of sphincter vesicae, dribbling of urine from ..	495
- spinal muscles, scoliosis from ..	192
- spinati in Erb's palsy ..	618
- stapedius ..	604
- in facial paralysis ..	604
- hyperacusis from ..	604, 605
- tinnitus from ..	605
- tympanic tension upset by ..	604
- superior oblique, effects of ..	222
- rectus, effects of ..	222
- supinator longus in Erb's palsy ..	618
- temporal muscle from fifth nerve lesion ..	860
- in trigeminal neuritis ..	549
- tenth nerve in bulbar paralysis ..	172
- tests for ..	611, 612
- of third cranial nerve illustrated (Fig. 516) ..	659
- internal rectus paralysed from ..	(Fig. 517) 659
- levator palpebrae superioris paralysed in ..	(Fig. 516) 659
- from mid-brain tumour ..	882
- ophthalmoplegia intern: from ..	674
- ptosis from ..	(Fig. 516) 659, (Figs. 518, 519) 660
- pupils unequal from ..	675
- seventh paralysed with ..	(Figs. 518, 519) 660
- from syphilis ..	(Fig. 516) 659, (Figs. 518, 519) 660
- tibial muscles, talipes from ..	146
- tick, account of ..	625, 626
- paraplegia in ..	621
- tingling with ..	612
- of tongue in bulbar paralysis ..	603, 731
- hysteria ..	178
- unilateral, without symptoms ..	774
- Tooth's (see Tooth's Peroneal Atrophy)	
- of twelfth nerve in bulbar paralysis ..	172
- dysphagia due to ..	662
- ptialism due to ..	662
- ulnar, adductor pollicis wasted in ..	141

Paralysis, ulnar, contd.

- claw-hand from (Fig. 85) 82, 141
- distinguished from progressive muscular atrophy 80
- flexors of forearm wasted in (Fig. 85) 82
- hypothenar muscles wasted in (Fig. 85) 82, 141
- illustrated (Fig. 85) 82
- Volkmann's contracture simulating 617
- unilateral 154, 155
- (and see Hemiplegia)
- of vagus nerve 84
- vocal cord from aneurysm 240, 388
- in bulbar paralysis 773
- due to carcinoma of thyroid gland 876
- compression of recurrent laryngeal nerve 877
- cough from 186, 188
- due to enlarged thyroid 388, 877
- epithelioma of esophagus 388
- hoarseness due to 388
- from malignant cervical glands 388
- mediastinal new growth 388
- recurrent laryngeal nerve affection 240
- stridor due to 799
- from syphilis 388, 399
- unilateral bulbar palsy 774
- vagal centre degeneration 799
- voice altered by 188
- without voice change 774
- (and see Paralysis, Laryngeal)
- Volkmann's, from splints 79
- Werdnig-Hoffmann 172
- reflexes lost in 172
- rickets distinguished from 172
- (and see Paresis)
- Parametric abscess felt per rectum 729
- groin bulged by 826
- pyrexia due to 687
- vaginal examination in diagnosing 693
- Parametritis, bladder irritated by 148
- frequency of micturition from 151
- general peritonitis from 734
- after labour 700
- pain in back from 700
- abscess from 700
- peritonitis from 151
- pyrexia due to 688, 700
- vesical colic from 148
- Paramnesia from chronic alcoholism 184
- Paramyoclonus multiplex 883
- account of 173
- in biceps 174
- face 174
- head-retraction with 731
- in quadriceps femoris 174
- rate of contraction 174
- in semitendinosus 174
- supinator longus 174
- Paraphenylic compounds, erythema from 275, 918
- Paraphimosis from balanitis 763
- gangrene of penis from 763
- pain in penis from 579
- PARAPLEGIA** 621
- from actinomycosis of vertebrae 626
- in adults 626
- from amyotrophic lateral sclerosis 626, 630
- aneurysm 626, 629
- ankle-clonus with 627
- in ataxic paraplegia 626

Paraplegia, contd.

- ataxic, achylia gastrica and 631
- Babinski's sign in 88
- combined sclerosis of cord and 631
- impotence in 393
- inco-ordination in 313
- no anaesthesia in 631
- nystagmus in 631
- voice change in 631
- paraplegia from 626
- pernicious anaemia and 631
- spasticity in 631
- syphilis and 631
- tracts affected in 631
- ataxy and 77
- from bilateral cerebral haemorrhage 626
- softening 626
- cerebellar abscess 626
- tumour 626
- in children 621
- from combined sclerosis of cord 626
- compression of cord 621
- lumbar enlargement 626
- compression, due to actinomycosis 626
- aneurysm 626
- ascending nephritis in 211
- bladder distended from 61
- cystitis in 211
- delirium in 211
- girdle pain in 326
- due to hydatid cyst 626
- incontinence of urine from 61
- from injury 626
- new growth of meninges 626
- vertebrae 626
- retention of urine in 211, 493
- due to spinal caries 623, 626
- uraemia in 211
- from congenital defect of cortex 621
- congenital spastic, kyphosis in 194
- from cretinism 621
- definition of 621
- in disseminated sclerosis 613, 626
- dragging of foot in 314
- from encephalitis 621, 622, 626, 632
- endarteritis obliterans 630
- enteric fever 628
- Erb's syphilitic 176
- extensor plantar reflex with 627
- from forceps injury 627
- Friedreich's ataxy 621, 624
- functional 626, 632
- in general paralysis 626, 632
- from gumma of cauda equina 627
- haemorrhage into cord 626
- hydatid cyst of spine 626
- hydrocephalus 621
- hysterical 77, 178, 609
- from idiocy 621
- Friedrich's ataxy 621, 624
- functional 626, 632
- in general paralysis 626, 632
- from gumma of cauda equina 627
- haemorrhage into cord 626
- hydatid cyst of spine 626
- hydrocephalus 621
- hysterical 77, 178, 609
- from idiocy 621
- incontinence of faeces in 627
- infantile 621
- spastic 169
- from infantile paralysis 621
- injury 626
- at birth 622
- by forceps 621
- to spine 656
- knee-jerk increased with 627
- in Landry's paralysis 626, 632
- limping in 314
- list of causes of 626
- malnourished of 626, 632
- from meningeal haemorrhage 626
- meningitis 621, 622, 626, 627
- meningocele 621
- myopathy 621
- new growth of spinal cord 626
- meninges 626
- vertebrae 626
- pelvic tumour 626

Paraplegia, contd.

- from peripheral neuritis 621, 626, 627
- poliomyelitis 621, 621
- porrocephalus 626, 627
- precipitate defecation in 394
- priapism with 656
- from primary lateral sclerosis 626, 631
- muscular dystrophy 621
- progressive muscular atrophy 611
- pseudo-hypertrophic muscular paralysis 621
- retention of urine in 495, 627
- from rickets 621
- scarlet fever 628
- sensory disturbance with 627
- from simple delayed walking 621
- spastic, acquired, causes of 169
- from amyotrophic lateral sclerosis 145
- anaesthesia of legs in 623
- ankle-clonus in 81, 623
- bladder distention in 815
- from combined sclerosis of cord 177, 515
- compression of cord 623
- congenital, atetosis in 169
- family nerve disease and 145
- kyphosis in 194
- mental incapacity and 145
- talipes equinus in Fig. 130 145
- convulsions from 182
- in diplexia 884
- disseminated sclerosis 623
- extensor plantar reflex in 81, 177, 394, 623
- girdle pain in 326
- from hematovelvia 620
- hydrochloric acid absorbed from gastric juice in 177
- impotence in 393
- from injury to spine 145
- knee-jerk increased in 81, 623
- from malignant disease of spine 620
- new growth 869
- pachymeningitis 620
- pernicious anaemia and 177
- precipitate defecation in 394
- micruria in 394
- no R.D. in 81, 623
- segmental anaesthesia in 177
- sphincter trouble in 81, 177, 623
- from spinal caries 145, 623
- syringomyelia 619
- transverse myelitis 81
- tuberculous spine 620
- tumour of cord 620
- meninges 620
- no wasting in 81, 623
- spasticity with 627
- from spina bifida 621
- occulta 621
- spinal artery thrombosis 628
- caries 621, 626
- of sudden onset 626
- sudden, from spinal caries 306
- from superior longitudinal sinus thrombosis 621, 622
- syphilis 626, 630
- in syringomyelia 619, 626, 628
- tabes dorsalis 626
- from tick paralysis 621, 626
- Tooth's peroneal atrophy 621
- transverse myelitis 626, 627, 628
- tumour of cauda equina 626, 627
- ulcer of foot in 893
- without wasting 627

- Parapsoriasis, itching in 658
- Parasites, albuminuria from 16
- anaemia from 44, 515
- anthelmintics in diagnosis 272
- blood per anum from 102
- in blood, delirium from 211
- diseases due to 36
- in filariasis 36
- malaria 36, 345, 417, 654, 708, 738, 739, 785
- relapsing fever 36
- trichinosis 885
- trypanosomiasis 36, 708
- cachexia from 128
- Charcot-Leyden crystals in stools from 131
- from copra 916
- delirium from 211
- eosinophilia from 35, 36, 44, 103, 104, 272
- erythema from 276, 280
- fungous, in tinea circinata 479
- versicolor 479
- from grain 916
- hemoptysis from 361
- INTESTINAL** 632
- jaundice due to 407, 410
- malarial (see Malaria)
- mucus in stools simulating 495
- oedema of legs from 515, 517
- ova in stools 104
- pruritus due to 658
- severe anaemia from 46
- in sputum 367
- stools 104, 131, 215
- and see Worms
- Parasitoides, dermatitis from 915
- Parathyroid glands, calcium metabolism and 150
- myoclonus from loss of 174
- tetany and 190
- Paratyphoid bacillus see Bacillus
- fever (see Fever)

- - - oesophagus affected in .. 127
- - - palate affected in .. 127
- - - pituitary rubra distinguished from .. 746
- - - pyrexia in .. 96, (Fig. 112) 127, 688, 709, 710
- - rectum affected in .. 127
- - - recurrences of .. 127
- - - syphilis distinguished from .. 743
- - - tongue swollen in 851, 852
- - - ulcerative colitis from .. 160
- - - urticaria and .. 127
- - - vagina affected by .. 95, 127
- - - vegetans .. 743
- - - vesicles due to .. 619
Pendulant, cheloid from .. 131
Pendulous abdomen, anteversion of uterus from .. 250
- - - dystocia from .. 250
- - - hepatoptosis and .. 462
- - - scrotum, varicocele in .. 589
Penguin-like dwarf .. 234
Penicillium glaucum in sputum .. 792
Penile calculus (see Calculus, Urethral)
- - fistula .. 494
Penis, absence of, impotence with .. 393
- - bite of, sore due to .. 763
- - blood from, due to vesical calculus .. 576
- - carcinoma of (see Carcinoma)
- - - chancere on 764, 824, 897
- - - chancroids of .. 764
- - - cyanosis affecting .. 195
- - - diabetic gangrene of .. 301
- - - discharge from (see Discharge, Urethral)
- - - drops of blood from, from epithelioma of bladder .. 721
- - - - vesical calculus .. 721
- - - - tuberculosis .. 721
- - - eczema of, in diabetes .. 334, 499
- - - elephantiasis of, impotence due to .. 393
- - - epithelioma of (see Epithelioma)
- - - erection of, persistent (see Priapism)
- - - erythema of, from herpes 764
- - - fracture of .. 140
- - - gangrene of .. 763
- - - gumma of .. 765
- - - - caries of pubis simulating .. 851
- - - - haematoma of .. 579
- - - herpes of .. 764, 913

Penis, contd.

- injury of (see Injury)
- lupus of .. 765
- oedema of (see Oedema)
- **PAIN IN** .. 574
 - (and see Pain in Penis)
 - pricking in, due to epithelioma of bladder .. 721
 - inflamed trigone .. 493
 - tuberculous bladder .. 721
 - vesical calculus .. 721
 - Raynaud's disease affecting .. 852
 - sarcoma of, caries of pubis simulating .. 851
 - scabies affecting .. 499
 - **SORE ON** .. 763
 - (and see Sore on Penis)
 - tingling in, from inflamed trigone .. 493
 - tubercle bacilli from .. 765
 - ulceration of (see Sore on Penis)
- **Pentosan crystals, melting point of** .. 328
- **Pentose, Bial's test for** .. 327
- in Camidge's test .. 129
- Fehling's solution reduced by .. 327
- glycosuria simulated by .. 327
- osazone crystals from .. 327, 328
- phloroglucin test for .. 327
- yeast not fermenting .. 327
- **Pentosuria, familial** .. 327
- **Pepper, dermatitis due to** .. 915, 916
- **Peppermint, heart symptoms and** .. 377
- leucocytosis from .. 453
- **Pepsin, no convenient test for** .. 401
- in gastric juice .. 401
- **Peptic ulcer, blood per anum from** .. 96
- of cheek .. 898
- of tongue .. 898
- **Peptone injections, delirium from** .. 212
- dyspnoea from .. 246
- erythema after .. 275
- rigor after .. 737
- not precipitated by salicyl-sulphonic acid .. 7
- **Peptonizing ferments in pancreatic cyst** .. 61
- **Perchloride of iron, thirst due to** .. 875
- in Uffelmann's reagent .. 401
- **Percussion and ascites of spleen, method of** .. 775
- **Perforating ulcer (see Ulcer)**

- due to carcinoma .. 149
- dysenteric ulcer .. 63
- scrofular ulcer .. 63
- tuberculous ulcer .. 63
- **cornea (see Cornea)**
- **duodenal ulcer (see Ulcer, Duodenal)**
- **gall-bladder, general peritonitis from** .. 734
- **gastric ulcer (see Ulcer, Gastric)**
- palate (see Palate)
- **Pericardial branches of vagus nerve** .. 185
- effusion (see Effusion)
- **friction, account of** .. 117
- **Pericarditis** .. 264, 265
- acute rheumatism and .. 71, 136, 568, 758
- adherent pericardium from .. 70, 71
- aortic disease simulated by .. 117, 120
- ascites with .. 62
- in blood diseases .. 137
- Bright's disease .. 136
- canter rhythm with .. 265, 373, 533, 729, 863
- chronic mediastinitis after .. 68, 910
- in chronic nephritis .. 15
- clubbed fingers from .. 142
- **dullness with** .. 265
- dyspnoea from .. 246

Pericarditis, contd.

- with effusion in polyrrhomenitis .. 62
- skiaogram of (Fig. 220) .. 265
- friction sounds with .. 373, 532
- haemorrhagic, in polymyositis .. 702
- heart failure from .. 246
- impulse displaced in .. 265, 373
- in Hodgkin's disease .. 137
- intercostal spaces filled up in .. 265
- in leukaemia .. 137
- lymphadenoma .. 137
- mediastinitis from .. 386
- nutral regurgitation from .. 263, 265
- myocarditis with .. 264
- pain in chest from .. 530, 532
- epigastric from .. 863
- pallor with .. 532
- palpitation from .. 594
- peritonitis with .. 62
- in pernicious anaemia .. 137
- **physical signs of** 264, 265
- pleurisy with .. 62
- **pleuropericarditis simulating** .. 533
- in polymyositis .. 702
- precordial pain in .. 863
- in pseudo-leukaemia infantum .. 137
- rheumatic fever and .. 423
- rheumatism causing .. 68
- **rub in** .. 117, 863
- in septicæmia .. 706
- shortness of breath from .. 532
- shuffling rub with .. 265
- in splenic anaemia .. 137
- suppurative in pyæmia .. 739
- systolic bruit with .. 265
- tenderness of chest from .. 861
- in epigastric from .. 863
- of precordia in .. 863
- thrill due to .. 875
- X rays in diagnosis .. 265
- **Pericardium, adherent (see Adherent Pericardium)**
- aneurysm ruptured into .. 157, 534
- fibrous thickening of, in polyrrhomenitis .. 138
- **gas in** .. 800
- **Pericellular cirrhosis in congenital syphilis** .. 467
- **Perichondritis of arytenoid cartilage, hoarseness from** .. 388
- pain in ear from .. 253
- sore throat due to .. 758
- streptococcal .. 253
- auricle, deafness from .. 207
- meatus obstructed by .. 207
- **cricoid cartilage, hoarseness from** .. 388
- sore throat due to .. 758
- ear, carache from .. 252
- **larynx, account of** .. 763
- thyroid cartilage, sore throat due to .. 758
- thyroid gland simulated by .. 876
- **Pericollitis** .. 812
- from diverticulitis .. 162
- **Perihepatitis from abscess of liver** .. 68
- account of .. 67, 68
- ascites from .. 62, 63, 467
- over carcinoma of liver .. 68
- chronic peritonitis and .. 68
- cirrhosis and .. 68, 465
- cough from .. 187
- liver distorted in .. 68
- edge curled under in .. 68
- rounded in .. 68
- turned up in .. 68
- enlarged with .. 63, 467
- pain over liver from .. 465
- paracentesis abdominis in .. 67
- in polyrrhomenitis .. 138
- really chronic peritonitis .. 62
- from repeated tapings .. 68
- syphilis .. 68
- **Perimeter chart of bilateral homonymous hemianopsia** .. (Fig. 313) 380

Perimeter chart, contd.

- of bilateral temporal hemianopsia .. (Fig. 306) 378
- in defining scotoma .. 924
- detecting blind spots .. 92
- hemianopsia .. 377
- **Perinephric abscess (see Abscess)**
- hematoma, abscess after .. 438
- from injury to loin .. 438
- swelling, kidney simulated by .. 438
- loin filled by .. 438
- **Perinephritis, account of** 697
- from coli bacilluria .. 187
- cough from .. 187
- pain in shoulder from .. 583
- pyrexia due to .. 697
- spleen simulated by .. 775
- subdiaphragmatic peritonitis from .. 583
- **Perineum, abscess in** .. 766
- leucocytosis with .. 453
- boil in, aching in perineum from .. 579
- bromidrosis of .. 803
- carbuncle in, aching in perineum from .. 579
- carcinoma of, aching in perineum from .. 579
- incontinence of faeces from .. 394
- chancre in .. 766
- condelomata in .. 766
- aching in perineum from .. 579
- eczema of, aching in perineum from .. 579
- diabetic .. 579
- gouty .. 579
- epithelioma of .. 767
- inguinal glands enlarged from .. 476
- erythema of, in infants .. 498
- fallon, injury of urethra from .. 394
- fistula in .. 575
- after operation .. 766
- hernia in, valvular swelling due to .. 853
- herpes of .. 914
- injury to, anuria after .. 55
- incontinence of faeces from .. 394
- prolapse of uterus due to .. 657
- intertrigo of, aching in perineum from .. 579
- lacerations healed in, dyspareunia due to .. 239
- mucous tubercles in .. 766
- **muscles of, nerve supply of** 610, (Fig. 471) 611
- **PAIN IN** .. 579
- (and see Pain in Perineum)
- rigidity of, dystocia due to .. 250
- sensory centre for .. (Fig. 485) 631
- sinus in, from prostate .. 766
- **SORES IN** .. 766
- (and see Sore, Perineal)
- tear of, after childbirth .. 394
- incontinence of faeces from .. 394
- testis in .. 589
- aching in perineum from .. 579
- ulcer in, aching in perineum from .. 579
- urine passed through .. 494, 766
- **Periodic breathing** .. 138
- polyuria without apparent cause .. 653, 654
- **Periods, painful (see Dysmenorrhœa)**
- profuse (see Menorrhagia)
- **Periosteal abscess (see Abscess)**
- haemorrhage (see Haemorrhage)
- node in typhoid fever .. 819
- sarcoma (see Sarcoma)
- **Periosteum, fibroma of** .. 821
- hematoma under .. 817
- haemorrhage under, tenderness from .. 51
- lipoma of .. 821

- **Periostitis, abscess due to** 845
- due to actinomycosis .. 818
- albuginosa with .. 21
- anaemia from .. 47
- due to Bacillus mallei .. 818
- paratyphosus .. 818
- pyocyaneus .. 818
- typhosus .. 818, 870
- bacteriological examination in .. 818
- due to dysentery bacilli .. 818
- of femur, limping from .. 457
- popliteal abscess due to .. 844
- fibula, limping from .. 456
- due to gonococci .. 818
- gunnatus, with gumma of testis .. 769
- trigeminal neuralgia from .. 548
- of humerus, skiaogram of .. (Fig. 620) 818
- due to hydatid disease .. 818
- of hyoid bone, pain in tongue from .. 590
- ilium, pain in iliac fossa from .. 557
- suppurative, appendicitis simulated by .. 558
- operation in diagnosing .. 558
- pain in iliac fossa from .. 555
- infective, syphilis simulating .. 819
- due to influenza bacilli .. 818
- of jaw from blow .. 834
- cervical glands enlarged from .. 834
- pain in jaw due to .. 834
- parotitis simulated by .. 834
- pyrexia from .. 834
- from septic tooth .. 834
- swelling of gums from .. 834
- toothache from .. 834
- trismus from .. 834
- due to leprosy .. 818
- leprosy .. 818
- leucocytosis in .. 817, 845
- necrosis of bone due to .. 818
- orbital, exophthalmos from .. 284
- X rays in diagnosis .. 284

- pain in shoulder from ..	580
- from pelvic inflammation ..	583
- perinephritis ..	583
- pyosalpinx ..	583

Peritonitis, contd.

- tabes dorsalis simulating ..	151
- temperature in ..	150
- subnormal in ..	150, 392
- thirst due to ..	875
- tuberculous, abdomen all dull with ..	60
- abdominal pain in ..	65, 706, 806
- swelling due to ..	806
- tenderness in ..	806
- tumour in ..	65, 706, 777, 809
- wall infiltrated in ..	65
- abscess at umbilicus in ..	593
- account of ..	64, 65, 717
- acute form ..	63, 64
- adhesions from ..	167, (Fig. 563) 705
- age incidence of ..	64, 777
- anæmia in ..	43, 806
- ascites with ..	Fig. 74, 59
- bands from ..	60, 61, 63, 64, 65, 67, 480, 706, 777, 806
- blood in stools in ..	806
- Calmette's reaction in ..	777
- carcinoma of colon simulating ..	809
- caseous abdominal glands in ..	(Fig. 563) 705
- bronchial glands in ..	(Fig. 563) 705
- form ..	64
- glands with ..	706
- masses in ..	(Fig. 563) 705
- matings in ..	476
- mediastinal glands in ..	(Fig. 563) 705
- mesenteric glands in ..	65, (Fig. 563) 705
- portal glands in ..	412
- in children ..	64, 480, 706
- choroidal tubercles in ..	787
- chronic appendix ..	706
- form ..	64
- peritonitis from ..	525
- cirrhosis of liver simulated by ..	64, 806
- constipation in ..	806
- cow's milk and ..	777
- diarrhoea in ..	806
- dullness with ..	65
- facies in ..	706
- faecal fistula at umbilicus from ..	59, 65, 777
- free fluid with ..	167
- gland disease with ..	65
- glands enlarged in ..	811
- guinea-pig test in ..	65
- hip disease with ..	65
- iliac glands involved in ..	563
- intestines adherent in ..	64, 65, 777, 806
- jaundice in ..	67, 412
- kidney disease with ..	65
- knee disease with ..	65
- leucopenia in ..	455
- liver enlargement simulated by ..	64, 462
- localized ascites in ..	64
- lumbar puncture in ..	787
- lupus with ..	65
- lymphocytes in fluid in ..	65
- malignant peritonitis simulated by ..	64, 65
- mesenteric glands enlarged from ..	476, 806
- mesentery caseous in ..	65
- shortened by ..	60, 65
- miliary tubercles in ..	64
- multiple tumours with ..	63, 167, 480, 805
- nausea in ..	806
- obliterative type ..	806
- obstruction after ..	167
- oedema of abdominal wall in ..	777
- umbilicus in ..	59
- omentum caseous in ..	65
- infiltrated in ..	806
- thickened in ..	64, 462, 777, 809
- optic neuritis in ..	787
- ovarian cyst simulated by ..	65

Peritonitis, tuberculous, contd.

- pancreatitis simulating ..	700
- paracentesis in ..	65
- perforative peritonitis simulated by ..	64
- pigmentation of skin in ..	806
- pyrexia in ..	(Fig. 75) 64, 65, 706, 777, 806
- rare in adults ..	64
- reddening of abdominal wall in ..	777
- resonance in flanks with ..	h60
- retraction of head in ..	787
- spinal disease with ..	65
- spleen simulated by ..	775
- temperature charts in ..	(Fig. 75) 64, (Fig. 563) 705
- tender mass in ..	806
- tuberculin reactions in ..	777
- from tuberculous glands ..	712
- typhoid fever simulated by ..	787
- ulceration of intestine with ..	806
- umbilical fistula with ..	706, 804
- umbilicus inflamed in ..	59, 65, 525, 804
- urachal cyst simulating ..	815
- varieties of ..	64
- von Pirquet's reaction in ..	777
- (and see Tuberculosis, Abdominal)	
- from twisted ovarian cyst ..	559
- vaginal examination in ..	151
- vomiting in ..	150, 929, 941
- Perityphilitic, abdominal tumour due to ..	812
- abscess due to ..	812
- appendicitis simulated by ..	564
- constipation with ..	812
- malignant disease simulated by ..	812
- pain over ..	564, 812
- from stercoreal ulcer of cæcum ..	564
- tenderness over ..	812
- vomiting with ..	812
Perleche in children ..	460
- Perl's reaction in bronzed diabetes ..	32, 385, 467
- negative in aplastic anæmia ..	31
- in pernicious anæmia ..	31, 385, 467
- sprue ..	32
- Pernicious anæmia (see Anæmia)	
- Peroneal atrophy (see Tooth's Peroneal Atrophy)	
- muscles (see under Muscle)	
- Peroxide of hydrogen in blood test ..	104
- erythema due to ..	917
- vesication due to ..	917
- Perspiration (see Sweating)	
- Pertussis (see Whooping-cough)	
- Pes anserinus ..	3
- cavus from spina bifida ..	146
- tight boots ..	146

- varus in Friedreich's disease ..	176
- Perssary, fetid discharge due to ..	232
- vaginal discharge due to ..	231
- Petechiæ (see Purpura)	
- Petit mal, aphasia in ..	772
- aura and ..	87
- characters of ..	182
- epilepsy and ..	87
- fainting due to ..	297
- loss of consciousness in ..	87
- muscular twitches in ..	174
Petrol, erythema from ..	775
- fumes, ataxy from ..	27
- coma from ..	154
- delirium from ..	212
- dyspnœa from ..	246
- fainting due to ..	297

Petrol fumes, contd.

- noises in head from ..	504
- out of condition from ..	113
- shortness of breath from ..	113
- vertigo from ..	504
- Petroleum, constipation and ..	160
- epithelioma of scrotum ..	849
- greedy colon and ..	160
- Petrous bone, fracture of, deafness from ..	208
- ivory exostosis of ..	820
- thickened in acromegaly ..	504
- leontiasis ossea ..	504
- osteitis deformans ..	504
- osteoporosis ..	504
- from syphilis ..	504
- vertigo from ..	504
- Peyer's patches enlarged in lymphatism ..	477
- in sloughs of, in typhoid fever ..	784
- ulceration of, in typhoid fever ..	481
- Pfeiffer's bacilli (see Bacillus Influenzæ)	
- Phagedæna oris ..	93
- ulcer of leg from ..	894
- Phagocytic anæmia ..	51
- Phalanges, chondromata of ..	820
- enlarged in acromegaly ..	255
- tuberculosis of ..	818
- (and see Fingers)	
- Phalline, hæmoglobinuria from ..	357
Phantom tumour ..	807, 808
- abdominal swelling due to ..	804
- amenorrhœa with ..	843
- anæsthetic in ..	843
- gnosis ..	61, 843
- ascites simulated by ..	60, 61
- due to diaphragm contraction ..	843
- at menopause ..	61, 843
- meteorism producing ..	486
- ovarian tumour simulated by ..	61
- pelvic swelling due to ..	840
- pregnancy simulated by ..	61, 843
- sex incidence of ..	61
- Pharyngeal abscess (see Abscess)	
- branch of vagus ..	185
- catarrh, middle-ear disease from ..	253
- obstruction, cyanosis from ..	196
- tonsil inflammation of, shoring due to ..	757
- Pharyngitis, acute ..	762
- bacteria which cause ..	757
- sore throat due to ..	757
- chronic, account of ..	762
- in clergymen ..	186, 757
- costermongers ..	186, 757, 762
- cough from ..	186
- in football-match watch-ers ..	762
- hæmoptysis simulated by ..	359
- from overuse of voice ..	762
- pyrexia due to ..	688
- from smoking ..	762
- syphilitic ..	93
- cough from ..	186
- snail-track ulcers in ..	186
- Wassermann test and ..	186
- Pharynx, bacteriological investigation of ..	83
- bulbar paralysis affecting ..	242
- carcinoma of (see Carcinoma)	
- chicken-pox affecting ..	762
- crusts on ..	95
- dermatitis herpetiformis affecting ..	95
- diphtherial membrane on ..	248

Pharynx, contd.

- epithelioma of (see Epithelioma)
- erythema bullosum affecting 95
- gumma of, dysphagia from 661
- - pyralism from 661
- mercurial tremor of 882
- naso- (see Nasopharynx)
- pain in, after acute irritants 244
- paralysis of (see Paralysis)
- pemphigus affecting 95
- red in scarlet fever 281
- rhinoscleroma affecting 889
- sarcoma of, earache from 253
- sepsis of, cervical adenitis from 763
- small-pox affecting 692
- snail-track ulcers on, - - - in syphilis 186, 760
- stenosis of, dysphagia from 244
- - syphilitic 244
- superior laryngeal nerve supplying 185
- ulceration of (see Ulceration)
- Phenacetin, coma from 154
- cyanosis from 196
- fainting due to 297, 299
- for headaches 299
- methemoglobinemia from 202
- methemoglobinuria after 196
- Phenazone, coma from 154
- cyanosis from 196
- fainting due to 297
- Fehling's solution reduced after 327
- methemoglobinemia from 202
- methemoglobinuria after 196
- noises in head from 504
- vertigo from 504
- Phenol, carbollina from 906
- dermatitis due to 918
- gangrene from 317
- necrosis due to 918
- Phenolphthalein, color from 148
- in estimating acidity 401
- fat estimation 299
- red urine due to 903
- Phenyl-alanin, homogenetic acid in 905
- hydroquinoneacetic acid in 905
- Phenyl-glucosazone crystals (Fig. 271) 328
- melting point of 328
- Phenyl-hydrazine in Camidge's test 129
- dermatitis from 917
- glycuronic acid and 129
- hemoglobinuria from 357
- osazone crystals from 327
- rash due to 918
- test 328
- in confirming glycosuria 902
- lactosuria 312
- Phenyl-lactosazone crystals illustrated (Fig. 272) 328
- melting point of 328
- Phenyl-lavullosazone crystals, melting point of 328
- Phenyl-pentosazone crystals, melting point of 328
- Phimosis from balanitis 763
- chance obscured by 764, 765
- convulsions from 181
- enuresis from 270
- foul discharge from 765
- increased frequency of micturition from 491
- inguinal glands enlarged with 765
- oedema of prepuce with 765
- pain in penis from 578
- priapism due to 656
- pyuria due to 716, 723
- Phlebitis, abdominal, melæna from 481
- abdominal pain due to 699
- account of 699

Phlebitis, contd.

- axillary thrombosis from 515
- empyema from 135
- erythema with infected emboli of lung from 135
- inferior vena cava obstruction from 515
- intra-abdominal 699
- limping due to 456, 457
- obscure cases of 699
- oedema of leg from 515, 699
- pain in leg from 539
- phlebotitis from 699
- pulmonary embolism from 699
- pyrexia from 688, 699
- redness over vein in 699
- in septicæmia 706
- sudden death from 699
- superior vena cava thrombosis from 515
- swelling due to 699
- tenderness over 699
- in varicose veins 539
- from whitlow 515
- Phlebotomy, calculus simulated by 440
- from mesenteric vein thrombosis 152
- phlebitis 699
- ureteric calculus simulated by 442, 443, 559
- Phleboscrosis, thrombosis from 321
- Phlebotomous fever, bradycardia in 110
- Phlegmasia alba dolens, - - - after labour 512, 894
- - - lymphatic obstruction in 894
- - - oedema in 511
- - - in pregnancy 894
- - - ulcer of leg from 894
- Phlegmonous gastritis 910
- Phloridzin, glycosuria from 332
- Phloroglucin test, glycuronic acid and 327
- for pentose 327
- Phlyctenular conjunctivitis (Fig. 230) 286, 890
- ulcer of cornea 890
- Phocomelus 234
- Phosgene, cyanosis from 200
- exudative oedema of lungs from 200
- Phosphate, ammonio-magnesium, - - - of calcium (see Calcium) 638
- calculus in bladder (Fig. 244) 355
- - X rays and 440
- crystals, stellar (Fig. 498) 638
- deposit, blue, from indigo blue 907
- deposits, physiology of 637
- of magnesium (see Magnesium)
- sodium 637
- stellar, calcium phosphate and 638
- triple 638
- - crystals of (Fig. 499) 638
- in cystitis 638
- Phosphates, acetic acid in clearing 21, 140, 229, 715
- amorphous 12
- blood pigment carried down by 12
- boiling test and 638
- cloud on boiling 636, 637
- liquor potassæ not dissolving 899
- milky urine from 638
- opalescent urine from 3
- precipitated by liquor sodæ 3
- ulcer of bladder coated with 722
- urates simulating 899
- uric acid and 901
- in urine in acute nephritis 12
- disappearance in starvation 637
- from lecithin 637
- in neurasthenia 637
- normal total per diem 637

Phosphates in urine, contd.

- - from nuclein 637
- - phosphates in food 637
- Phosphatic diabetes (see Diabetes)
- PHOSPHATURIA 636**
- absolute 637
- albuminuria simulated by 639
- definition of 636
- enuresis simulated by 271
- gonorrhœa simulated by 639
- increased frequency of micturition from 491
- and oxaluria, alternating 638
- - in indigestion 523
- physiological 638
- pyuria simulated by 639
- spermatorrhœa and 638, 639
- urine milky in 140
- Phosphide of calcium in ferrosilicon 421
- Phosphorus poisoning, account of 420**
- acute yellow atrophy simulated by 421
- albuminuria in 16
- albumosuria in 21
- ammonia of urine in 421
- anuria from 55, 57
- black vomit in 421
- bleeding gums in 93
- blood per anum from 96
- burning pain in epigastrium in 421
- chlorides of urine in 421
- cholæmia from 213
- collapse in 421
- coma in 153, 421
- convulsions in 421
- delirium from 213, 421
- drowsiness in 421
- extreme thirst in 421
- fatty degeneration of heart from 70, 94, 264, 421
- kidneys in 421
- liver in 94, 421, 469
- gastritis from 138
- simulated by 929
- hæmatemesis from 336, 338
- hæmorrhages in 421
- headache in 421
- jaundice from 408, 420, 421
- leucin not found in 421
- liver enlarged from 408, 421, 469
- matches and 94, 421
- nausea in 421
- necrosis of jaw from 94, 834
- nitrogen of urine in 421
- rapid feeble pulse in 421
- respiration in 421
- from rat paste 94, 421
- suicide by 94, 421
- tenderness in epigastrium in 421
- right hypochondrium in 421
- tyrosin not found in 421
- urea of urine in 421
- vomiting in 929, 421
- priapism from 657
- ptialism from 661
- stomatitis from 94
- vermin-killer and 94
- Phosphotungstic acid in Hofmeister's test 20
- Phosphuretted hydrogen, fainting due to 297
- from ferrosilicon 421
- hemoglobinuria from 357
- jaundice due to 408
- poisoning, account of 421**
- Phosy jaw 94
- Photographers, amidol used by 917
- dermatitis in 917
- hydroquinone used by 917
- metol used by 917
- pyrogallac acid used by 917
- rodinal used by 917
- PHOTOPHOBIA 639**
- from albinism 639
- arsenic 639, 640
- astigmatism 639
- biliousness 640

Photophobia, contd.

- causes of 639
- from cerebral abscess 639
- - irritation 396
- - tumour 639
- conjunctivitis 285, 639, 926
- constipation 639, 640
- with corneal ulcer 890
- from cycloitis 639
- drugs 639, 640
- dyspepsia 639, 640
- in electric blindness 926
- from encephalitis 639
- error of refraction 639
- in erythroptia 926
- from eyestrain 639
- fevers 639
- foreign body in eye 639
- glaucoma 285, 639
- hypermetropia 639
- hysterical 639, 640
- from influenza 639, 640
- injury to eye 639
- iritis 285, 639
- keratitis 639
- malaria 639
- malingering 639, 640
- measles 639
- meningitis 547, 639
- migraine 639, 640
- occupation 639, 640
- ophthalmia 639
- pachymeningitis 639
- pain in eye with 639
- from potassium bromide 639, 640
- iodide 639, 640
- quinine 639, 640
- retinitis 639
- retrobulbar neuritis 639
- severe anæmia 639, 640
- sick headache 639, 640
- in snow blindness 926
- from snow glare 639
- suggestion curing 640
- from supra-orbital herpes 639, 640
- in tic douloureux 548, 639, 640
- from typhus 639, 640
- ulceration of cornea 639
- X rays 639
- Phrenic nerve (see Nerve)
- neuralgia 531
- Phtheiriasis 642
- Phthisis, abdominal pains in 594
- account of 362
- Addison's disease simulated by 642
- alar chest and 208
- albumosuria from 20
- anæmia from 27, 43, 47
- aneurysm simulating 365
- anorexia nervosa simulating 934
- apical clicks in 362
- mottling in 134
- signs in 792
- Bacillus prodigiosus simulating 791
- bleeding gums in 185
- blood-streaked sputum in 97
- bronchial breathing in 362
- bronchiectasis distinguished from 112
- bronchophony in 362
- bronchopneumonic, dyspnoea from 247
- cachexia from 27, 218
- cacogæstia in 860
- calcareous concretion in sputum in (Fig. 618) 792
- caseous bronchopneumonia from 198
- mass in sputum in 792
- catarrhal laryngitis in 246
- cavities in lung in 789
- cirrhosis of liver with 337
- coagulable sputum in 792
- in congenital heart disease 363
- consonating râles in 362
- cough from 186, 188, 198, 210, 362, 582
- cyanosis in 198
- deficient movement of chest in 362
- deltoid wasted in 79

Phthisis, contd.

- diaphragm deformed in (Fig. 118) 134, 135
- diarrhoea from .. 217
- diazo-reaction from .. 218
- diphtheria bacilli in .. 187
- early, skiagram of (Fig. 117) 133
- tubercle bacilli in sputum in .. 133
- effects of alcohol simulating .. 934
- elastic fibres in sputum in 187, 198, 360, 362, 792
- in the elderly .. 362
- empyema from .. 134
- distinguished from .. 112
- expectoration in .. 362
- extensive, yet signs few with (Fig. 119) 135
- skiagram of (Fig. 118) 134
- fainting due to 296, 299
- family history in .. 790
- fatty heart from .. 264
- fibroid, dyspnoea from 247
- laryngeal paralysis from .. 606
- fibroid lung distinguished from .. 269
- fibrosing type (Fig. 119) 135
- flattened chest wall in 362
- fixed bronchitis simulated by .. 790
- foul breath from .. 112
- sputum in .. 790
- Friedländer's pneumobacilli in .. 187
- gastric pains in .. 594
- glands seldom caseous in 480
- hæmoptysis in 187, 198, 360, 361, 362, 363
- hernia of lung in .. 210
- hydatid cyst simulating .. 360
- hydropneumothorax in .. 801
- impaired note in .. 362
- impotence in .. 393
- indigestion in .. 396
- influenza bacilli in .. 187
- simulated by .. 713
- infrapinnatus wasted in .. 79
- intestinal catarrh from 217
- knee-jerks exaggerated in .. 451
- lardaceous disease from 10, 469, 784
- lichen scrofulosorum with .. 598
- lineæ albicantes in .. 459
- with lobar pneumonia 364
- lobar pneumonia simulated by .. 364
- long neck and sloping shoulders with .. 208
- loss of appetite in .. 362
- weight in .. 362, 942
- low blood-pressure in 106
- miner's .. 198, 363
- in diamond-miners 363
- dyspnoea from .. 247
- in gold-miners .. 363
- hæmoptysis from .. 361
- in limestone quarriers 363
- and .. 198
- skiagram of (Fig. 170) 199
- syphilis and .. 198, 363
- tubercle bacilli in .. 363
- muscle wasting on chest in .. 79
- nail ridges from .. 933
- nausea in .. 396
- night sweats in 362, 582
- nummular sputum in .. 187, 788
- organisms of Vincent's angina in .. 187
- osteo-arthritis in (Figs. 351, 352) 436
- out of condition from 113
- pain in shoulder from .. 580, 582
- pectoralis major wasted in 79
- pectoriloquy in .. 362
- physical signs of 362
- pigmentation in mouth in .. 642, 643
- of skin in .. 642
- pleurisy from .. 134
- pneumococcus in .. 187

Phthisis, contd.

- pneumoconiosis and .. 198
- pneumothorax in 647, 648
- pousses évolutives in .. 713
- prognosis in .. 218
- prolonged expiration in 362
- pulmonary aneurysm in 362
- purulent sputum in .. 187
- pyogenic organisms and 112
- pyrexia in .. 562
- retraction of chest in .. 210
- root shadows not evidence of .. 362
- secondary infection in 112, 187, 788, 790
- senile, bronchitis simulated by .. 700
- shortness of breath from 113, 114
- sporotrichosis of lung simulating .. 365
- sputum cultures in .. 789
- testing in .. 362
- staphylococcus in .. 187
- stench of sputum in .. 364
- streptococcus in .. 187
- succussion in .. 800
- supposed early, but really extensive (Fig. 119) 135
- suppuratus wasted in 79
- syphilis and .. 198, 246
- of tracheus simulated by .. 367
- tactile vocal fremitus unequal in .. 362
- toxæmia from .. 113
- tubercle bacilli in sputum in 112, 187, 198, 360, 362, 363, 562, 582, 792
- without tubercle bacilli in sputum .. 187, 791
- tuberculin injection test in .. 360
- tuberculosis of larynx with .. 762
- secondary to .. 367
- tuberculous circum with .. 562
- ginevritis in .. 95
- glands not predicted by .. 474
- stomatitis in .. 661
- tonsil with .. 763
- ulceration of bowel in .. 562
- palate with .. 730
- tongue with .. 898
- unsuspected .. 114
- vomica in .. 362
- vomiting from 198, 396, 929
- wasting in .. 198, 582
- above and below .. 362
- clavicles in .. 362
- of chest wall in .. 362
- without abnormal signs .. 360, 362
- X rays not detecting .. 363
- early .. 362, 363
- in diagnosing 114, 134, 188, 360, 362, 562, 582, 932
- (and see Tuberculosis, Pulmonary)
- Physical signs of acute endocarditis .. 263
- adherent pericardium .. 70, 71, 265
- aneurysm .. 241
- of first part of aorta 260
- aortic disease .. 259
- ascites .. 59
- bronchiectasis 269, 790
- carcinoma of splenic flexure .. 776
- stomach .. 777, 778
- congenital heart disease .. 650
- emphysema 199, 208, 269
- enlarged gall-bladder .. 314, 315, 316, 437
- heart .. 257
- spleen .. 774, 775
- fibroid lung 210, 258, 269, 366, 790
- gangrene of lung .. 423
- hepatoptosis .. 462
- hydronephrosis 315, 316
- kidney .. 350
- enlargement .. 437
- lobar pneumonia 199, 789
- lung root obstruction 241

Physical signs, contd.

- of mitral fibrosis (Fig. 100) 119
- regurgitation .. 262
- stenosis .. 268
- movable kidney 315, 316
- ovarian cyst .. 60, 438
- tumour .. 777
- pancreatic tumour .. 776
- patent ductus arteriosus .. 267
- septum ventriculorum .. 267, 650
- pericarditis 264, 265, 532, 533
- phthisis .. 362
- pleuritic effusion 209, 258
- pneumothorax .. 209, 532, 647
- pulmonary stenosis .. 267, 650
- renal tumour 775, 776
- right ventricle enlargement .. 267
- stenosis of bronchus 365
- subphrenic abscess .. 697
- suprarenal tumour .. 776
- tympanites .. 60
- uterine fibroid .. 438
- Physiological albuminuria (see Albuminuria)
- amenorrhœa .. 23
- cup .. 517
- absent in hypermetropic astigmatism 520
- account of .. 517
- diplopia .. 220
- Physostigmine, myotic action of .. 675
- pupils unequal from .. 675
- Phytolacca decandra, dermatitis due to .. 916
- Pianists, clump in .. 189
- Pica, account of .. 58, 128
- Picking of nose from worms .. 633
- Picramic acid from picric acid .. 903
- in urine .. 903
- Picric acid, see Acid
- PIED-EN-GRIFFE .. 140
- and see Claw-foot
- Pigeon chest, outline of .. 209
- in rickets .. 208, 233
- feeders, aspergillus in 792
- Pigment granules in urine in malaria .. 39
- in malaria parasites 46, 41, 42
- Plasmodium malarie .. 40
- Pigmentary naevus-sarcomatosis of skin .. 454
- Pigmentation of anus in Addison's disease .. 643
- brown of bones in hydra-æstivale .. 127
- teeth in hydra-æstivale (Fig. 111) 126
- cartilage in ochronosis 644
- round eyes from uterine lesions .. 128
- of eyelids in exophthalmic goitre 267, 292
- face in acanthosis nigricans .. 295
- carcinoma of stomach 295
- chloasma .. 643
- cirrhosis of liver 67, 294, 466
- pellagra .. 646
- from uterine lesions 128
- forearm in pellagra .. 646
- forehead in chloasma .. 643
- pellagra (Fig. 224) 280
- from uterine lesions 128
- gums .. 641
- hands in pellagra .. 646
- lips .. 641
- in Addison's disease .. 44, 934
- pernicious anemia (Fig. 64) 45
- IN MOUTH .. 641
- in Addison's disease 44, 224, 295, 299, (Figs. 500-502) 641, 643, 928, 934
- amyloid disease .. 642
- argyria .. 645
- from arsenic .. 642

Pigmentation in mouth, contd.

- from cachexia 642, 643
- carcinoma of colon .. 642
- malignant disease .. 643
- negro blood .. 641, 643
- in pernicious anemia 44, (Fig. 64) 45, 641, 643
- from phthisis 642, 643
- of mucous membranes in Addison's disease 106, 295, 934
- nipple from pregnancy 529
- palate .. 641
- in pernicious anemia (Fig. 64) 45
- retina .. 926
- sclerotic in ochronosis 644
- SKIN .. 642
- in abdominal tuberculosis .. 643
- acanthosis nigricans .. 295, 645
- Addison's disease 44, 83, 106, 201, 295, 299, 641, 643, (Fig. 506) 644, 928, 934
- argyria .. 201, 295
- from arsenic 44, 83, 94, 467, 642, (Fig. 505) 643, 645
- in bronzed diabetes 335, 467, 644
- cachexia .. 644
- cancer .. 644
- carcinoma of stomach 295
- chloasma .. 642, 643
- curliosis of liver .. 48
- constipation .. 643
- dermatitis exfoliativa 645, (Fig. 500) 646
- from drugs .. 645
- in exophthalmic goitre 267, (Fig. 504) 643, 877
- hemochromatosis 201, 644
- after herpes .. 865
- in Hodgkin's disease 643
- ichthyosis hystrix (Fig. 462) 599
- Kaposi's disease .. 644
- leprosy .. 313, 644
- low blood-pressure with .. 106
- in malaria .. 644
- malignant disease 295, 644, 805
- neurofibromatosis .. 889
- ochronosis 201, 644, 906
- from pancreatic lesions .. 582
- in pancreatitis .. 700
- pellagra 203, 279, (Fig. 224) 280, 646
- pernicious anemia .. 643
- phthisis .. 642
- from picric acid .. 645
- radium .. 276
- in rheumatoid arthritis 47, 426, 643
- from scratching .. 642
- silver .. 295, 645
- syphilis 91, 261, 311, 382, (Figs. 507, 508) 644, 645, 895
- tineæ versicolor simulated by .. 313
- from T.N.T. .. 645
- in tuberculous peritonitis .. 806
- utricular .. 644
- from uterine disorder .. 642, 643
- in vagabond's disease .. 642
- round varicose veins 677
- in von Recklinghausen's disease .. 865
- from X rays .. 276
- in Still's disease .. 472
- of urethra in Addison's disease .. 643
- vulva in Addison's disease .. 643
- Pigmented crescents of optic disc (Fig. 411) 517
- mole (see Mole)
- patches in retina in syphilitic choroiditis 518
- Piles (see Hemorrhoids)
- PILIMICTON .. 646

- bronchophony in . . . 199
- chlorides absent from urine in . . . 209, 364
- colic simulated by . . . 153
- conia in . . . 153
- crepitations in . . . 199
- crisis in . . . 199, 760, 703, (Fig. 617) . . . 789
- cyanosis from . . . 199
- deep-seated . . . 790
- delirium in . . . 211, 214
- in diabetes . . . 344, 345
- dilatation of heart in . . . 266
- empyema after 47, 134, 199, (Fig. 171) . . . 200, 454, 703, 791
- fibroid lung from . . . 366
- first heart-sound weak in . . . 266
- gangrene of lung due to . . . 791, 801
- hæmoptysis from 361, 364
- herpes labialis in . . . 199
- hyperpyrexia in . . . 390
- impaired note with . . . 199
- in influenza . . . 570
- knee-jerks absent in . . . 452
- laryngeal paralysis from . . . 606
- leucocytosis in . . . 47, 454
- lysis in 199, (Fig. 171) . . . 200
- massive collapse of lung simulating . . . 375
- pain in iliac fossa from . . . 558
- pectoriloquy in . . . 199
- phthisis with . . . 364
- simulating . . . 364
- physical signs of 199, 789
- plague simulating . . . 709
- pleurisy with . . . 136
- pneumobacilli in . . . 790
- pneumococci in 364, 790
- polymorphonuclear cells increased in . . . 47
- post-critical rise in (Fig. 617) . . . 789
- purulent bronchitis simulating . . . 791

Pneumonia, lobar, contd.

- pyopneumothorax from . . . 801
- pyrexia of . . . 199, 364
- without râles at height 199
- rapid respiration-rate in . . . 199
- respiration-pulse ratio high in . . . 364
- rigor in . . . 736, 737
- a septicæmia . . . 739
- skiagram of (Fig. 297) . . . 364
- sputum in . . . 780
- bright red in . . . 364, 790
- russet-brown in 364, 419
- rusty in . . . 187, 199, 200, 788, 789, 790
- viscid in 199, 364, 419, 788, 789, 790
- strider in . . . 606
- sudden onset . . . 199
- temperature chart in (Fig. 617) . . . 789
- transverse ridges on nails in (Fig. 387) . . . 497
- urates in . . . 900
- without abnormal signs . . . 199, 790
- X rays in . . . 364
- lobular (see Bronchopneumonia)
- myocardial changes in . . . 53
- nail ridges after . . . 933
- nares working in . . . 735
- in negroes, leucopenia . . . 455
- pain in chest from 530, 532
- right iliac fossa from . . . 565
- shoulder from 580, 582
- the side in . . . 419
- peritonitis with . . . 525
- simulated by . . . 525, 735
- perspiration after . . . 789
- pleurisy with . . . 136, 512
- pleuritic rub in . . . 419
- pneumococcal arthritis from . . . 424
- septicæmia with . . . 525
- pneumococci in . . . 11
- polyuria after . . . 654
- pyrexia in . . . 419
- relatively slow pulse in respiration rapid in . . . 419, 735, 785, 789
- rigor in . . . 419, 739
- septic hæmoptysis from . . . 361
- skin dry in . . . 789
- flushed in . . . 789
- purulent in . . . 789
- Skodatic resonance in . . . 755
- sordes in . . . 93
- speech lost in . . . 770
- in spirochaetosis icterohaemorrhagica . . . 420
- spirochaetosis simulating . . . 693
- spleen enlarged in . . . 778, 786
- subdiaphragmatic abscess simulating . . . 697
- in typhoid fever . . . 737
- ulcerative colitis from . . . 100
Pneumonic plague . . . 709
- cyanosis in . . . 200
- tuberculosis, rigor in . . . 737
- typhoid . . . 689
Pneumonoconiosis in
- brimstone workers . . . 363
- diamond-miners . . . 363
- dyspnoea from . . . 247
- in gold-miners . . . 363
- hæmoptysis from 361, 363
- in knite-grinders . . . 363
- limestone workers . . . 363
- miner's phthisis and . . . 363
- phthisis in . . . 198, 363
- syphilis and . . . 198, 363
Pneumoperitoneum due
- to Bacillus coli . . . 800
- carcinoma of colon . . . 800
- liver dullness lost in . . . 805
- succussion in . . . 800
- due to tuberculous ulcer of bowel . . . 800
- in typhoid fever . . . 800, 802
PNEUMOTHORAX . . . 647
- account of . . . 532
- acute, fainting due to . . . 297
- adhesions preventing . . . 648
- affected side moving little . . . 209

Pneumothorax, contd.

- due to Bacillus aerogenes capsulatus .. 647
- coli .. 647, 649
- Welchii .. 649
- bell sound with .. 209
- breath sounds absent with .. 209, 532
- bruit d'airain with .. 209
- due to carcinoma ventriculi .. 647
- causes of .. 647
- after chest wound .. 649
- coin-tap sound over .. 209, 647
- cyanosis from 198, 532, 648
- diaphragm immobile with .. 532
- low and flat with .. 532
- (Fig. 511) 648
- dyspnoea from 198, 247, 532
- due to empyema ruptured into lung .. 647
- epithelioma of oesophagus .. 647
- gangrene of lung 647, 649
- gas gangrene .. 649
- gastric ulcer .. 647
- hæmo- (see Hæmo-pneumothorax) .. 648
- hæmoptysis with .. 648
- after hæmothorax .. 649
- heart displaced by .. 209, 573, 532, 647, (Fig. 511) 648, 801, 807
- herniation of stomach into chest simulating .. 649
- hydro- (see Hydro-pneumothorax) .. 648
- hyper-resonance with .. 209, 647
- insidious .. 532
- instrumental .. 647
- liver displaced by .. 649
- dullness diminished .. 649
- lung shrunken in .. 532
- due to malignant œdema .. 647
- metallic tinkling with .. 209
- movement of chest deficient with .. 532, 647
- pain on breathe in .. 532
- in chest from 209, 530, 648
- shoulder from 580, 582
- partial .. 647
- due to phthisis .. 647
- physical signs 209, 532, 647
- pleural effusion with .. 532
- protrusion from .. 532
- pus with .. 209
- pyo- (see Pyo-pneumothorax) .. 647
- rapid feeble heart with .. 532
- shallow breathing with .. 648
- resonance over .. 209
- due to rupture of emphysematous bleb .. 647, 649
- serum with .. 209
- skiagraph of (Fig. 511) 648
- due to stab .. 647
- subphrenic abscess .. 649
- simulating .. 807
- succussion in .. 209, 532
- sudden onset of .. 209, 532, 648
- without symptoms .. 648
- after tapping pleural effusion .. 647, 649
- from tubercle .. 198
- tubercle bacilli and .. 648
- tympanic note over .. 532
- unilateral enlargement of chest by .. 208
- vesicular murmur absent over .. 647
- vocal fremitus absent in .. 532
- diminished with .. 209
- voice sounds absent with .. 209, 532, 647
- due to wound of chest wall .. 647
- X-ray examination for .. 209, 532, 647
- Podophyllin, colic from .. 148
- Podophyllum peltatum, dermatitis due to .. 916

Polikocytes, characters of

- coloured figures of .. 27
- (Fig. 32) 29, (Fig. 43) 31
- from diet deficiency .. 110

Polikocytes, contd.

- in pernicious anemia .. 27, (Fig. 43) 31
- severe anemia .. 27
- war œdema .. 110
- Poisoning (see under the various Poisons, e.g., Arsenic, Carbon Monoxide, Lead, etc.)
- Poker back .. (Fig. 621) 796
- Polar cataract, anterior .. 922
- Polarimeter in diagnosing lœvulosemia .. 327, 328
- estimating sugar .. 329
- Polio-encephalitis (see Encephalitis)
- Poliomyelitis, acute, account of .. 177, 620, 623
- acute onset of .. 78, 177, 620, 627
- - - - rheumatism simulated by .. 623
- - - adductors of thighs paralysed after .. 623
- - - in adults .. 80, 627
- - - arm affected in .. 620
- - - asymmetry of .. 620
- - - atrophic palsies from .. 142
- - - claw-foot from .. 141
- - - claw-hand from 141, (Fig. 125) 142
- - - club-foot from .. 623
- - - complete recovery from .. 623
- - - constitutional disturbance in .. 620
- - - convulsions from 177, 620
- - - convulsions in .. 142, 620
- - - course of .. 78
- - - death from .. 623
- - - deformity from .. 620
- - - eighth cervical segment affected by .. 142
- - - electrical reactions after .. 620, 623
- - - extensors of ankle paralysed after .. 623
- - - toes paralysed after .. 623
- - - first dorsal segment affected by .. 142
- - - flaccid paralysis in .. 177
- - - forearm affected in .. 177
- - - growth defects from .. 620
- - - hand affected in .. 620
- - - headache in .. 142
- - - history in diagnosing infantile paralysis .. 78, 145, 163
- - - influenza simulated by .. 623
- - - initial paralysis greater than permanent in .. 620
- - - knee-jerks in .. 452, 623
- - - Landry's acute ascending paralysis .. 623
- - - a variety of .. 623
- - - limp paralysis in .. 623
- - - lymphocytes in cerebrospinal fluid in .. 383
- - - malaise in .. 177, 620
- - - muscular atrophy from .. 78, 80, 620, 623
- - - no oculo-pupillary phenomena in .. 620
- - - pains in .. 177, 623
- - - all over in .. 620
- - - paralysis of limbs in .. 623
- - - one leg from .. 611
- - - paraplegia from 621, 623, 626, 627
- - - peripheral neuritis distinguished from .. 627
- - - - simulating .. 623
- - - phrenic centres involved in .. 623
- - - pyrexia in 142, 177, 620, 623
- - - quadriceps extensor femoris paralysed after .. 623
- - - R.I.D. from 78, 80, 620, 623
- - - reflexes in .. 620
- - - rigor in .. 737
- - - no sensory loss in .. 142, 177, 620
- - - shoulder affected in .. 620
- - - (Fig. 80) 78, 620
- - - sphincters in .. 177
- - - vasomotor changes in .. 620
- - - vomiting in .. 142, 620

Poliomyelitis, contd.

- atrophic palsy from .. 142
- chronic, claw-hand in .. 177
- club-foot in .. 177
- contractures in .. 177
- fibrillary contractions in .. 177
- claw-foot from .. 141
- claw-hand from .. 141
- illustrated (Fig. 125) 142
- convulsions in .. 142
- eighth cervical segment affected by .. 142
- first dorsal segment affected by .. 142
- forearm affected by .. 142
- headache in .. (Fig. 125) 142
- headache in .. 142
- Polishers, bichromate of potassium used by .. 917
- dermatitis in .. 917
- stained skin in .. 917
- Politzerization, effect on tympanum .. 207
- Polychromasia, coloured leucocytes of .. (Fig. 34) 29
- Polycystic disease of kidneys (see under Cystic Kidneys)
- POLYCYTHÆMIA .. 650
- from acetanilide .. 650, 651
- blood-pressure high with .. 246
- in bronchiectasis .. 651
- from bronchitis and emphysema .. 650
- cantharides .. 650, 651
- in cholera .. 650, 651
- chronic bronchitis .. 651
- colour index low in .. 651
- from congenital heart disease .. 267, 650
- drugs .. 650, 651
- dyspnoea .. 246
- in emphysema .. 651
- erythraemia .. 650
- from fibroid lung .. 650, 651
- hæmoglobin in .. 650
- heart failure with .. 246
- at high altitudes .. 650, 651
- from inability to get water .. 650
- leucocytes in .. 650, 651
- from loss of fluid .. 650
- in lymphatic leukaemia .. 34, 652
- methæmoglobinæmia .. 650, 651
- and .. 650, 651
- with mitral disease .. 45
- in morbus crureus .. 650, 651
- Osler's disease .. 650
- ptomaine poisoning .. 651
- pulmonary stenosis .. 650, 651
- from renal disease .. 650, 651
- severe diarrhoea .. 650
- thirst .. 651
- vomiting .. 650
- shortness of breath from 113
- from Spanish fly .. 651
- spasmodic asthma .. 650, 651
- spleen enlarged with .. 778
- splenomegaly .. 651, 780
- blood-pressure high in .. 780
- course of .. 780
- cyanosis from 196, 201, 780
- delirium in .. 212
- epistaxis in .. 780
- facies of 294, 651, (Fig. 515) 652
- hæmatemesis in 342, 780
- hæmaturia in .. 780
- hæmoptysis in .. 780
- hæmorrhages in .. 780
- heart enlarged in .. 780
- melæna in .. 780
- mouth bleeding in .. 780
- plethora in .. 212
- purpura uncommon in .. 780
- serous effusions in .. 780
- shortness of breath in .. 780
- spleen enlarged in .. 201, 778
- systolic apical bruit in .. 780
- no wasting in .. 780
- with splenomegaly .. 650
- in summer diarrhoea of infants .. 650
- Vaquez's disease .. 651
- vera (see Polycythæmia, Splenomegaly)

Polycythæmia, contd.

- from veronal .. 650
- Polydactylism in giants .. 325
- Polydermatomyositis .. 295
- Polygonum aviculare, dermatitis due to .. 916
- - erythema from .. 275
- punctatum, dermatitis due to .. 916
- Polygrams (see Illustrations)
- Polygraph, account of .. 663
- Polygraphy in diagnosing cause of irregular pulse .. 673
- heart-block .. 109
- - idioventricular rhythm .. 671
- - paroxysmal tachycardia .. 670
- investigating irregular pulse cases .. 663
- Polymorphonuclear cells 27, 28
- in ascitic fluid .. 65
- cerebrospinal fluid .. 383
- in meningococcal meningitis .. 623
- suppurative meningitis .. 623
- coloured figure of .. (Fig. 38) 29
- hepatic abscess and .. 455, 464
- in Hodgkin's disease .. 49
- increased in empyema .. 47
- pneumonia .. 47
- suppurative .. 453
- in pleuritic fluid .. 132
- pneumococcal .. 135
- streptococcal .. 135
- pus and .. 715
- in pyæmia .. 739
- typhoid fever .. 689
- Polyomyositis .. 295, 569
- acuta .. 701, 702
- - rheumatism simulated by .. 701
- - anorexia in .. 569
- - bones affected in .. 295
- - contractures after .. 703
- - debility in .. 569
- - diarrhoea in .. 702
- - no eosinophilia in .. 703
- - erysipelas simulated by .. 702
- - erythema in .. 276, 569
- - facies of 295, (Fig. 559) 702
- - malaise in .. 569
- - mucous membranes affected in .. 295, 702
- - muscles affected in .. 295
- - nerves affected in .. 702
- - œdema of legs in .. 569
- - pain in limbs from .. 568
- - muscles in 569, 702, 703
- - pericarditis in .. 702
- - peritonitis in .. 702
- - pleurisy in .. 702
- - pyrexia in 295, 569, 688, 702
- - rigidity in .. 56
- - serous membranes affected in .. 295, 702
- - skin affected in .. 295, 702
- - spinal cord affected in .. 702
- - stiffness due to .. 702
- - streptococcal 295, 569, 702
- - subcutaneous tissues affected in .. 295
- - temperature chart in .. (Fig. 560) 702
- - trichinosis simulated by .. 295, (Fig. 560) 702
- - types of .. 295
- - vomiting in .. 702

Potassium iodide, contd.

- - epiphora from . . . 272
 - - in estimating blood-sugar . . . 333
 - - gumma cured by . . . 761, 765, 898
 - - of tongue and . . . 474
 - - hoarseness from . . . 388
 - - laryngeal crises simulated from . . . 249
 - - noises in head from . . . 504
 - - oedema from . . . 514, 516
 - - of larynx from . . . 246
 - - in orchitis . . . 388, 799
 - - photophobia from . . . 85
 - - purpura due to . . . 649, 640
 - - stridor due to . . . 799
 - - syphilis and . . . 82, 85, 245, 586, 769, 819
 - - syphilitic ulcer healed by . . . 730
 - - vertigo atrophy from . . . 799
 - - testis from . . . 804
 - - salts, pelvuria after . . . 653
 - - sulphocyanide in Benedict's solution . . . 327
 Potato particles in stools . . . 215
 Potted meat, botulism from . . . 243
 Pott's angular curvature of spine with psoas abscess . . . 458
 - curvature in spinal caries . . . 628
 - disease - see Spinal Caries
 - fracture into ankle joint . . . 147
 - talipes from . . . 147
 Pouch of Douglas felt per rectum . . . 729
 - (and see Diverticulum)
 Pouching of colon, diverticulitis from . . . 556
 Poultices, erythema from . . . 275
 Poultry, botulism in . . . 223
 - paralyzing . . . 243
 - dealers, dermatitis in . . . 917
 Poupard's ligament, fluctuation below, due to psoas abscess . . . 698
 - landmarks of . . . 824
 Pousses, evolutes of . . . 706, 713
 Pouting lips in myopathy . . . 291
 Poverty, bulious impetigo and . . . 124
 - out of condition from . . . 113
 - scurvy from . . . 679
 - shortness of breath from . . . 113
 - typhus fever and . . . 417, 690
 Pozzi, coelocystic uterus of . . . 238, 793
 Pozzi's syndrome of endometritis . . . 483
 P-R interval, normal . . . 109
 - prolonged . . . 109
 Preacher's hand in progressive muscular atrophy . . . 141
 - svringomyelia . . . 142
 Pre-aortic gland - see Lymphatic Gland, Pre-aortic
 Precipitancy of defecation . . . 394
 - micturition (see Micturition)
 Precipitin reaction with hydatid disease . . . 807
 Precocity, sexual, with suprarenal tumour . . . 814
 Precordial bulging from adherent pericardium . . . 210, 265
 - aortic disease . . . 259
 - big heart . . . 210
 - mitral regurgitation . . . 262
 - pericardial effusion . . . 210
 - discomfort from D.A.H. . . 247
 - distress from dilatation of heart . . . 266
 - pain (see Pain)
 - tenderness from heart disease . . . 863
 - in pericarditis . . . 863
 - THRIILL . . . 875
 Preglucosuric state, life insurance and . . . 506
 - obesity due to . . . 505
 Pregnancies, repeated, albuminuria from . . . 16

Pregnancy, abdominal palpation in . . . 251

- - tumour in . . . 24
 - - acetoneuria in vomiting of . . . 3
 - - acute yellow atrophy and . . . 345
 - - advisability of examining about thirtieth week . . . 251
 - - albuminuria in . . . 9, 15
 - - albumosuria in . . . 21
 - - amenorrhoea and . . . 23, 24, 61, 489, 841, 842
 - - appendicitis with . . . 843
 - - ascending nephritis from . . . 9, 16
 - - bacteriuria in . . . 88
 - - bearing-down pain in . . . 529
 - - bladder distention in . . . 61
 - - - simulating . . . 815, 840
 - - blood-sugar high in . . . 332
 - - Braun's sign of . . . 489
 - - breast changes in . . . 842
 - - secretion and . . . 24
 - - breasts swollen in . . . 837
 - - bullous eruptions of . . . 123, 124
 - - cervix softened in . . . 61, 489
 - - chlorea in . . . 170
 - - chorion-epithelioma and . . . 488
 - - chloasma in . . . 642
 - - coli bacilluria in . . . 15, 556
 - - coma in . . . 181
 - - constipation from . . . 164, 166
 - - convulsions in . . . 174, 181, 183
 - - dark-brown nipple from . . . 529
 - - diabetes mellitus in . . . 332
 - - diagnosis of . . . 21
 - - diaphragm pushed up by . . . 374
 - - dullness of abdomen in . . . 61
 - - dyschezia from . . . 166
 - - dysmenorrhoea cured by . . . 238
 - - eclampsia in . . . 174
 - - fainting due to . . . 297
 - - fear of, amenorrhoea from . . . 23
 - - fibroids softening in . . . 842
 - - fibromyoma of uterus . . . 840
 - - - simulating . . . 841
 - - fluctuation in . . . 841
 - - flushing due to . . . 303
 - - fetal heart in . . . 24, 61, 841, 842
 - - - movements in . . . 241, 842
 - - glycosuria in . . . 332
 - - heart displaced by . . . 373
 - - - . . . 374, 376
 - - Hegar's sign of . . . 489
 - - herpes gestationis and . . . 126
 - - hydrops amnii with . . . 61
 - - hysteria simulating . . . 179
 - - impetigo herpetiformis in . . . 125
 - - incontinence of urine in . . . 61
 - - lactosuria in . . . 327, 332
 - - leucocytes high in . . . 453
 - - linear albugines from . . . 459
 - - lymphatic obstruction . . . 894
 - - - following . . . 837
 - - mastitis in . . . 531
 - - mastodynia in . . . 841
 - - menstruation during . . . 486
 - - meteorism simulating . . . 492
 - - micturition difficult in . . . 227
 - - milk discharge from . . . 305
 - - nipple in . . . 305
 - - mollities ossium after . . . 529
 - - Montgomery's glands swollen in . . . 529
 - - morning sickness and . . . 24, 489
 - - nephritis, general account . . . 11
 - - neuroses in . . . 662
 - - ovarian cyst simulating . . . 840
 - - pain in breast from . . . 529
 - - palpitation from . . . 595
 - - paragastric due to . . . 859
 - - pelvic swelling due to . . . 840
 - - peripheral neuritis and . . . 80, 83
 - - perverted appetite in . . . 58
 - - phantom tumour simulating . . . 61, 808, 843
 - - phlegmasia alba dolens after . . . 894
 - - prevented by lactation . . . 662
 - - pyelorrhoea in . . . 662
 - - pyelitis in . . . 11, 15, 554, 718
 - - pyelonephritis in . . . 15
 - - pyuria in . . . 11
 - - renal tube-casts in . . . 11
 - - retention of urine in . . . 55

Pregnancy, contd.

- - in retroverted uterus . . . 841
 - - secondary areola from . . . 529
 - - signs of . . . 489
 - - subinvolution of uterus after . . . 483
 - - superinvolution of uterus after . . . 24
 - - swelling in hypogastrium in . . . 815
 - - - iliac fossa due to . . . 829
 - - tetany and . . . 3, 189
 - - thyroid gland enlarged in . . . 876
 - - tinnitus due to . . . 878
 - - toxæmia, hæmoglobinuria from . . . 357
 - - tumours with . . . 842
 - - ulcer of leg after . . . 894
 - - uterine cast due to . . . 238
 - - - hæmorrhage during . . . 489
 - - uterus enlarged from . . . 489
 - - vaginal bleeding in . . . 489
 - - - discoloration and . . . 24
 - - varicella of vulva in . . . 855
 - - vomiting of . . . 855
 - - (and see Gestation)
 Prepatellar bursa, inflamed . . . 581
 - bursitis, limping from . . . 456
 Prepuce, epithelioma of . . . 765
 - - inguinal glands enlarged from . . . 476
 - - erythema of, from herpes . . . 764
 - - gumma of . . . 765
 - - herpes of . . . 230, 764, 913
 - - oedema of, from balanitis . . . 763
 - - - in Bright's disease . . . 849
 - - phimos . . . 765
 Presbyopia, eyestrain from . . . 547
 Presentation, abnormal . . . 547
 - (see Malpresentation)
 Preserved foods, botulism from . . . 243
 Presystolic bruit - see Bruit
 Thrill - see Thrill
 Prevention of conception, menorrhagia from . . . 482
 PRIAPISM . . . 656
 - due to alcohol . . . 657
 - - aphrodisiacs . . . 657
 - - without apparent cause . . . 657
 - - due to balanitis . . . 656
 - - cerebellar hæmorrhage . . . 657
 - - circumcision . . . 656, 657
 - - of clitoris . . . 656
 - - due to convalescence . . . 657
 - - definition of . . . 656
 - - due to drugs . . . 657
 - - enlarged prostate . . . 656, 657
 - - epilepsy . . . 657
 - - fracture of dorsal spine . . . 657
 - - full bladder . . . 657
 - - gonorrhoea . . . 657
 - - gouty urethritis . . . 656, 657
 - - hæmorrhoids . . . 657
 - - hydrophobia . . . 657
 - - ill-fitting trousers . . . 657
 - - in infancy . . . 656
 - - from injury to spine . . . 656
 - - in leukaemia . . . 579, 657
 - - due to loaded rectum . . . 657
 - - in lymphatic leukaemia . . . 656
 - - due to male menopause . . . 657
 - - masturbation . . . 657
 - - with mental deficiency . . . 656
 - - due to oxaluria . . . 656
 - - Oxyuris vermicularis . . . 656
 - - pain in penis from . . . 579
 - - due to phimosis . . . 656
 - - horse Varoli lesion . . . 657
 - - posthitis . . . 656
 - - puberty . . . 656
 - - senile . . . 656
 - - from sexual excitement . . . 657
 - - sleeping on back . . . 657
 - - spinal meningitis . . . 657
 - - in splenomedullary leukaemia . . . 656
 - - due to tetanus . . . 657
 - - thrombosis of pampiniform plexus . . . 657
 - - transverse myelitis . . . 657
 - - urethral calculus . . . 656
 - - vesical calculus . . . 656
 - - worms . . . 656
 Prick, sea-cat, delirium from . . . 211
 - septicæmia from . . . 704
 - weaver-fish, delirium from . . . 211

Pricking in eyes from error of refraction . . . 371

- - glans penis from inflamed trigone . . . 493
 - - pain in chest in functional cardiopathy . . . 52
 - - in penis (see Penis)
 - - miliaria rubra . . . 918
 Prickly elder, dermatitis due to . . . 915
 - heat, itching in . . . 658
 Primary alcoholic heart (see Alcoholic Heart)
 - lateral sclerosis (see Lateral Sclerosis)
 - muscular dystrophy (see Myopathy)
 Primrose yellow colour in pernicious anæmia . . . 10, 83, 294, 933
 - - facies in lardaceous disease . . . 10
 Primula obconica, bulle . . . 123
 - - dermatitis from . . . 124
 - - 278, 515, 659, 915, 916
 - - epiphora from . . . 273
 - - erythema from . . . 275, 515
 - - itching from . . . 659
 - - oedema from . . . 515
 - - parinosa, dermatitis due to . . . 916
 - - sinensis, dermatitis due to . . . 916
 - - Printers, benzine used by . . . 917
 - - dermatitis in . . . 917
 - - lye used by . . . 917
 Privation, general oedema from . . . 514
 Probe in diagnosing pyorrhæa alveolaris . . . 94
 - - salivary calculus . . . 848
 Proctitis, abscess from . . . 296
 - - infective, blood per anum from . . . 96
 - - syphilitic, account of . . . 100
 - - tenesmus due to . . . 873
 - - vesiculitis simulating . . . 700
 Proctoscope in constipation . . . 166
 - diagnosis . . . 98
 - - of adenoma of rectum . . . 874
 - - carcinoma of rectum . . . 166
 - - periproctal abscess . . . 874
 - - polypus of rectum . . . 874
 - - investigating spasm of sphincter ani . . . 166
 - - syphilitic proctitis and . . . 100
 - - in tenesmus . . . 873
 - - tuberculous ulcer of rectum and . . . 101
 Professional cramps . . . 189
 Progeria, account of . . . 237
 - angina pectoris in . . . 237
 - baldness in . . . 237
 - car lobule absent in . . . 237
 - (Fig. 201)
 - fingers nodose in . . . 237
 - (Fig. 201)
 - infantilism in . . . 236
 - ossification premature in . . . 234
 Prognosis in acholuric jaundice . . . 781
 - acidosis . . . 3
 - carcinoma of pancreas . . . 810
 - Cheyne-Stokes breathing . . . 140
 - in chronic nephritis . . . 13
 - - pancreatitis . . . 810
 - cirrhosis of liver . . . 67
 - diabetes mellitus . . . 3
 - diazo-reaction and . . . 218
 - of embryoma of testis . . . 850
 - with globulinuria . . . 5
 - of hiccup in peritonitis . . . 386
 - in lymphatic leukaemia . . . 34
 - meningococcal meningitis . . . 732
 - of meteorism . . . 485
 - nucleated red cells and . . . 27
 - in phthisis . . . 218
 - of purpura in fevers . . . 677
 - in splenomedullary leukaemia . . . 33
 - splenomegalic cirrhosis . . . 780
 - suppurative meningitis . . . 732
 - of tetany . . . 2

Prognosis, contd.

- in tuberculous meningitis .. 732
- ulcerative colitis .. 812
- Progressive muscular atrophy, abductor indicis wasted in .. (Fig. 84) 80
- - - pollicis affected in .. 141
- - - age incidence of .. 80
- - - amyotrophic lateral sclerosis and .. 80, 81
- - - anterior corneal cell lesions in .. 80
- - - ape's hand from .. (Fig. 123) 141
- - - brachial plexus lesions diagnosed from .. 80
- - - bulbar paralysis and .. 80, 731
- - - claw-hand from .. (Fig. 84) 80, 81, (Fig. 123) 141, 177
- - - club-foot in .. 177
- - - contractures in .. 177
- - - deep reflexes exaggerated in .. 141
- - - distinguished from ulnar paralysis .. 80
- - - extensors affected in .. 141
- - - not familial .. 80
- - - fibrillary contractions in .. 172, 177
- - - flexors affected in .. 141
- - - forearm affected in .. 80
- - - general account of .. 80
- - - gonorrhoeal arthritis simulating .. 425
- - - hand in .. (Fig. 84) 80
- - - hands affected in .. 80, 141
- - - hypotheran muscles in .. 80
- - - wasted in .. (Fig. 123) 141
- - - interossei wasted in .. (Fig. 84) 80
- - - no pain in .. 141
- - - paralysis of arm in .. 80
- - - one leg from .. 611
- - - paraplegia from .. 611
- - - peroneal type .. 78
- - - preacher's hand in .. 141
- - - R.D. in .. 80
- - - no sensory change in .. 80, 141
- - - slow progress of .. 80
- - - symmetrical .. 80
- - - syringomyelia simulating .. 81
- - - thenar muscles in .. 80
- - - wasted in .. (Fig. 123) 141
- - - Tooth's type .. 78
- - - transverse myelitis simulating .. 81
- - - trophic (see Myopathy) .. 220
- - - prolapse of anus, blood per anum from .. 101
- - - constipation and .. 101
- - - iris due to corneal ulcer .. 890
- - - oesophagus into stomach .. 244
- - - ovaries, bimanual examination in diagnosing .. 239
- - - dyspareunia due to .. 239
- - - pelvic pain from .. 573
- - - rectum, intussusception simulating .. 872
- - - tenesmus due to .. 873
- - - urethra, caruncle simulated by .. 855
- - - hemorrhage from .. 855
- - - vulval swelling due to .. 853
- UTERUS .. 657**
- - - albuminuria from .. 16
- - - ascending nephritis from .. 16
- - - backache from .. 573
- - - cystocele with .. 658
- - - simulating .. 657
- - - extroversion of bladder simulating .. 657
- - - hypertrophic elongation of cervix simulating .. 657
- - - due to injury of levator ani .. 657
- - - perineum .. 657

Prolapse of uterus, contd.

- - - inversion of uterus .. 657, 658
- - - mechanism of .. 657
- - - rectocele with .. 658
- - - simulating .. 657
- - - strangury due to .. 797
- - - tumour of vagina simulating .. 657
- - - vulval swelling due to .. 853
- - - vagina, discharge due to .. 231
- Proliferating ovarian cyst .. 63, 66
- Pronators (see under Muscle)
- PROPTOSIS .. 283**
- - - from cavernous sinus thrombosis .. 156
- - - epiphora from .. 273
- - - (and see Exophthalmos)
- Propulsion in paralysis agitans .. 881
- Prostate, adenoma of, felt per rectum .. 728
- - - haematuria from .. 348
- - - (and see Prostate, Enlarged)
- - - carcinoma of (see Carcinoma)
- - - disease of, pain in leg from .. 543
- - - sacral pain from .. 349
- - - enlarged, abscess of testis with .. 768
- - - account of .. 493
- - - aching in perineum from .. 579
- - - age incidence of .. 355, 490, 493
- - - albuminuria from .. 11, 16
- - - ascending nephritis from .. 9, 183, 211
- - - bladder distended from .. 61, 815
- - - growth simulating .. 493
- - - by carcinoma .. 493, 575
- - - casts in urine from .. 11
- - - catheter in diagnosing .. 355
- - - catheterization for .. 58
- - - coude catheter for .. 492, 493
- - - cystitis from 211, 718, 720
- - - cystoscopic appearance of .. (Fig. 290) 354
- - - delirium from .. 211
- - - difficulty in micturition from .. 355
- - - epididymo-orchitis from .. 849
- - - frequency of micturition from .. 355, 490, 493, 652, 901
- - - haematuria with .. 349, 355
- - - hicough from .. 387
- - - indigestion from .. 396
- - - pain in perineum .. 494
- - - papilloma of bladder simulating .. 493
- - - priapism from .. 656, 657
- - - from prostatic abscess .. 575
- - - prostatitis .. 575, 723
- - - pyclitis from .. 717
- - - pyclocephritis from .. 717
- - - pyonephrosis from .. 718
- - - pyuria with .. 349, 396
- - - rectal examination in diagnosing .. 350, 355, 491, 493
- - - retention of urine from .. 55, 492, 720
- - - sixty the age of .. 11
- - - stone behind .. 721
- - - straining from .. 493
- - - strangury due to .. 797
- - - suppurative nephritis from .. 699
- - - tenesmus due to .. 873
- - - uraemia from 183, 211, 396
- - - urine stream abnormal from .. 491, 493
- - - gleet due to infection of .. 229
- - - gonorrhoea of .. 86, 228
- - - massage of, in detecting prostatitis .. 229
- - - middle lobe of .. 492
- - - mucous cylindroids from .. 7
- - - nodular, from calculi .. 575
- - - carcinoma .. 575
- - - in renal tuberculosis .. 352

Prostate, contd.

- operation on, epididymo-orchitis from .. 584
- pain in, from prostatitis .. 723
- rectal examination in .. 350
- refractile globules in .. 229
- secretion of .. 728
- sarcoma of .. 728
- scarred, after abscess .. 766
- tender, in gonorrhoea .. 228
- tuberculous (see Tuberculosis of Prostate)
- Prostatectomy, anuria after .. 55, 58
- - - epididymitis after .. 850
- - - epididymo-orchitis from .. 585
- - - perineal fistula after .. 766
- - - urethritis after .. 850
- Prostatic abscess (see Abscess)
- - - calculus (see Calculus)
- - - ducts, gonococcus infecting .. 228
- - - threads from gonorrhoea .. 496
- Prostatitis, abscess from .. 296
- - - aching in perineum from .. 579
- - - due to Bacillus coli .. 90, 228
- - - blood infection .. 575
- - - cystitis simulated by .. 720
- - - difficulty in micturition from .. 492
- - - epididymitis from .. 850
- - - fibrositis from .. 571
- - - frequency of micturition from .. 490, 575, 720, 723
- - - due to gonococcus .. 90, 228, 578
- - - haematuria due to .. 720
- - - massage of prostate in detecting .. 229
- - - micturition difficult in nocturnal micturition .. 490
- - - pain in calves from .. 543
- - - feet from .. 543
- - - hypogastrium from .. 723
- - - ischial tuberosities from .. 543
- - - loin from .. 543
- - - after micturition from .. 493
- - - in penis from .. 493
- - - 574, 576, 578
- - - perineum from .. 543, 720, 723
- - - rectum from .. 720

- - - baldness from .. 91

Psoriasis, contd.

- in bathing-drawers area 499
- blue eyes and 745
- brown staining after 745
- disappearing in illness 745
- distribution of 745
- eczema simulating 745
- elbows affected by 499, 602, 745
- eosinophilia from 272
- fair hair and 745
- favus simulating 309
- finger affected by 301
- hair falling out in 311
- in health 745
- itching in 658
- slight in 745
- knees affected by 499, 602, 745
- lichen planus distinguished from 598
- - simulating 746
- of lips 459
- lupus erythematosus 746
- - simulating 496
- nails affected by 312, 745
- papules in 745
- parts affected by 600
- pityriasis rubra from 746
- - distinguished from 746
- - pilaris distinguished from 600
- - - simulating 746
- prurigo distinguished from 601
- recurrences in 602
- ring-like areas in 312
- ringworm distinguished from 311
- rupioides of McCall Anderson 743
- - syphilis distinguished from 746
- scales in 311, 499, 602, 744, 745, 747
- of scalp 91, 311
- no scarring in 746
- of scrotum 747
- seborrhea simulated by 745
- syphilis simulating 602
- Psychalgia, pain in arm from 546
- **Psychalgias 551**
- Psychasthenia, aerophagy in 302
- - nightmares from 499
- - noises in head from 504
- - vertigo due to 504
- Psychic reflex of pupil 674
- - lost from cervical sympathetic paralysis 675
- Psycho-analysis, dreams and 499
- Psychosis, Korsakow's 570
- Pterygium 496
- Ptomaine poisoning, acetone-uria from 3
- - agglutination reaction in 677
- - blood per rectum in 872
- - delirium due to 213
- - diarrhoea from 216, 278, 650, 872
- - epidemic 677, 872
- - erythema in 276, 278
- - food causing 278
- - due to Guertner's bacillus 677, 872
- - general oedema from 514, 516
- - - wasting in 78
- - from Morgan's bacillus 872
- - mucus per rectum in 872
- - muscular atrophy in 78
- - pellagra simulating 279
- - polycythemia in 650, 677
- - purpura due to 676
- - tenesmus in 872
- - urticaria from 911
- - vertigo due to 514
- - vomiting in 278, 872
- **PTOSIS 659**
- in angioneurotic oedema 660
- botulism 223, 243
- of colon, skiagrams of (Figs. 437, 438) 537
- due to compression of cervical sympathetic 877

Ptosis, contd.

- congenital 660
- from conjunctivitis 660
- definition of 659
- enophthalmos with (Fig. 520) 660
- due to enlarged thyroid 877
- facial paralysis with (Figs. 518, 519) 660
- in hysteria 178
- of liver, hepatic dullness in 460
- from mediastinal lympho-sarcoma (Fig. 520) 660
- in myasthenia gravis 660
- nuclear facial palsy 604
- from paralysis of cervical sympathetic (Fig. 520, 270, 520, 660, 675)
- - levator palpebrae superioris (Fig. 516) 659
- - seventh nerve 659, 660
- - third nerve (Fig. 516) 659
- of stomach, skiagram of (Fig. 436) 537
- in tabes dorsalis (Fig. 249, 292)
- from trachoma 286, 660
- **PTYALISM 660**
- (and see Salivation)
- Pylororrhoea 661, 662
- Puberty, acne at 303, 682
- - albuminuria of 18
- amenorrhoea before 23
- breast enlarged at 838
- epistaxis at 274
- lupus erythematosus and 500
- - vulgaris and 500
- menorrhagia at 484
- metrorrhagia at 488
- milk from breast at 227, 838
- pain in breast at 529
- testis at 589
- premature, with hyper-nephroma of kidney 776
- priapism at 656
- Pubic hair at eighteen months (Fig. 394) 508
- - premature, with hyper-nephroma 413, (Fig. 394) 508, 767
- - region, hair absent from 91
- Pubis, caries of, scrotal swelling due to 851
- Pudic nerve (see Nerve)
- **Puerperal exhaustion 252**
- - fever (see Fever)
- sepsis, foul breath in 112
- - pelvic abscess due to 843
- Pulmonary artery (see Artery)
- - blood-pressure raised in mitral stenosis 763
- - branches of vagus nerve 185
- **diastolic murmurs 121**
- embolism (see Embolism of Lung)
- - infarct (see Infarct of Lung)
- - murmurs (see Bruit)
- - new growth (see Lung, New Growth of)
- **osteo-arthropathy 438**
- - bones of fingers enlarged in 142, 436
- - illustrated (Figs. 351, 352) 436
- - regurgitation, aortic regurgitation and 120, 121, 269
- - diastolic bruit from 269
- - from infective endocarditis 208, 269
- - mitral stenosis 121, 269
- - right ventricle enlarged from 268
- - with stenosis 269
- **stenosis, account of 267**
- - ascites from 62
- - clubbed fingers from 142, (Fig. 126) 143, 875
- - toes with 875
- - cyanosis with 142, 196, 875
- - dyspnoea with 875
- - exocardial bruit simulating 116
- - extreme cyanosis in 143, (Fig. 166) 196
- - heart failure from 62
- - palpitation from 594

Pulmonary stenosis, contd.

- patent interventricular septum with 142
- - physical signs of 650
- - polycythemia in 650, 875
- - regurgitation with 269
- - right ventricle enlarged from 268
- - **systolic bruit of 143, 196, 267, 650, 875**
- - - thrill with 143, 196, 267, 875
- - - systolic bruit (see Bruit)
- - thrombosis (see Thrombosis)
- - tuberculous (see Phthisis and Tuberculosis)
- - valve, infective endocarditis of 364
- - vein, aneurysm opening into 534
- - (and see Lung)
- Pulpy ankle 457
- - knee 432, 457
- Pulsatile liver (see Liver)
- - pleural effusion 847
- **SWELLING 846**
- - tumour due to aneurysm 538, 629
- Pulsatilla, dermatitis from 915
- Pulsating exophthalmos 285
- Pulsation over aneurysm 260
- - aortic, transmitted by pancreatic tumour 67
- - due to arteriovenous aneurysm 847
- - capillary, from aortic disease 263
- - - regurgitation 259
- - in carcinoma of bone 190
- - - stomach (Fig. 659) 846
- **ear in detecting 260, 846**
- egg-shell crackling with 846
- epigastric, from fibroid lung 269
- - in heart failure 268
- - from mitral regurgitation 262
- - - stenosis 268
- - right ventricle hypertrophy 258, 267
- - excessive, in aortic regurgitation 662
- - expansive, over abdominal aneurysm 413, 663
- - account of 846
- - in aneurysm 210, 342, 564, 816, 825, 827, 829, 832, 844, 846, 869
- - - osteosarcoma 846
- - in hernia cerebri 847
- - - pulmonary 847
- - - meningocoele 284
- - - meningomyelocele 847
- - of neck veins, nutmeg liver and 463
- - orbit due to arteriovenous aneurysm 847
- - - osteosarcoma 847
- - psoas bursa transmitting 833
- - in sarcoma 190, 833, 844
- - transmitted by popliteal swelling 844
- - in tumour of pancreas 412
- **UNDUE ABDOMINAL AORTIC 662, 846**
- - - noises in head with 504
- - in aortic regurgitation 504, 846
- - - exophthalmic goitre 267, 504, 846
- - - of subclavian artery 259
- Pulse, anacrotic, in aortic stenosis 846
- - at ankle, diminished, from popliteal aneurysm 844
- - cessation of, in infective endocarditis 46
- - in colic 735
- - collapsing, from aortic regurgitation 269, 595
- - disappearing during inspiration 664
- - falling as temperature rises, in yellow fever 420
- - feeble, with carcinoma of liver 468
- - - cirrhosis 466

Pulse, feeble, contd.

- - from corrosive poison 338
- - diarrhoea causing 216
- - from fatty heart 264
- - with fibroid heart 264
- - after haematemesis 339
- - high blood-pressure notwithstanding 106
- - in mitral stenosis 17, 71, 106
- - from myocarditis 264
- - in phosphorus poisoning 421
- - scarlet fever 345
- - femoral, delayed, from iliac aneurysm 832
- - imperceptible, in snake-bite 422
- - intermittent, in Kirkland's disease 762
- **IRREGULAR 663**
- - in aortic regurgitation 259
- - from arsenic 103
- - auricular fibrillation 665
- - digitalis 664
- - dilatation of heart 266
- - dropped beats 664
- - electrocardiograph in investigating 663, 673
- - from extrasystoles 666, 668, 672, 673
- - fatty heart 264
- - fibroid heart 264
- - without fundamental rhythm 672
- - from heart-block 667, 672
- - high blood-pressure notwithstanding 160
- - not important if exercise makes it regular 115
- - from mitral regurgitation 262
- - - stenosis 17, 71, 106, 268
- - myocarditis 264
- - polygraph in investigating 663, 673
- - from sino-auricular block 665
- - sinus arrhythmia 664
- - in tuberculous meningitis 184
- - (and see Heart, Irregular)
- - **Irregularities, types of 664**
- - in jaundice 406
- - peculiarities, summary of 671-673
- - quickening, in general peritonitis 734
- - radial, diminished by cervical rib 142, 545
- - rapid, in acute yellow atrophy 416
- - - anuria 57
- - - appendicitis 558, 724, 828
- - - from arsenic 103
- - - corrosive poison 338
- - - in dengue 571
- - - from dilatation of heart 266
- - - diverticulitis 556
- - - fatty heart 264
- - feeble, in pneumothorax 532
- - - in fevers 856
- - - general peritonitis 734
- - - after haematemesis 339
- - - from hemorrhage 464
- - - with hepatic abscess 787
- - - in influenza 57
- - - lardaceous disease 57
- - - life insurance examination 115
- - - from mitral stenosis 268
- - - in phosphorus poisoning 421
- - - with popliteal abscess 844
- - - in pyemia 419
- - - pyelonephritis 57
- - - relapsing fever 785
- - - rheumatoid arthritis 426, 431
- - - scarlet fever 345
- - - with subphrenic abscess 807
- - - tuberculous kidney 57
- - - (and see Tachycardia)
- **rate in colic 150**
- - halved in Stokes-Adams' syndrome 596

 - pyonephrosis 449, 450, 716, 718
 - pyosalpinx 716
 - renal abscess 716
 - calculus 56, 349, 351, 716, 719
 - colic 151
 - tumour 67, 716
 - rigor with 739
 - from sarcoma of kidney 716
 - in septicaemia 706
 - due to staphylococcal cystitis
 - (Fig. 90) 89
 - stricture of urethra 716, 723
 - suppurative nephritis
 - 699, 736
 - triple phosphates and
 - from tuberculous bladder
 - (Fig. 88) 89, 349, 494, 577, 716, 720, 721
 - bowel 716
 - kidney 349, 716
 - (Fig. 87, 89, 352, 364, 716, 719, 721
 - ulceration of bladder 716
 - small intestine 716
 - uræmia with 396
 - from ureteric calculus
 - 577, 716, 720
 - urethritis 716, 722
 - uretropine for 798
 - with vesical calculus
 - 355, 576, 716, 721
 - growth 349
 - villous carcinoma of bladder 716

QUADRANT hemianopsia in migraine 922

Quadrata head in rickets 782

Quadratus (see under Muscle)

Quadriceps (see under Muscle)

Quadriplegia from medulla oblongata lesions 614

- pons lesions 614

Quadrates, solubility of 901

Quartars, phthisis in 363

- silicosis in 363

Quartan malaria (see Malaria)

Queen's root, dermatitis due to 916

Quickening, fainting from 297

Quincke's disease 517

- Quinine, amblyopia from 93, 922
- blackwater fever and 358
 - blindness due to 925
 - deafness from 207
 - delirium from 212
 - in diagnosing malaria 654, 687
 - erythema from 275
 - haemoglobinuria from 371
 - headache from 213
 - injections for malaria 39, 417, 738, 785
 - malaria parasites and 739
 - relieved by 926
 - night blindness due to 504
 - noises in head from 922
 - optic disc pale from 922
 - photophobia from 639, 640
 - purpura due to 676
 - pyemia not influenced by 739
 - retinal vessels constricted from 922
 - scales due to 744
 - scotoma from 93
 - spasm of retinal arteries due to 925
 - tinnitus due to 879
 - vertigo from 504
 - visual field diminished by 922
 - Quinsy, abscess in 758
 - adenitis from 474
 - asymmetry of 758
 - bursting of 758
 - dysphagia from 244, 661
 - illustrated (Fig. 592) 758
 - inability to open mouth due to 884
 - pain in ear from 253
 - ptialism from 661
 - sore throat due to 757
 - stertor due to 794
 - Quivering of face in Friedreich's ataxia 883
 - Quotidian malaria (see Malaria)
- R** **RABBIT**, opaque nerve fibres in eye of normal 518
- skin curers, mercurialism in 44, 84
 - Rabies (see Hydrophobia)
 - Race incidence of diabetes 335
 - hepatic abscess 464
 - leucopenia in pneumonia 455
 - Radial artery (see Artery)
 - nerve, distribution of (Fig. 589) 748
 - pulse diminished by cervical rib 142, 545
 - rations from lung roots 188
 - wrist jerks increased from cerebral lesion 613
 - - - unequal in hemiplegia 381
 - Radicular sensory areas (Fig. 584) 751
 - Radiographic bougie (Figs. 362-365) 443, (Fig. 366) 444
 - Radiography (see Illustrations—Skagrams; and X Rays)
 - Radium, anaemia from 456
 - aplastic anaemia from 456
 - burns from 276
 - disease 456
 - erythema from 275, 276
 - leucopenia from 455
 - for Mooren's ulcer 891
 - pigmentation of skin from 276
 - rodent ulcer cured by 225
 - spleen reduced by 33
 - splenomedullary leukaemia treated by 33
 - sterility from 86
 - Radius, enlarged lower end in rickets 192, 194
 - myeloma affecting 822
 - osteitis deformans of (Fig. 632) 820
 - Radius, *cond.*
 - periostitis of, skiagram of (Fig. 628) 818
 - sarcoma invading, skiagram of (Fig. 642) 823
 - syphilitic, skiagram of (Fig. 631) 819
 - Ragnail, axillary glands enlarged from 475
 - Ragweed, dermatitis from 916
 - Railway accident, ataxia after 77
 - - - nystagmus from 505
 - spine (see Spine)
 - Rainbow vision 926
 - due to conjunctivitis 926
 - - glaucoma 288, 926
 - Râles due to aneurysm 365
 - apical, in phthisis 362
 - at bases in emphysema 199
 - bubbling, with fibroid lung 210
 - consonating, over fibroid lung 258
 - - in phthisis 362
 - crackling, in bronchitis 366, 790
 - - over empyema 134
 - with fibroid lung 269, 366
 - from lung root obstruction 241
 - - stenosed bronchus 365
 - crepitant, over infarct of lung 364
 - sticky at bases in bronchopneumonia 364
 - due to subdiaphragmatic abscess 697
 - Ramus communicans to ganglion stellatum (Fig. 474) 618
 - descendens hypoglossi (Fig. 474) 618
 - Rand, phthisis in (Fig. 170) 199
 - Ranula, account of 590
 - notes on 852
 - from obstructed salivary duct 590
 - pain in tongue from 590
 - ptialism from 661
 - red swelling in floor of mouth from 590
 - from retention cyst of mucous gland 590
 - tongue swollen from 852
 - Ranunculus, dermatitis due to 916
 - Rash, bathing-drawers, in small-pox 678
 - bromide (see Bromide)
 - day of, in varicella 919
 - in dengue 571
 - drug (see Drug Rash)
 - iodide 125, 920
 - in meningococcal meningitis 733
 - mulberry 691
 - in rat-bite fever 740
 - roseolar, in syphilis 764
 - septic, in pyaemia 739
 - - septicæmia 739
 - serum, incubation period of 935
 - - wheals in 935
 - of small-pox 920
 - typhoid fever 418, 784
 - typhus fever 691, 786

Rectal exam. in diagnosis, contd.
 - acute nephritis .. 10
 - aneurysm of iliac artery .. 729
 - appendicitis 151, 356, 558, 814, 828
 - appendicular abscess .. 697, 729
 - blood per anum. .. 97
 - Bright's disease .. 9
 - carcinoma of bladder 56, 350, 353, 355, 576, 577, 721, 722, 728
 - colon .. 217, 413
 - liver .. 68
 - prostate 350, 575, 728
 - rectum 98, 166, 168, 557, 727, 873
 - coccydynia .. 729
 - colic cases .. 151
 - constipation .. 166
 - diarrhoea cases 215, 216
 - diverticulitis 556, 557
 - dyschezia 158, 166
 - enlarged pelvic glands .. 350
 - prostate 350, 355, 401, 493
 - free fluid in abdomen .. 151, 729
 - growth of sacrum 729
 - impacted faeces 217, 873
 - inflamed iliac glands .. 562
 - intestinal obstruction .. 151
 - intussusception 164, 168, 727, 872
 - ischio-rectal abscess .. 693, 729
 - jaundice cases .. 409
 - malignant peritonitis .. 65
 - obturator hernia .. 832
 - ovarian new growth 413, 723
 - pelvic adhesions .. 168
 - growth .. 627
 - peripheral neuritis 627
 - periproctal abscess 693
 - peritonitis .. 151
 - prostatic abscess .. 575, 693, 715, 728, 766
 - calculi 444, 492, 575, 578
 - prostatitis 493, 575, 715, 720, 723
 - rectocele .. 658
 - sarcoma of liver .. 68
 - prostate .. 728
 - sciatic nerve lesions 729
 - scintilla .. 539, 540
 - stone in ureter .. 729
 - tubercle of ureter 719
 - tuberculous kidney .. 719
 - prostate .. 766
 - urethritis .. 578
 - vesiculitis 700, 715
 - distended bladder felt on .. 728
 - Douglas's pouch felt on .. 729
 - ectopic gestation felt on .. 729
 - fibroid of uterus felt on .. 728
 - fistula felt on .. 728
 - fetal head felt on .. 728
 - gonococcal seminal vesicles felt on .. 728
 - in gonorrhoea .. 228
 - growth of vagina felt on .. 728
 - hydatid felt on .. 66
 - iliac glands felt on .. 476
 - invagination of rectum felt on .. 166
 - in investigating bladder .. 350
 - prostate .. 350
 - ureter .. 350
 - vesicular seminales .. 350
 - lumbago .. 528
 - method of making .. 726
 - in oedema of leg cases 512
 - organs palpable on 728
 - in paralysis of legs .. 81
 - parametric abscess felt on .. 729

Rectal examination, contd.
 - pea-like nodule felt on 727
 - pelvic glands felt on 476
 - pessary felt on .. 728
 - polypus .. 98
 - pyosalpinx felt on .. 728
 - rectal shelf felt on .. 729
 - retroversion of uterus .. 728
 - felt on .. 729
 - sacrum felt on .. 729
 - stone in bladder felt on .. 728
 - tender prostate felt on 228
 - in tenesmus .. 873
 - tuberculous seminal vesicles felt on .. 728
 - ureter felt on 352, 355, 577, 719
 - ureteric calculus felt on .. 578, 720
 - uterus felt on .. 728
 - vesicular seminales .. 728
 - fissure, pain in penis .. 578
 - from .. 578
 - polypus (see Polypus) .. 729
 - temperatures, notes on Recti (see under Muscle) .. 658
 - ureter with .. 657
 - simulated by .. 657
 - Rectovesical fistula 296, 728
RECTUM, ABNORMALITIES FELT PER .. 726
 - aching in, from carcinoma recti .. 727
 - actinomycosis of .. 724
 - adenoma of (see Adenoma) .. 165
 - atony of, constipation .. 165
 - ballooned in intestinal obstruction .. 151, 168
 - bilharzia in .. 96, 102
 - blood per (see Blood per Anum) .. 843
 - bulged by pelvic abscess .. 700
 - burning pain in, from .. 700
 - vesiculitis .. 700
 - carcinoma of (see Carcinoma) .. 700
 - of bladder opening .. 296
 - into .. 296
 - uterus opening into .. 873
 - concretion in .. 873
 - congenital obstruction .. 167
 - of .. 167
 - diamonds in .. 726
 - fibrous stricture of 166, 728
 - finger in, in relieving constipation .. 165
 - fishbone in .. 726
 - foreign body in .. 726
 - tenesmus due to .. 873
 - hair-ball in .. 726, 873
 - injury of, see Injury .. 159
 - insensitive, in dyschezia .. 96
 - invaded by actinomycosis .. 96
 - carcinoma of bladder .. 96
 - uterus .. 96
 - pelvic abscess .. 96
 - sarcoma .. 96
 - lesions of, causing tenesmus .. 873
 - pain in back from .. 528
 - loaded, dystocia due to .. 250
 - priapism from .. 657
 - malformations of .. 728
 - mucus per (see Stools, Mucus in) .. 726
 - needle in .. 726
 - opening into urethra .. 728
 - (Fig. 575) .. 728
 - vulva .. 728
 - operation on, bacteriuria after .. 90
 - retention of urine after .. 493
 - pain in (see Pain) .. 165
 - paresis of, constipation .. 165
 - from .. 165
 - pelvic abscess rupturing into .. 843
 - pemphigus affecting .. 127
 - pins in .. 726
 - polypi of (see Polypus) .. 726
 - pressure on, bearing-down pain from .. 529

Rectum, contd.
 - prolapse of, intussusception simulating .. 872
 - tenesmus due to .. 873
 - prostatic abscess opening into .. 296, 723
 - referred pain from .. 871
 - (Fig. 660) .. 871
 - stenosis of, from syphilitic proctitis .. 100
 - tenderness in, due to .. 723
 - prostatitis .. 723
 - time at which barium reaches engulfs .. 160
 - tubercle bacilli from .. 101
 - tuberculous fistula of .. 296
 - ulceration of (see Ulceration) .. 726
 - wood splinter in .. 726
 Rectus muscles (see under Muscle) .. 225
 Recurrent fibroma of basiphrenoid .. 225
 - laryngeal nerve paralysis (see Paralysis, Laryngeal) .. 372
 - sick headache .. 372
 - Red corpuscles in casts .. 8
 - amebic bacilli from .. 99
 - auto-agglutination of .. 51
 - basophilic, coloured .. 51
 - figure of (Fig. 42) 29
 - binucleated (Fig. 44) 32
 - crenated, coloured .. 29
 - figure of (Fig. 41) 29
 - diameter of normal .. 27
 - elliptic .. 51
 - fixed badly, coloured .. 29
 - figure of (Fig. 30) 29
 - fragility of (see Fragility) .. 51
 - leucocytes ingesting .. 51
 - normal, coloured .. 29
 - figure of (Fig. 28) 29
 - normal numbers of 650
 - nucleated, coloured .. 29
 - figures of (Fig. 29) 29, (Fig. 43) 31, (Fig. 44) 32
 - in lymphadenoma 83
 - pernicious anaemia .. 27, (Fig. 43) 31
 - prognosis and .. 27
 - in severe anaemia .. 27
 - splenomedullary .. 32
 - leukamia (Fig. 44) 32
 - types of .. 27
 - oval, in fowl's blood .. 337, 359
 - polychromatic, coloured figure of .. 34
 - (Fig. 34) 29
 - rouleaux formation of .. 51
 - sickle-shaped .. 51
 - size of, in chlorosis .. 346
 - field of vision for .. 921
 - granular contracted kidney (see Granular Kidney, Red) .. 268
 - induration of lung from .. 268
 - mitral stenosis .. 268
 - nucleus lesion, intention tremor from .. 884
 - pepper, dermatitis from .. 915
 - scotoma for .. 923
 - urine (see Urine) .. 926
 - vision .. 926
 Reducing substances in urine, various .. 327
 Reduction in urine after drugs .. 196
REDUPLICATION OF HEART SOUND .. 729
 - (and see under Heart Sounds) .. 789
 Redux crepitations .. 789
 Reed workers, erythema in .. 275
 Reeds, dermatitis due to .. 916
 Reeling due to vertigo .. 911
 Referred pain (see Pain)
 Reflexes, abdominal, absent in amyotrophic lateral sclerosis .. 619
 - disseminated sclerosis .. 613
 - exaggerated knee-jerks and .. 451
 - extensor plantar reflex and .. 451
 - paralysis of arm with .. 612, 613
 - in primary lateral sclerosis .. 631

Reflexes, abdominal, contd.
 - centre for (Fig. 486) 631
 - spinal segments for .. 607
 - absent in convulsions .. 181
 - accommodation of pupil 674
 - asymmetrical, after slight stroke .. 298
 - centres in spinal cord (Fig. 486) 631
 - convergence pupillary, lost in alcoholism .. 674
 - diphtheria .. 674
 - tubus dorsalis .. 674
 - corneal, in facial paralysis .. 603
 - cremasteric, centre for (Fig. 486) 631
 - deep, exaggerated in general paralysis .. 184
 - disseminated sclerosis .. 185
 - hamatomyelia .. 177
 - progressive muscular atrophy .. 141
 - transverse myelitis .. 177
 - lost in general paralysis .. 184
 - elbow, centre for (Fig. 486) 631
 - epigastric, centre for (Fig. 486) 631
 - exaggerated from cortical degeneration .. 881
 - in diplegia .. 884
 - disseminated sclerosis 883
 - hysteria .. 171
 - from paralysis agitans 881
 - in peripheral neuritis .. 82, 570
 - with typhoid spine .. 870
 - gluteal, centre for (Fig. 486) 631
 - light, of pupil .. 674
 - unilateral loss, from optic nerve lesion .. 674
 - lost in Brown-Sequard paralysis (Fig. 469) 608
 - neuromyositis .. 569
 - peripheral neuritis 82, 570
 - from transverse myelitis .. 627
 - in Werdnig-Hoffmann paralysis .. 172
 - palate, absent in hysteria 573
 - impaired in bulbar paralysis .. 773
 - plantar (see Plantar) .. 675
 - of pupil, hemianopic .. 675
 - psychic .. 674
 - varieties of .. 674
 - pupillary light, paradoxical .. 675
 - loss of, from cervical sympathetic paralysis .. 675
 - scapular, centre for (Fig. 486) 631
 - sensory pupillary, loss of, from cervical sympathetic paralysis .. 675
 - tendon, absent in peripheral neuritis .. 74, 85
 - exaggerated in bulbar paralysis .. 773
 - lost from alcohol .. 85
 - unequal on two sides .. 181
 - winking, lost in fifth nerve paralysis .. 891
 - wrist, centre for (Fig. 486) 631
 - (and see Ankle-jerk; Knee-jerk, etc.)
 Refraction, error of, burning in eyes from .. 371
 - defect of vision due to 924
 - eyestrain from 547, 640
 - headache from 370, 371, 548, 549, 867
 - photophobia from .. 639
 - pricking in eyes from 371
 - strabismus due to .. 797
 - tenderness of scalp from .. 867
 - watering of eyes from 371
 Regurgitation, aortic (see Aortic Regurgitation)
 - of fluid through nose from diphtheria 192, 623
 - paralysis of palate 192

Regurgitation of fluid, contd.

- through nose in peri-pharyngeal neuritis .. 623
- **FOOD THROUGH NOSE** 730
- due to beer .. 730
- bulbar paralysis .. 223, 730, 731, 927
- champagne .. 730
- cider .. 730
- cleft palate .. 223, 730
- coughing .. 730
- diphtheria .. 84, 223, 242, 730, 731, 927
- ginger beer .. 730
- in hysteria .. 731
- infants .. 927
- due to laughing .. 730
- myasthenia gravis .. 223, 927
- palate paralysis .. 84, 192, 242, 730
- perforation of palate .. 223, 740
- post-operative .. 730
- in pseudo-bulbar paralysis .. 223, 730
- due to sneezing .. 730
- soda-water .. 730
- mitral (see Mitral Regurgitation)
- pulmonary (see Pulmonary Regurgitation)
- tricuspid (see Tricuspid Regurgitation)
- Reinforcement in testing knee-jerk .. 450
- Reinsch's test for arsenic .. 103
- Relapses in bronchopneumonia .. 700
- dengue .. 571
- dysentery .. 99
- infective endocarditis .. 704
- Malta fever .. 691
- relapsing fever .. 709
- tetragenous fever .. 692
- trench fever (Fig. 508) .. 710
- typhoid fever 688, 689, 690 (Fig. 546)
- Relapsing fever (see Fever)
- Relative air-bone test of hearing .. 206
- Religion, chorea major and 171
- Remittent fever, purpura in .. 676
- Renal abscess (see Abscess of Kidney)
- calculus (see Calculus, Renal)
- casts (see Casts, Urinary)
- cells in casts .. 8
- fat globules from .. 8
- colic (see Colic)
- crises in tabes dorsalis .. 148, 627
- degeneration from chloroform .. 416
- diabetes and .. 334
- .. **EFFICIENCY TESTS** 19
- embolism (see Embolism of Kidney)
- epithelial cells, gonococci in .. 228
- methylene blue and .. 99
- epithelium in urine in bacteriuria .. 90
- glycosuria .. 333
- infantilism .. 236
- infarct (see Infarct of Kidney)
- neuralgia simulating calculus .. 525
- pain (see Colic; and Pain in Kidney)
- sclerosis .. 71
- (and see Nephritis, Chronic)

- thrombosis (see Thrombosis)
- tube-casts (see Casts, Urinary)
- tuberculosis (see Tuberculosis of Kidney)
- veins involved by kidney growth .. 10
- Rennin in gastric juice .. 401
- milk test for .. 401
- Residual abscess, axillary 816

Residual abscess, contd.

- pylophlebitis simulating .. 696
- Resin, albuminuria simulating .. 6
- bullae from .. 123
- copaliba, polyuria after .. 653
- dermatitis from .. 124
- erythema from .. 275
- in urine, from copaliba .. 0
- vesicles from .. 124
- white ring in urine from .. 6
- Resonance, colonic, in chest .. 755
- over femoral hernia .. 825
- hernia .. 831, 855
- impaired from aneurysm .. 260, 262, 365
- in bronchiectasis .. 366
- with fibroid lung .. 210, 269, 366, 375, 790
- over infarct of lung .. 364
- from lung root obstruction .. 241
- in phthisis .. 362
- from stenosed bronchus .. 260, 365
- subphrenic abscess .. 697
- (and see Dullness)
- **SKODAIC** .. 755
- (and see Skodaic Resonance)
- Resorcin, urine black from 904
- .. **RESPIRATION, CHEYNE-STOKES** 138
- (and see Cheyne-Stokes Respiration)
- embarrassed in tetany .. 189
- rapid (see Tachypnoea)
- shallow, in general peritonitis .. 734
- slow (see Bradypnoea)
- Respiration-pulse ratio .. 364
- high in lobar pneumonia .. 250
- Respiratory blood pump .. 250
- Retained products of conception, colic due to .. 148
- endometritis from .. 700
- testis (see Testis, Ectopic)
- Retching, mechanism of .. 928
- with undue pulsation of abdominal aorta .. 662
- Retention cyst (see Cyst)
- of urine, account of .. 492
- in amyotrophic lateral sclerosis .. 176
- anuria distinguished from .. 492
- ascending nephritis from .. 211
- ascites simulated by .. 61
- bladder distended from .. 61
- from calculus in urethra .. 356, 493
- carcinoma of bladder .. 353
- combined sclerosis .. 61, 176, 211
- compression of cord .. 495
- paraplegia .. 61, 211, 493
- cystitis from .. 211, 720
- definition of .. 492
- delirium from .. 211
- in disseminated sclerosis .. 176, 211
- distinct from anuria .. 54
- dribbling from .. 55, 492
- in encephalitis .. 176
- from enlarged prostate .. 61, 492, 720
- in Erb's syphilitic paraplegia .. 176
- from fracture of pelvis .. 493
- spine .. 211, 495
- in Friedreich's ataxia .. 176
- general peritonitis .. 734
- from gonorrhoea .. 228
- in haematomyelia .. 176
- from haemorrhage into spinal meninges .. 495
- hypogastric tumour from .. 55
- in hysteria .. 493, 495
- incontinence of urine simulated by .. 492
- from lateral sclerosis .. 61, 211, 495, 631
- in myelitis .. 493, 495
- after operation for haemorrhoids .. 58

Retention of urine, contd.

- after operation for hernia .. 58, 493
- on rectum .. 493
- pain above pubes from .. 55
- from papilloma of bladder .. 493
- paralysis of detrusor .. 495
- paraplegia .. 495, 627
- pelvic tumour .. 55
- prostate .. 55
- prostatic abscess .. 493
- prostatitis .. 493, 723
- reflex .. 493
- from retroverted gravid uterus .. 55, 61
- rupture of urethra .. 493
- severe pain from .. 492
- from spinal cord lesions .. 55, 61
- stranguy from .. 492, 797
- from stricture .. 55, 492, 720
- in syringomyelia .. 176
- tabes dorsalis .. 61, 211, 493, 495, 720, 798
- transverse myelitis .. 720
- typhus fever .. 786
- uraemia from .. 211
- various causes of .. 797
- from vesical tumour .. 493
- (and see Sphincter Trouble)
- Retina, anaemia of, from retinal embolism .. 520
- cones and rods in .. 921
- congenital crescents in .. 517
- detachment of .. 520
- blindness due to .. 925
- illustrated (Fig. 427) .. 520
- ophthalmoscopic examination for .. 93
- scotoma from .. 93
- embolism of .. 46, 520
- fatigue of, blue vision from .. 926
- after cataract extraction .. 926
- red vision from .. 926
- flame-shaped haemorrhages in .. 519
- melanotic carcinoma of .. 886
- sarcoma of .. 886
- oedema of, in optic neuritis .. 518
- from thrombosis of retinal vein .. 519
- opaque nerve fibres in (Figs. 413, 414) .. 518
- ophthalmoscopic appearances of .. 517
- physiology of .. 920
- pigmentation of .. 926
- pigmented patches in, in syphilitic choroiditis .. 518
- striated, in optic neuritis .. 518
- white patches in, from albuminuric retinitis .. 93, 519
- **coloboma** (Fig. 412) .. 517
- **opaque nerve fibres** (Figs. 413, 414) .. 518
- in optic neuritis .. 519
- **syphilitic choroiditis** .. 518
- due to tubercles .. 520
- Retinal artery (see Artery)
- changes in chronic nephritis .. 57
- from renal disease .. 183
- uraemia and .. 183
- examination (see Ophthalmoscopic Examination)
- haemorrhages (see Haemorrhage)
- thrombosis (see Thrombosis)
- veins (see Veins)
- vessels, normal (Fig. 409) .. 517
- small, in retinitis pigmentosa .. 924, 926
- Retinitis, albuminuric .. 519
- from arteriosclerosis .. 371
- cerebral haemorrhage and .. 155
- in chronic nephritis .. 12, 14, 15, 64, 137, 263, 347, 506
- flame-shaped haemorrhages in .. 519

Retinitis, albuminuric, contd.

- from high blood-pressure .. 106, 595
- illustrated (Figs. 423-425) .. 519
- ophthalmoscopic examination for .. 93
- optic neuritis simulating .. 519
- scotoma from .. 93
- in uraemia .. 396
- white patches in .. 519
- amaurosis with .. 922
- amblyopia with .. 922
- cerebral haemorrhage and .. 627
- photophobia from .. 639
- pigmentosa .. 924, 926
- uraemia with .. 922, 925
- of yellow spot, amblyopia with .. 922
- nystagmus due to .. 922
- Retinoscopy (see Ophthalmoscopic Examination)
- Retraction of abdomen in peritonitis .. 149, 524
- (and see Rigidity of Abdomen)
- chest (see Chest)
- **EYE** .. 270
- (and see Enophthalmos)
- eyelids in Graves' disease .. 877
- **GUMS** .. 731
- (and see Gums, Retraction of)
- **HEAD** .. 731
- from acute encephalitis .. 731
- asphyxia .. 731
- bronchopneumonia .. 731
- in capillary bronchitis .. 731
- cataplexy .. 731
- from cerebellar ataxia .. 731, 733
- tumour .. 731, 733
- in cerebrospinal meningitis .. 731
- diphteria .. 731
- hydrophobia .. 731
- hysteria .. 731
- hysterio-epilepsy .. 731
- from laryngeal obstruction .. 731
- in meningitis .. 371, 405, 700, 731, 732, 797
- paramyoclonus multiplex .. 731
- from spasmodic torticollis .. 731
- strychnine poisoning .. 731
- superior longitudinal sinus thrombosis .. 731
- in suppurative meningitis .. 731
- tetanus .. 731
- tuberculous meningitis .. 700, 731, 787
- nipple with carcinoma of breast .. 839
- normal .. 839
- in Paget's disease .. 887
- ribs in adherent pericardium .. 71
- systolic, from adherent pericardium .. 265
- of chest .. 535
- Retio- (and see under Post-)
- Retrolabular neuritis (see Neuritis)
- Retrolflexion of uterus (see Uterus)
- Retropertitoneal cyst (see Cyst)

- hernia (see Hernia)
- lipoma, pelvic swelling due to .. 840
- sarcoma, chylous ascites from .. 62
- receptaculum chyli obstruction from .. 62
- Retropharyngeal abscess (see Abscess, Post-pharyngeal)
- Retropulsion in paralysis agitans .. 881
- Retroverted uterus (see Uterus)
- Revolver shooting, deafness from .. 207

- Rhabdomyoma of kidney** 449
 - colic from .. 147
Rhagades in glass-blowers 917
Rheumatic fever (see Fever)
 - growing pains, limping due to .. 456
 - myositis, torticollis simulated by .. 179
 - nodules (see Nodules)
Rheumatism, acute (see Acute Rheumatism)
 - ankylosis from .. 179
 - aortic regurgitation from .. 119, 120
 - brachial neuralgia from 543
 - chorea and .. 170
 - chronic, from apical dental infections .. 571
 - - bowel infection .. 571
 - - cholecystitis .. 571
 - - fibrositis .. 571
 - - infected nasal sinus .. 571
 - - pain in limbs from .. 568, 571
 - - from prostatitis .. 571
 - - pyorrhea alveolaris .. 571
 - - pyosalpinx .. 571
 - - seldom follows acute rheumatism .. 571
 - - from septic seminal vesicles .. 571
 - - tonsils .. 571
 - - weather influencing .. 571
 - - writer's cramp simulated by .. 180
 - contracture from .. 179
 - echthrodoses from .. 179
 - epididymo-orchitis from 584
 - exostoses from .. 179
gonorrheal .. 425
 - hydrocele from .. 588
 - joint adhesions from .. 179
 - lumbago and .. 868
 - metrorrhagia after .. 482
 - ntral regeneration from .. 118
 - stenosis and .. 363
 - muscular, brachial neuralgia diagnosed from 544
 - deltoid tender in .. 544
 - peri-arthritis tenderness in .. 544
 - shoulder immobilized from .. 544
 - tender in .. 544
 - in stiff neck .. 175
 - tender fibrous masses in .. 544
 - - muscle insertions in 544
 - tetanus simulated by 175
 - (and see Myalgia)
 - nails affected by .. 312
 - pain in back from .. 528
 - - epigastrium from .. 537
 - - scalp in .. 867
 - - between shoulders in 566
 - polymyositis acuta simulated by .. 701
 - - simulating .. 702
scarlatinal .. 425
 - of shoulder, carcinoma mammary simulating 863
 - coronary artery sclerosis simulating .. 863
 - gall-stones simulating 863
 - gastritis simulating 863
 - pulmonary tuberculosis simulating .. 863
 - simulated from reading in bed .. 583
 - tabes dorsalis mistaken for .. 536, 541
 - tenderness of scalp in .. 867
 - spine from .. 868
 - urethral discharge from 227
Rheumatoid arthritis (see Arthritis)
Rhine Valley, mollities ossium in .. 305
Rhinitis, adenoids with .. 225
 - atrophic, agueusia due to 859
 - - anosmia due to .. 756
 - - crusts in .. 225
 - - foul breath from .. 113
 - - ozena from .. 225
 - - pus from nose due to 225
 - - from syphilis .. 225
 - caseous, foul breath from .. 113
 - not tuberculous .. 225
Rhinitis, contd.
 - cornual ulcer from .. 890
 - - cutaneous diptheria .. 613
 - - enlarged tonsils with .. 225
 - - hypertrophic, agueusia due to .. 859
 - - anosmia due to .. 756
 - - difficulty in breathing through nose from 113
 - - foul breath from .. 225
 - - mouth breathing from 225
 - - offensive smell due to .. 225
 - - pus from nose due to 225
 - - snoring due to .. 757
 - membranous .. 225
 - polyp with .. 225
 - purulent, foul breath from .. 113
 - - from glands .. 225
 - - pyrexia due to .. 688
 - - rhinoliths from .. 225
 - - from syphilis .. 225
 - - taste affected from .. 860
 - - tuberculous .. 225
 - Rhinoliths .. 225
 - Rhinophyma, pustules in 889
 - - 303
RHINORRHOEA .. 273
 - (and see Epistaxis)
 - Rhinorrhoea due to neuritis .. 223
 - Rhinoscleroma .. 849
Rhomboids, nerve-supply of 615, (Fig. 474) 618, 620
 - Rhomb. in emphysema and 199
 - - subacute with bronchitis 208
 - - sonorous, with bronchitis .. 208
 - - in typhoid fever 689, 784
 - Rhubarb, chrysanthemic acid in .. 903
 - - colic from .. 148
 - - erythema from .. 275
 - - flatulency relieved by .. 376
 - - heart symptoms and .. 377
 - - osaluria from .. 353, 523
 - - pink urine after .. 904
 - - uric colour after .. 903
 - Rhus, tumor affected by 301
 - - metopium, dermatitis from .. 916
 - - toxicodendron, bulle from .. 123, 124
 - - dermatitis from 659, 916
 - - epiphora from .. 273
 - - erythema from 275, 277
 - - itching from .. 659
 - - virgata creper and 124
 - - venenata, dermatitis due to .. 916
 - - vernicera, dermatitis due to .. 916
 - Rib, abscess of .. 210
 - - aneurysm eroding .. 534
 - - carcinoma of, tenderness of chest from .. 862
 - - caries of, abscess of chest wall from .. 530
 - - cartilage, calcified, calculus simulated by 440, 442
 - - cervical (see Cervical Rib)
 - - first, bruised caused by .. 664
 - - pulsus paradoxus caused by .. 664
 - - subclavian artery compressed by .. 664
 - - fracture of (see Fracture)
 - - hydatid of, tenderness of chest from .. 862
 - - inflammation of, tenderness of chest from .. 862
 - - myeloma of (see Myeloma)
 - - new growth of, tenderness of chest from .. 862
 - - protruded by large liver .. 210
 - - sarcoma of, tenderness of chest from .. 862
 - - slipping, account of .. 563
 - - gall-stone simulated by .. 553
 - - gastric ulcer simulated by .. 553
 - - pain in chest from .. 530
 - - - hyochondrium from .. 553
 - - syphilitic node on .. 819
 - - tenderness of, in blood diseases .. 862
Rib, contd.
 - tuberculous (see Tuberculosis)
 - Ribs, beaded, in rickets .. 194, 782
 - - everted, in emphysema 460
 - - rickets .. 782
 - - myelomata of .. 210
 - - protruded by hydatid cyst .. 210
 - - pushed up by ascites .. 59
 - - retraction of, in adherent pericardium .. 71
 - - supernumerary, claw-hand from .. 141
 - Rice, decorated, beri-beri and 78, 83, 279, 516
 - Rice-water stools from arsenic .. 338
 - - in cholera .. 345, 872
 - Richter's syndrome .. 51
 - Rickets, abdomen tumid in 182
 - - account of .. 182
 - - achondroplasia distinguished from .. 233
 - - in adolescence .. 305
 - - age incidence of 305, 458
 - - ankles large in (Fig. 192) 232
 - - back muscles weak in .. 194
 - - beaked pelvis in .. 233
 - - bending of bones in .. 305
 - - bone curves exaggerated in .. 182
 - - bones deformed in .. 458
 - - soft in .. 194
 - - bony changes in .. 782
 - - bow-leg in .. 232
 - - bronchitis in .. 152
 - - cachexia and .. 128
 - - carpal spasm in .. 190
 - - chest characters in .. 208
 - - in children .. 305
 - - colds in .. 182
 - - colon visible in .. 809
 - - coma from .. 181
 - - congenital syphilis simulated by .. 256
 - - constipation in .. 160, 182
 - - convulsions from 181, 182
 - - corvix in .. 182
 - - cranioabates in .. 256
 - - deformity of chest from 114
 - - diarrhoea in .. 182
 - - diet and .. 182
 - - diffuse kyphosis in .. 194
 - - dwarfism from (Fig. 192) 232
 - - enlarged bone-ends in 233
 - - eosinophilia in .. 271
 - - epiphyses large in .. 782
 - - extinct (Fig. 192) 232
 - - fatness in .. 182, 480
 - - feet flat in (Fig. 192) 232
 - - no fibrillary contractions in .. 172
 - - flabbiness of muscles in .. 868
 - - fontanelle closing late in .. 182, 782
 - - forehead bulging in 232, 256
 - - gastro-intestinal upsets in .. 182
 - - girdle in .. 233
 - - greenstick fracture in 305
 - - hamoglobinuria from 357
 - - hair thin in .. 866
 - - at back in .. 182
 - - Harrison's sulcus in .. 182, 208, 233
 - - head enlarged in 182, 622
 - - head-rolling in 182, 866
 - - hot-cross-bun head in .. 232, 256
 - - hour-glass pelvis in .. 233
 - - hydrocephalus distinguished from .. 622
 - - simulated by .. 256
 - - hypoplasia of bowel in 160
 - - infantile scurvy simulated by .. 51
 - - insomnia in .. 402
 - - irritability in .. 182
 - - knock-knee from (Fig. 192) 232
 - - kyphosis from .. 234
 - - laryngismus stridulus in .. 182, 249, 799
 - - of legs (Fig. 192) 232
 - - limping from .. 456, 457
 - - liver displaced from .. 461
 - - lordosis from .. 234
Rickets, contd.
 - - lower end of radius enlarged in .. 192, 194
 - - mucous stools in .. 182
 - - no muscular atrophy in 172
 - - muscular debility in 182
 - - nervous system unstable in .. 182
 - - occipital baldness in .. 866
 - - pains in bones in .. 458
 - - paraplegia from .. 621
 - - pigeon chest in .. 208, 233
 - - pot belly in .. 782
 - - pseudo-leukemia infantum and .. 782
 - - simulating .. 50
 - - quadrate head in .. 782
 - - rarefaction of skull in 190
 - - reflexes retained in .. 172
 - - restlessness in 182, 866
 - - ribs beaded in 194, 782
 - - everted in .. 182, 208
 - - rostrated pelvis in .. 233
 - - sacro-iliac joint disease simulated by .. 458
 - - scoliosis from 191, 192, 234
 - - screaming in .. 182
 - - scurvy (see Scurvy Rickets)
 - - mistaken for .. 679
 - - shortness of breath in 114
 - - skull by in .. 232
 - - sleep disturbed in .. 182
 - - spasmophilia in 182, 799
 - - spinal curvature in .. 232
 - - disease suspected in .. 866
 - - spleen enlarged in 778, 782
 - - stridor due to .. 799
 - - sweating of head in .. 182
 - - tenderness of bones in 182
 - - - scalp from .. 865, 866
 - - skull in .. 182
 - - spine in .. 869
 - - tetany and 2, 3, 182, 189
 - - tibiae sabre-shaped in (Fig. 192) 232
 - - tooth eruption delayed in .. 194
 - - tuberculous ankle simulated by .. 458
 - - hip simulated by .. 458
 - - knee simulated by .. 458
 - - spine simulated by 458
 - - walking interfered with in .. 458
 - - Werdnig-Hoffmann paralysis simulating .. 172
 - - wrists large in (Fig. 192) 232
Ricketts on small-pox 686, 920
 - Ricketts chest, outline of (Fig. 192) 209
 - - rosary .. 182, 208
 - - Rider's bone .. 845
 - - Riding, orchitis from .. 86
 - - Riedel's disease .. 197
 - - lobe, account of .. 461
 - - belt and .. 461
 - - enlarged gall-bladder simulated by 315, 461, 812, 829
 - - floating kidney simulated by .. 461
 - - kidney tumour distinguished from .. 438
 - - laparotomy and .. 315
 - - movable kidney simulated by 315, 812, 813
 - - in right lumbar region 812
 - - sex incidence of .. 461
 - - tight lacing and 461, 462
 - - Rifle fire, deafness from 207
 - - Rigg's disease, pyorrhea alveolaris and .. 94
RIGIDITY OF ABDOMEN 734
 - in acute peritonitis 168
 - - appendicitis 724, 735
 - - over appendicular abscess .. 734
 - - from cold .. 735
 - - colic .. 734
 - - over duodenal ulcer 734
 - - gastric ulcer .. 734
 - - inflamed gall-bladder .. 734
 - - due to injury .. 735
 - - in intestinal colic .. 525
 - - laparotomy and .. 150
 - - due to necrosis of rectus abdominis muscle 736

Rigidity of abdomen, contd.

- - due to nervousness 734
 - - in peritonitis 149, 150, 485, 524, 734, 931
 - - from pneumonia .. 735
 - - ruptured tubal gestation .. 735
 - - suppurative nephritis 736
 - - back from aneurysm 566
 - - arthritis of spine .. 566
 - - fibrositis .. 566
 - - new growth .. 566
 - - with psous abscess .. 458
 - - in spinal caries .. 195, 528, 566, (Fig. 490) 628, 868
 - - from spondylitis deformans .. 566, 869
 - - X rays .. 566
 - - due to cortical degeneration .. 881
 - - in disseminated sclerosis 883
 - - erysipelas .. 824
 - - general, from tetanus .. 521
 - - of head from cervical caries .. 528
 - - in hemiplegia .. 381
 - - hysteria .. 614
 - - iliac fossa, left, from diverticulitis .. 556
 - - from necrosis of rectus abdominis muscle .. 561
 - - right, in appendicitis .. 558, 628
 - - from chronic appendix .. 697
 - - ureteral calculus 559
 - - of leg in hysteria .. 608 (and see Spasticity)
 - - muscular, in paralysis agitans .. 292
 - - Thomsen's disease 726
 - - of neck due to cervical caries .. 795 (and see Stiff Neck)
 - - in paralysis agitans .. 881
 - - post-encephalitic .. 880
 - - of spine from caries .. 193
 - - with psous abscess .. 831
 - - tenderness with .. 736
- RIGORS 736**
- - due to abscess of testis 768
 - - in acute osteomyelitis 737
 - - polion, yelitis .. 737
 - - albuminuria with .. 739
 - - in angina Ludovici 853
 - - angioneurotic oedema 853
 - - anthrax .. 737
 - - due to appendicitis .. 724
 - - appendicular abscess .. 737
 - - arsenobenzol derivatives 422
 - - bacteriuria .. 91
 - - in beri-beri .. 737
 - - biliary colic .. 150
 - - after bladder operations .. 58
 - - blood cultures in case of 738
 - - after blood transfusion 737
 - - blueness in .. 736
 - - in bronchiectasis 737, 740
 - - after catheterization .. 737
 - - from cerebral abscess 737
 - - in cerebrospinal fever 737
 - - chilliness in .. 736
 - - from cholangitis .. 316
 - - cholecystitis 553, 696, 737
 - - in cholera .. 737
 - - after collosal manganese coma representing .. 736
 - - convulsions representing .. 736
 - - from cystitis .. 699, 737
 - - in diptheria .. 737
 - - dysentery .. 737
 - - eclampsia simulating .. 736
 - - due to empyema 737, 739
 - - of gall-bladder .. 696
 - - in epidemic jaundice .. 420
 - - epilepsy simulating .. 736
 - - in erysipelas 737, 740, 785
 - - fastigium in .. 736
 - - in feverish cold .. 737
 - - from gall-stones 150, 316, 410, 468, 737, 739
 - - gastro-intestinal disorder .. 737
 - - in German measles .. 737
 - - glanders .. 737
 - - due to gonorrhoea 228, 739
 - - in gout .. 739

Rigors, contd.

- - haematuria with .. 739
 - - from hepatic abscess 366, 408, 464, 695, 737, 740
 - - in Hodgkin's disease .. 738
 - - hydrophobia .. 737
 - - hysteria simulating .. 736
 - - in infective endocarditis 46, 703, 737
 - - parotitis .. 808
 - - sinus thrombosis .. 737
 - - influenza 737, 740, 785
 - - jaundice with .. 739
 - - and jaundice, causes of 408
 - - in leukaemia .. 737, 738
 - - malaria 38, 278, 737, 738
 - - Malta fever .. 737
 - - mastitis .. 837
 - - measles .. 737
 - - after measles .. 739
 - - medical injections .. 737
 - - in miliary tuberculosis 737
 - - mumps .. 737
 - - nephritis .. 737
 - - from operations on bladder .. 58
 - - in osteomyelitis .. 512
 - - paroxysmal haemoglobinuria .. 358
 - - after peptone injection 737
 - - from perinephric abscess .. 737
 - - peristitis .. 817
 - - in pernicious anaemia 738
 - - plague .. 737
 - - after pleurisy .. 739
 - - in pneumonia 419, 736, 737
 - - after pneumonia .. 739
 - - in pneumonic tuberculosis .. 737
 - - from portal pyaemia 464, 737
 - - thrombosis .. 67
 - - prostatic abscess .. 723
 - - in puerperal fever 737, 738
 - - from pulmonary tuberculosis .. 740
 - - in pyaemia 419, 678, (Fig. 553) 694, 737, 738, 739, 740
 - - pyelitis .. 718, 737
 - - pyelonephritis .. 737
 - - from pyelophlebitis .. 408
 - - pyrexia in .. 736
 - - pyuria with .. 739
 - - in rat-bite fever 737, 740
 - - relapsing fever 737, 738, 785
 - - from renal calculus 150, 737, 739
 - - in renal colic .. 150
 - - rheumatic fever .. 737
 - - from salvarsan 422, 737
 - - in sapraemia .. 737
 - - scarlet fever 737, 739
 - - secondary syphilis .. 737
 - - septicemia 678, 737, 739, 740
 - - after serum injection .. 737
 - - shaking in .. 736
 - - in sick headache .. 737
 - - from sinus thrombosis 739
 - - in small-pox .. 345, 737
 - - from subphrenic abscess 737, 807
 - - suppurative cholangitis 415, 464, 696, 739
 - - cholecystitis .. 739
 - - nephritis .. 699
 - - pyelophlebitis 415, (Fig. 554) 696, 737
 - - sweating in .. 736
 - - in tetanus .. 737
 - - thirst in .. 737
 - - in tonsillitis .. 737
 - - tremor with .. 879, 882
 - - in trench fever 710, 737
 - - typhoid fever 689 737, 739, 740
 - - typhus fever .. 737, 786
 - - uraemia simulating .. 736
 - - after vaccine .. 737
 - - in Weil's disease .. 737
 - - yellow fever 345, 420, 737 (and see Chills)
- Rings tight in myxoedema (Fig. 392) 507
- Ringworm 309-312**
- - alopecia areata simulating .. 92
 - - bald, alopecia areata distinguished from .. 311

Ringworm, contd.

- - baldness from .. 91, 92, 311
 - - of beard (see Tinea Sycosis) .. 311
 - - black-dot type .. 311
 - - of body skin (see Tinea Circinata)
 - - cultural characters of fungi of .. 310, 311
 - - disseminated .. 311
 - - of Durham .. 310
 - - eczema simulated by .. 311
 - - favus distinguished from 311
 - - of France .. 310
 - - fungi causing .. 309
 - - geographical distribution of .. 310
 - - hair follicles and .. 311
 - - stumps in .. 311
 - - impetigo simulated by 311
 - - inflammatory .. 310
 - - kerion and .. 310, 865
 - - London type of .. 310
 - - microspora causing .. 309
 - - of mucous membrane .. 310
 - - mycelium of .. 310
 - - of nails .. 309, 312, 496
 - - Northumberland .. 310
 - - papule in .. 311
 - - scales in .. 310
 - - of scalp (see Tinea Tonsurans)
 - - scaly patches in .. 311
 - - of scrotum .. 747
 - - seborrhoea distinguished from .. 311
 - - of skin .. 309
 - - spores of .. 310
 - - suppurative, occipital glands enlarged from .. 472, 473
 - - tenderness of scalp from 865
 - - Tokelau .. 312
 - - trichophyta causing .. 309 (and see Tinea)
- Rinn's test of hearing 206**
- - negative in otosclerosis .. 207
 - - in trauers in myopathy .. 291
 - - Rising in throat as an aura 87
 - - Risorius muscle, weak, in myopathy .. 291
- RISUS SARDONICUS 740**
- - in catalepsy .. 741
 - - hysteria .. 741
 - - malingering of .. 741
 - - scleroderma simulating .. 741
 - - from strychnine 521, 741
 - - tetanus 175, 521, 741, 885
- Riveters, noises in head .. 504
- in vertigo in .. 504
- Roaring in ear .. 878
- noises in head .. 504
- Robin, haemoglobinuria from .. 357
- Rochelle salt in Fehling's solution .. 327
- Rocky Mountain spotted fever due to Dermacentor venustus .. 679
- purpura in .. 676
- Rodent ulcer (see Ulcer)
- Rodinal, dermatitis due to .. 917
- used by photographers 917
- Rods, no colour perception in .. 921
- and cones, functions of 921
- in owls .. 921
- Rolling of head, occipital baldness from .. 866
- in rickets .. 866
- Romanowsky stain in malaria .. 40, 41
- Romberg's sign in ataxy .. 74
- method of eliciting .. 75
- posterior column degeneration and .. 75
- in tabes dorsalis 75, 753
- Root shadows, account of 188**
- - in healthy persons .. 362
 - - not indicative of phthisis .. 362
- Roots, posterior, affected in tabes dorsalis .. 75
- Rosacea (see Acne Rosacea)
- Rosaniline, albuminuria treated by .. 904

Rosamine, contd.

- - haematuria simulated after .. 904
 - - Rosary, rickets .. 182, 208
 - - Rose spots in typhoid fever 419, 477, 685, 689, 784
 - - typhus fever .. 786
 - - Rose-Bradford kidneys .. 14
 - - after scarlet fever .. 282
 - - Rose-pickers, dermatitis in .. 915, 916
 - - Roscola in dengue .. 571
 - - macules in .. 477
 - - in small-pox .. 684
 - - syphilis .. 476, 417, 472, 476, 691, 760, 764
 - - variation with temperature .. 479
 - - Rosette crystals of uric acid 900
 - - Rosewood, dermatitis from 916
 - - Rostral sensory area (Fig. 442, 445) 550
 - - Rostrate pelvis in rickets 233
 - - Rotators of hip, nerve-supply of .. 610
 - - Rothera's test for acetone 3
 - - illustrated (Fig. 8) 4
 - - Rouleaux formation in cirrhosis of liver 51, 784
 - - fevers .. 51
 - - trypanosomiasis .. 51
- Round ligament (see Ligament)**
- - worms (see Ascaris Lumbricoides)
- Rowing men, albuminuria in .. 18, 330
- - cramp in .. 188
 - - heart enlarged in .. 266
 - - left ventricle enlarged in .. 258, 374
 - - pain in shoulder in 581
 - - tenderness of spine in 870
 - - urine changes in .. 18
 - - race, glycosuria after .. 330
 - - Rub over carcinoma of liver .. 468
 - - in infant .. 199
 - - liver in general peritonitis .. 485, 734
 - - in pericarditis .. 265, 863
 - - peritonitis .. 149
 - - over infarct of lung 564
 - - in pneumonia .. 419
 - - over spleen 46, 775, 776
 - - from embolism .. 787
 - - in general peritonitis .. 485, 734 (and see Friction Sounds)
- Rubber workers, acute yellow atrophy in .. 416
- - carbon bisulphide used by .. 917
 - - chloride of sulphur used by .. 416
 - - dermatitis in .. 917
- Rubefaciens, erythema from .. 275
- Rubella (see German Measles)
- Rubrospinal tract lesion, intention tremor from 884
- Rue, dermatitis due to .. 916
- RUMINATION .. 485**
- - (and see Merycism)
- Running as an aura .. 86
- - heart enlarged from .. 266
- Rupia, leprosy simulating 743
- - in syphilis 742, 743, 746
- Rupture of aneurysm (see Aneurysm)
- - aortic valve 123, 260, 261
 - - fainting due to .. 297
 - - bladder from fractured pelvis .. 351
 - - empyema (see Empyema)
 - - extra-uterine gestation 842
 - - gall-bladder in typhoid fever .. 316
 - - heart .. 264
 - - liver from a blow .. 149
 - - fainting due to .. 297
 - - simulating colic .. 149
 - - urgent laparotomy for 149
 - - muscle .. 179
 - - bruising due to .. 677
 - - purpura due to .. 676
 - - spontaneous .. 677
 - - ovarian cyst, dysmenorrhoea simulated by .. 239

Rupture of ovarian cyst, contd.

- - - pain in pelvis from 573
- pelvic abscess into rectum .. 843
- plantaris longus, limping from .. 456
- - at tennis .. 677
- pyosalpinx, dysmenorrhoea simulated by .. 239
- - pain in pelvis from .. 573
- rectus abdominis muscle, appendicitis simulated by .. 561
- - - pain in iliac fossa from .. 557
- - - in typhoid fever .. 561
- - - from Zenker's degeneration .. 561
- sphincter iridis from injury .. 674
- spleen from a blow .. 149
- - fainting due to .. 297
- - from injury .. 788
- - laparotomy in diagnosing .. 149, 788
- - simulating colic .. 149
- tympanic membrane .. 522
- urethra, aching in perineum from .. 579
- extravasation of urine from .. 351
- from fractured pelvis .. 493
- - inability to micturate from .. 351
- - retention of urine from .. 493
- uterus .. 252
- varicose veins, fainting due to .. 297
- - purpura due to .. 676
- - vulval swelling due to .. 853
- vein, purpura due to .. 676
- viscera from abdominal injury .. 735
- - and see Hernia
- Ruptured ectopic gestation see Gestation.
- Extra-uterine .. 322
- Russia, ergotism in .. 322
- Rusty nail, tetanus from .. 741, 885
- - sputum in lobar pneumonia 187, 199, 200, 788, 789, 790
- Ruta graveolens, dermatitis due to .. 916
- Rye, mouldy, ergotism from .. 322

SABOURAUD on bottle

- bacillus .. 92
- seborrhoea .. 92
- Saccaromyces in urine .. 647
- Sacculatation of colon, diverticulitis from .. 556
- Sacral nerves (see Nerve)
- pain from sacro-iliac disease .. 81
- plexus, carcinoma of rectum invading .. 146
- - distribution of .. 610
- - lesion, foot-drop from .. 146
- - new growth of pelvis invading .. 146
- segments, sensory areas for .. (Fig. 584) 751

Sacralgia, notes on 573

- (and see Backache)
- Sacro-iliac abscess, swelling in iliac fossa due to .. 814
- - joint (see Joint)
- Sacrum, abscess of, rectal examination in diagnosing .. 729
- - bed sore over .. 321
- - carcinoma of, skiagram of .. (Fig. 26) 21
- - recti fixed to .. 727
- - felt per rectum .. 729
- - fracture of, anaesthesia from .. (Fig. 585) 752
- - growth of, rectal examination in diagnosing .. 729
- - myeloma of, albumuria from .. 20
- - - skiagram of (Fig. 24) 20

Sacrum, contd.

- pain over, haematuria with .. 349
- - - prostate disease causing .. 349
- - - sarcoma of .. 843
- Saddle injury, orchitis from .. 86
- - testis from .. 585, 850
- Sadness, excessive expression of, in bilateral facial paralysis .. 603
- - - cerebral diplegia .. 603
- - - pseudo-bulbar paralysis .. 603
- Safranin, fat stained by .. 140
- Saffron, dermatitis due to .. 915
- Sage brush, wood ticks on .. 625
- Sago grain bodies in eczema .. 919
- - lesions of cheilopompholyx .. 124, 918
- Sailing ships, scurvy on .. 93
- Sailors, night blindness in .. 926
- - scurvy in .. 926
- St. Gothard tunnel, ankylostomiasis in .. 103, 635
- St. Vitus's dance .. 170
- - (and see Chorea)
- Salicyl-sulphonic acid tests for albumen .. 7
- Salicylates in acute rheumatism 45, 282, 568, 758, 844
- - anaemia from .. 44, 45
- - delirium from .. 207
- - delirium from .. 212
- - effect in rheumatic fever .. (Fig. 328) 423
- - erythema from .. 275
- - ferric chloride reaction from .. 214
- - growing pains relieved by .. 457
- - headache from .. 371
- - joint pains relieved by .. 282
- - noises in head from .. 504
- - pulse slow from .. 110
- - tinnitus due to .. 879
- - tonillitis relieved by .. 758
- - in urine .. 214
- - urine black from .. 904, 906
- - - brown from .. 904
- - vertigo from .. 504
- Salicylic acid, purpura due to .. 676
- - vesicles due to .. 918
- Saline, normal, composition of .. 634
- Saliva, deficient, from chorda tympani paralysis .. 605
- - dribbling of (see Dribbling of Saliva; and Salivation)
- - effects of mercury on .. 661
- - excessive .. 660
- - not tinged in jaundice .. 406
- Salivary calculus (see Calculus)
- - gland in Miculicz's syndrome .. (Fig. 46) 34
- - nerve-supply of .. 605
- - - **SWELLING OF** .. 848
- - (and see Swelling of Salivary Glands)
- - neurosis .. 662
- - retention cyst .. 590
- Salivation from acute dyspepsia .. 662
- - gastritis .. 662
- - in angina pectoris .. 52
- - from biliousness .. 662
- - in dementics .. 662
- - from dilated stomach .. 662
- - duodenal ulcer .. 662
- - encaphalitis .. 223
- - gastric carcinoma .. 662
- - ulcer .. 662
- - hepatic disorder .. 662
- - in idiots .. 662
- - imbeciles .. 662
- - from mercury .. 44, 94, 882
- - pancreatitis .. 662
- - in stomatitis .. 95
- - tic douloureux .. 548
- Salol, caecogastria due to .. 860
- - carboloria from .. 906
- - Fehling's solution reduced after .. 327
- - ferric chloride reaction from .. 214
- - in urine .. 214

Salol, contd.

- urine black from .. 904
- Salpingitis, abdominal pain from .. 555
- - bladder opened by .. 356
- - colic due to .. 148
- - haematuria from .. 348, 356
- - increased frequency of micturition with .. 491
- - pain in iliac fossa from .. 555, 557
- - vaginal examination in diagnosing .. 559
- Salpingo-oophoritis 238, 843
- - amenorrhoea from .. 24
- - bimanual examination in diagnosing .. 239
- - dysmenorrhoea from .. 237
- - dyspareunia due to .. 239
- - extra-uterine gestation simulated by .. 842
- - growth of pelvic bone simulating .. 843
- - leucocytosis with .. 843
- - menorrhagia from .. 482, 843
- - pelvic abscess from .. 843
- - adhesions with .. 239, 573
- - pain with .. 238, 573, 843
- - swelling due to .. 840, 843
- - pyrexia with .. 843
- - retort-shaped swellings with .. 238, 843
- - sterility due to .. 793, 843
- - sweating with .. 843
- - tender swellings due to .. 238
- - uterine discharge with .. 843
- - uterus fixed with .. 238
- - wasting with .. 843
- Salpingopharyngeus, cracking in ear due to .. 878
- Salt, thirst due to .. 879
- Salvarsan, amblyopia from .. 922
- - arsenic in .. 277
- - chancre healed by .. 898
- - Cheyne-Stokes breathing from .. 422
- - for condylomata .. 854
- - convulsions from .. 422
- - degeneration of liver cells from .. 422
- - delirium from .. 212, 422
- - in diagnosing gumma of liver .. 415
- - - orbit .. 284
- - rat-bite fever .. 687, 740
- - syphilis .. 684, 687, 695
- - erythema from .. 275, 277
- - general oedema after .. 516
- - gumma cured by .. 761, 898
- - irritability from .. 422
- - jaundice from .. 422
- - prostration from .. 422
- - pyrexia from .. 422
- - rigors from .. 422, 737
- - in syphilis 245, 422, 586, 746, 769, 818
- - syphilis a second time after .. 765
- - syphilitic proctitis and .. 100
- - ulcer healed by .. 730
- - toxic effects of .. 422
- - vomiting from .. 422
- - wheals due to .. 935
- **SAND, INTESTINAL 741**
- 'Sand under skin' sensation in cocaine habit .. 755
- Sandalwood oil, erythema from .. 275
- Sanguinaria canadensis, dermatitis due to .. 916
- Santonin, convulsions from .. 181
- - delirium from .. 212
- - pink urine after .. 904
- - urine colour after .. 903
- - yellow vision due to .. 926
- Saphena varix, account of 825
- - femoral hernia simulated by .. 825, 831
- - impulse on coughing in .. 825, 831
- - psosa abscess simulating .. 825
- - reducible .. 825, 831
- - thrill in .. 825
- - varicose veins with .. 825
- Saphenous vein, thrombosed, oedema of one leg from .. 10

- Saponin, haemoglobinuria from .. 357
- Saprophytes in bladder .. 90
- Sarcine in carcinoma of stomach .. 777, 930
- - gastric juice .. 401
- - illustrated (Fig. 258) 302
- - in pyloric stenosis .. 401
- - vomit .. 929
- - in dilated stomach .. 930
- - pyloric stenosis .. 802
- Sarcoid, multiple benign, of Boeck .. 502
- Sarcoma, age incidence of 835
- - alveolar, of kidney .. 449
- - anaemia from .. 515
- - aneurysm simulating .. 832
- - angio-, of kidney .. 449
- - tongue .. 857
- - antrum of Highmore .. 832
- - basiphrenoid, haemoptysis simulated by .. 359
- - blood cysts in .. 823
- - bone swelling due to .. 823
- - of bone, account of 821-823
- - carcinoma simulating (Fig. 156) 190
- - central necrosis simulating .. 818
- - central, osteitis simulated by .. 845
- - - periostitis simulated by .. 845
- - - X rays in diagnosis 845
- - eosinophilia from .. 271
- - intracardiac abscess simulating .. 694
- - from osteitis deformans .. 820
- - secondary in lung .. 365
- - spontaneous fracture due to .. 304
- - - syphilis simulating 819
- - brain, hemianopsia from 379
- - breast .. 839
- - blood from nipple due to .. 227
- - bruit over .. 844
- - of bundle of His .. 109
- - cachexia from .. 515
- - of caecum, appendicitis simulated by .. 814
- - fever with .. 814
- - swelling in iliac fossa from .. 814
- - cauda equina .. 81
- - cervical glands .. 475
- - check .. 225
- - chondro-, of femur skiagram of (Fig. 637) 822
- - endosteal, account of .. 822
- - (and see Myeloma)
- - epithelioma simulated by .. 895
- - in femoral region .. 826
- - of femur, limping from 457
- - popliteal aneurysm simulating .. 844
- - X rays in diagnosing 844
- - fibro- (see Fibrosarcoma)
- - of tibia, limping from 556
- - forehead .. 225
- - frontal bone .. 255
- - general wasting from .. 78
- - of ilium, pain in iliac fossa from 555, 558, 564
- - swelling in right iliac fossa from .. 564
- - in infants .. 835
- - of inguinal glands 830
- - innominate bone, sciatica simulated by .. 539
- - invading bone from outside .. 823
- - radius and ulna, skiagram of (Fig. 642) 823
- - of jaw .. 225
- - from epulis .. 835
- - microscope in diagnosing .. 836
- - X rays in diagnosing 836
- - kidney, Cheyne-Stokes breathing from .. 139
- - colic from .. 147
- - haematuria from 348, 350, 448
- - pyuria due to .. 716
- - secondary in lung (Fig. 120) 136
- - uraemia from .. 139

Sarcoma, contd.

- of larynx, hæmoptysis from .. 361
- leucocytosis in .. 451
- of lip .. 225
- liver .. 469
- ascites from 62, 63, 68, 412
- gall-bladder enlargement simulated by 315
- jaundice with 68, 412
- large portal glands with 68
- liver enlarged from .. 63, 68, 412
- hard with .. 68
- tender with .. 68
- melanotic .. 469
- rectal examination in .. 68
- retinal examination in .. 68
- umbilicated nodules with .. 68
- loss of weight due to .. 932
- of lower jaw .. 834
- lung, hæmoptysis from .. 361, 365
- red - currant jelly sputum from .. 365
- secondary to bone .. 365
- mediastinal glands .. 365
- sarcoma of kidney (Fig. 120) 136
- lympho- (see Lympho-sarcoma)
- of mediastinal glands secondary in lung .. 365
- mediastinum, bronchus invaded by .. 361
- cervical sympathetic irritated by .. 675
- chylous ascites from .. 62
- cough from .. 186
- hæmoptysis from .. 361
- hæmorrhage into .. 361
- cyanosis from .. 198
- hypothermia with (Fig. 315) 392
- pain between shoulders from .. 566
- paralysis of cervical sympathetic due to (Fig. 221) 270
- phrenic nerve irritated by .. 136
- pleural effusion with (Fig. 315) 392
- pupil dilated with .. 675
- receptaculum chyli obstruction from .. 62
- starting in glands .. 910
- thymus .. 910
- superior vena cava obstructed by .. 910
- temperature chart in (Fig. 564) 706
- vagus nerve irritated by .. 186
- X rays in diagnosing .. 186
- metastases in .. 315
- hæmorrhage from .. 370
- ophthalmoscopic examination for .. 93
- scotoma from .. 93
- secondary in liver .. 315
- of inguinal glands .. 831
- inguinal glands enlarged from .. 477
- of liver .. 469
- secondary to eye .. 315
- long latency of .. 886
- melaninogen in urine with .. 831
- melanotic carcinoma simulating .. 886
- melanuria with 469, 477, 831, 905
- microscope in diagnosing .. 886
- from mole 473, 477, 886
- operation in diagnosis 477
- pre-auricular gland enlarged from .. 473
- from retina .. 886
- skin .. 477
- of spine .. 869
- from toe .. 477, 831
- wart .. 831
- of meninges, large cells in cerebrospinal fluid from .. 383

Sarcoma, contd.

- microscope in diagnosing .. 818, 888, 895
- of misplaced testis .. 589
- from mole .. 888
- muscular atrophy from .. 78
- mycosis fungoides simulating .. 888
- myeloid, account of .. 822
- bone expanded by (Fig. 64) 822
- of bone, crepitus in .. 190
- pulsation in .. 190
- X rays in diagnosis .. 190
- crackling over .. 188
- enchondroma simulated by (Fig. 639) 822
- of femur, skiagram of .. (Fig. 641) 823
- histology in diagnosing .. 95
- of humerus, skiagram of .. (Fig. 638) 822
- jaw, bleeding gums from .. 93
- histology in diagnosing .. 93
- pyalism from .. 661
- skiagram of .. (Fig. 647) 836
- odontoma simulating .. 836
- of spine .. 796
- spontaneous fracture due to .. 304, 306
- of tibia, skiagrams of (Figs. 639, 640) 822
- X rays in diagnosing .. 845
- (and see Myeloma)
- of neck, temperature chart in (Fig. 564) 706
- nose affected by .. 225
- of os calcis .. 551, 552
- osteo- (see Osteosarcoma)
- of palate .. 730
- parotid gland .. 848
- pelvic bones .. 833
- aneurysm distinguished from .. 833
- bruit over .. 833
- pulsation in .. 833
- swelling in iliac fossa due to .. 829
- X rays in diagnosing .. 829, 833
- pelvis .. 832
- blood per anum from .. 96
- foot-drop from .. 146
- lumbosacral plexus affected by .. 81
- rectum invaded by .. 96
- tumour of cauda equina simulated by 81
- penis, caries of pubis simulating .. 851
- periosteal, account of .. 821
- amputation not curing .. 821
- cachexia with .. 821
- of femur .. 845
- humerus, skiagram of .. (Fig. 636) 821
- from injury .. 821
- loss of weight with .. 821
- lymphatic glands enlarged from .. 821
- malignancy of .. 821
- metastases in lung from .. 821
- microscope in diagnosing .. 821
- not very painful .. 821
- periostitis simulated by .. 821, 845
- skiagram of (Fig. 635) 821
- striations in (Figs. 635, 636) 821
- of tibia .. 845
- veins prominent over .. 821
- in young adults .. 821
- of pharynx, carache from .. 253
- popliteal .. 844, 845
- of portal glands, colic from .. 147
- prostate felt per rectum .. 728
- pulsation in .. 844
- retroperitoneal, chylous ascites from .. 62
- of rib, tenderness of chest from .. 862
- sacrum .. 843

Sarcoma, contd.

- of sciatic nerve, rectal examination in diagnosing .. 729
- secondary, spontaneous fracture due to .. 304
- of skin, account of .. 888
- colour of .. 888
- multiple benign sarcoma simulating .. 502
- secondary to glands .. 888
- small round-celled, of .. 888
- of spermatic cord .. 589
- spindle-celled, of skin .. 888
- of spine .. 869
- abdominal pain from .. 151
- colic simulated from .. 151
- kyphosis from .. 193
- pain between shoulders from .. 566
- skiagram of (Fig. 620) 796
- X rays in diagnosing .. 845
- starting in muscle .. 194
- subcutaneous tissues .. 823
- of sternum, tenderness of chest from .. 862
- stomach, blood per anum from .. 97
- epigastric tumour due to .. 809
- spleen simulated by .. 776
- suprarenal, secondary in scalp .. 806
- testis .. 586, 850
- iliac glands enlarged from .. 587
- from injury .. 587
- lumbar glands enlarged from .. 587
- microscopical examination in diagnosing .. 769
- orchitis simulated by .. 587
- scrotum involved from .. 767, 768
- ulceration of scrotum from .. 769
- tibia, limping from .. 456

- erythrasma .. 747

Scales, contd.

- from German measles 744
 - greasy, in seborrhoea 311
 - due to ichthyosis 744
 - iodine 744
 - keratosis pilaris 744
 - leprosy 744
 - lichen scrofulosorum 598
 - lupus erythematosus 744
 - - vulgaris 303, 744, 500
 - from measles 744
 - in mycosis fungoides 888
 - pityriasis alba 744
 - rosacea 744
 - rubra 744, 746
 - - pilaris 599, 600, 744, 746
 - prurigo 601
 - psoriasis 311, 499, 598, 602, 744, 745, 747
 - due to quinine 744
 - in ringworm 310, 311
 - from scarlet fever 744
 - in seborrhoea 744, 745
 - syphilides 601, 602, 744
 - tineia circinata 311
 - - imbricata 312
 - tonsurans 744
 - - versicolor 313, 645, 744
 - urticaria 744
 - due to xeroderma 744
 Scalp, aene affecting 865
 - circoid aneurysm of 847
 - dermatitis herpetiformis affecting 865
 - eczema of 91
 - - seborrhoeicum affecting 602
 - epithelioma of, preauricular gland enlarged from 473
 - erysipelas of 91, 865
 - - favi of 91, *Fig. 262*, 309
 - - gumma of 866
 - hyperaesthesia of, in neurasthenia 754
 - inflamed, hyperaesthesia from 389
 - lupus erythematosus of 91, 746, 865
 - molluscum fibrosum of 865
 - multiple benign sarcoid affecting 502
 - nerve-supply of *Fig. 656*
 - oedema of (see Oedema)
 - pain in (see Pain)
 - pediculosis of 695
 - pityriasis affecting 311
 - - rubra of 746
 - - pilaris affecting 600
 - psoriasis of 91, 311, 745
 - pustular syphilides of 664
 - referred pains in 867
 - ringworm of (see Tinea Tonsurans)
 - sebaceous cyst of 888
 - seborrhoea of 91, 744, 745
 - seborrhoeic dermatitis affecting 493
 - segmental areas of (*Figs. 658, 659*) 867
 - sensory centre for (*Fig. 485*) 631
 - sores on, occipital glands enlarged from 473
 - syphilis of 91
TENDERNESS OF 865
 - (and see Tenderness of Scalp)
 - varicella affecting 919
 - in von Recklinghausen's disease 865
 - wound, oedema round 511
 - - suppurative meningitis from 732
 - (and see Head, etc.)
SCALY ERUPTIONS 744
 - Scammony, colic from 148
 - Scanning speech in cerebellar abscess 630
 - - - tumour 630
 - - disseminated sclerosis 630, 773, 883
 Scapula, rheumatic nodules over (*Fig. 226*) 282
 - winged, in carpenters (*Fig. 473*) 617
 - - from paralysis of serratus magnus 617

Scapular, pain between (see Pain, Interscapular)
 Scapular reflex, centre for (*Fig. 486*) 631
 Scar, abdominal, herniation of 636
 - from abscess 131
 - - acne 131
 - - alveolar cicatrized 92
 - - bracelet 131, 147, 180
 - - cheloid and 131
 - from chicken-pox 131
 - contractures from 147, 180
 - in favus 309
 - of fingers in Morvan's disease 302
 - - syringomyelia 302
 - in folliculitis decalvans 92
 - from gumma (*Fig. 516*) 659
 - herpes 531, 742
 - laceration 147
 - in leprosy 501, 743
 - lupus erythematosus 92, 303, 309, 746
 - - vulgaris 500
 - from multiple benign sarcoid 502
 - in neck in scrofuloderma 500
 - from operation 131
 - of palate from syphilis 261
 - from pendant 131
 - pigmented, from syphilis 261, 382
 - in pseudopelade 92
 - Raynaud's disease 203, 302
 - from scald 131
 - scrofula 683
 - in small-pox 743
 - striated, by mouth, in congenital syphilis 290
 - from syphilis 586, 683
 - syphilitic ulcer 895
 - talipes due to 144
 - from vaccination 131
 - of vulva from syphilis 854
 - from wound 131
Scarlatinal arthritis 424
 - Scarlet fever (see Fever)
 Scarpa's triangle 824
 - - hollow, in congenital dislocation of hip 195
 - - psoas abscess pointing in 825
 Scents, erythema from 275
 Schistosoma haematobium 102
 - - (and see Bilharzia)
 Schizonts of malaria parasite 42
 - - 40, 41, 300
 Schmidt-Werner milk-tube in estimating fat 300
 Schonlein's disease (see Pelliosis Rheumatica)
 Schoolboys, constipation in 165
 - - epistaxis in 274
 Schott's Nauheim treatment in fatty heart 595
 Schuller's dots in malaria parasites 42
 Sciatic nerve (see Nerv.)
 - notch, tenderness over, in sciatica 539
Sciatica, account of 82, 539
 - anaesthesia in foot 539
 - ankle-jerk diminished in 539
 - - lost in 539
 - anterior cruritis with 540
 - cauda equina lesion simulating 539
 - from fibrositis 572
 - gumma of spine simulating 539
 - hip-joint disease distinguished from 82
 - - simulating 539
 - knee-jerk never affected in 539
 - lumbago with 539
 - lumbar puncture in 539
 - malignant disease simulating 539
 - - latens 539
 - muscle atrophy from 80, 82, 539
 - neuralgic 539
 - neuritic 539
 - numbness in foot in 539
 - osteo-arthritis of hip simulating 431
 - - spine simulating 539

Sciatica, contd.

- pain in leg from 539
 - - loin with 539
 - - thigh from 539
 - - pelvic disease simulating 539
 - - psoas abscess distinguished from 82
 - - R.D. from 80, 82
 - rectal examination in 539, 540, 729
 - retroverted uterus simulating 539
 - sarcoma of innominate bone simulating 539
 - simulated by tumour of cauda equina 81
 - skiagraphy in cases of 539
 - spinal caries simulating 539
 - - meningitis simulating 539
 - spondylitis deformans simulating 870
 - syphilis 504
 - tenderness in gluteal region from 539
 - - loin with 539
 - - over sciatic notch in tests for 82
 - unilateral as a rule 540
 - urine testing in 540
 - vaginal examination in 504
 - Wassermann test and 916
 Scilla, dermatitis due to 916
 Scirrhus carcinoma of breast 839
 - - blood from nipple due to 227
 - - colon 826
 Scissor gait in diplegia 884
 - Little's disease 169
 Scleroderma, anidrosis in 803
 - atrophy of skin in 865
 - course of 886
 - ectropion from 273
 - epiphora from 273
 - exacerbations in 886
 - of face 886
 - lack of expression due to 741
 - risus sardonius simulated by 741
 - finger affected by 301
 - inability to open mouth in 886
 - leucoderma distinguished from 645
 - parchment skin in 886
 - pseudopelade and 865
 - skin stiff in 645
 - thickened in 645
 - tenderness of scalp from 865
 - trismus simulated by 886
 Scleroses, combined (see Combined Scleroses)
 Sclerosis, amyotrophic lateral (see Amyotrophic Lateral Sclerosis)
 - cerebral, choreiform contractions in 170, 171
 - of coronary artery (see Atheroma of Coronary Artery)
 - disseminated (see Disseminated Sclerosis)
 - labyrinthine, fainting due to 297
 - lateral (see Lateral Sclerosis)
 - of posterior columns in combined sclerosis 75
 - - disseminated sclerosis 75
 - - - Friedreich's ataxia 7
 Sclerotics, blackened, in ochronosis 644, 906
 - blue, brittle bones with (*Fig. 259*) 304
 - - familial incidence of 304
 Scolices of Tenia echinococcus (*Figs. 623a, 623b*) 806
 Scolio-kypnosis in Friedreich's ataxia (*Fig. 148*) 176
Scoliosis, account of 191
 - from asymmetry of shoulders 191
 - - caries distinguished from 528
 - - causes of 191
 - chest asymmetry from 209
 - - deformity from 114
 - from diphtheria 191, 192
 - dwarfism from 234

Scoliosis, contd.

- from empyema 191
 - faulty posture 234
 - fibroid lung 191, 210
 - in Friedreich's ataxia 176, 192, 624
 - generally postural 191
 - heart displaced in 373
 - from hysteria 191
 - infantile paralysis 191
 - kyphosis with 194
 - - from caries of spine 193
 - from muscular dystrophy 191
 - - weakness 234
 - - osteomalacia 234
 - pain in back from 527
 - from paralysis of back muscles 191, 192
 - - pencilling spine to detect 191
 - from peripheral neuritis 191, 192
 - primary muscular atrophy 192
 - - rickets 191, 192, 234
 - seldom tuberculous 191
 - shortness of breath from 114
 - in spondylitis deformans (*Fig. 622*) 796
 - from Sprengel's shoulder 191
 - - stays 234
 - in syringomyelia 142, 619
 - - from unequal legs 191
 - - weakness of back 191
 - - weight-carrying 191
 - - wryneck 191, 192
 - (and see Spinal Curvature)
 Scorbutus (see Scurvy)
 Scorpion sting, delirium from 211
 Scotoma, annular, from choroiditis 924
 - - in glaucoma 288, 924
 - due to blind spot 923
 - central, account of 823
 - - due to alcohol 922
 - - atoxyl 922
 - - for colours 923
 - - due to alcohol 922
 - - tobacco 922
 - - in dim lights 921
 - - disseminated sclerosis 630, 631, 923
 - - effects of 931
 - - for green 923
 - - in hereditary optic atrophy 923
 - - hippus with 675
 - - due to lead 922, 923
 - in Leber's optic atrophy 923
 - - migraine 922, 923, 924
 - - negative 923
 - - from optic chiasma lesion 923
 - - pituitary tumour 923
 - - positive 923
 - - for red 923
 - - after retrobulbar neuritis 923, 925
 - - due to tobacco 923
 - - paracentral 924
 - - in disseminated sclerosis 630
 - - glaucoma 288
 - - perimetrix in defining 924
 - - peripheral 923
 - - ring, from choroiditis 924
 - - glaucoma 924
 - - in migraine 922
 - - unnoticed 923
 - (and see Amblyopia; Blind Spot; Blindness)
 Scratching, due to itching 658
 - perineal sore from 766
 - in phthieriasis 642
 - pigmentation of skin from 642
 - - pleasurable 658
 - - in scabies 918
 - - scabs due to 742
 - in vagabond's disease 642
 Screaming in hysteria 174
 - due to intussusception 101
 - night terrors 403
 - at night from tuberculous joint 432
 - in rickets 182

- Scrofula, age incidence of 892
 - ulcer of face in 892
Scrofuloderma 598, 683
 - in childhood 683
 - crusts in 683
 - Dühring on 683
 - glands in neck in 500
 - lupus distinguished from 683
 - vulgaris with 500
 - simulating 500
 - nodules in 500, 683
 - pustules in 683
 - scars from 500, 683
 - syphilis distinguished from 683
 - ulceration in 500, 683
Scrotum, abscess of 767
 - from tuberculous epididymis 851
 - boil of 849
 - chancre of 747, 767, 849
 - cyst in, spermatozoa in 588
 - translucency test of 588
 - ecchymosis of, with hamatocele 589
 - eczema of 747
 - in diabetes 334
 - marginatum of 747
 - elephantiasis of (Fig. 65) 849
 - epithelioma of (see Epithelioma)
 - erythema of 747
 - erythrasma of 747
 - exfoliative dermatitis of 747
 - fibrosarcoma of 849
 - fistula of (see Fistula)
 - gummatous ulcer of 747
 - hernia in (see Hernia)
 - intertrigo of 747
 - Jacques's erythema of 498
 - Madura disease of 893
 - mucous tubercle of 767
 - mustard gas ulcerating 767
 - myxoma of 889
 - oedema of (see Oedema)
 - Paget's disease of 747
 - papilloma of 767
 - hernia testis simulated by 769
 - pendulous, varicocele in 589
 - pruritus of 659
 - psoriasis of 747
 - ringworm of 747
 - scabies affecting 499
 - sebaceous cyst of 849
 - sensory centre for (Fig. 485) 631
 - sinus of (see Sinus)
 - soft sore of 849
SORES ON 767
 - (and see Sore, Scrotal)
 - suppurating cyst of 767
SURFACE AFFECTIONS OF 747
SWELLING OF 848
 - from hamatocele 589
 - hydrocele 588
 - phibils of 747, 767
 - from peri-urethral abscess 851
 - scular disease involving 767
 - tuberculous ulcer of 747
 - ulceration of (see Ulceration)
 - wart of 849
Scrubbing, cervical rib symptoms from 544
Scurvy, absence of vegetables and 679
 - albuminuria in 21
 - anaemia in 50, 346
 - Barlow's disease and 50, 679
 - bleeding gums in 93, 337, 362
 - blood per anum in 96
 - clot from kidney in 147
 - on board ship 51
 - bromidrosis in 803
 - bullae in 123, 125
 - in children 50, 51, 93, 679
 - colic in 148
 - diet and 51, 93, 346, 679
 - epistaxis in 274, 362
 - gums fetid in 50
 - spongy in 50
 - hæmatemesis in 336, 337, 346
 - hæmaturia in 348, 357
 - hæmoptysis in 362
Scurvy, contd.
 - hæmorrhage into bowel wall in 148
 - from gums in 50
 - mucous membranes in 50
 - into skin in 50
 - tongue in 851
 - hæmorrhages in 50
 - around hairs in 346
 - infantile 93, 679
 - anaemia in 93, 128
 - bed-clothes kicked off in 128
 - bleeding gums in 93, 128
 - cachexia in 128
 - fresh vegetables curing 93
 - hæmorrhages in 93
 - pain in bones in 128
 - periosteal hæmorrhage in 93
 - perspiring head in 128
 - purpura in 93
 - sleep sweats in 128
 - spongy gums in 93
 - stomatitis in 93
 - subperiosteal hæmorrhages in 128
 - tenderness of bones in 93, 128
 - inguinal glands enlarged in 477
 - menorrhagia in 482, 484
 - metrorrhagia in 488
 - mouth bleeding in 679
 - necrosis of soft parts in 125
 - night blindness due to 926
 - pasty pallor in 679
 - patent foods and 679
 - periosteal hæmorrhage in 50
 - poverty and 679
 - pyralism in 661
 - purpura in 676, 679
 - rarity of 51
 - renal colic in 147
 - rickets 50, 51, 679, 819
 - anaemia in 50, 819
 - diet and 819
 - femur painful in 819
 - hæmorrhage from mucous membranes in 819
 - in infants 819
 - painful swelling on bone in 819
 - among the rich 819
 - spongy gums in 819
 - spontaneous fracture 819
 - suppurative periostitis simulated by 819
 - tenderness of bones in 50
 - traumatic fracture simulated by 819
 - vegetable cure of 51
 - in sailors 93, 926
 - spongy gums in 93, 346, 679
 - stomatitis in 661
 - subcutaneous indurations in 346
 - swellings in muscles in 679
 - tenderness of bones in 679
Scybala, abdominal tumour due to 815
 - in colon 809, 815
 - intestinal constipation 159
 - palpable 805
 - in spastic colon 161
Sea-cat pricks, delirium from 211
Sea-cats, erythema from 275
 - headache from 278
 - poisoning by 278
 - swelling of skin from 278
 - urticaria from 278
 - vomiting from 278
Sea-sickness, headache from 372
 - vomiting in 929
Scal-like dwarf 234
Scamen, beri-beri in 516
 - scurvy in 93, 926
 - phosphuretted hydrogen poisoning in 421
Seamstresses, actinomycetes in 792
 - cramp in 189
 - sporotrichosis in 365
Season effect on xeroderma pigmentosum 888
Sebaceous cyst (see Cyst)
Seborrhœa 744, 745
 - baldness from 91, 92
 - due to bottle bacillus 92
 - corporis, syphilis simulated by 479
 - favus distinguished from 309
 - greasy scales in 311
 - itching in 658
 - lips affected in 459
 - occipital glands enlarged from 473
 - oleosa 744
 - pityriasis alba and 92
 - psoriasis simulated by 745
 - ringworm distinguished from 311
 - Sabouraud on 92
 - scales in 744, 745
 - of scalp 91, 745
 - sicca, scales in 744
 - tineæ, scycosis distinguished from 311
Seborrhœic dermatitis in infants 498
 - napkin region affected by 498
 - eczema (see Eczema)
Sebun, coloured 803
Second cervical nerve, distribution of (Fig. 580) 748
 - segment, sensory area for (Fig. 584) 751
 - dorsal nerve (see Nerve, Dorsal, Second)
 - segment, sensory area for (Fig. 584) 751
 - lumbar nerve, distribution of (Fig. 580) 748
 - segment, sensory area for (Fig. 584) 751
 - sacral segment, sensory area for (Fig. 584) 751
Secret drinking in women 85
Secretion of Bartholin's glands 231
 - cervical uterine, normal 231
 - uterine, normal 231
 - reaction of 231
vaginal, characters of 231
 - normal 231
 - lactic acid in 231
 - normal amount of 231
Sedum acre, dermatitis due to 916
See-saw cardiac impulse with adherent pericardium 71
Seeing red 926
Segment, spinal (see Spinal Segments)
 - Segmental areas of head (Figs. 658, 659) 869
 - nerve areas for teeth 549
Sciditz powder in inflating stomach 776, 801
Selenium, delirium from 212
Seleniuretted hydrogen, delirium from 212
 - fainting due to 297
 - hæmoglobinuria from 357
 - jaundice due to 408, 421
 - from paint 212, 421
 - tinnitus due to 878
 - vertigo due to 878
Sella turcica in dys-pituitarism 509
 - enlarged in acromegaly 255, (Fig. 310) 379, 436, 656
 - normal, skiagrams of (Figs. 308, 309) 378
 - shallow, gigantism and (Fig. 309) 379
 - X-rays of 509
Semen, examination in sterility 793, 794
 - spermatozoa in 794
Semicircular canals, embolism of, Menière's disease from 912
 - equilibrium and 205, 221
 - hæmorrhage into inner ear affecting 208
 - Menière's disease from 912
 - vertigo from 911
Semilunar cartilage, blow on, fainting from 297
 - displaced, synovitis from 435
Semilunar cartilage, contd.
 - internal, painful 431
 - tenderness over 435
 - kick on, vomiting due to 929
Semimembranosus, bursa (see Bursa)
 - nerve-supply of 609, (Fig. 471) 611
Seminal vesicles (see Vesicular Seminales)
Semitenidiosis, myoclonus of 174
 - nerve-supply of 609, (Fig. 471) 611
Senator, neuromyositis of 569
Senile alopecia 91
 - dyspepsia 400
 - endometritis 700
 - metastasis from 489
 - facies in congenital syphilis 498
 - gangrene (see Gangrene)
 - granular vaginitis, metastasis from 489
 - heart, palpitation from 594
 - insomnia 404
 - phthisis, bronchitis simulated by 700
 - tremor 879, 880
Senilism, infantilism with 237
Senility, ataxy from 77
 - impotence from 393
 - memory defects due to 25
 - premature 237
 - alopecia in 91
Senna, chrysophanic acid in 903
 - colic from 148
 - pink urine after 904
 - urine colour after 904
SENSATION, ABNORMALITIES OF 747
 - disturbed in peripheral neuritis 320
 - epigastric, as an aura 86
 - impaired in neuro-mycosis 569
 - retarded 863
 - of size, abnormal 926
 - in delirium 926
 - epilepsy 926
 - testicular, lost in syphilis 850
 - varieties of 748, 749
 - Sense of cold (see Cold Sense)
 - distance 220
 - FULLNESS 306
 - (and see Fullness, Sense of)
 - heat (see Heat Sense)
 - impending death 52
 - pain (see Pain Sense)
 - position, impaired from cerebral causes 76
 - in tabes dorsalis 75, 545
 - space 220
 - temperature lost in syringomyelia 320
 - unreality as an aura 86
Sensibility, deep 749
 - epicritic 749
 - protopathic 749
Sensory aphasia 770, 772
 - areas of back of head (Fig. 414) 550
 - face, neck, and head (Figs. 442, 443, 445) 550
 - radicular (Fig. 584) 751
 - changes from cerebellar lesions 76
 - subjective, in disseminated sclerosis 883
 - disturbances in paraplegia 627
 - impulses, basal ganglia and 73
 - Burdach's columns and 73
 - cerebnum and 73
 - crossing in medulla 73
 - cuneate nuclei and 73
 - fillet and 73
 - Goll's columns and 73
 - gracile nuclei and 73
 - loss of, ataxy from 74
 - Romberg's sign from 74
 - paths of 73
 - in cord (Fig. 583) 750
 - posterior columns and 73

- - - diabetes .. 334
- - and hard in cirrhosis of liver .. 466
- - - pyelitis .. 718
- - in myxedema .. 290
- - - pneumonia .. 789
- - and shrivelled in carcinoma of liver .. 468
- - epithelioma of (see Epithelioma)
- - favus of (Fig. 262) 309
- - fissures in, in pellagra .. 279
- - 'flowers' on, from ankylostomiasis .. 635
- - flushed in pneumonia .. 789
- - FUNGUS AFFECTIONS OF .. 309
- - gangrene of, leucocytosis slight in .. 453
- - glossy in syringomyelia .. 142
- - gumma of .. 315
- - haemorrhage into (see Purpura)
- - hot dry, in pneumonia .. 419
- - hypertrophy in syringomyelia .. 320
- - inelastic, emphysema and .. 199
- - irritation of, in cheiro-pompholyx .. 124
- - dermatitis herpetiformis .. 126
- - herpes gestationis .. 124
- - (and see Itching)
- - in jaundice .. 405
- - lustreless in diabetes .. 334

Skin, contd.

- melanotic carcinoma of .. 886
- - sarcoma from 477, 886
- - moist, in Graves' disease 292
- - mosaic, in prurigo .. 601
- - mycosis fungoides of .. 886
- - myxoma of .. 889
- - nailhead, in ichthyosis hystrix .. 599
- - necrosis of, in leprosy .. 82
- - - due to phaeol .. 918
- - nodules in (see Nodules)
- - nutmeg-grater, in prurigo .. 601
- - Paget's disease of .. 886, 887
- - pain in, in erythema bullosum .. 126
- - parchment-like, in scleroderma .. 886
- - peeling of, suggesting scarlet fever .. 12
- - pigimentary, nevus-sarcomatosis of .. 454
- - PIGMENTATION OF .. 642
- - (and see Pigmentation of Skin)
- - plucked fowl, in pityriasis rubra pilaris .. 600
- - primrose yellow, in pernicious anemia .. 83, 933
- - puckering of, over carcinoma of breast .. 839
- - purgent, in pneumonia .. 789
- - rashes in cerebrospinal meningitis .. 278
- - - encephalitis lethargica .. 278
- - (and see Erythema Rash; Vesicles, etc.)
- - reddening of, over abscess .. 825, 844
- - - mastitis .. 888
- - in mycosis fungoides .. 888
- - due to peristitis 817, 862
- - over tuberculous bone .. 819
- - (and see Erythema)
- - ringworm affecting .. 309
- - rugose, in prurigo .. 601
- - scallow, in myxedema .. 290
- - - pigmented, in tertiary syphilis .. (Fig. 95) 91
- - sarcoma (see Sarcoma)
- - sensory nerve distribution in .. (Fig. 580) 743
- - sepsis, general enlargement of lymph glands in .. 471
- - shiny, over ascites .. 59
- - sodium hypobromite effervescence on .. 803
- - sore on, glands inflamed from .. 562
- - sores in jaundice .. 405
- - staining of, due to chrysarobin .. 917
- - - iodine .. 918
- - in syphilis .. 919
- - stiff in scleroderma .. 645
- - test, von Pirquet's, in tuberculosis .. 563, 819
- - thickened in myxedema .. 50
- - pellagra .. 279
- - scleroderma .. 645
- - trophic changes in, in syringomyelia .. 619
- - - tic douloureux .. 548
- - TUMOURS .. 886
- - ulceration of (see Ulceration)
- - urea crystals on .. 803
- - white patches in, in leprosy .. 645
- - - leucoderma .. 645
- - - syphilis .. 645
- - wrinkled in myxedema (Fig. 342) 507
- - xeroderma pigmentosum of .. 886
- - yellow, in cretin .. 290
- - from picric acid .. 645
- - plaques in .. 889
- - from T.N.T. .. 645
- - (and see Jaundice)
- - Skins, mercury in curing .. 84, 882
- - rabbit, peripheral neuritis from .. 84
- - in stools .. 495
- - SKODAIC RESONANCE .. 755
- - - from big heart .. 755

Skodaic resonance, contd.

- - from carcinoma of liver .. 755
- - enlarged spleen .. 755
- - gumma of liver .. 755
- - hepatic abscess .. 755
- - hydatid cyst of liver .. 755
- - in leukaemia .. 755
- - from mediastinal new growth .. 755
- - new growth of lung .. 755
- - pericardial effusion .. 755
- - pleural effusion .. 209, 755
- - with pneumonia .. 755
- - from subdiaphragmatic abscess .. 755
- - Skull, big, in rickets .. 232
- - bones enlarged in acromegaly .. 656
- - broad in anosteoplasia .. 233
- - changes in leontiasis osses .. 255
- - cracking of bones of .. 188
- - enlarged in leontiasis osses .. 820, 837
- - fracture of (see Fracture)
- - hot-cross-bun, in congenital syphilis 256, 819, 866
- - - rickets .. 232, 256
- - ivory exostosis of .. 820
- - natiform .. 819
- - operation on, glycosuria from .. 330
- - osteoma of (see Osteoma of Cranium)
- - petriostitis of .. 866
- - rarefaction of, from craniotabes .. 190
- - - crepitus from .. 190
- - from hydrocephalus .. 190
- - in rickets .. 190
- - from syphilis .. 190
- - round, in anosteoplasia .. 233
- - skiagram of, in leontiasis osses .. (Fig. 215) 255
- - square in rickets .. 232
- - sutures stretched in hydrocephalus .. 256
- - syphilitic node on .. 819
- - tenderness of, with cerebral lesions .. 371
- - in rickets .. 182
- - tumour of, headache from .. 370
- - - secondary to breast .. 866
- - - prostate .. 866
- - - sarcoma of suprarenal .. 866
- - - testis .. 866
- - - thyroid gland .. 866, 876
- - tenderness of scalp from .. 865, 866
- - X-rays of, in diagnosing dyspituitarism .. 509
- - (and see Head)
- - Skunk cabbage, dermatitis due to .. 916
- - Skutsch's pelvimeter .. 251
- - Slapping first sound with mitral stenosis .. 2, 268
- - Slaty stools after bismuth 481
- - Slaughterers, post-mortem warts in .. 301
- - Sleep, Babinski's sign in .. 88
- - death during (see Death)
- - disturbed in rickets .. 182
- - hours required .. 401, 402
- - lack of, diabetes from .. 331
- - - fainting due to .. 296
- - periodic breathing in .. 139
- - restlessless in, in rickets 866
- - sweats in infantile scurvy 128
- - (and see Night Sweats)
- - tremor ceasing during .. 880
- - Sleeping on back, priapism from .. 657
- - sickness .. 708
- - - coma in .. 153
- - delirium in .. 211
- - enlarged glands in .. 37
- - general account of .. 37
- - lymphocytes in cerebrospinal fluid in .. 383
- - spread by Glossina palpalis .. 37
- - trypanosomes in cerebrospinal fluid in .. 37, 384
- - from trypanosomiasis .. 37, 153

Sleeping sickness, contd.

- in Uganda . . . 37
- (and see Trypanosomiasis)
- Sleepiness (see Drowsiness)
- Sleeplessness in dermatitis
- herpetiformis . . . 126
- from itching . . . 658
- loss of weight due to . . . 933
- from periproctal abscess . . . 874
- (and see Insomnia)
- Sleepy sickness (see Encephalitis Lethargica)
- Sleeve anaesthesia in hysteria . . . 615
- Sling in brachitis . . . 583
- Slipping rib (see Rib)
- through hands in pseudo-hypertrophic muscular paralysis . . . 625
- Slobbering in dements . . . 662
- Slough, washleather, in gumma . . . 898
- Sloughing** . . . 318
- of cheek . . . 95
- after erysipelas . . . 824
- of fibroid . . . 842
- in typhoid fever . . . 784
- Slow-combustion stove, carbon monoxide poisoning from . . . 155
- Slurring speech in Friedreich's ataxy . . . 145
- Small occipital nerve (see Nerve)
- sciatic nerve, distribution of . . . 748
- Small-pox, account of** . . . 684
- acute simulated by 682, 686
- albuminuria in . . . 16
- albumosuria in . . . 20
- antimony rash simulating . . . 917
- arthritis from . . . 425
- backache in . . . 345
- bathing drawers area affected by . . . 499, 678
- black . . . 345
- bleeding gums in . . . 345, 362
- bromide eruption simulating . . . 687
- centrifugal distribution of . . . (Fig. 686) 920
- chicken-pox distinguished from . . . 919, 920
- simulating . . . 685
- coma in . . . 153
- confluent 684, (Fig. 542) 665
- copiba rash simulating 687
- crusts in . . . 743
- delirium in . . . 211
- discrete, illustrated (Fig. 541) 685, (Fig. 686) 920
- eczema simulating . . . 686
- epigastric pain in . . . 345
- epistaxis in . . . 345, 362
- eruption in mouth in . . . 762
- erythema in . . . 276, 278
- multiforme simulating 686
- flexor surfaces affected in 685
- gangrene from . . . 317
- hematemesia from . . . 336
- hematemia in . . . 345, 348
- hemoptysis in . . . 362
- hemorrhages in 345, 684
- hemorrhagic, hematemesia in . . . 345
- headache in . . . 345
- hoarseness in . . . 387
- hydrocele from . . . 588
- impetigo simulating . . . 686
- iodide eruption simulating . . . 687
- itching in . . . 743
- leucocytosis in . . . 454
- rare in . . . 453
- loculation of vesicles in malignant . . . 345, 362
- melena in . . . 345
- menorrhagia after . . . 482
- modified . . . 684
- mucous membranes affected by . . . 684
- oesophagus affected in . . . 762
- pain in eye in . . . 547
- limbs in . . . 570
- papules in 678, 684, 762
- parts affected by 685, (Fig. 686) 920

Small-pox, contd.

- pharynx affected in . . . 762
- pits from . . . 684, 743
- pytelism from . . . 661
- purpura in . . . 345, 676, 678
- pustules in 678, 681, 684, 743, 762, 913
- **Ricketts on** . . . 686, 920
- rigors in . . . 345, 737
- roseola in . . . 684
- scars in . . . 684, 743
- scarlet fever simulated by . . . 684
- scars from . . . 743
- sore throat in . . . 757, 762
- spleen enlarged in 778, 786
- submucous hemorrhage in . . . 345
- symptomatic leukaemia after . . . 454
- **syphilis simulating** 683, 686, 691
- thyroid gland enlarged in . . . 877
- tongue swollen in . . . 851, 852
- ulceration of larynx in . . . 244
- cyanosis from . . . 197
- haemoptysis from . . . 361, 367
- umbilication in . . . 743
- vaccinia simulating 685, 920
- vesicles in 678, 684, 762
- multifollicular in . . . 919
- umbilicated in 913, 920
- vomiting in . . . 345
- Smart weed, dermatitis due to . . . 916
- SMELL, ABNORMALITIES OF** . . . 756
- centre in uncinate gyrus . . . 756
- defective, causes of . . . 756
- loathsome, fainting due to . . . 296
- loss of power of . . . 756
- lost in hysteria . . . 754
- mouse, in lavus . . . 311
- offensive, vomiting due to . . . 929
- subjective, due to empyema of antrum of Highmore . . . 756
- as epileptic aura . . . 756
- due to hippcampal lesion . . . 756
- in hysteria . . . 756
- insanity . . . 756
- due to meningeal thickening . . . 756
- sinusitis . . . 756
- tumour of brain . . . 756
- Smile, fixed, from strychnine . . . 521
- tetanus . . . 521
- nasal, in myopathy . . . 291
- transverse, in myopathy . . . 291
- Smoking (see Tobacco)
- Smoky urine in acute nephritis . . . 12
- general infections . . . 90
- (and see Hematuria)
- Snail-track ulcers of pharynx in syphilis 186, 760
- in syphilis . . . 691
- Snake-bite, account of** . . . 422
- delirium from . . . 211
- dyspnoea from . . . 246
- erythema from . . . 276
- gangrene from . . . 317
- general oedema from . . . 514, 516
- haemoglobinuria from . . . 357
- oedema of limb from . . . 514
- purpura due to . . . 676
- Sner, myasthenic (Fig. 246) 291
- Sneezing, epistaxis from 273
- regurgitation of food through nose from . . . 730

- Sonorous rhonchi with bronchitis . . . 208
- Soot, eczema from . . . 917
- epithelioma from . . . 917
- warts from . . . 917
- Sordes in acute yellow atrophy . . . 93
- asthenic states . . . 94
- fevers . . . 94
- foul breath from . . . 112
- in general paralysis . . . 93
- malignant cachexia . . . 93
- pneumonia . . . 93
- typhoid fever . . . 93
- Sore on arm, axillary glands enlarged from . . . 475
- back, axillary glands enlarged from . . . 475
- inguinal glands enlarged from . . . 476
- breast, axillary glands enlarged from . . . 475
- buttock, inguinal glands enlarged from . . . 476

Sore, contd.

- on cheek, pre-auricular gland enlarged from 473
 - dissecting-room, epithelial gland enlarged from 476
 - on ear, pre-auricular gland enlarged from 473
 - eyelid, pre-auricular gland enlarged from 473
 - **FINGER** 301
 - axillary glands enlarged from 475
 - in infective endocarditis 302
 - Morvan's disease 302
 - syringomyelia 302
 - on foot, abscess in groin due to 831
 - inguinal glands enlarged from 476
 - popliteal glands enlarged from 477
 - genital, abscess in groin due to 831
 - inguinal glands enlarged from 830
 - heel (see Pain in Heel)
 - on leg, inguinal glands enlarged from 476
 - popliteal glands enlarged from 477, 845
 - lip due to chancre Fig. 94 94
 - upper, from diphtheria 224
 - mouth, cervical glands enlarged from 474
 - in sprue 47, 709
 - on neck, cervical glands enlarged from 474
 - nose from diphtheria 224
 - on penis from balanitis 763
 - bite 763
 - chancre 763
 - epithelioma 763
 - gumma 763
 - herpes progeneralis 763
 - inguinal glands enlarged from 476
 - due to injury 763
 - soft sore 763
 - suppurative lymphatic glands from 695
 - from tuberculosis 763
 - perineal, aching in perineum from 579
 - due to epithelioma 766
 - gonorrhoea 766
 - inguinal glands enlarged from 476, 814
 - due to prostatic suppuration 766
 - pruritus ani 766
 - scratching 766
 - skin inflammation 766
 - syphilis 766
 - tinea cruris 766
 - urethral fistula 766
 - vaginal discharge 766
 - scrotal, from carcinoma of testis 768
 - embryoma of testis 768
 - gumma of testis 768
 - inguinal glands enlarged from 476
 - from sarcoma of testis 768
 - sebaceous cyst 769
 - suppurating lymphatic glands from 695
 - from testicular abscess 768
 - tuberculosis of testis 768
 - on shoulder, axillary glands enlarged from 475
 - skin, glands inflamed from 562
 - soft (see Soft Sore)
 - on thigh, inguinal glands enlarged from 476
 - **THROAT** 757
 - due to actinomycosis 757
 - acute laryngitis 758
 - pharyngitis 757
 - rheumatism 282, 568
 - adenitis from 474
 - due to adenitis 758
 - ammonia 758, 763
 - aspergillosis 757
 - bacteriological examination in 758

Sore throat, contd.

- due to carcinoma of fauces 757
 - larynx 758
 - palate 757
 - pharynx 757
 - tonsil 757
 - uvula 757
 - catarrh of fauces 757
 - palate 757
 - uvula 757
 - cervical adenitis 763
 - glands enlarged from 12, 474
 - in chicken-pox 757, 762
 - children 760, 761
 - due to chlorine 758
 - chronic pharyngitis 757
 - in clergymen 186, 757
 - with condylomata 854
 - from corrosive 758, 763
 - in costermongers 186, 757
 - cough from 186
 - cultures in 84
 - in dengue 571
 - due to diphtheria 84, 242, 757, 758
 - medium severity Fig. 594 750
 - dysphagia from 244
 - due to epithelioma of tonsil 757
 - fish-bone in tonsil 757
 - follicular tonsillitis 757
 - foreign body in tonsil 757
 - foul breath from 113
 - due to German measles 757
 - granular pharyngitis 186
 - gumma 757
 - Hoffmann's bacilli 757
 - hot steam 758
 - hyperaemia Fig. 591 758
 - due to influenza bacilli 757
 - injury of larynx 758
 - Kirkland's disease 757, 761
 - measles 757
 - morbilli 757
 - thalid 757
 - motor-car dust 761
 - mumps 758, 763
 - overuse of voice 186, 757
 - in peliosis rheumatica 680

 - due to pneumobacilli 757
 - pneumococci 757
 - post-pharyngeal abscess 757
 - quinsy 757
 - sarcoma of tonsil 757
 - scarlet fever 12, 282, 757, 763
 - sewers 761
 - simple, diphtheria 730
 - simulating 730
 - in small-pox 757, 762
 - due to Spirochaeta pallida 757
 - staphylococci 757
 - in stockbrokers 186, 757
 - due to streptococci 757
 - in syphilis 417, 476, 479, 602, 684, 757, (Fig. 600) 760
 - due to syphilitic laryngitis 758
 - tonsillitis 757
 - in trench fever 710
 - due to tubercle bacilli 757
 - tuberculosis of fauces 757
 - palate 757
 - tonsil 757
 - uvula 757
 - tuberculous laryngitis 758
 - in Vincent's angina 757, 760
 - (and see Tonsillitis)
 - toe, abscess in groin due to 831
 - femoral abscess from 825
 - inguinal glands enlarged from 476, 830
 - popliteal glands enlarged from 477
 - tongue after anaesthetics 591
 - in dengue 571

Sore tongue, contd.

- from mouth-gag 591
 - in pernicious anaemia 591
 - sprue 47, 709
 - syphilis 602, 684
 - from tongue forceps 591
 - on vulva, inguinal glands enlarged from 476
 - **SORES, PENILE** 763

 - - enlarged glands in neck with 628
 - - fracture-dislocation due to 306
 - - gait due to 868
 - - girdle pains from 536
 - - groin abscess from 831
 - - hip disease with 628
 - - hydatid disease simulating 194, 620
 - - hyperæsthesia due to 754
 - - iliac abscess and 724
 - - incidence of 432
 - - indigestion simulated by 396
 - - intercostal neuralgia simulated by 193
 - - pain from 193, 531
 - - jerky movements avoided in 193
 - - knee disease with 628
 - - kyphosis from 193, 234, 480
 - - lameness due to 868
 - - lardaceous disease due to 784
 - - lateral curvature distinguished from 528
 - - local rigidity with 528
 - - tenderness of spine in 628
 - - lordosis with 195
 - - in lumbar region 610
 - - lupus vulgaris with 628
 - - milk and 628, 932
 - - neurosis simulated by 583
 - - new growth simulating 796
 - - pain in abdomen from 151, 193, 396, 594
 - - back from 528, 565, (Fig. 480) 628, 868
- Spinal caries, contd.**
- - pain in chest from 536
 - - epigastrium from 536
 - - leg due to 176, 868
 - - in shoulder from 580, 583
 - - between shoulders from 566
 - - paralysis of one leg from 610
 - - paraplegia from 145, 176, 193, 620, 621, 623
 - - post-pharyngeal abscess due to 794
 - - simulated by 762
 - - Pott's curvature in 628
 - - psoas abscess from 458, 628, 698, 724, 831, 868
 - - muscle affected in 195
 - - rickets simulating 458, 868, 869
 - - rigidity of back from 193, 195, 566, (Fig. 480) 628, 868
 - - root palsies from 620
 - - in sacral region 610
 - - sciatica simulated by 539
 - - skiagrams of (Fig. 451) 565, (Fig. 480) 628
 - - lateral view (Fig. 482) 629
 - - missing the disease (Fig. 481) 629
 - - stomach-ache simulated by 193
 - - stooping gait in 193
 - - sudden paraplegia with 306
 - - swelling in iliac fossa due to 829
 - - talipes from 145
 - - tenderness of spine due to 193, 195, 869
 - - transverse myelitis from 486, 626
 - - tuberculous peritonitis with 65
 - - turnout of back from 210
 - - uterine calculus simulated by 565
 - - X rays in diagnosing 193, 453, 536, 565, 584, 629, 831
 - - centre for micturition 490, 494
 - - centres for reflexes (Fig. 486) 631
 - - sensory (Fig. 487) 831
 - - cord affected in polymyositis 702
 - - alocheiria from hemisection of 22
 - - bruising of, pains after 820
 - - bullet damaging 22
 - - central canal of, affected in syringomyelia 628
 - - changes in pernicious anaemia 83
 - - combined sclerosis of (see Combined Sclerosis)
 - - compression of, alocheiria from 22
 - - - anæsthesia from 754
 - - - by callus 22
 - - - caries 22, 176, 623
 - - - fracture-dislocation 22, 495
 - - - impotence from 393
 - - - micturition difficult from 492
 - - - by neoplasm 22
 - - - pain in legs from 176
 - - - paraplegia from 621, 623
 - - - retention of urine from 495
 - - - from spinal injury 176
 - - - by tumour 176
 - - - defects, ataxy from 74
 - - - disease, retention of urine from 55
 - - - embolism of 630
 - - - gas-bubbles liberated in 77
 - - - gunium of, alocheiria from 22
 - - - Brown-Séquard paralysis from 608

Spinal cord, contd.

hemorrhage into (see Hemorrhage into Cord) ..
 - hemisection of, al-
 locheiria from .. 22
 - hypergliomosis of
 central canal of .. 81
 - injury to (see Injury)
 - lesion, arm paralysis
 from .. 718
 - ataxy from .. 68, 78
 - bladder distended
 from .. 61
 - in Clarke's column,
 effects of .. 145
 - causing aliocheiria .. 22
 - muscular atrophy,
 list of .. 80
 - reaction of de-
 generation .. 80
 - in disseminated
 sclerosis .. 76
 - Friedreich's ataxy .. 76
 - gangrene from .. 317
 - incontinence of
 urine in .. 61
 - meteorism from .. 486
 - oculopupillary sym-
 ptoms from .. 618
 - palpebral fissure
 small from .. 618
 - pupil small from .. 618
 - in syringomyelia .. 81
 - tabes dorsalis .. 76
 - lumbosacral, syphi-
 litic meningitis of
 meninges of, Brown-
 Sequard paralysis
 from .. 608
 - neoplasm of, allo-
 cheiria from .. 22
 - ataxy from .. 76
 - Brown Sequard pa-
 ralysis from .. 608
 - unilateral effects of
 neurofibroma of,
 lipiodol locating ..
 (Fig. 270) 526
 - non-sensory afferent
 paths in .. 73
 - psychomyelitis of,
 abdominal pain
 from .. 151
 - colic simulated by .. 151
 - paraplegia from .. 621
 - reflex centres in
 (Fig. 486) 631
 - sclerosis in per-
 nicious anemia .. 30
 - sensory localization
 in .. (Fig. 485) 631
 - paths in .. 73, 730
 - softening of .. 630
 - impotence from .. 393
 - incontinence of
 urine from .. 495
 - stab damaging .. 22
 - not tinged in jaun-
 dice .. 406
 - transverse lesion of,
 bedsores from .. 321
 - from fracture of
 spine .. 452
 - knee-jerk absent
 from .. 451
 - tumour of, abdominal
 pain from .. 594
 - micturition difficult
 from .. 492
 - muscle wasting from .. 80
 - pain in back from .. 528
 - legs from .. 176
 - paralysis of arm
 from .. 620
 - one leg from .. 611
 - paraplegia from .. 620
 - R.D. from .. 176
 - spastic legs from .. 176
 - unilateral lesion of,
 effects of (Fig. 469) 608
 - CURVATURE .. 191
 - due to ancurysm .. 869
 - caries .. 868, 869
 - cervical caries .. 795
 - dwarfism from .. 234
 - from fibroid lung .. 269
 - growth .. 869
 - hydatid disease .. 194

Spinal curvature, contd.

lateral (see Scoliosis) ..
 - liver displaced from .. 461
 - in ontogenesis im-
 perfecta .. 233
 - Pott's, in spinal caries .. 628
 - with psoas abscess .. 458
 - in rickets .. 232
 - syringomyelia .. 320, 619
 - from torticollis .. 795
 - (and see Kyphosis;
 and Lordosis)
 - gliosis, brachial neuritis
 simulated by .. 544
 - lesions, lipiodol and
 X rays in locating .. 326
 - meninges (see Meninges)
 - meningitis (see Meningitis)
 - nerve (see Nerve)
 - root (see Nerve Root)
 - segments, abdominal re-
 flexes corresponding to 607
 - for arm .. 615
 - cervical, eighth, af-
 fected by polio-
 myelitis .. 142
 - in syringo-
 myelia .. 142
 - hamatomyelia at .. 620
 - sensory area for
 (Fig. 584) 751
 - fifth, for arm .. 615
 - sensory area for
 (Fig. 584) 751
 - fourth, sensory
 area for (Fig. 584) 751
 - second, sensory
 area for (Fig. 584) 751
 - seventh, for arm .. 615
 - cervical, rib af-
 fecting .. 82
 - sensory area for
 (Fig. 584) 751
 - third, sensory area
 for (Fig. 584) 751
 - eighth, for arm .. 615
 - dorsal, eighth, sensory
 area for (Fig. 584) 751
 - eleventh, sensory
 area for (Fig. 584) 751
 - fifth, sensory area
 for (Fig. 584) 751
 - first, affected by
 poliomyelitis .. 142
 - in syringo-
 myelia .. 142
 - for arm .. 615
 - hamatomyelia at .. 620
 - sensory area for
 (Fig. 584) 751
 - fourth, sensory
 area for (Fig. 584) 751
 - ninth, sensory area
 for (Fig. 584) 751
 - second, sensory area
 for (Fig. 584) 751
 - seventh, sensory
 area for (Fig. 584) 751
 - temporal region
 connected with .. 867
 - sixth, sensory area
 for (Fig. 584) 751
 - tenth, lower ab-
 dominal reflexes
 lost with lesion at 607
 - sensory area for
 (Fig. 584) 751
 - skin area for .. 573
 - third, sensory area
 for (Fig. 584) 751
 - twelfth, sensory
 area for (Fig. 584) 751
 - lumbar, fifth, sensory
 area for (Fig. 584) 751
 - first, sensory area
 for (Fig. 584) 751
 - fourth, sensory area
 for (Fig. 584) 751
 - second, sensory area
 for (Fig. 584) 751
 - third, sensory area
 for (Fig. 584) 751
 - reflex centres in,
 various (Fig. 486) 631
 - sacral, first, claw-foot
 from lesion of .. 141

Spinal segments, contd.

sacral, first, sensory
 area for (Fig. 584) 751
 - second, claw-foot
 from lesion of .. 141
 - sensory area for
 (Fig. 584) 751
 - sensory localization in
 successive (Fig. 485) 631
 - thrombosis, transverse
 myelitis from .. 486
 - tumour, abdominal
 pain from .. 594
 - brachial neuritis simu-
 lated by .. 544
 - (and see Spine)
 Spinal, nerve-supply of 620
 - paralysis of, in Erb's
 palsy .. 618
 - Spindled fingers (see Fingers)
 Spine, actinomycosis of
 (see Actinomycosis)
 - affecting .. 687, 698
 - aneurysm eroding (see
 Aneurysm Eroding
 Spine)
 - angular curvature of .. 193
 - arthritis of (see Arthritis)
 - carcinoma of (see Car-
 cinoma)
 - caries of (see Spinal Caries)
 - cracked .. 795
 - defective movement in .. 566
 - deformity of, with psoas
 abscess .. 831
 - dislocation of, allo-
 cheiria from .. 22
 - entasement of .. 610
 - eroded by mediastinal
 growth .. 534
 - fracture of (see Fracture)
 - fracture-dislocation of
 (see Fracture-dislocation)
 - growth eroding, pain in
 back from .. 528
 - in, after amputation
 of breast .. 583
 - backache from .. 574
 - neurosis simulated by .. 583
 - pain in arm from .. 545
 - shoulder from .. 583
 - skiagram of (Fig. 484) 630
 - X rays in diagnosing .. 583
 - gumma of, abdominal
 pain from .. 151
 - colic simulated by .. 151
 - hydatid of (see Hydatid
 Disease)
 - hyperaesthesia of, in
 neurasthenia .. 754
 - hysterical .. 870
 - injury of (see Injury)
 - irritable, after typhoid
 fever .. 870
 - lateral curvature of
 (see Scoliosis)
 - lipiodol injection into,
 skiagram of (Fig. 270) 326
 - lumbar, hairy mole over .. 622
 - pigmented mole over .. 622
 - malignant disease of,
 brachial neuritis simu-
 lated by .. 544
 - root palsies from .. 620
 - spastic paraplegia
 from .. 620
 - mediastinal growth
 eroding .. 534
 - myeloid sarcoma of .. 796
 - myeloma of, abdominal
 pain from .. 151
 - albumosuria from .. 20
 - colic simulated from .. 151
 - skiagram of (Fig. 24) 20
 - necrosis of, swelling in
 iliac fossa due to .. 829
 - new growth in, account
 of .. 869
 - actinomycosis simu-
 lating .. 629
 - anaesthesia from .. 869
 - ankle-clonus with .. 869
 - Babinski's sign with .. 869
 - from breast .. 610, 629
 - carcinoma of breast .. 796
 - thyroid .. 796
 - compression mye-
 litis from .. 628
 - paraplegia due to .. 626
 - entasement from .. 610

Spine, new growth in, contd.

girdle pain from .. 869
 - hydatid disease
 simulating .. 194, 629
 - indigestion simu-
 lated by .. 396
 - intercostal tender-
 ness from .. 862
 - knee-jerks increased
 from .. 869
 - kyphosis from .. 193
 - pain in abdomen
 from .. 396
 - neck from .. 796
 - shoulder from .. 580
 - paralysis of leg from .. 610
 - rigidity of back
 from .. 566
 - due to sarcoma .. 796
 - spastic paraplegia
 from .. 869
 - sphincter trouble
 from .. 869
 - spinal caries simu-
 lated by .. 629, 796
 - stiff neck from .. 796
 - transverse myelitis
 from .. 626
 - tumour of back
 from .. 210
 - X rays in diagnos-
 ing .. 610, 629
 - not showing
 (Fig. 483) 630
 - on os calcis (see Os Calcis)
 - osteo-arthritis of (see
 Osteo-arthritis)
 - pain in (see Pain)
 - railway .. 870
 - glyco-suria from .. 331
 - tenderness of spine
 from .. 868
 - tremor with .. 879
 - referred pain in .. 867
 - (Fig. 600) 871
 - rheumatoid arthritis of
 (see Arthritis)
 - rigidity of, from caries
 of spine .. 193
 - with psoas abscess .. 831
 - tenderness with .. 867
 - sarcoma of (see Sarcoma)
 - stiffness of, due to psoas
 abscess .. 698
 - suppuration of, swelling
 in iliac fossa due to .. 829
 - TENDERNESS OF .. 867
 - (and see Tenderness
 of Spine)
 - tuberculosis of (see
 Spinal Caries)
 - typhoid (see Typhoid
 Spine)
 - wound of, bedsores from .. 321
 - (and see Back)
 Spinocerebellar ataxy, cho-
 reiform movements in .. 885
 Spinal ganglion, deafness
 from changes in .. 207
 SPIRALS, CURSCH-
 MANN'S .. 131, 191
 Spirilla in Vincent's
 angina .. 760, (Fig. 609) 779
 - of Vincent, stomatitis
 from .. 95
 Spirochæta Obumbrati
 (Fig. 606) 779
 - in blood .. 36, 709, 785
 - Leishman's stain for .. 36
 - motile .. 36
 - in relapsing fever .. 36, 420, 709, 738, 785
 - size of .. 36
 - pallida in cerebrospinal
 fluid .. 384
 - from chancre .. 230, 683, 764, 766, 824, 830, 854, 898
 - fixing of tissues for .. 854
 - Giemsa's stain for .. 854
 - gumma of liver and .. 417
 - Indian ink in demon-
 strating .. 854
 - Levaditi's stain for .. 854
 - from palate .. 730
 - rheumatoid arthritis
 from .. 47
 - sore throat due to .. 757
 - in syphilis .. 94, 760, 764
 - tonsillitis due to .. 757

- Spirochætes in blood in
 spirochætosus ictero-
 hæmorrhagica .. 420
 - rat-bite fever .. 740
 Spirochætosus from cats
 - delirium in .. 213
 - from ferrets .. 213
 - lcterohæmorrhagica
 - account of .. 419, 693
 - albuminuria in .. 16, 420
 - coma in .. 153, 420
 - conjunctival injection
 in .. 420
 - convulsions in .. 420
 - delirium in .. 211
 - epistaxis in .. 420
 - eyeballs tender in .. 420
 - giddiness in .. 419
 - guinea-pig inoculation
 in diagnosing 420, 693
 - hæmatemesis in .. 420
 - hæmaturia in .. 420
 - hæmoptysis in .. 420
 - hæmorrhages in .. 420
 - headache in .. 419
 - herpes facialis in 419, 693
 - influenza simulated by 693
 - jaundice in 408, 419, 693
 - liver enlarged in .. 419
 - lung catarrh in .. 420
 - melæna in .. 420
 - nephritis in 419, 420
 - pain in back in .. 419
 - limbs in .. 419
 - pneumonia in .. 420
 - simulated by .. 693
 - pulse relatively slow
 in .. 419
 - purpura in .. 420, 676
 - pyrexia in .. 419
 - rigor in .. 737
 - spirochæte in blood in .. 420
 - urine in .. 420
 - spleen enlarged in .. 419
 - stupor in .. 420
 - temperature chart in
 (Fig. 552) 693
 - tube-casts in .. 420
 - two stages of .. 419
 - urine injections in
 diagnosing .. 693
 - from mice .. 213
 - rat-bite fever from .. 213
 - from rats .. 213, 693
 - stoats .. 213
 - weasels .. 213
 Spironema recurrentis
 (Fig. 606) 779
 Splashing pulse from
 aortic disease 259, 263
 Spleen, abscess of, general
 peritonitis from .. 734
 - very rare in .. 778
 - ague-cake .. 779
 - bruit over .. 775, 776
 - carcinoma very rare in 778
 - dipping to palpate .. 59
 - dislocation of 775, 777, 788
 - embolism of (see Embolism)
 - ENLARGEMENT OF .. 774
 - mural tumour
 due to .. 782
 - in acholuric jaundice
 .. 50, 72, 81
 - ascites simulated by 774
 - in Banti's disease .. 83
 - bronchiectasis from 367
 - carcinoma of pancreas
 simulating .. 775
 - splenic flexure simu-
 lating .. 775
 - stomach disten-
 guished from .. 776
 - simulated .. 775
 - in catarrhal jaundice
 causes of .. 411
 - in children .. 49, 782
 - from chloroma .. 257
 - in chronic malaria .. 778
 - cirrhosis of liver 67,
 83, 336, 344, 345,
 415, 465, 468, 782, 783
 - colon tumour simu-
 lating .. 814
 - in congenital syphilis
 .. 778, 782
 - diphtheria .. 778, 786
 - dullness due to 775, 814
 - in Egypt 72, 709, 781
 - from embolism 778, 787
 Spleen, enlargement of, contd.
 - with enlarged cervical
 glands .. 475
 - in epidemic jaundice 420
 - erysipelas .. 778, 785
 - erythrasma .. 294
 - faecal mass simulating
 .. 775, 777
 - in familial acholuric
 jaundice .. 415, 778
 - splenomegaly .. 72
 - fibroid lung from .. 367
 - in Gaucher's disease
 .. 778, 781
 - general enlargement
 of glands with .. 66
 - in general tubercu-
 losis .. 778, 787
 - hæmatemesis from
 .. 336, 345, 346
 - hæmatoma simulating 778
 - from hæmorrhage into
 it .. 788
 - in Hanot's cirrhosis
 .. 414, 466
 - Hodgkin's disease
 49, 72, 93, 471,
 475, 476, 778, 782
 - hypochondrium .. 812
 - infantilism with .. 235
 - in infants .. 49
 - infective endocard-
 itis 46, 704, 714,
 778, (Fig. 615) 787
 - inferior vena cava
 obstructed by .. 909
 - in influenza .. 778, 787
 - kala-azar 37, 72, 709, 778
 - kidney simulating 775, 814
 - in lardaceous disease
 .. 10, 47, 469, 778, 784
 - leaking aneurysm
 simulating .. 778
 - to left iliac fossa .. 827
 - in left lumbar region 814
 - leukæmia 128, 272,
 345, 346, 357
 - loin .. 812
 - not filled out by .. 775
 - in lumbar region .. 812
 - lymphadenoma 66, 83, 412
 - lymphatic leukæmia
 34, 66, 71, 83,
 652, 656, 679, 778
 - malaria 346, 347, 785
 - Malta fever 571, 691,
 778, 785
 - Miculicz's syndrome 848
 - mixed leukæmia .. 778
 - mobility of .. 438
 - notch in 438, 774,
 775, 827
 - omental tumour
 simulating .. 814
 - ovarian tumour dis-
 tinguished from .. 777
 - simulated .. 775
 - pain in hypochon-
 drium from .. 553
 - pancreatic cyst simu-
 lating .. 775
 - tumour distin-
 guished from 776
 - in paratyphoid fever
 .. 778, 785
 - pelvic swelling due to 840
 - perinephric abscess
 simulating .. 775
 - perinephritis simu-
 lating .. 775
 - in pernicious anæmia
 .. 778, 782
 - physical signs of 774, 775
 - in pneumonia 778, 786
 - polycythæmia with 650
 - from portal vein ob-
 struction 778, 784
 - in pseudo-leukæmia 50
 - infantum 72, 778, 781
 - from pylephlebitis .. 344
 - in relapsing fever
 420, 778, 785
 - renal tumour distin-
 guished from 438, 775
 - simulated by .. 812
 - resonance behind .. 438
 - in rheumatic fever .. 778
 - rheumatoid arthritis 47
 - rickets .. 778, 782
 - from rupture of it .. 788
 Spleen, enlargement of, contd.
 - sarcoma of stomach
 simulating .. 776
 - in scarlet fever 778, 786
 - septicæmia .. 778, 785
 - signs of .. 812
 - Skoda's resonance due
 to .. 755
 - in small-pox 778, 786
 - spirochætosus ictero-
 hæmorrhagica .. 419
 - splenic anæmia 449,
 466, 467, 778, 780,
 (Fig. 611) 781
 - flexure pushed
 down by .. 814
 - in splenomedullary
 leukæmia 33, 71,
 83, 656, 778
 - splenomegalic cir-
 rhosis .. 346, 778
 - polycythæmia 201,
 651, 778
 - Still's disease 47,
 472, 778, 781
 - stomach tumour simu-
 lating .. 811, 814
 - from strangulation of
 spleen .. 778, 788
 - suprarenal tumour
 distinguished from 776
 - simulated by .. 812
 - simulating 775, 814
 - from thrombosis of
 portal vein 778, 784
 - thrombotic infarct .. 788
 - in trench fever 710, 788
 - tuberculous periton-
 itis simulating .. 775
 - other tumours dis-
 tinguished from 775-777
 - from twisting of spleen
 pedicle .. 778
 - in typhoid fever 216,
 419, 689, 710, 775,
 778, 784
 - typhus fever 691, 778, 786
 - von Jaksch's disease 778
 - in epigastrium 811
 - excision of, in familial
 acholuric jaundice .. 415
 - friction over, in peri-
 tonitis .. 149
 - Gaucher cells in .. 781
 - gumma very rare in .. 778
 - hæmorrhage into, from
 injury .. 788
 - hydatid cyst in .. 806
 - very rare in .. 778
 - infarct of (see Infarct)
 - injury of (see Injury)
 - lardaceous disease affect-
 ing .. 217, 469

- temperature chart in (Fig. 567) 710
- Subclavian artery (see Artery)
- bruil (see Vein) .. 122, 664
- vein (see Vein)
- Subconjunctival haemorrhage from fractured skull .. 155
- illustrated (Fig. 235) 287
- Subcutaneous abscess, leucocytosis with .. 453
- in pyaemia .. 738
- emphysema, account of 254
- crackling with .. 188
- haemorrhage see Purpura
- indurations in scurvy 346
- nodules in acute rheumatism .. 136, 282
- Subdiaphragmatic abscess (see Abscess)
- peritonitis (see Peritonitis)
- Subdural haemorrhage, convulsions from .. 183
- after injury .. 870
- Subhyoid bursa, thyroid gland simulated by .. 876
- Subinvolution of uterus (see Uterus)
- Sublimate, corrosive (see Corrosive Sublimate)
- Sublingual calculus, tongue swollen from .. 852
- gland, chorda tympani supplying .. 605
- salivary gland, calculus in .. 590
- Submammary abscess (see Abscess)
- Submaxillary abscess from tooth .. 834
- gland (see Lymphatic Glands, Submaxillary)
- salivary gland, calculus in .. 590
- Subnormal temperature (see Hypothermia)
- Subperiosteal haemorrhages in infantile scurvy .. 128
- Subphrenic abscess (see Abscess, Subdiaphragmatic)
- Subscapular nerve, distribution of .. 616**
- Subscapularis, nerve-supply of 616, (Fig. 474) 618, 620**
- Subtentorial tumour (see Cerebellar Tumour)
- Subtertian malaria, malignant .. (Fig. 59) 41
- Subthalamic lesions, hyperpyrexia from .. 392
- tumour, unilateral tremor due to .. 882
- Succinic acid, leucocytosis from .. 453
- Succulent hand in syringomyelia .. 142
- Succus allii, cacogeusia due to .. 860
- Succussion, abdominal, in typhoid fever .. 802
- in caecum .. 800, 802
- chest .. 800

Succussion, contd.

- in diaphragmatic hernia 800
- epigastrium .. 809
- due to gas in bladder 800
- gastroctasis .. 636, 800, 801
- gastric 218, 219, 307, 801
- in haemopneumothorax 800
- hydropneumopericardium .. 800
- hydropneumothorax .. 209, 532, 647, 800
- normal stomach .. 799, 800
- ovarian cyst .. 800
- phthisical cavity .. 800
- pneumoperitoneum .. 800
- due to pyonephrosis .. 800
- in pyopneumopericardium .. 800
- pyopneumothorax 647, 800
- sigmoid colon .. 800, 802
- SOUNDS .. 799**
- in subphrenic abscess 800
- Sudamina .. 803
- in rheumatic fever .. 423
- Sudan III, fat stained by 140
- Sudden death (see Death)
- Suffocation, sense of, flushing with .. 303
- Suffocative laryngitis .. 197
- oedema of larynx .. 767
- Sugar in blood (see Blood Sugar)
- cerebrospinal fluid .. 383
- dermatitis .. 659, 915, 917
- estimation of .. 329
- finger affected by .. 301
- indigestion, stools in .. 215
- pruritus from .. 333
- threshold, notes on .. 333
- reduced in acromegaly .. 331
- Graves' disease .. 331
- tolerance test .. 333
- in urine see Diabetes and Glycosuria
- Suggestion, amenorrhoea due to .. 23
- functional aphonia cured by .. 606
- hiccough cured by .. 486
- hysteria cured by .. 597
- hysterical photophobia cured by .. 640
- memory restored by .. 25
- Suicide by arsenic .. 872
- corrosive sublimate .. 103
- hydrochloric acid .. 103
- from neurasthenia .. 389
- by nitric acid .. 103
- phosphorus .. 94, 421
- rat paste .. 94
- strychnine .. 521
- sulphuric acid .. 163
- vermin-killer .. 94
- voices urging to .. 503
- Sulcus, Harrison's 208, 233, 782
- Sulphanilic acid in diazo reaction .. 217, 218
- Sulphate of ammonia in Rothera's test .. 3
- copper (see Copper)
- indoxyl, in indicanuria 904
- of zinc in estimating blood-sugar .. 333
- vomiting due to .. 928
- Sulphates, ethereal, in urine .. 395
- in urine in carboloria 906
- Sulphenoglobinaemia, cyanosis from 196, 201
- no polycythemia in .. 201
- shortness of breath from .. 113
- Sulphide of ammonium (see Ammonium)
- zinc, basophilia from 30
- Sulphides, cacogeusia due to .. 860
- in gangrene .. 318
- Sulphocyanide of potassium in Benedict's solution .. 327
- Sulphonah, bradypnea from .. 110
- Cheyne-Stokes breathing from .. 139
- coma from .. 110, 154
- cyanosis from .. 196
- erythema from .. 275

Sulphonal, contd.

- haemoglobinuria from .. 357
- methaemoglobinuria .. 196
- after .. 504
- noises in head from .. 504
- porphyria from .. 504
- purpura due to .. 676
- stupor from .. 110
- vertigo from .. 504
- wheals due to .. 935
Sulphur chloride, acute yellow atrophy from .. 416
- jaundice due to .. 408
- dermatitis due to .. 918
- dioxide, coryza from .. 223
- granules in acutomy-cosis .. 470
Sulphur-yellow disc in favus .. 309
Sulphuretted hydrogen from cystin .. 203
- eosinophilia from .. 271
- fainting due to .. 297
- haemoglobinuria from .. 357
- tinnitus due to .. 878
- in urine .. 203
- vertigo due to .. 878
Sulphuric acid (see Acid)
Summation of painful stimuli .. 863
Summer, cheilopompho-lyx and .. 124, 919
- diarrhoea, see Diarrhoea
- hydroa aestivale and .. 127
- zymotic diarrhoea in .. 101
Sunburn, pellagra simulat-ing .. 279
Sunflower dermatitis from .. 916
Sunshine, strong, ex-stra- from .. 547
- photophobia from .. 649
Sunstroke, coma from .. 156
- headache from .. 372
- hyperpyrexia from .. 490
Suprarenal cervical nerve, distribution of (Fig. 580) 748
- circumflex iliac vein, constricted in appen-dicitis .. 558
- thrombosis of, pain in iliac fossa from .. 557
- perineal nerve, distribu-tion of (Fig. 580) 748
Superinvololution of uterus (see Uterus)
Superior cerebellar ped-uncle lesion, intention tremor from .. 884
- gluteal nerve (see Nerve)
- laryngeal nerve (see Nerve)
- sensory area .. 442, 445, 550
- longitudinal sinus throm-bosis (see Thrombosis)
- maxilla, growth of, eye displaced upward by .. 285
- tenderness of, from empyema of an-trum of Highmore .. 226
- maxillary nerve, dis-tribution of (Fig. 656) 865
- mesenteric artery, em-bolism of (see Embolism)
- oblique, paralysis of .. 222
- rectus, paralysis of .. 222
- vena cava (see Vena Cava)
Supinator muscles (see under Muscle)
- jerk in hysteria .. 614
- increased from cere-bral lesion .. 613
Support, abdominal, in Visceroptosis .. 48
Suppositories, dyschezia relieved by .. 159
Suppository, cocaine, in investigating sphincter ani spasm .. 166
Suppression of urine .. 57
- (and see Anuria)
Suppuration, amenorrhoea from .. 23
- anaemia from .. 47
- chronic, various causes .. 10
- headache due to .. 371
- hectic pyrexia with .. 843
- lardaceous disease from .. 217, 469, 784
- leucocytosis in 453, 454, 843

Suppuration, contd.

- In liver, account of .. 464
- polymorphonuclear cell increase in .. 453
- pyelitis from .. 718
- pyrexia from .. 454, 687
- sweating with .. 843
- typhoid fever simulated by .. 454, 455
- wasting with .. 843
Suppurative arthritis (see Arthritis)
- cholangitis (see under Cholangitis)
- cholecystitis, rigor with 739
- gingivitis, pyorrhoea alveolaris and .. 94
- meningitis (see Meningitis)
- pericarditis in pyaemia 739
- periostitis (see Periostitis)
- peritonitis (see Peritonitis)
- pyelonephritis (see Pyle-nephritis)
- pyelophlebitis (see Pyle-phlebitis)
Supraclavicular glands (see Lymphatic Glands, Supraclavicular)
- nerve, distribution of (Fig. 580) 748
Suprahyoid cyst, tongue swollen from .. 852
Supranuclear paralysis, facial .. 603
Supra-orbital herpes, photophobia from 639, 640
- vesicles in .. 640
- nerve, distribution of (Fig. 540) 748
- herpes of .. 891
Suprapubic pain (see Pain)
- urinary fistula .. 494
Suprarenal capsule, amenor-rhoea and .. 24
- carcinoma of ascites from .. 67
- portal vein ob-structed by .. 67
- supraclavicular gland enlarged from .. 475
- new growth of, gall-bladder enlarge-ment simulated by .. 316
- sarcoma of, secondary in scalp .. 866
- tuberculous, in Addi-son's disease .. 45
- disease, obesity from .. 508
- gigantism .. 324
- illustrated (Fig. 267) 324
- secretion, menstruation and .. 484
- tumour, Addison's disease rare with .. 413
- without Addison's disease .. 776
- ascites from .. 61
- dilatation of stomach from .. 218
- enlarged suleen dis-tinguished from .. 776
- in epigastrium .. 811
- haematuria with .. 776
- in hypochondrium .. 439
- jaundice from .. 407
- kidney simulated by .. 413
- laparotomy in diagnos-ing .. 439, 776
- in left hypochon-drium .. 812
- liver simulated by .. 413
- loin filled by .. 814
- physical signs of .. 776
- portal vein ob-structed by .. 61
- pyloric stenosis from .. 218
- renal tumours distin-guished from .. 776
- simulated by .. 439
- sexual precocity with .. 814
- spleen simulated by .. 775, 812, 814
Suprascapular nerve (see Nerve)
- tender fibrous masses in fibrositis .. 544
Supraspinatus (see under Muscle)
Supratrochlear nerve, dis-tribution of (Fig. 580) 748

SURGICAL EMPHYSEMA 254

- (and see Emphysema, Surgical)
- tuberculous, milk and 932
Surprise, Graves' disease looking like .. 291
Sutures, cranial, separated in hydrocephalus 256, 622
Swallowing, difficult (see Dysphagia)
- Eustachian tube open-ing on .. 205
- pain on, from peri-ostitis of hyoid bone 590
Sweat, Bacillus fetidus in .. 803
- prodigious in .. 803
- black .. 803
- bloody .. 803
- blue .. 803
- clammy, from snake-bite 422
- coloured .. 803
- effect of drugs on .. 803
- on steel .. 803
- foul-smelling .. 803
- glands affected in cheiro-pompholyx .. 124
- green .. 803
- jaundice tinging .. 406
- red .. 803
- sour-smelling, in rheu-matic fever .. 423
- urinary .. 803
- violet .. 803
- yellow .. 803
SWEATING, ABNORMAL-ITIES OF .. 803
- due to abscess of liver 740
- absence of .. 803
- in leprosy patches .. 478
- from paralysis of cer-vical sympathetic .. 270
- and see Anhidrosis
- constipation from .. 162
- crises in tabes dorsalis .. 627, 803
- deficient in myxoedema 556
- excessive see Hyperid-rosis
- of feet in rheumatoid arthritis .. 426
- granulosi rubra nasi and .. 803
- in Graves' disease .. 821
- of hands in rheumatoid arthritis .. 426
- head in rickets .. 182
- in infantile scurvy .. 803
- influenza .. 712, 787
- Malta fever .. 571
- phthisis .. 803
- after pneumonia .. 789
- profuse, in pyaemia .. 419
- trichinosis .. 569
- with pyonephrosis .. 450
- in rheumatic fever .. 423
- rickets .. 803
- rigor .. 736
- salpingo-ophoritis .. 843
- sense of, in syringo-myelia .. 752
- in septicemia .. 423
- from sinus thrombosis 739
- stage in malaria .. 38
- with suppuration .. 843
- thirst after .. 875
- unilateral, due to aneu-rysm .. 803
- cervical sympathetic lesion .. 803
- cyst in chest .. 803
- functional .. 803
- in hysteria .. 803
- due to new growth in chest .. 803
- urates due to .. 899, 900
- urine concentrated after .. 899, 900
Sweats, cold clammy, from arsenic .. 103
- head, in infantile scurvy 128
- heavy, in typhoid fever 737
- from hepatic abscess .. 464
- night (see Night Sweats)
- in pyaemia .. 738
- relapsing fever .. 785
- sleep .. 128
- (and see Night Sweats)
Sweeps, eczema in .. 917
- epithelioma in 849, 886, 917
- warts in .. 917

Sweetbriar odour of urine in cystinuria .. 203
Sweets, eosin in 903, 904, 906
- green urine from .. 906
- methylene blue in .. 906
- red urine due to .. 903
SWELLING, ABDOMINAL 804
- due to ascites .. 804
- constipation .. 804
- cystic kidney .. 15
- cysts .. 804
- dilated stomach .. 636
- hydatid cyst .. 806
- malignant peritonitis .. 805
- obesity .. 804, 805
- ovarian growth .. 24
- pseudo-leukemia .. 49
- subphrenic abscess .. 804, 807
- tuberculous peritonitis .. 804, 805, 806
- (and see Abdominal Distention; and Tumour, Abdominal)
- of arm (see Oedema of Arm)
- AXILLARY .. 816
- of back from aneurysm 198
- new growth of spine 210
- spinal caries .. 210
- ON A BONE .. 817
- from abscess 694, 817
- callus .. 817
- carcinoma .. 823
- in chloroma .. 679
- from healed node .. 819
- method of investiga-ting .. 817
- due to periostitis .. 817
- sarcoma .. 823
- due to rickets .. 819
- due to tubercle .. 818
- of breast, see Swelling, Mammary
- cheeks, from mercury .. 94
- in stomatitis .. 95
- cloudy, see Cloudy Swelling
- of epididymis, gonor-rhoeal .. 639
- due to inflammation 850
- tuberculous .. 849, 850
- from urethritis .. 850
- in epigastrium due to subphrenic abscess 807
- OF THE FACE .. 824
- from aneurysm .. 198
- opening superior vena cava (Fig. 169) 178
- bee-sting .. 824
- carbuncle .. 311
- dental abscess 694, 824
- gnaw-bite .. 824
- mosquito-bite .. 824
- parotid abscess .. 695
- tinea sycois .. 311
- FEMORAL .. 824
- due to abscess .. 825
- femoral aneurysm .. 825
- hernia .. 825
- psoas abscess .. 825
- saphena varix .. 825
- of foot in mycetoma .. 893
- in groin (see Swelling, Inguinal)
- of gums from mercury 94
- peristitis of jaw .. 834
- in stomatitis .. 95
- in hypochondrium .. 804
- right, due to hepatic abscess .. 807
- due to subphrenic ab-scess .. 807
- iliac fossa due to abscess of broad ligament .. 829
- aneurysm of iliac artery .. 564
- appendicitis .. 439
- carcinoma of caecum 814
- chondroma of pelvic bones .. 829
- enlarged iliac glands .. 827
- fibroid of uterus .. 829
- hip-joint disease .. 814, 829
- hydatid cyst .. 829
- iliac abscess 724, 814
- inflamed glands .. 562
- LEFT .. 826

Swelling in iliac fossa, contd.

| | |
|---------------------------------------|-------------------------|
| -- left, from carcinoma of colon .. | 826 |
| -- -- diverticulitis .. | 816 |
| -- from lymphatic glands .. | 814 |

Syphilis, cerebral, contd.

- Jacksonian epilepsy from . . . 174, 185
- paralysis of cranial nerves from . . . 184
- softening of brain from . . . 139
- chance of (see Chance)
- Cheyne-Stokes breathing from . . . 139
- choroiditis from . . . 518
- illustrated (Fig. 415) . . . 518
- chronic glossitis from . . . 898
- hypertrophic hamorrhagic pachymeningitis from . . . 628
- nephritis from . . . 13
- superficial glossitis in . . . 382
- circinate ulcers in . . . 892
- of clavicle . . . 819
- combined scleroses of cord and . . . 631
- condyloma in . . . 601
- congenital, account of . . . 290, 291, 480
- acholuric jaundice and . . . 781
- anus affected in . . . 498
- arthritis in . . . 432
- bridge of nose depressed in (Fig. 240) . . . 290
- bullous eruption from . . . 498
- cachexia in . . . 498
- cate-au-lait skin in . . . 498
- chronic arthritis in . . . 291
- nephritis from . . . 14
- cirrhosis due to . . . 411
- cloudy cornea from . . . 181
- condylomata in . . . 480, 498
- convulsions from . . . 181
- criariotabes in . . . 190, 256, 866
- deafness in 207, 291, 912
- Dercum's disease from . . . 509
- of ear . . . 912
- earthy complexion in . . . 290
- epiphysis separated in . . . 433, 819
- epiphysitis in . . . 433, 819
- erythema from . . . 498
- of Jaquet simulating . . . 498
- Eustachian tube obstruction in . . . 912
- facies in . . . (Figs. 240, 241) 290
- familial acholuric jaundice from . . . 415
- family history and . . . 782
- forehead in . . . 256, (Fig. 24) 290, 498
- gapped teeth in . . . 291
- genital regions affected in . . . 498
- grating in joint in . . . 433
- gummatous orchitis in . . . 586
- Hanot's cirrhosis from . . . 414
- head enlarged in . . . 622
- of hip, limping from . . . 457
- hot-cross-bun head in . . . 256, 866
- hydrocephalus distinguished from . . . 622
- infantilism from . . . 14, 291
- interstitial keratitis from . . . 207, 433, 912
- orchitis in . . . 586
- jaundice due to . . . 411, 417
- keratitis in . . . 290
- knee diseased from, limping from . . . 456
- knee-joints affected in . . . 291
- laryngitis in . . . 498
- leucocytosis in . . . 454
- liver enlarged in . . . 467
- malarasmus from . . . 480
- mental deficiency in . . . 291
- mercury in . . . 433
- mouth affected in . . . 498
- nails affected in . . . 498
- napkin region eruption from . . . 498
- nerve deafness from . . . 433
- notched teeth in . . . (Fig. 241) 290, 291
- osteitis in . . . 866
- osteochondritis in . . . 433
- pain in leg in . . . 819
- palms affected in . . . 498

Syphilis, congenital, contd.

- papular eruption from . . . 498
- paralysis simulated by . . . 819
- Parrot's nodes in . . . 480, 819
- pemphigus from . . . 124
- pericellular cirrhosis in . . . 467
- pseudo-leukemia and . . . 50, 781, 782
- pseudo-paralysis in . . . 433
- pustular eruption in . . . 498
- raw-ham tint of skin lesions in . . . 498
- rickets simulating . . . 256
- sallow complexion in . . . 290
- seborrhoeic eczema distinguished from . . . 499
- senile facies in . . . 498
- skin rashes in . . . 782
- snuffles in . . . 480, 498, 782
- soles affected in . . . 498
- sore angles of mouth in . . . (Fig. 241) 290
- spleen enlarged in . . . 778, 782
- squamous eruption from . . . 498
- symptomatic leukemia in . . . 454
- tabes dorsalis from . . . 541
- tenderness of cranial bones in . . . 866
- tibial deformity in . . . 291
- Wassermann test in . . . 14, 291, 433, 480, 782
- wasting in . . . 417
- copaliba rash simulating . . . 479
- cornea venereis in . . . 601
- coronary artery disease from . . . 264
- cranial nerve paralysis from . . . 730
- crusts in . . . 243, 684
- cutaneous ulcers in . . . 382
- cyanosis from . . . 197
- deafness from . . . 205, 207
- degeneration of medulla oblongata from . . . 139, 387
- diazo-reaction from . . . 218
- diffuse interstitial orchitis from . . . 586
- of ear, account of . . . 912
- earache from . . . 252
- labyrinthine deafness due to . . . 912
- Meniere's disease simulated by . . . 912
- tinnitus due to . . . 879, 912
- vertigo due to . . . 912
- endarteritis from . . . 381, 382, 627, 629, 630
- enlarged heart from . . . 373
- epididymitis from . . . 85, 586
- epithelioma distinguished from . . . 886
- epitrochlear gland enlarged in . . . 476
- erythema in . . . 479
- of Jaquet simulating . . . 498
- esthiomene from . . . 854
- of face, rosacea distinguished from . . . 304
- facial paralysis from . . . (Figs. 518, 519) 660
- fever in . . . 686
- fibroid heart and . . . 70, 264
- lung from . . . 367
- fissure of tongue from . . . 898
- follicular tonsillitis simulated by . . . 760
- gail from . . . 422
- gangrene from . . . 317
- general enlargement of glands in . . . 302, 417, 471, 472, 602, 691, 764
- paralysis and . . . 305, 606
- wasting from . . . 78
- gingivitis from . . . 93
- gout simulated by . . . 432
- gumma of liver in . . . 315
- scalp in . . . 866
- skin in . . . 315
- tongue from . . . 898
- gummatous orchitis in . . . 586
- haematemesia in . . . 336
- haemoglobinuria from . . . 358
- haemoptysis from . . . 361
- headache from . . . 370
- heart-block from . . . 109

Syphilis, contd.

- hemiplegia from . . . 155, 381, 382, 630
- hernia testis from . . . 850
- herpes zoster simulated by . . . 919
- herpetic urethritis from . . . 230
- hyperacusis and . . . 390
- incubation period of . . . 764
- infantilism from . . . 235
- inguinal glands enlarged in . . . 830
- insomnia from . . . 404
- intermittent claudication from . . . 542
- intracranial bruit in . . . 878
- iodides in . . . 746, 818, 892
- in diagnosing . . . 684, 895
- no itching in . . . 919
- kharsivan for . . . 422
- lardaceous disease from . . . 10, 47, 217, 467, 784
- laryngeal paralysis from . . . 606, 730
- laryngitis from . . . 93, 387
- of larynx, cough from . . . 188
- dysphagia from . . . 245
- haemoptysis from . . . 361
- laryngoscope in diagnosing . . . 762
- stridor due to . . . 799
- voice altered by . . . 188
- leontiasis ossea from . . . 255
- leprosy simulated by . . . 82
- simulating . . . 501, 502, 743
- leucodermatoderma from . . . (Figs. 507, 508) 644
- leukoplakia from . . . 261, 315, 382, 897, 898
- lichen ruber planus distinguished from . . . 602
- of lips . . . 459
- Little's disease and . . . 169
- of liver, account of . . . 467
- ascites from . . . 62, 63
- rare with . . . 466, 467
- carcinoma simulated by . . . 467
- cirrhosis simulated by . . . 466
- hamatemesis from . . . 347
- hydatid cyst distinguished from . . . 470
- jaundice from . . . 408
- rare with . . . 466, 467
- liver enlarged from . . . 63, 408
- irregular with . . . 466
- Wassermann reaction with . . . 467
- loculated hydrocele in . . . 849
- lupus vulgaris simulating . . . 500
- lymphocytes in cerebrospinal fluid from . . . 243
- macules in . . . 478, 684
- measles simulated by . . . 479
- mediastinal fibrosis from . . . 910
- skiagram (Fig. 684) . . . 910
- of mediastinum . . . 137, 535
- new growth simulated by . . . 137
- superior vena cava obstructed by . . . 137
- varicose abdominal veins from (Fig. 682) . . . 908
- thoracic veins from . . . 137, (Fig. 682) 908
- medulla oblongata generated from . . . 243
- of meninges, pain in back from . . . 528
- meningitis from . . . 611
- tenderness of scalp in . . . 866
- mercury and . . . 82, 245, 586, 684, 746, 769, 818, 892
- Miculicz's syndrome in . . . 848
- middle cerebral artery affected by . . . 381
- miner's phthisis and . . . 198, 363
- monoplegia from . . . 611
- mucous papule in . . . 601
- patches on fauces in . . . 764
- tonsils in . . . 764
- tubercle in . . . 601
- muscular atrophy from . . . 78
- myocardial changes from . . . 18
- nails shed in . . . 496
- nasal affections due to . . . 225

Syphilis, contd.

- of nasal bones, epistaxis from . . . 274
- necrosis of jaw from . . . 834
- nasal bones from . . . 261
- neokharsivan for . . . 422
- neosalvarsan for . . . 422
- nephritis in . . . 661
- mercury and . . . 94
- nodes in . . . 819
- of frontal bone in . . . 255
- nodules in . . . 500
- in epididymis from . . . 586
- noises in head from . . . 504
- of nose, foul breath from . . . 113
- novarsenobillon for . . . 422
- occipital glands enlarged in . . . 473
- one lobe of liver dwarfed by . . . 461
- onychia from . . . 497
- ophthalmoplegia interna from . . . 674
- orchitis from . . . 85
- osteo-arthritis simulated by . . . 432
- ozana from . . . 225
- pachymeningitis from (see Pachymeningitis, Syphilitic)
- pain in bone from . . . 819
- pancreatitis from . . . 128
- papules in . . . 598, 684, 686, 854, 919
- on genitalia in . . . 499
- round anus in . . . 499
- paralysis of one leg from . . . 611
- palate due to . . . 730
- seventh nerve from . . . (Figs. 518, 519) 660
- third nerve from . . . (Figs. 518, 519) 660
- paraplegia from . . . 628, 630
- paroxysmal haemoglobinuria and . . . 358
- pemphigus distinguished from . . . 743
- perforation of palate from . . . 223, 261, 730
- peritrochanteritis from . . . 68
- perineal sore due to . . . 766
- periosteal thickening from . . . 586
- periostitis in . . . 456, 866
- peripheral neuritis in . . . 80, 83, 570, 571
- peritonitis from . . . 68
- perleche simulating . . . 460
- petrous bone thickened from . . . 504
- pharyngitis from . . . 93, 186
- of pharynx, pain in ear from . . . 253
- phthisis with . . . 246
- pigmentation of skin in . . . (Figs. 507, 509) 644, 645
- pigmented scars on legs from . . . 261, 382, 895
- pleuritic effusion from . . . 137
- pneumoconiosis and . . . 198
- polyporrhomenitis from . . . 62, 138
- of portal glands, colic from . . . 147
- potassium iodide . . . 82, 85, 245, 769, 819
- in diagnosing . . . 586
- pre-auricular gland enlarged in . . . 848
- primary lateral sclerosis from . . . 631
- proctitis from, account of . . . 100
- pseudo- elephantiasis vulvae from . . . 854
- psoriasis simulated by . . . 602
- simulating . . . 746
- pupil reacting to light but not to accommodation in . . . 674
- pus from nose due to . . . 225
- pustules in . . . 681, 683, 684
- pyrexia in . . . 687
- of radius, skiagram of . . . (Fig. 631) 819
- rarefaction of skull from . . . 190
- of rectum, blood per anum from . . . 96
- retrobulbar neuritis in . . . 547
- rhinitis from . . . 225

Syphilis, contd.
 - of rib . . . 819
 - rodent ulcer distin-
 guished from . . . 501
 - roseola in 93, 472, 476,
 691, 764
 - effect of temperature
 on . . . 479
 - rupia in . . . 743, 746
 - rupial crusts in . . . 742
 - sallow pigmented skin
 in . . . (Fig. 93) 91
 - salvarsan in 245, 422,
 746, 769, 818
 - in diagnosing . . . 586,
 684, 687, 895
 - scales in . . . 601, 602
 - scarring from . . . 586, 895
 - of palate from . . . 261
 - of sciatic nerve, rectal
 examination in diag-
 nosing . . . 729
 - scrofuloderma distin-
 guished from . . . 683
 - of scrotum . . . 747, 767
 - scorbirhoea corporis
 simulating . . . 479
 - second infections with . . . 765
 - secondary, acute neph-
 ritis in . . . 11, 12
 - albuminuria from 16, 417
 - condyloma of . . . 854
 - of ear . . . 522
 - hyperacusis in . . . 389
 - jaundice from 407, 417
 - pain in eye in . . . 547
 - limbs in . . . 568
 - parenchymatous de-
 generations in . . . 417
 - portal glands enlarged
 from . . . 407
 - pyrexia in 417, 691,
 699, 760
 - rigor rare in . . . 737
 - roseola in . . . 417, 760
 - scalp tenderness in . . . 417
 - snail-track ulcers in
 pharynx in . . . 760
 - sore throat in 417, 760
 - Spirochaeta pallida in . . . 760
 - submaxillary glands
 enlarged from . . . 474
 - tenderness of bones in . . . 760
 - scalp in . . . 760
 - thyroid gland en-
 larged in . . . 877
 - tongue changes in . . . 898
 - ulcer of cheek in . . . 898
 - lip in . . . 898
 - mouth in . . . 898
 - palate in . . . 898
 - tongue in . . . 898
 - tonsil in . . . 898
 - Wassermann reaction
 in . . . 760
 - seriginous ulcers in . . . 500, 747, 892, 895
 - anaemia in . . . 16
 - eruptions of . . . 601
 - skull . . . 819
 - small-pox simulated by . . . 686, 691
 - snail-track ulcers of . . . 186, 760
 - pharynx in . . . 186, 691
 - throat in . . . 476, 479,
 602, (Fig. 604) 760
 - tongue in . . . 602
 - spinal meningitis from,
 girdle pain in . . . 326
 - Spirochaeta pallida in . . . 94, 764
 - staining of skin in . . . 919
 - stenosis of bronchus
 from . . . 367
 - as asthma simulated by 653
 - pharynx from . . . 244
 - trachea from . . . 799
 - of sternum . . . 819
 - stomatitis from . . . 93
 - pyalism from . . . 661
 - strabismus from 606, 730
 - stridor due to . . . 799
 - superior vena cava ob-
 struction in . . . 137
 - sycosis vulgaris dis-
 tinguished from . . . 682
 - tabes dorsalis and 541,
 606, 627
 - tachycardia due to . . . 857

Syphilis, contd.
 - tenderness of scalp from . . . 865, 866
 - testicular sensation lost
 in . . . 850
 - testis atrophy from . . . 85
 - enlarged from . . . 586
 - swollen from . . . 849
 - of testis 585, 586, 850
 - epididymis unaffected
 with . . . 850
 - hernia testis from . . . 850
 - hydrocele with . . . 586
 - new growth simulated
 by . . . 850
 - no pain in . . . 586, 850
 - scrotal fistula from . . . 767
 - scrotum involved in . . . 767
 - tuberculous testis dis-
 tinguished from . . . 586
 - therapeutic test 82, 91, 818
 - third nerve paralysis
 from (Fig. 516) 659
 - thrombosis of spinal
 artery from . . . 628
 - of tibia . . . 819
 - tinea circinata simu-
 lating . . . 479
 - verticor simulating . . . 479
 - tinnitus due to . . . 879
 - of tongue . . . 897
 - epithelioma from . . . 897
 (Fig. 674) 896
 - distinguished from 897
 - trachea, dyspnoea from 247
 - transverse myelitis from . . . 486, 628, 629
 - trigeminal neuralgia
 from . . . 548
 - ulcer of leg due to . . . 895
 - ulceration of face due
 to . . . 892
 - larynx in (see Ulcera-
 tion of Larynx) . . . 261
 - palate from . . . 261
 - rectum in, blood per
 anum from . . . 97
 - skin in . . . 500, 684
 - tongue from . . . 261
 - trachea from . . . 361
 - vulva from . . . 854
 - of urethra . . . 230
 - valve rupture from . . . 261
 - varicose veins on chest
 from . . . 137
 - vertigo due to . . . 504
 - vesicles in . . . 693, 686
 - rare in . . . 919
 - vesico-pustule in . . . 601
 - of vulva, epithelioma
 simulated by . . . 854
 - tuberculosis simulated
 by . . . 854
 - vulval scarring from . . . 854
 - swelling due to . . . 853
 - Wassermann's test in . . . 68, 82, 84, (Fig. 93) 91,
 92, 94, 225, 243, 245,
 261, 382, 472, 501, 586,
 746, 747, 854, 892, 895
 - yaws not immunizing
 against . . . 501
 - simulating . . . 501
 - (and see Chancres)
 Syphiloderma, annular . . . 601
 circinate . . . 601
 tubercular . . . 311
 copper colour of . . . 602
 eczema simulated by . . . 602
 flat papular . . . 601
 flexor surfaces affected
 by . . . 602
 miliary papular . . . 601
 palms and soles affected
 by . . . 602
 parts affected by . . . 601
 polymorphism of . . . 602
 raw ham colour of . . . 601
 Wassermann test in
 diagnosing . . . 602
 Syringa vulgaris, derma-
 titis due to . . . 916
 Syringing of ear, vertigo
 due to . . . 912
 Syringomyelia . . . 320, 619
 amyotrophic lateral
 sclerosis simulated by 81
 analgesia in (Fig. 588) 753
 ankle-jerks increased
 in . . . 619

Syringomyelia, contd.
 - anterior cornual cell
 lesion in . . . 81
 - ape's hand in . . . 142
 - arms affected in . . . 320
 - arthritis in . . . 435
 - ataxia in . . . 76
 - atrophic palsy of arms
 in . . . (Fig. 588) 753
 - atrophy of flexors in . . . 619
 forearm in . . . 619
 hand muscles in 321, 619
 brittle bones in . . . 320
 - Brown-Sequard paralysis
 from . . . 76
 bullae in . . . 123, 125
 burns in . . . 81
 - central canal of cord
 affected in . . . 628
 - cervical enlargement
 affected in . . . 619
 - Charcot's elbow in . . . 434
 (Figs. 449, 570) 434
 joints in 320, 435, 628
 - claw-hand from 141,
 142, 321
 - illustrated (Fig. 124) 142
 - cold sense lost in 82,
 125, 435, 628
 - cord lesion in . . . 81
 - cramps in . . . 752
 - crossed pyramidal tracts
 affected in . . . 81
 - cutaneous sensibility
 normal in . . . 82, 125, 628
 - dissociative anaesthesia in
 125, 142, 320, 619,
 628, 752, (Fig. 588) 753
 - electrical reactions in 619
 - erythromelalgia in . . . 543
 - extensor plantar reflex
 in . . . 88, 176, 619
 - fingers deformed in . . . 402
 - forearm affected in . . . 320
 - gangrene from 317,
 320
 - general account of . . . 81
 - gliosis of eighth cervical
 segment in . . . 142
 first dorsal segment in . . . 142
 - glossy skin in . . . 142
 - hands affected in . . . 320
 - heat sense lost in 82,
 125, 302, 435, 628
 - hemiatrophy of tongue
 in . . . (Fig. 81) 70
 - insidious onset . . . 619
 - knee-jerks increased in 619
 - lancinating pains in . . . 752
 - leprosy simulated by . . . 82
 - simulating . . . 478
 - main succulente in 142, 321
 - manual deformity in . . . 619
 - micturition difficult in 492
 - Morvan's disease and 81,
 125, 302, 320, 628
 - muscle wasting in 80,
 320, 619
 - nail atrophy in . . . 320
 - hypertrophy in . . . 320
 - nystagmus in 142, 505, 619
 - oculo-pupillary pheno-
 mena in . . . 142, 619
 - one limb affected long
 before other in . . . 619
 - pain sense lost in 82,
 125, 302, 320, 435, 628
 - painless gangrene in . . . 320
 - pains in arms in . . . 619
 - paralysis of arms in . . . 619
 one leg in . . . 142, 611
 - paraplegia from 626, 628
 - peau lisse in . . . 142
 - preacher's hand in . . . 142
 - precipitate defecation in 94
 - progress gradual . . . 619
 - progressive muscular
 atrophy simulated by 81
 - R.D. in . . . 80
 - scarring of fingers in . . . 302
 - scoliosis in 142, 435, 619
 - sense of cold in warm
 skin in . . . 752
 sweating in dry skin in 752
 - sensory disturbances of 81
 - shoulders affected in . . . 320
 - skin atrophy in . . . 320
 - hypertrophy in . . . 320
 - lesions in . . . 81
 - slow progress of . . . 628
 - spasticity in 142, 176, 619

Syringomyelia, contd.
 - sphincter trouble in . . . 176
 - spinal curvature in 320, 619
 - muscles atrophied in 320
 - spontaneous fracture in 320
 - temperature sense lost
 in . . . 320
 - thermo-anaesthesia in . . . 753
 (Fig. 588) 753
 - trophic changes in 320, 619
 - joint changes in . . . 619
 - ulcer of foot in . . . 893
 - unilateral effects from
 76, 611
 - wasting of hands in . . . 619
 - whitlows in . . . 142, 302
 Systolic bruit (see Bruit)
 - retraction from adher-
 ent pericardium . . . 265
 - of chest in medias-
 tinitis . . . 535
 Thrill (see Thrill)
 Systole-diastole bruit
 from aneurysm . . . 260
 - of patent ductus arteri-
 osus . . . 196, 267

TABES DOLOROSA . . . 571
 dorsalis, account of 541
 acetonuria from . . . 3
 Achilles jerk absent in 387
 acute appendicitis in 151
 cystitis simulated in 798
 allochiria from 22, 753
 anaesthesia in (Fig. 589) 753
 analgesia in 74, 75,
 541, 627, 750,
 (Fig. 589) 753
 ankle-jerks absent in . . . 541, 571
 anomalous cases of 627
 anaemia in . . . 756
 anterior cornual cell
 lesion simulated by 78
 Argyll Robertson
 pupil in 387, 545,
 571, 626, 627, 674,
 798, 874, 931
 artery with . . . 295
 ascending nephritis in 211
 astereognosis in . . . 753
 ataxy in 74, 75, 76,
 571, 627
 biliary crises in . . . 148
 bladder distended
 from . . . 61, 815
 trouble in . . . 396
 boring pains in . . . 753
 carcinoma of bladder
 simulated by . . . 798
 recti simulated by 874
 cardiac crises in . . . 597
 cerebellar tract lesion
 in . . . 76
 cervical . . . 76
 Charcot's joint in . . . 47, 448, 434, 627, 628
 (Figs. 445, 433, 627, 628)
 colic in . . . 148
 constipation in . . . 165
 convergence pupil-
 lary reflex lost in 674
 crises in . . . 753, 798
 cyanosis in . . . 198
 cystitis in 211, 720, 798
 delirium in . . . 211
 dependence on visual
 impulses in . . . 75
 diarrhoea in . . . 217
 dyspepsia simulated
 in . . . 396
 dyspnoea in 198, 246
 emotional movements
 of face deficient in 283
 erythromelalgia in . . . 543
 facies in . . . (Fig. 249) 292
 gait uncertain in dark . . . 75
 gangrene from . . . 317
 of toes in . . . 321
 gastric crises in 3,
 148, 149, 151, 396,
 525, 538, 541, 594,
 597, 627, 753, 931
 ulcer simulated by 396
 gastro-enterostomy in 594
 general abdominal
 crises in . . . 627
 girdle pain in 326, 536
 sensations in . . . 753

Tabes dorsalis, contd.

- gold curve in .. 384
- gout simulated by .. 536
- hiccup in .. 386, 387
- high-stepping gait in .. 314
- history of syphilis in .. 627
- hoarseness in .. 388
- hyperaesthesia in 753, 754
- hypotonia in .. 293
- impotence in .. 393
- incontinence of faeces in .. 874
- urine from .. 61
- inco-ordination in .. 313, 753
- intercostal pain from .. 553
- intestinal crises in .. 148, 149, 151, 597, 753
- obstruction simulated by .. 151
- intolerance of cold water in .. 753
- hot water in .. 753
- one knee-jerk lost in .. 452, 627, 798
- knee-jerks absent in .. 487, 396, 451, 525, 538, 541, 571, 626, 798, 874, 931
- not always absent in .. 452, 627, 798
- laryngeal crises in .. 198, 246, 249, 388, 597, 627
- obstruction simulated in .. 198
- paralysis with .. 606
- larynx analgesic in .. 627
- lightning pains in .. 253, 396, 541, 571, 627, 753, 798
- cessation of .. 874
- little subcutaneous fat in .. 293
- no loss of power in .. 626
- lymphocytes in cerebrospinal fluid in .. 383, 541
- mammary analgesic in .. 627
- micturition difficult in .. 492
- muscles analgesic in .. 627
- insensitive to squeezing in .. 541
- muscular atrophy in .. 78
- no muscular atrophy in .. 626
- myalgia in .. 627
- numbness in .. 753
- occupation neurosis simulated .. 189
- pain in chest in .. 536
- ears in .. 253
- epistaxis from .. 538
- face from .. 550
- legs in .. 541
- limbs in .. 568
- at umbilicus in .. 594
- palpitation in .. 594
- paralysis of external popliteal nerve from 610
- paradoxical pupil reflex in .. 675
- paraesthesia in arms in 545
- paraplegia from .. 626
- perforated gastric ulcer in .. 151
- perforating ulcer in .. 121, 335, (Fig. 699) 893
- of foot in .. 627, 894
- peripheral neuritis distinguished from .. 750
- simulated by .. 78
- simulating .. 626
- peritonitis simulated by .. 151
- plantar reflex flexor in 88
- posterior column degeneration in .. 75, 76
- roots affected in .. 75
- precipitate defaecation in .. 394
- pruritis due to .. 658
- ptosis in (Fig. 249) 292
- pupil eccentric in .. 675
- immobile in .. 396
- oval in .. 675
- reaction atypical in 627
- pupils dilating to light in .. 675

Tabes dorsalis, contd.

- pupils not reacting to light in .. 541
- small in .. 292
- unequal in .. 292, 675
- no reaction of degeneration in .. 627
- rectal crises in 217, 627, 798, 874
- renal crises in 148, 627
- retention of urine in .. 211, 493, 495, 720, 798
- rheumatism simulated by .. 536, 541
- Romberg's sign in 753, 753
- sad expression in .. 292
- sawlow complexion in 293
- sensation impaired in 626
- sense of position in .. 75
- impaired in .. 545
- sensory disturbances in .. 753
- silver nitrate in treating .. 295
- spasm of larynx in .. 388
- sphincter trouble in .. 217, 571, 627
- stamping gait in .. 75
- stance in .. 75
- stranguary due to .. 797
- syphilis and .. 511, 606
- sweating crises in .. 627, 803
- temperature sense disturbance in .. 863
- no tenderness with .. 571
- tendo Achillis jerks lost in .. 627
- tendon jerks absent in 545
- tenesmus in .. 874
- testis analgesic in .. 627
- tingling in .. 753
- tongue analgesic in 627
- tuberculosis of bladder simulated by .. 798
- ulnar analgesia in 545, 753
- unilateral symptoms in 22
- uraemia in .. 211
- urethral crises in .. 627
- vesical crises in 627, 798
- vomiting in 396, 538, 929
- Wassermann reaction and .. 541
- negative in blood in .. 384
- wrinkling of forehead in .. (Fig. 249) 292
- zones of anaesthesia in 571
- mesenterica .. 706
- anorexia nervosa simulated .. 934
- iliac glands involved .. 563
- meteorism from .. 486
- pseudo .. 74
- TACHE CEREBRALE .. 856
- Taches bleues (Fig. 503) 642
- TACHYCARDIA .. 856
- from alcohol 856, 857, 858
- anaemia .. 516, 857
- aneurysm .. 856
- with auricular fibrillation .. 857
- in auricular flutter 670, 672
- from being out of training .. 857
- belladonna 856, 858, 859
- bradypnoea with .. 111
- from caseous glands .. 111, 856, 858
- in convalescence .. 857
- from cordite .. 859
- D.A.H. 597, 856, 859
- digitalis .. 856, 858
- after diphtheria .. 84, 858
- from drugs .. 856, 858
- electrocardiograms in cases of .. 857
- from excitement 672, 856, 857
- exertion .. 856
- fatty heart .. 857
- fibroid heart .. 857
- graphic records in elucidating .. 672
- in Graves' disease 266, 267, 283, 597, 672, 856, 857, 877, 881, 934

Tachycardia, contd.

- after influenza .. 858
- from lateral sinus thrombosis .. 109
- at life insurance examination .. 2
- list of causes of .. 856
- from mastoid abscess .. 109
- mediastinal fibrosis .. 856
- meningitis .. 109
- microbic infection .. 858
- mitral stenosis 69, 856, 857
- nervousness .. 857
- otitis media .. 109
- in parenchymatous goitre .. 877
- paroxysmal .. 672, 856
- account of .. 670, 857
- auricular fibrillation distinguished from 670
- flutter distinguished from .. 670
- in cardiosclerosis .. 670
- cyanosis in .. 670
- electrocardiograms of (Fig. 538) 670, 858
- electrocardiograph in diagnosing .. 670
- faintness in .. 857
- in mitral stenosis .. 670
- normal heart .. 670
- numbness in .. 857
- palpitation in 594, 857
- pins and needles .. 857
- polygraph in diagnosing .. 670
- pulse regular in .. 670
- pulsus alternans in 671
- sex incidence of .. 857
- venous engorgement in .. 670
- due to rheumatic heart .. 857
- suppurative meningitis .. 109
- syphilitic heart .. 857
- thoracic new growth .. 856
- thyroid extract 856, 858
- tobacco .. 596, 856, 857
- after trench fever .. 710
- in tuberculosis .. 672
- from vagal affection .. 84
- nerve irritation 856, 858
- (and see Pulse, Rapid)
- Tachypnoea in hysteria .. 111
- phosphorus poisoning .. 421
- pneumonia 199, 419, 715, 785, 789
- from pneumothorax .. 648
- in pyaemia .. 738
- Tactile sense, lost, in Brown-Sequard paralysis .. (Fig. 469) 608
- vocal fremitus, absent over pneumothorax .. 532
- deficient in bronchiectasis .. 366
- fibroid lung 210, 366
- pleuritic effusion .. 209
- pneumothorax .. 209
- from stenosed bronchus .. 365
- increased, in emphysema .. 269
- unequal, in phthisis 362
- Tænia, account of 632, 633
- anaemia due to .. 633
- echinococcus in dog 633, 807
- head of (Fig. 490) 633
- hydatid cyst from 633, 807
- scolices of .. (Figs. 623a, 623b) 806
- eosinophilia from 103, 633
- erythema due to 276, 280
- increased appetite from .. 58
- male fern for .. 421
- mediocanellata, anaemia from .. 515
- cystic stage in cattle .. 633
- eosinophilia from .. 272
- head of (Fig. 489) 633
- oedema of legs from .. 515, 517
- severe anaemia from .. 35
- solium, anaemia from .. 515
- costophilia from .. 272
- head of (Fig. 487) 632, (Fig. 488) 633

Tænia solium, contd.

- mucomembranous colitis simulated by 633
- oedema of legs from .. 515, 517
- ovum of (Fig. 492) 634
- from pig meat .. 633
- segments of (Fig. 487) 632
- severe anaemia from .. 35
- varieties of .. 633
- Tailors, actinomyces in .. 792
- cramp in .. 189
- sporotrichosis in .. 365
- TALIPES .. 144, 145
- acquired .. 144, 145
- from amyotrophic lateral sclerosis .. 145
- blue feet in .. 145
- due to bone disease 144, 147
- burns .. 147
- calcaneoalagus .. 144
- limping from .. 456
- from spina bifida .. 146
- calcaneus, limping from 456
- from poliomyelitis .. 623
- position of foot in .. 144
- from cauda equina lesions .. 145
- cavus, foot shape in .. 144
- with cerebral monoplegia .. 145
- in chronic poliomyelitis 177
- Clarke's column lesion and .. 145
- cold feet in .. 145
- congenital .. 144
- foot shape in .. 144
- heel small and conical in .. 144
- and paralytic distinguished .. 144
- varus worse than equinus in .. 144
- due to contracting scars 145
- difficult labour .. 145
- disease of lower neuron .. 144
- upper neuron .. 147
- Dupuytren's fracture .. 147
- after catenaria .. 147
- epiphysitis .. 147
- equinovarus from ankle-joint fractures .. 147
- from spina bifida .. (Fig. 131) 146
- equinovarus .. 144
- in alcoholic neuritis 177
- arsenical neuritis .. 177
- congenital. (Fig. 128) 144
- and equinovarus .. 146
- together (Fig. 131) 146
- from external popliteal nerve paralysis .. 146
- after forcible extension of contracted knee .. 146
- fracture of thigh .. 146
- from Friedrich's ataxy .. 145, 176
- growth on sciatic nerve .. 146
- hamatorachis .. 146
- in hysteria .. 178
- illustrated (Fig. 131) 146
- from infantile paralysis .. (Fig. 149) 177
- injury to spine .. 146
- limping from .. 456
- from poliomyelitis .. 623
- sciatic nerve paralysis .. 146
- spina bifida (Fig. 131) 146
- split .. 146
- in Tooth's paralysis 146
- from wound of thigh 146
- equinus .. 143, 144
- after acute necrosis of tibia .. 147
- from arthritis of ankle .. 147
- after cellulitis of leg .. 147
- compound fracture of leg .. 147
- from congenital spastic paraplegia .. (Fig. 130) 145
- contracture of calf .. 147
- Friedrich's ataxy .. 145
- in infantile hemiplegia .. (Fig. 129) 145
- limping from .. 456
- from lying in bed .. 178
- in peripheral neuritis 178
- from poliomyelitis .. 623

- Talipes equinus, contd.*
- after sprain of ankle 147
 - extensor plantar reflex in 144
 - due to fibrosis of muscle 144
 - fit of passion .. 145
 - forceps delivery .. 145
 - fracture into ankle-joint 147
 - in Friedreich's ataxia .. 78, 145, 624
 - from Hodgen's extension apparatus .. 146
 - hysteria .. 144, 147
 - infantile paralysis 78, 145
 - influenza .. 145
 - injury to epiphysis .. 147
 - sciatic nerve .. 145
 - spine .. 145
 - tibia .. 147
 - joint disease .. 144, 147
 - after laceration of foot .. 147
 - leg .. 147
 - leg shortening in .. 145
 - wasting in .. 145
 - from measles .. 145
 - meningeal hæmorrhage .. 145
 - paralysis of arm with .. 145
 - leg with .. 145
 - from paralysis of tibial muscles .. 146

- Bordet-Gengou, in whooping-cough .. 250
- bromine, in melanuria 905
- Calmette's, in Addison's disease .. 45
- - tuberculous peritonitis .. 777
- - - in cerebrospinal fluid .. 383
- - chrysophanic acid in urine .. 904
- Congo red, for acid .. 401
- diastase .. 19
- Fehling's, albuminuria and .. 327
- - errors in .. 327
- - for glycosuria .. 326
- fermentation, in confirming glycosuria .. 902
- - lactosuria .. 332
- - for sugar .. 328
- ferric chloride (see Ferric Chloride)
- fluorescence, for urobilin (Fig. 322) 406, 407
- for fragility of red corpuscles .. 781
- Gmelin's, for bile .. 903
- - illustrated (Fig. 321) 406
- gold chloride, in cerebrospinal fluid .. 383
- guaiacum (see Guaiacum)
- Günzburg's, for free HCl, (Fig. 318) 401
- Heller's, for albumose .. 20
- - cold nitric acid .. 5
- Hofmeister's, for albumose .. 20

Test, contd.

- Holmgren's, for colour blindness .. 926
- Huppert's, for bile pigment .. 903
- iodine, for bile .. 406, 903
- iodoform, for acetone .. 3
- irrigation, in gonorrhoea .. 228
- urethritis .. 229
- Koch's tuberculin .. 828
- - in lupus .. 895
- - tuberculosis .. 819, 898
- lateralizing, of hearing .. 206
- lead, ammonium sulphide in .. 85
- Legal's, for acetone .. 3
- - illustrated (Figs. 2-7) 4
- lower-tone limit, of hearing .. 206
- Marsh's, for arsenic .. 103
- nical in achlorhydria .. 344
- - composition of .. 400
- - in diagnosis of cause of heartburn .. 376
- - diarrhoea cases .. 215
- - duodenal ulcer .. 343, 344
- - fractional .. 401
- - in gastric carcinoma .. 344
- - - ulcer .. 343, (Fig. 285) 344
- - gastritis .. 58
- - hyperchlorhydria .. 58
- - pernicious anemia .. 344
- - for melanuria .. 904, 905
- - mercuric chloride, for albumen .. 7
- - methyl orange, for acid .. 401
- - nitric acid (see Acid, Nitric)
- - nitroprusside, for acetone .. 3
- - in melanuria .. 905
- - Perl's (see Perl's Reaction)
- - phenyl-hydrazine .. 328
- - in confirming glycosuria .. 902
- - lactosuria .. 332
- - phloroglucin, glycuronic acid and .. 327
- - for pentose .. 327
- - phosphotungstic, for albumose .. 20
- - platinumchloride, in cerebrospinal fluid .. 383
- - Prussian blue, in bronzed diabetes .. 32, 467
- - - sprue .. 32
- - - pernicious anemia .. 467
- - Reinsch's, for arsenic .. 103
- - relative air-bone, of hearing .. 206
- - for rennin .. 401
- - Rinne's, of hearing .. 206
- - negative in otosclerosis .. 207
- - Rothera's, for acetone .. 3
- - illustrated (Fig. 8) 4
- - salicyl-sulphonic, for albumen .. 7
- - serum (see Serum Reaction)
- - silver nitrate, for albumen .. 905
- - spectroscopic, for blood .. 12, 104
- - Spiegel's, for albumen .. 7
- - sugar tolerance .. 333
- - therapeutic (see Therapeutic Test)
- - translucency, of scrotal cysts .. 588
- - tuberculin (see Tuberculin Test)
- - two-glass, for cystitis .. 723
- - in urethritis .. 720, 723
- - Uffelmann's, for lactic acid .. 401
- - upper-tone limit, of hearing .. 206
- - urea in blood .. 19
- - - concentration .. 19
- - van den Bergh's .. 414
- - von Pirquet's (see Von Pirquet's Test)
- - warning, for urates .. 899
- - Wassermann's (see Wassermann's)

Test, contd.

- watch, for hearing .. 206
- Weber's, of hearing .. 206
- - whispered word .. 205
- Widal (see Widal)
- Tests for acetone illustrated (Figs. 2-8) 4
- albuminuria .. 5
- cystin .. 203
- of hearing .. 205
- for indican 395, 904, 905
- methylene blue in urine .. 906
- nucleoproteid .. 5, 524
- paralysis .. 611, 612
- porphyrin .. 903, 904
- RENAL EFFICIENCY .. 19
- Testes, excision of, obesity due to .. 505
- in groins in pseudo-hermaphroditism .. 793
- hæmaturia cases .. 350
- unequal physiologically .. 85
- Testicular gigantism .. 324
- sensation lost in syphilis .. 850
- Testis within abdomen .. 589
- abscess of (see Abscess)
- aching in, from hydrocele .. 588
- analgesic et. in tabes dorsalis .. 627
- ATROPHY OF .. 85
- (and see Atrophy)
- Testicular
- blow on, fainting due to .. 297
- carcinoma of (see Carcinoma)
- compression of, by hæmatocoele .. 85
- - hydrocele .. 85
- - testis atrophy from .. 85
- cyst of .. 587
- ectopic .. 589, 832
- - appendicitis simulated by .. 561, 832
- - in atelectasis .. 247
- - at crural ring .. 589
- - diagnosis of .. 589
- - at external abdominal ring .. 589
- - in femoral region .. 826
- - femoral hernia simulated by .. 832
- - inflamed .. 589
- - in inguinal canal .. 85
- - - 561, 589, 832
- - inguinal hernia and .. 832
- - intestinal colic simulated by .. 832
- - limping from .. 457
- - pain in abdomen due to .. 832
- - - iliac fossa from .. 555, 561, 567
- - in perineum .. 589
- - aching in perineum from .. 579
- - at root of penis .. 589
- - sarcoma of .. 589
- - strangulated hernia simulated by .. 589
- - strangulation of .. 833
- - in thigh .. 589, 832
- embryoma of (see Embryoma)
- endorcheloma of .. 850
- enlarged from abscess .. 585
- - carcinoma .. 586
- - epididymo-orchitis .. 86, 584, 585
- - by epurra .. 768
- - malignant growth .. 586
- - new growth .. 850
- - from sarcoma .. 586
- - syphilis .. 586
- - in tuberculous subjects .. 86
- - gangrene of .. 589
- - gonococcus infecting .. 228
- - in groin .. 830
- - growth of, hydrocele simulated by .. 833
- - gumma of .. 586, 768
- - hernia of (see Hernia)
- - injury to (see Injury)
- - new growth of, account of .. 850
- - - cord thickened with .. 586, 850

Testis, new growth of, contd.

- - differential diagnosis of .. 587
- - - hæmatocoele distinguished from .. 589
- - - - simulating .. 587
- - - hydrocele simulating .. 587
- - - operation in diagnosis .. 850
- - - - gnosning .. 850
- - - pelvic glands enlarged from .. 850
- - - secondary in retroperitoneal glands .. 910
- - - syphilis of testis simulating .. 850
- - - testicular sensation lost with .. 587
- - - torsion simulating .. 850
- - PAIN IN .. 584
- - (and see Pain in Testicle)
- - sarcoma of (see Sarcoma)
- - - strangulated, abdominal pain from .. 833
- - - - hernia simulated by .. 833
- - - swelling of (see Swelling)
- - - syphilis of (see Syphilis)
- - tenderness of, from abscess .. 768
- - - in epididymo-orchitis .. 584, 585
- - - torsion of .. 849, 850
- - - abdominal pain from .. 833
- - - abscess of testis due to .. 768
- - - - hernia simulated by .. 833
- - - in horse-riders .. 585, 587
- - - misplaced .. 589
- - - operation in diagnosis .. 587
- - - swelling in groin .. 833
- - - from .. 833
- - tuberculous see Tuberculosis
- - various diseases of .. 768
- - Testis, contraction of .. 252
- - - contractions .. 174-176
- - - in epilepsy .. 175
- - - spasm (see Spasm)
- - and tonic, discussion of terms .. 175
- - Tetanoid epilepsy .. 182
- - Tetanus .. 175, 521, 885
- - - acute pain in .. 175
- - - asphyxia in .. 175
- - - bacillus, anaerobic .. 741
- - - Bacillus tetani and .. 175, 741
- - - choleraform in .. 885
- - - clinical .. 175
- - - consciousness retained in .. 521
- - - convulsions from .. 181, 741, 884
- - - drumstick bacilli in .. 521, 885
- - - emprosthotonus in .. 175
- - - face stiff in .. 885
- - - fixed smile in .. 521
- - - habit spasm simulated by .. 175
- - - head-retraction in .. 731
- - - heart failure in .. 175
- - - hoarseness in .. 388
- - - hydrophobia distinguished from .. 175
- - - hyperacusis in .. 389
- - - hyperpyrexia in .. 390
- - - hysteria simulated by .. 175, 176, 521, 741, 886
- - - impacted wisdom tooth .. 175, 886
- - - simulating .. 175, 885
- - - incubation period of .. 885
- - - jaw stiff in .. 175, 885
- - - lockjaw in .. 521, 741
- - - meningitis distinguished from .. 175
- - - muscular rheumatism .. 175
- - - - simulating .. 175
- - - in new-born .. 885
- - - opisthotonus in .. 175, 521, 741, 885
- - - orthotonus in .. 175
- - - from penetrating wound .. 885
- - - physiological .. 174
- - - from piece of stick .. 885
- - - priapism from .. 657
- - - pyrexia in .. 687, 693
- - - rigidity in .. 521
- - - rigor in .. 737

Tetanus, contd.

- risus sardonius in 175, 521, 741, 885
- from rusty nail 741, 885
- soil contamination .. 885
- spasm of back in .. 175
- face in .. 175
- in head and neck in .. 190
- of larynx in .. 388
- spasms in .. 175, 693
- stiff neck in 175, 521, 741, 797, 885
- strychnine poisoning distinguished from 175, 741
- tetany distinguished from .. 175, 190
- touch producing spasms in .. 741
- trismus in 175, 190, 521, 693, 797, 884, 885
- from umbilical cord infection .. 885
- wound .. 175, 521, 741
- without obvious wound 885
- Tetany, accoucheur's hand in .. 2, 189
- account of .. 2, 189
- in adults .. 2
- alkalosis and .. 214
- attitude in .. 2
- calcium and .. 190
- carpalpedal 2, 190, 799, 885
- causes of .. 3
- in children .. 2, 3, 189
- from chloroform poisoning .. 189
- Chvostek's sign in 3, 190
- colitis and .. 3
- convulsions in .. 3, 181
- cramp in .. 189
- delirium and .. 213
- diarrhoea and .. 2, 189
- dietetic errors and .. 2
- from dilated stomach .. 213
- duodenal ulcer .. 799
- duration of spasms of .. 2
- dwarfism and .. 3
- electrical reactions in .. 725
- in enterica .. 189
- epidemic of .. 189
- Erb's sign in .. 3, 190
- from ergot .. 189
- face involved in .. 189
- from fevers .. 189
- food poisoning .. 189
- gastrectasis and 3, 189, 214, 799
- gastric ulcer and .. 3, 799
- gastro-intestinal disorder and .. 2, 189, 799
- hand in, illustrated (Fig. 1) 2
- hoarseness in .. 388
- hysterical .. 190
- from improper diet .. 189
- in infants .. 189
- intestinal fermentation and .. 3
- from lactation .. 189
- laryngismus stridulus with .. 3, 249
- from lead .. 189
- muscles tender in .. 189
- neck involved in .. 189
- parathyroids and .. 190
- after parturition .. 799
- position of arms in .. 189
- feet and legs in .. 189
- pregnancy and .. 3, 189
- prognosis of .. 2
- from pyloric stenosis .. 213, 799
- renal dwarfism and .. 3
- respiration embarrassed in .. 189
- rickets and 2, 3, 182, 189, 799
- seventh nerve in .. 3
- spasm of larynx in .. 388
- stridor in .. 799
- strychnine poisoning distinguished from 190
- tetanus distinguished from .. 175, 190
- thyroidectomy and 3, 189, 799
- trismus in .. 885
- Trousseau's sign in 3, 189
- trunk affected in .. 2, 189
- uremia with .. 213
- from vomiting .. 189

- Tetrabromophenolphthalein in gall-bladder cases 941
- Tetrachlorethane, acute yellow atrophy from .. 416
- in aeroplane varnish .. 416
- jaundice due to .. 408
- Tetrachloride of carbon for ankylostomiasis 103, 635
- Tetragenus bronchopneumonia .. 692
- fever (see Fever)
- septicaemia, temperature chart of (Fig. 550) 692
- Tetraiodophenolphthalein in gall-bladder cases .. 941
- and gall-stones (Figs. 698-701) 943
- in normal gall-bladder (Figs. 694-697) 942
- Tetronal, bradypnea from 110
- coma from .. 110, 154
- stupor from .. 110
- Tetryl, dermatitis from .. 917
- in explosives .. 917
- Tetterbury, dermatitis due to .. 915
- Thapsia, finger affected by 301
- gargarica, dermatitis due to .. 916
- Theatre, fainting in .. 297
- Thear area, pink hue of .. 803
- muscles (see under Muscles)
- Thecin-acetate of sodium, polyuria from .. 653
- Therapeutic test of acute rheumatism .. 568
- adiposis dolorosa .. 510
- amebic dysentery .. 98, 99, 417
- angina abdominalis .. 396
- pectoris .. 396, 882
- asthma .. 654
- in chlorosis .. 49
- for condylomata .. 854
- of cretinism .. 291, 622
- diabetes insipidus .. 655
- in diagenosis cause .. 53
- of cardiac pain .. 298
- fainting .. 298
- of epilepsy .. 298, 653
- fatty heart .. 595
- flatulence .. 376
- gumma .. 761, 765
- of liver .. 315, 417
- orbit .. 284
- hepatic abscess .. 696
- in hypothyroidism (Figs. 389, 390) 506
- malaria 39, 417, 654, 687, 738, 739, 785
- meningitis .. 733
- myxoedema 50, 290, 508, 510, 516, 656
- pachymeningitis .. 583
- pernicious anaemia .. 641
- rat-bite fever 687, 740
- rheumatic fever (Fig. 328) 423
- syphilis and 82, 91, 245, 586, 684, 687, 746, 799, 818
- for syphilitic proctitis .. 730
- ulcer .. 58
- worms .. 58
- Thermo-anæsthesia, definition of .. 749
- in syringomyelia 752, (Fig. 588) 753
- due to thrombosis of posterior inferior cerebellar artery .. 754
- Thermometer in diagnosing anorexia nervosa .. 934
- trance .. 111
- distinguishing opium poisoning from pontine hæmorrhage 390, 391
- excluding death .. 111
- makers, mercurialism in 44
- swallowed, hæmatemesis from .. 342
- (and see Fever; Pyrexia, etc.)
- Thigh, adduction of, impaired in obturator nerve paralysis .. 610
- adductors of, nerve-supply of .. 610
- paralysis of, from poliomyelitis .. 623

Thigh, contd.

- bruising of, limping from .. 457
- condyloma of .. 854
- flexed, from psosa abscess .. 458
- flexion of, impaired in paralysis of anterior crural nerve .. 609
- fracture of, paralysis of external popliteal nerve from .. 146
- sciatic nerve from .. 146
- talipes from .. 146
- infantile paralysis affecting .. 457
- lymphatic drainage of muscles (see under Muscle)
- pain in (see Pain)
- rotation of, impaired in obturator nerve paralysis .. 610
- sensory centre for (Fig. 485) 631
- sore on, inguinal glands enlarged from .. 476
- tenderness in, in anterior cruritis .. 540
- testis in .. 589, 832
- wasting of, from hip disease .. 195
- knee disease .. 79, 457
- in paralysis of anterior crural nerve .. 609
- wound of (see Wound)
- Thighs, attitude in tetany .. 2
- bullæ on, in pemphigus neonatorum .. 498
- eczema of, in diabetes .. 913
- herpes of .. 498
- Jacquet's erythema of linear albicans on .. 459
- oedema of, with ascites .. 59
- from interior vena cava thrombosis .. 152
- scabies affecting .. 499
- seborrhoeic dermatitis affecting .. 498
- wasted in Tooth's peroneal atrophy (Fig. 82) 79
- Thiosulphate of sodium in estimating blood-sugar .. 333
- Third cervical nerve (see Nerve, Cervical, Third)
- root (see Nerve Root)
- segment, sensory area for (Fig. 584) 751
- cranial nerve, paralysis of (see Paralysis)
- dorsal segment, sensory area for .. (Fig. 584) 751
- lumbar segment, sensory area for .. (Fig. 584) 751
- relations to optic nerve .. (Fig. 304) 377
- occipital nerve, distribution of (Fig. 656) 865
- sacral nerve in micturition .. 490
- root, distribution of (Fig. 585) 752
- Thirst due to abstinence from drinking .. 874
- alum .. 875
- belladonna .. 874
- in diabetes .. 334, 874
- insipidus .. 875
- due to diarrhoea .. 875
- EXTREME .. 874
- in phosphorus poisoning .. 421
- polycythemia from .. 651
- in fevers .. 874
- due to fluid loss .. 875
- gallic acid .. 875
- gastrectasis .. 875
- after hæmorrhage .. 875
- due to heart failure .. 875
- hepatic abscess .. 464
- in hysteria .. 874
- due to oedema .. 875
- perchloride of iron .. 875
- peritonitis .. 875
- perspiration .. 875
- in phosphatic diabetes .. 637
- polyuria and .. 874
- due to pyloric stenosis .. 875
- in rigor .. 736

Thirst, contd.

- due to salt .. 875
- serous exudation .. 875
- tannic acid .. 875
- vomiting .. 875
- Thoma-Leitz hæmocytometer .. 26
- Thoma-Zeiss hæmocytometer .. 26
- Thomas, olivopontocerebellar atrophy of .. 883
- Thomson's disease .. 726
- Thoracic aneurysm (see under Aneurysm)
- duct, injury of, chylous pleuritic effusion from 138
- new growth involving, chylous pleuritic effusion from .. 138
- obstruction, chylous ascites from .. 62, 72
- chyluria from .. 140
- from elephantiasis .. 62
- by growth .. 140
- from injury .. 62
- by malignant disease .. 72
- mediastinal sarcoma .. 62
- retroperitoneal sarcoma .. 62
- Thorax (see Chest)
- Thorium nitrate in pyelography .. 445
- Thorn in foot .. 456
- heel .. 551, 552
- knee .. 456
- Thorn-apple crystals (Fig. 678) 899
- Throads, prostatic, from gonorrhoea .. 496
- in urine .. 229
- Thread-worms (see Oxyuris)
- Threshold, sugar, notes on 333
- reduced in acromegaly .. 331
- Graves' disease .. 331
- Thrill with ascites .. 59
- diastolic, from aortic disease .. 259
- regurgitation .. 875
- in fibromyoma .. 483
- hydatid .. 468, 470, 806
- mid-diastolic, from mitral stenosis .. 268
- due to mitral stenosis .. 875
- with ovarian cyst .. 60
- patent ductus arteriosus .. 196
- PRECORDIAL .. 875
- presystolic .. 875
- disappearance of .. 666
- from mitral stenosis .. 268
- tricuspid stenosis .. 876
- in saphena varix .. 825
- systolic, due to aneurysm .. 875
- aortic disease .. 259
- stenosis 259, 260, 875
- atheroma .. 875
- in congenital heart disease .. 875
- from mitral regurgitation .. 262, 875
- in patent ductus arteriosus .. 875
- interventricular septum 121, 196, 267, 875
- due to pericardial friction .. 875
- pleuritic friction .. 875
- in pulmonary stenosis .. 143, 196, 267, 875
- due to tricuspid regurgitation .. 876
- in varicose vein .. 825
- Throat, acid risings into 376
- bleeding, hæmatemesis from .. 336
- cultures in peripheral neuritis .. 192
- sore throat .. 192
- foreign body in, in children .. 113
- foul breath from .. 113
- gurgling in, before hæmoptysis .. 359
- Klebs-Loeffler bacilli from .. 242, 731
- pain in (see Pain)
- red, in scarlet fever .. 281
- rising in, as an aura .. 87

Throat, contd.

- **SORE** 757
- (and see Sore Throat; and Tonsillitis)
- tickling in, before hæmoptysis 359
- Throbbing, abdominal, from undue pulsation of abdominal aorta 662
- in aortic regurgitation 259
- head (see Head)
- Thrombosis, abdominal, blood per anum from 97
- from fungating endocarditis 485
- intestinal obstruction simulated by 486
- laparotomy for 486
- meteorism from 485
- peritonitis simulated by 485
- of appendicular veins, colic from 148
- in auricle, cerebral embolism from 170
- of axillary vein, spread to superior vena cava 515
- from whitlow 515
- cavernous sinus due to carbuncle of face 284
- coma from 153
- delirium from 212
- diplopia from 222
- encephalitis simulating 156
- exophthalmos in 156, 283, 284, 739
- eye displaced by 222
- eyelids red with 284
- frontal veins dilated with 284
- due to furuncle of face 284
- meningitis from 284
- simulating 156
- oedema of eyelids from 740
- orbit from 739
- ophthalmic veins dilated with 284
- due to orbital cellulitis 284
- orbital cellulitis distinguished from 284
- proptosis in 156
- due to sinusitis 284
- squint from 156, 739
- swelling over mastoid with 284
- central retinal vein, illustrated (Fig. 422) 519
- cerebral, anosmia from 756
- aphasia from 772
- apoplexy from 184
- athetosis after 169, 170
- Babinski's sign from 88
- in children 170
- choreiform movements from 170
- coma from 153, 154
- delirium from 212
- diabetes insipidus from 655
- from endarteritis 382, 627
- epilepsy from 170
- fainting due to 297
- glycosuria from 330
- headache from 370, 371, 380
- hemianopsia from 379
- hemiplegia from 88, 155, 321
- infantile diplegia from 170
- hemiplegia from 170
- after influenza 145
- measles 145
- mental defect after 170
- paralysis of arm from 612
- premonitory warnings 184
- pyramidal tract lesion from 88
- slow onset 184
- speech imperfect from 170
- syphilis and 155, 184, 382, 627
- talipes from 145
- tremor after 170
- trophic lesions after 170

Thrombosis, cerebral, contd.

- unilateral paralysis from 154
- vertigo preceding 911
- vomiting from 380, 929
- coronary, collapse from 52
- pain in epigastrium from 52
- severe cardiac pain from 52
- vomiting from 52
- of femoral vein, embolism of lung from 199
- oedema of leg from 512
- gangrene from 317
- iliac, oedema of one leg from 10, 512
- preceding inferior vena cava thrombosis 10
- pulmonary embolism from 199
- infarct of lung from 364
- of inferior vena cava 9, 909
- abdominal pain from 152
- account of 152
- albuminuria from 9, 16, 68, 909
- ascites from 62, 68
- colic simulated by 152
- collapse from 152
- from extension from leg 68
- fainting due to 297
- hæmaturia from 68
- laparotomy for 152
- nephritis simulated by 10, 909
- oedema of abdomen from 152
- back from 152, 909
- legs from 517, 909
- thighs from 152
- perforated gastric ulcer simulated by 152
- peritonitis simulated by 152, 736
- renal vein thrombosis from 68
- reversed abdominal blood-stream from 10
- swelling of one leg preceding 10
- from thrombosis of leg 909
- tube-casts in urine due to 909
- varicose abdominal veins from 10, 68, 909
- vomiting from 152
- innominate vein, causes 910
- intracardiac, cerebral embolism from 184
- of jugular vein, embolism of lung from 137
- pyæmia from 137
- from otitis media 137
- pleurisy from 137
- from sigmoid sinus thrombosis 739
- lateral sinus, bronchopneumonia from 364
- delirium from 212
- embolism of lung from 137, 199, 322, 791
- empyema from 137
- gangrene of lung from 322, 791
- infarct of lung from 137
- from mastoid abscess 694
- otitis media 109, 137, 199, 253, 322, 694
- pleurisy from 137
- rapid pulse with 109
- in leg, extension to inferior vena cava 68, 909
- in leukaemia 512
- limping due to 456
- from malignant cachexia 512

Thrombosis in leg, contd.

- osteomyelitis simulating 512
- after parturition 512
- in typhoid fever 512
- limping from 457
- of mesenteric vein, abdominal pain from 152
- account of 152
- blood per anum from 96, 152
- colic simulated by 152
- hæmatemesis from 168
- from infection 481
- injury 481
- melæna from 168, 481
- often undiagnosed 152
- peritonitis simulated by 152
- phlebotitis from 152
- pulmonary embolism from 152
- sudden death from 152
- middle cerebral artery, hemiplegia from 381
- necrosis of rectus abdominis muscle in 561
- pain in leg from 321, 539
- of pampiniform plexus, priapism from 657
- pelvic, after childbirth 699
- pyrexia from 699
- from phlebosclerosis 321
- of piles 726
- dyspareunia from 239
- popliteal vein, oedema of leg from 512
- portal vein, account of 67
- from appendicitis 67
- ascites from 61, 67
- characters of ascitic fluid in 67
- jaundice with 67
- piles increased by 67
- primary 67
- pyrexia with 67
- rigors with 67
- spleen enlarged in 778, 784
- suppurative 67
- posterior inferior cerebellar artery, hemiataxy from 76
- medulla softening from 754
- sensory changes from 76, 754 (Fig. 590)
- pulmonary, from atheroma of pulmonary artery 363
- hæmoptysis from 363
- infarct from 137, 363
- in mitral stenosis 363
- renal, albuminuria from 9, 10
- in blood diseases 10
- cachexia 10
- hæmaturia from 68
- infarct from 9
- from inferior vena cava thrombosis 68
- in leukaemia 10
- pernicious anaemia 10
- simulating nephritis 10
- of retinal vein 519
- blindness due to 925
- illustrated (Fig. 422) 519
- ophthalmoscopic examination for 93
- scotoma from 93
- saphenous, oedema of one leg from 10
- preceding inferior vena cava thrombosis 10
- of sigmoid sinus, jugular vein thrombosis from 739
- oedema over mastoid from 739
- tenderness over mastoid from 739
- sinus, account of 739
- headache with 739
- hemiplegia from 382
- optic disc congested with 739
- from otitis media 739
- with otorrhœa 739
- pain about ear with 739
- pyrexia with 739

Thrombosis, sinus, contd.

- rigor in 737, 739
- sweating with 739
- vomiting with 739, 931
- of spinal artery, allocheiria from 22
- from enteric fever 628
- scarlet fever 628
- syphilis 628
- transverse myelitis from 486, 628
- unilateral symptoms in 22
- splenic, infarction from 788
- hæmatemesis from 345
- in leukaemia 788
- lymphadenoma 788
- of superficial circumflex vein, pain in iliac fossa from 557
- superior longitudinal sinus, cerebellar abscess simulating 740
- cerebral abscess simulating 740
- coma from 153, 733
- convulsions in 156, 622
- encephalitis simulated by 156
- simulating 622
- headache in 156
- head-retraction in 731
- meningitis simulated by 156, 733
- simulating 622, 740
- oedema of scalp from 740
- optic neuritis in 156
- paraplegia from 621, 622
- pyrexia from 622
- spastic paralysis of legs from 733
- vomiting in 622
- vena cava, causes of 910
- oedema of arm from 515, 516
- face from 515, 516
- from phlebitis 515
- whitlow 515
- ulcer of foot from 893
- of vein, gangrene with 321
- leucocytosis from 453
- necrosis of rectus abdominis muscle due to 736
- oedema due to 511
- in ventricle, cerebral embolism from 170
- Thrush due to *Oidium albicans* 95
- Thyæa occidentalis, dermatitis due to 916
- Thumb, attitude of, in tetany 2
- Thumbs, double-jointed, in Mongolism 236
- Thymic asthma 653
- infantilism 235
- Thymol for ankylostomiasis 103, 635
- Thymus gland, enlarged, coma from 181
- convulsions from 181, 182
- dullness due to 248
- dyspnoea from 246, 247
- in Graves' disease 877
- lymphatism 477
- skiagraph of (Fig. 213) 248
- stridor due to 799
- X rays in detecting 248, 877
- hæmorrhage into, cyanosis from 198
- sarcoma starting in 910
- Thyroglossal duct, cyst of 852
- Thyroid cartilage, perichondritis of, sore throat due to 758
- thyroid gland simulated by 876
- deficiency, enuresis from 702
- (and see Hypothyroidism)

Thyroid, contd.

- extract, adiposis dolorosa not helped by .. 510
 - - in diagnosis of hypothyroidism .. 50
 - - myxœdema .. 50, 656
 - - distinguishing cretin from idiot .. 622
 - - effect on high blood-pressure .. 106
 - - in infantilism .. 235
 - - loss of weight due to .. 934
 - - in myxœdema .. 508
 - - palpitation from .. 594
 - - tachycardia from .. 856
 - gland, abscess in .. 877
 - - adenoma of .. 877
 - - cyst simulating .. 876
 - - amenorrhœa and .. 24
 - - bruit over, in exophthalmic goitre .. 267
 - - carcinoma of (see Carcinoma)
 - - cyst of (see Cyst)
 - - **ENLARGED** .. 876
 - - from abscess .. 877
 - - in acute rheumatism .. 877
 - - asthma simulated by .. 653
 - - brachial plexus compressed by .. 877
 - - brassy cough from .. 877
 - - cervical plexus compressed by .. 877
 - - sympathetic compressed by .. 877
 - - in cholera .. 877
 - - dysphagia due to .. 877
 - - dyspnoea from .. 246, 248, 877
 - - from fear .. 877
 - - in Graves' disease .. 267, 283, 596, (Fig. 644) 643, 857, 877, 881, 877
 - - from gumma .. 197
 - - hæmorrhage into .. 388
 - - hoarseness from .. 877
 - - from hydatid cyst .. 877
 - - jugular veins obstructed by .. 877
 - - in malaria .. 877
 - - menstruation .. 876, 877
 - - œsophagus compressed by .. 877
 - - orthopnoea from .. 877
 - - paralysis of vocal cord from .. 388
 - - in pregnancy .. 876
 - - pressure signs from .. 877
 - - ptosis due to .. 877
 - - pupil contracted from .. 877
 - - recurrent laryngeal nerve compressed by .. 877
 - - in secondary syphilis .. 877
 - - stridor due to .. 799, 877
 - - from suppuration in it .. 197
 - - trachea compressed by .. 248, 877
 - - displaced by .. 877
 - - in trench fever .. 877
 - - from tuberculosis .. 877
 - - in typhoid fever .. 877
 - - vagus compressed by .. 877
 - - in variola .. 877
 - - vocal cord paralysis from .. 877
 - - voice altered by .. 877
 - - (and see Goitre)
 - - fibrosis of, in Riedel's disease .. 197
 - - hæmorrhage into, cyanosis from .. 197
 - - malignant, laryngeal paralysis from .. 606
 - - movement on swallowing .. 876
 - - new growth of, secondary in bone .. 306
 - - - pleura .. 132
 - - ovary related to .. 507

Thyroid gland, contd.

- - perichondritis of thyroid cartilage simulating .. 876
 - - pulsatile, in exophthalmic goitre .. 846
 - - removal (see Thyroidectomy)
 - - sebaceous cyst simulating .. 876
 - - subhyoid bursa simulating .. 876
 - - suppuration in, cyanosis from .. 197
 - - inadequacy in ateliosis .. 235
 - - in infantilism .. 235
 - - **Infantilism** .. 235
 - - medication in hypothyroidism .. 506
 - - (Figs. 389, 390)
 - - at menopause .. 507
 - - in myxœdema .. 516
 - - secretion, menstruation and .. 484
 - - treatment in diagnosing cretinism .. 294
 - - for enuresis .. 271
 - - in myxœdema .. 290
 - Thyroidectomy, abductor paralysis after .. 799
 - - hoarseness after .. 388
 - - paralysis of vocal cord after .. 388, 607
 - - stridor after .. 607, 799
 - - tetany and .. 3, 189, 799
 - Thyroiditis, ligneous, cyanosis from .. 197
 - Tibia, acute necrosis of, cellulitis from .. 147
 - - contracture of leg after .. 147
 - - talipes from .. 147
 - - bed sore over .. 321
 - - bent in osteogenesis imperfecta .. 233
 - - deformed in congenital syphilis .. 291
 - - enlarged in leontiasis ossea .. 255
 - - epiphysitis of, limping from .. 456
 - - greenstick fracture of, limping from .. 456
 - - hæmorrhage under periosteum of, in scurvy .. 50
 - - injury to, arrest of growth from .. 147
 - - overgrowth from .. 147
 - - myeloid sarcoma of, skiagrams of .. 822
 - - (Figs. 639, 640)
 - - myeloma affecting .. 822
 - - nodule on, in yaws .. 501
 - - in osteitis deformans, skiagram of (Fig. 161) .. 193
 - - osteomyelitis of, erythema nodosum simulating .. 502
 - - limping from .. 456
 - - periosteal sarcoma of .. 845
 - - periostitis of, limping from .. 456
 - - sabre-shaped in rickets (Fig. 192) .. 232
 - - sarcoma of, limping from .. 456
 - - syphilitic node on .. 819
 - - tenderness of, due to tuberculous disease .. 819
 - - thickened in osteitis deformans .. 194, 819
 - - tuberculous abscess of .. 818
 - Tibial muscles, paralysis of, talipes from .. 146
 - **Tibialis anticus, nerve-supply of** .. 609, 610
 - - posticus, nerve-supply of .. 609
 - Tic, blinking of .. 173
 - - cessation of, during sleep .. 173
 - - from conjunctivitis .. 173
 - - convulsive, chorea distinguished from .. 170
 - - **douloureux** .. 548, 866
 - - age incidence of .. 548
 - - facial pain from .. 640
 - - flushing in .. 548
 - - hyperacusis from .. 389
 - - lachrymation in .. 548

Tic douloureux, contd.

- - metallic taste in .. 548
 - - pain in ear from .. 253
 - - face from .. 548
 - - lower jaw from .. 567
 - - tongue from .. 590
 - - pains due to .. 866
 - - photophobia in .. 548, 639, 640
 - - pyalorrhœa and .. 662
 - - salivation in .. 548
 - - sense of swollen face in .. 548
 - - teeth and .. 548
 - - tenderness of scalp in .. 866
 - - of tongue .. 591
 - - trigeminal neuralgia simulating .. 548
 - - trophic changes in skin in .. 548
 - - hair in .. 548
 - - (and see Neuralgia, Trigeminal)
 - - emotion increasing .. 173
 - - face affected by .. 173
 - - from foreign body in eye .. 173
 - - jaw affected by .. 173
 - - limbs affected by .. 173
 - - mannerisms and .. 173
 - - neck affected by .. 173
 - - shoulder-shrugging .. 173
 - - sniffing, from adenoids .. 173
 - - itching nares .. 173
 - - **spasmodic** .. 173
 - - convulsions from .. 181
 - - from tight collar .. 173
 - **Tick paralysis** .. 625, 626
 - - paraplegia in .. 621
 - - Tickling, hiccough from .. 386
 - - in throat before hæmoptysis .. 359
 - Ticks, spotted fever due to .. 679
 - Tight lacing, hepatoptosis from .. 462
 - - liver displaced by .. 461
 - - furrowed by .. 461
 - - pushed down by .. 460
 - - menorrhagia from .. 482
 - - movable kidney from .. 461
 - - Riedel's lobe of liver and .. 461, 462
 - Tightness in chest from mediastinal growth .. 534
 - - mediastinitis .. 535
 - Tilbury Fox, impetigo contagiosa of .. 498
 - Tin-tack in heel .. 552
 - Tincture of guaiacum .. 104
 - - in blood-test .. 481, 482
 - - test, positive in acute nephritis .. 12
 - - iodine test for bile .. 903
 - **Tinea circinata** .. 311, 312
 - - body skin affected by .. 311
 - - carbolic acid simulating .. 276, 312
 - - fungous parasite in .. 479
 - - of lips .. 459
 - - microscope in diagnosis .. 312, 479
 - - redness in .. 311
 - - rings in .. 311, 312
 - - scales in .. 311
 - - syphilis simulated by .. 479
 - - tinea imbricata distinguished from .. 312
 - - trichophyte in .. 312
 - - cruris, perineal sore from .. 766
 - - scratching in .. 766
 - - decalvans, alopecia arcata distinguished from .. 311
 - - **Imbricata** .. 312
 - - ichthyosis distinguished from .. 312
 - - tinea circinata distinguished from .. 312
 - - with large spores .. 309
 - - marginata, bathing drawers area affected by .. 499
 - - itching in .. 659
 - - with small spores .. 309
 - - **sycois** .. 311, 809
 - - carbuncle simulated by .. 311
 - - circinate tubercular syphilide distinguished from .. 311

Tinea sycosis, contd.

- - eczematous folliculitis distinguished from .. 311
 - - microscope in diagnosis .. 311
 - - pain in face from .. 311
 - - pyrexia from .. 311
 - - seborrhœa distinguished from .. 311
 - - swelling of face from .. 311
 - - trichophytic fungus in .. 311
 - - **tonsurans** .. 91, 309, 311
 - - hair stumps bent in .. 311
 - - pityriasis distinguished from .. 311
 - - psoriasis distinguished from .. 311
 - - scales in .. 744
 - - **versicolor** .. 313
 - - chest affected by .. 313
 - - chloasma simulated by .. 313, 645
 - - colour varying with race .. 313
 - - erythrasma distinguished from .. 313
 - - simulating .. 313
 - - face affected by .. 313
 - - fungous parasite in .. 479
 - - limbs affected by .. 313
 - - microscope in diagnosis .. 313, 479
 - - Microsporon furfur causing .. 313
 - - mycelium in .. 313
 - - parts affected by .. 313
 - - scales in .. 313, 645, 744
 - - spots in .. 313
 - - syphilides simulated by .. 313
 - - syphilis simulated by (and see Ringworm) .. 479
 - - Tingling, apoplexy preceded by .. 184
 - - as an aura .. 86
 - - in fingers in acroparesthesia .. 545
 - - glans penis from inflamed trigone .. 493
 - - miliaria rubra .. 918
 - - paralysis with .. 612
 - - in peripheral neuritis .. 570, 749
 - Tinkling, metallic, over pneumothorax .. 209
 - Tinned milk, scurvy from .. 93
 - **TINNITUS** .. 877
 - - in aeroplane .. 878
 - - alcohol and .. 878
 - - due to anæmia .. 878, 879
 - - anesthetics .. 879
 - - antipyrin .. 879
 - - anxiety and .. 878
 - - due to aortic regurgitation .. 879
 - - arteriosclerosis .. 878, 879
 - - atheroma .. 878
 - - aural polyp .. 878
 - - aurium, epistaxis relieved by .. 274
 - - bruit in head with .. 878
 - - due to carbon bisulphide .. 878
 - - change of atmospheric pressure .. 878
 - - chloroform .. 879
 - - chronic nephritis .. 879
 - - coal gas .. 878
 - - deafness and .. 207, 878
 - - in divers .. 878
 - - due to drugs .. 879
 - - dyspepsia .. 879
 - - ear disease .. 878
 - - effect of surroundings on .. 878
 - - due to ether .. 879
 - - in facial paralysis .. 604
 - - flushing with .. 303
 - - due to foreign body in ear .. 878
 - - fracture of base of skull .. 879
 - - garage .. 878
 - - going to depths .. 878
 - - gout .. 879
 - - granular kidney .. 878
 - - hallucinations of hearing and .. 878
 - - due to heart disease .. 879
 - - high blood-pressure .. 878, 879

Tinnitus, contd.

- infection of labyrinth .. 879
- lacquering .. 878
- leukaemia .. 879
- malaria .. 879
- in Ménière's disease .. 207, 879, 912
- menopause and .. 878
- menstruation and .. 878
- due to migraine .. 879
- in miners .. 878
- due to motor-boat cabin .. 878
- neuralgia .. 879
- noisy machinery and .. 878
- due to occupation .. 878
- otitis media .. 878
- otosclerosis .. 879, 912
- overwork and .. 878
- in pernicious anæmia .. 878, 879
- due to plethora .. 878
- pregnancy and .. 878
- pulsatile .. 878
- due to quinine .. 879
- rhythmical .. 878
- due to rising to heights .. 878
- salicylates .. 879
- scleritretted hydrogen .. 878
- stapedius paralysis .. 604
- stuffy rooms and .. 878
- due to sulphuretted hydrogen .. 878
- syphilis of ear .. 879, 912
- telephone .. 879
- tobacco .. 878, 879
- toxic gases and .. 878
- due to tumour of acoustic nerve .. 879
- typhoid disease of ear .. 879
- uræmia .. 879
- (and see Noises in Head)
- Tip-toe, standing on, not possible in paralysis of internal popliteal nerve .. 610
- - - - pseudohypertrophic muscular paralysis .. 625
- T.N.T. (see Trinitrotoluol)
- Toad poison, hæmoglobinuria from .. 357
- Toadstools, delirium from .. 213
- hæmoglobinuria from .. 357
- Tobacco amblyopia (see Amblyopia, Tobacco)
- angina from .. 53
- appetite diminished from .. 58
- cachexia from .. 128
- cacogeusia due to .. 860
- central scotoma due to .. 923
- chronic laryngitis from .. 387
- pharyngitis from .. 762
- colour blindness due to .. 925
- cough from .. 185, 186
- dead fingers from .. 204
- deafness from .. 207
- dyspnoea from .. 246, 247, 400
- foul breath from .. 112
- gastritis from .. 58, 398
- headache from .. 371
- heart disease simulated from .. 114
- - irregular from .. 596
- heart, heartburn simulating .. 377
- - precordial pain from .. 377
- heartburn from .. 376
- hemeralopia from .. 926
- hoarseness due to .. 387
- infantilism from .. 235
- insomnia due to .. 402
- intermittent claudication from .. 542
- loss of weight due to .. 933
- low blood-pressure from .. 106
- out of condition from .. 113
- pain in tongue from .. 590, 591
- palpitation from .. 594, 596
- pseudo-angina from .. 533
- shortness of breath from .. 113, 114
- tachycardia from .. 596
- tinnitus due to .. 878, 879
- tremor due to .. 879, 881
- vertigo due to .. 911
- vomiting due to .. 928
- Toe, abrasion of, cellulitis from .. 511
- gangrene of (see Gangrene)

Toe, contd.

- great, dropped, in Tooth's peroneal atrophy .. 79
- - erect (see Hallux Erectus)
- - exostosis of .. 820
- - flexed, in peroneal atrophy .. 624
- - gout in .. 428, 539
- - pain in, in anterior cruritis .. 540
- - perforating ulcer of .. 892
- - pyæmia affecting .. 429
- - hammer, limping from .. 456
- - little, perforating ulcer of .. 892
- - melanotic sarcoma of .. 477, 831
- - pain in, in gout .. 428
- - perforating ulcer of, in tabes dorsalis .. 321
- - sore (see Sore Toe)
- - whitlow of, limping due to .. 456
- - - pain in foot from .. 456
- Toe-nail, ingrowing, pain in foot from .. 539
- Toes, atrophosis affecting .. 168
- black, in Raynaud's disease .. 203
- of boots worn in periph. neuralritis .. 75
- cheilopompholyx of .. 918
- clubbed, from congenital heart .. 267
- - in pulmonary stenosis .. 875
- deformity of, from tight boots .. 146
- - dragging of, in hysteria .. 608
- - spastic paralysis .. 607
- - eczema marginatum of .. 312
- - of, from polymyositis .. 623
- - hyperextended, from infantile paralysis .. 146
- - paralysis of interosseal .. 146
- - - lumbricals .. 146
- - peripheral neuritis .. 146
- - in talipes .. 144
- - from tight boots .. 146
- pain in, in Raynaud's disease .. 542
- purple, in Raynaud's disease .. 203
- Raynaud's disease of .. 320, 852
- - scabies affecting .. 918
- Tokelau ringworm .. 312
- Toluylenediamine, blood destruction by .. 421
- jaundice due to .. 408, 421
- Tomato leaves, dermatitis due to .. 916
- Tomato-like tumours in mycosis fungoides .. 888
- Tomatoes, oxaluria from .. 353, 523
- Tongue, actinomycosis of, dysphagia from .. 661
- - pyralism from .. 661
- - analgesia of, in tabes dorsalis .. 627
- - angioneurotic edema of .. 513, 853
- - angiosarcoma of .. 852
- - ataxy of .. 77
- - atrophy of, in bulbar paralysis .. 243, 603, 662, 731, 773
- - - from twelfth nerve lesion .. 82
- - bald, from scarlet fever .. 763
- - bee-sting of .. 244
- - bitten, in convulsions .. 180
- - epilepsy .. 182, 298, 591, 736
- - pain from .. 590, 591
- - during sleep .. 591
- - black, in Raynaud's disease .. 852
- - bleeding, in stomatitis .. 95
- - brown, in acute yellow atrophy .. 345, 416
- - - anuria .. 57
- - - lardaceous disease .. 57
- - suppurative pyelonephritis .. 57
- - with tuberculous kidney .. 57
- - bulbar paralysis affecting .. 242

Tongue, contd.

- chancre of .. 897
- - dysphagia from .. 661
- - pyralism from .. 661
- coarse, in Mongolian idiocy .. 293
- coated, in appendicitis .. 558
- - biliousness .. 640
- - diverticulitis .. 556
- - influenza .. 712
- - serum disease .. 277
- - trench fever .. 710
- cracks in .. 591, 592
- - cramp in .. 592
- - crusts on .. 95
- - cyanosis of, in Raynaud's disease .. 852
- - deep red, in diabetes .. 334
- - dental ulcer of .. 897, 898
- - dermatitis herpetiformis affecting .. 95
- - difficulty in moving, in stomatitus .. 95
- - dry, in acute yellow atrophy .. 345, 416
- - - anuria .. 55, 57
- - from belladonna .. 859
- - furred, in general peritonitis .. 485
- - from hepatic abscess .. 464
- - in lardaceous disease .. 57

- - - (and see Ulceration of Tongue)
- - - white, pica and .. 128
- - - Tonic contraction of uterus .. 252
- - - spasms, account of .. 174-176
- - - definition of .. 173
- - - and tetanic, discussion of terms .. 175
- - - Tonsils, actinomycosis of, bacteriology in diagnosing .. 761
- - - - sore throat due to .. 757
- - - and adenoids, enuresis with .. 270
- - - aspergillosis of, bacteriology in diagnosis .. 761
- - - bacteriological examination of .. 43, 83, 474
- - - carcinoma of (see Carcinoma)
- - - chancre of .. 761
- - - - dysphagia from .. 661
- - - - pyralism from .. 661
- - - chronically inflamed, cachexia from .. 127
- - - - toxæmia from .. 127
- - - enlarged, insomnia from .. 403
- - - in lymphatism .. 477
- - - from mouth-breathing .. 225
- - - - nightmares from .. 499
- - - - rhinitis with .. 225
- - - - stertor due to .. 794
- - - epithelioma of (see Epithelioma)
- - - fish-bone in, sore throat due to .. 757
- - - foreign body in, sore throat due to .. 757
- - - gumma of, carcinoma simulated by .. 761
- - - - sore throat due to .. 757

Tonsils, gumma of, contd.

- Wassermann reaction with .. 761
- herpes on, from glossopharyngeal neuralgia .. 253
- mucous patches on, in syphilis .. 764
- operation on, pain in ear from .. 253
- pharyngeal, inflammation of, snoring due to .. 757
- removal of, death from, lymphatism and .. 477
- paralysis of palate after .. 730
- sarcoma of (see Sarcoma)
- septic, acute nephritis from .. 11
- anæmia from .. 43
- cervical adenitis from .. 763
- chronic, anæmia with .. 761
- cheesy material from .. 761
- rheumatoid arthritis with .. 761
- D.A.H. from .. 246, 597
- deafness from .. 207
- debility from .. 246
- dyspnoea from .. 246
- fibrosis from .. 571
- foul breath from .. 113
- noises in head from .. 504
- otorrhœa due to .. 522
- out of condition from .. 113
- purpura from .. 678
- pyrexia from 711, 713, 715
- retrobulbar neuritis from .. 547
- septicæmia from 739, 785
- shortness of breath from .. 113
- toxæmia from 43, 113
- verigo from .. 504, 911
- snail-track ulcers on .. 691
- Streptococcus hæmolyticus in .. 678
- tuberculosis of .. 898
- ulcer of, in secondary syphilis .. 898
- Tonsillar abscess (see Abscess)
- Tonsillitis, acute endocarditis from .. 263
- in acute rheumatism .. 136, 758,
- adenoids with .. 761
- albuminuria in .. 16
- anæmia from .. 47
- aortic disease after .. 261
- arthritis of spine from .. 796
- bacteriological examination in .. 759
- bacteriuria from .. 90
- in children .. 712
- cough from .. 186
- D.A.H. after .. 246
- debility after .. 246
- diabetes after .. 334
- in diphtheria .. 757, 758
- dysphagia in .. 661
- dyspnoea after .. 246
- follicular, account of .. 759
- in diphtheria simulating .. 759
- leucocytosis in .. 453
- mild .. 760
- severe .. 760
- sore throat due to .. 757
- syphilis simulating .. 760
- due to German measles .. 757
- hæmoptysis simulated by .. 359
- due to Hoffmann's bacilli .. 757
- inability to open mouth due to .. 884
- due to influenza bacilli .. 757
- intercurrent .. 46
- due to measles .. 757
- Micrococcus catarrhalis mouth-breathing .. 761
- pain in ear from .. 253
- limbs from .. 568, 569
- due to pneumobacilli .. 757
- pneumococci .. 757
- ptialism in .. 661
- pyrexia from 46, 688, 704, 712
- rheumatic fever and .. 423

Tonsillitis, contd.

- rigor from .. 737
- due to scarlet fever 757, 759
- septic, foul breath from .. 113
- sodium salicylate relieving .. 758
- sore throat due to .. 757
- due to Spirochæta pallida .. 757
- spondylitis deformans from .. 869
- due to staphylococci .. 757
- streptococci .. 757
- submaxillary glands enlarged from .. 474
- due to tubercle bacilli .. 757
- valvular disease and .. 17
- due to Vincent's bacilli .. 757
- **Tonus, muscular** .. 175
- cerebellum and .. 73
- digitalis and .. 175
- veratria and .. 175
- **Tooth, 'abscess' at apex of** .. 43
- (Figs. 61-63)
- in bronchus, gangrene of lung from .. 322
- hæmoptysis from .. 361
- canine, nasolabial tenderness from .. 549
- **decaying, pain in face from** .. 549
- epithelioma related to .. 896
- of tongue started by .. 591
- extraction, excessive bleeding after, in hæmophilia .. 446
- infected, skiagrams of .. 43
- (Figs. 61-63)
- molar, unerupted, pain in jaw from .. 567
- pain in tongue from 590, 591
- sockets, bacteriological investigation of .. 83
- in trachea, cyanosis from 197
- gangrene of lung from 323
- wisdom (see Wisdom)
- **Tooth** .. 240
- and see Teeth
- **Toothache from alveolar abscess** .. 834
- dental abscess .. 694
- fanning due to .. 297
- oedema of face from .. 511
- pain in jaw from .. 567
- from perostitis of jaw .. 834
- tooth-brush, bleeding gums from .. 93, 94
- retraction of gums from 731
- **Tooth-plate, aorta opened by** .. 337
- bleeding of gums due to .. 94
- ill-fitting, loss of weight due to .. 933
- impacted in larynx .. 240
- (Fig. 202)
- in œsophagus .. 240
- pyopneumopericardium from .. 800
- œsophagus opened by .. 337
- pain in tongue from .. 590, 591
- ptialism due to .. 661
- tongue swollen from .. 852
- ulceration of tongue from .. 244
- **Tooth's peroneal atrophy** .. 78
- account of .. 624
- age incidence of .. 78
- no ankle-clonus in .. 624
- anterior cornual cell lesion in .. 79, 624
- tibial muscles .. 146
- affected in .. 79
- big toe drop in .. 624
- flexed in .. 141
- club-foot from .. 611
- early case of .. 611
- external popliteal nerve paretic in .. 624
- family incidence of .. 78, 141, 146, 624
- features of .. 146
- foot-drop in .. 624
- Friedrich's ataxy simulated by .. 78
- hand paralysis in .. 620
- hands wasted in .. 79
- infantile paralysis simulated by .. 78
- simulating .. 146

Tooth's peroneal atrophy, contd.

- insidious onset of .. 624
- knee-jerks in .. 79, 624
- legs affected in .. 620
- limping from .. 456
- muscle wasting in .. 79, 80
- (Fig. 82)
- myopathy simulated by .. 78
- onset after fevers .. 79, 624
- measles .. 79, 624
- whooping-cough .. 79, 624
- paraplegia in .. 621
- peroneal muscles affected in .. 146
- pes cavus in .. 146
- plantar reflex flexor in .. 88
- primary muscular dystrophies simulating .. 146
- not a primary muscular dystrophy .. 79
- R.D. in .. 79, 80, 146
- no sensory changes in .. 79
- slow course of .. 79, 624
- symmetry of .. 146
- talipes from 78, 145, 146, 624
- thenar muscles wasted in .. 146
- transverse myelitis simulating .. 81
- wasting of leg in .. 141
- **Top-hat makers, mercanturism in** .. 44
- **Tophi, peripheral neuritis with** .. 571
- **Tophus of ear** .. 429
- (Fig. 140)
- Torsion of ovarian cyst (see Cyst, Ovarian)
- pedicle (see Ovarian Pedicle)
- subperitoneal fibroid simulating colic .. 149
- urgent laparotomy for .. 149
- testis (see Testis)
- **Torticollis** .. 174, 179
- asymmetry of face with .. 795
- after birth .. 179, 795
- cervical caries simulating .. 179
- congenital .. 179
- facial atrophy in .. 179
- in hysteria .. 178
- inflamed glands simulating .. 179
- from injury .. 795
- lateral curvature of spine from .. 795
- rheumatic myositis simulating .. 179
- due to rupture of sternomastoid .. 179
- scoliosis from .. 191, 192
- spasmodic .. 795
- head-retraction with .. 731
- spinal accessory nerve and .. 179
- sternomastoid muscle affected in .. 795
- stiff neck from .. 795
- **Tottering gait in general paralysis** .. 881
- **Toxæmia, acute dilatation of heart from** .. 266
- from acute rheumatism .. 261
- acute yellow atrophy .. 345
- anæmia from .. 43, 47
- anuria from .. 57
- from bronchiectasis .. 127
- cachexia from .. 127
- from cholecystitis .. 113
- chronic, anæmia from .. 43
- from coli bacilluria 113, 127
- collapse from .. 215
- convulsions from .. 183
- D.A.H. from 115, 246, 597, 859
- deafness from .. 207
- dyspnoea from .. 246
- from enteric fever .. 25
- fainting due to .. 299
- fatty heart from .. 70
- foul breath from .. 112

Toxæmia, contd.

- gastric, hæmatemesis from .. 336
- general cardiac bruits in .. 117
- oedema from .. 516
- hæmoglobinuria from .. 358
- headache from .. 371
- heart impulse displaced in .. 374
- heart-block due to .. 109
- infantilism from .. 235
- from infective endocarditis .. 113, 787
- intestinal (see Intestinal Toxæmia)
- from intestinal sepsis .. 113
- stasis .. 127
- loss of weight due to .. 933
- memory defect from .. 25
- multiple neuritis from 541
- noises in head from .. 504
- out of condition from .. 113
- peripheral neuritis from .. 572
- from phthisis .. 113
- plumbism .. 113
- of pregnancy, hæmoglobinuria from .. 357
- from pyelonephritis .. 127
- pyorrhea alveolaris .. 127
- pyosalpinx .. 43
- rheumatoid arthritis .. 127
- septic tonsils .. 43, 113
- shortness of breath from 113
- from summer diarrhœa 215
- tonsils and adenoids .. 127
- trench fever .. 113
- trismus in .. 885
- various causes of .. 246
- forms of .. 47
- vertigo from .. 504, 911
- **Toxic adenomatous goitre** .. 857
- Graves' disease .. 877
- gases, tinnitus due to .. 878
- Trachea, aneurysm compressing .. 534
- opening into .. 157, 361
- **caseous gland in, effects of** .. 249
- interrupted into, dyspnoea from .. 246
- obstructing, stridor due to .. 799
- displaced by enlarged thyroid .. 877
- epithelioma of, dyspnoea from .. 247
- stridor due to .. 799
- of œsophagus invading .. 799
- fistula to œsophagus from .. 323
- foreign body in (see Foreign Body)
- mucopus in, stridor due to .. 799
- obstruction of, by aneurysm .. 186, 188, 248
- caseous gland .. 197
- (Fig. 168)
- causes of .. 246
- cough from .. 186, 188
- cyanosis from .. 197
- dyspnoea from 246, 248
- by enlarged thyroid gland .. 188, 248, 877
- foreign body .. 197, 248
- lymphadenomatous .. 248
- malignant cervical glands .. 248
- mediastinal new growth 186, 188, 248
- stridor from .. 248
- voice altered by .. 188
- stenosis of, after cut throat .. 799
- from syphilis .. 799
- after tracheotomy .. 799
- syphilis of, dyspnoea from .. 247
- ulceration of (see Ulceration)
- wound of, surgical emphysema due to .. 805
- **Tracheal tugging from aneurysm** .. 240
- **Tracheotomy for acute suffocative laryngitis** .. 197
- oedema of larynx .. 606

Tracheotomy, contd.

- in angioneurotic oedema 553
- for bilateral laryngeal paralysis . . . 606
- diphtheria . . . 606
- laryngeal obstruction . . . 248
- oedema of larynx . . . 762
- stenosis of trachea after stridor after . . . 799
- surgical emphysema from . . . 254
- tube, hæmoptysis from . . . 361
- Trachema** 285, 286
- corneal ulcer with . . . 891
- entropion from . . . 286
- illustrated (*Fig. 237*) . . . 288
- lachrymation from . . . 286
- oedema of eyelids in . . . 660
- pannus from . . . 286, 891
- ptosis from . . . 286, 660
- thickened lids with . . . 286
- trichiasis from . . . 286
- Trade fumes, delirium from** . . . 212
- fainting due to 297, 299
- out of condition from 113
- shortness of breath from . . . 113
- processes, tremor due to 881
- Trades, dermatitis from** 915
- account of . . . 916
- list of . . . 917
- erythema due to 275, 277
- mercury tremor and . . . 882
- noises in head from . . . 504
- vertigo due to . . . 504
- vesicular dermatitis due to . . . 278
- (and see Occupation)
- Train, dizziness on** . . . 911
- sickness, headache from 372
- vomiting in . . . 929
- smash, fainting due to 297
- Trance, bradypnoea in** 110, 111
- coma in . . . 154
- death simulated by . . . 111
- hysteria and . . . 158
- mirror in diagnosing . . . 111
- sex incidence of . . . 158
- thermometer in diagnosing . . . 111
- Transfusion of blood (see Blood Transfusion)**
- general oedema after . . . 513, 516
- Transillumination of antrum of Highmore** (*Fig. 191*) 226, 567, 694
- of nose . . . 837
- Translucency of hydrocele** . . . 588, 833, 849
- of cord . . . 832
- psosa bursa . . . 833
- in scrotal hernia in infant . . . 588
- test of scrotal cysts . . . 588
- Transposition of cæcum** . . . 556
- great vessels . . . 196
- heart . . . 267, 373
- liver . . . 461
- viscera . . . 196
- abnormal subclavian artery with . . . 241
- fibroid lung simulating . . . 269
- morbus coeruleus with 241
- Transverse colon (see Colon, Transverse)**
- malpresentation . . . 250, 251
- myelitis (see Myelitis)
- smile in myopathy (*Fig. 244*) 291
- Trapezius, nerve-supply to** (*Fig. 474*) 618
- Traube's space, demarcation of** . . . 755
- stomach tympany in . . . 755
- Trauma (see Injury)**
- Traumatic cyanosis** . . . 200
- illustrated (*Fig. 175*) 202
- neurasthenia . . . 870
- Treadler's cramp** . . . 189
- Trembling attacks in Graves' disease** . . . 881
- TREMOR** 879
- due to absinth 879, 881
- action . . . 883
- due to alcohol 184, 879, 881
- antimony . . . 881, 882
- of arms, congenital . . . 880

Tremor of arms, contd.

- from cephalitis 157, 701
- in Graves' disease . . . 881
- due to manganese . . . 882
- mercury . . . 84
- senile . . . 880
- bread-crumbling . . . 880
- due to carbon bisulphide 881
- cerebellar lesions . . . 880
- cerebellar diplegia . . . 880
- embolism . . . 170
- thrombosis . . . 880
- cessation during sleep . . . 880
- due to chill . . . 882
- in chorea . . . 880
- choreiform contractions distinguished from . . . 170
- from chronic hemiplegia 880
- intoxications . . . 881
- cigarette-rolling . . . 880
- due to cocaine 879, 881
- cold . . . 879, 880, 882
- congenital . . . 879
- due to convalescence . . . 879, 880
- in diplegia . . . 883
- disseminated sclerosis . . . 879, 880
- due to emotion . . . 879, 880
- cephalitis . . . 223
- of face due to alcohol . . . 881
- congenital . . . 880
- familial . . . 879
- in familial ataxy . . . 880, 883
- due to fatigue . . . 880
- of feet due to alcohol . . . 881
- manganese . . . 882
- fine . . . 880
- of fingers due to alcohol . . . 881
- in Graves' disease . . . 857, 881, 934
- flushing with . . . 303
- in Friedreich's ataxy 880, 883
- in fur workers . . . 882
- due to general paralysis . . . 879, 881, 883
- in Graves' disease 263, 879
- of hands due to alcohol . . . 881
- congenital . . . 880
- in general paralysis . . . 881
- Graves' disease 877, 881
- due to manganese . . . 882
- mercury . . . 44, 84
- in hat-makers . . . 882
- of head from cephalitis . . . 157
- and neck in old age . . . 880
- paralysis agitans . . . 880
- senile . . . 880
- in spinocerebellar ataxy . . . 883
- after hemiplegia 171, 882
- in hemiplegia . . . 883
- hysteria 171, 879, 880, 882
- infantile hemiplegia . . . 76
- intention, account of 883
- in cerebellar abscess . . . 371, 630
- ataxy . . . 884
- atrophy . . . 884
- tumour . . . 371, 630
- choreiform contractions distinguished from 170
- from corpora quadrigemina lesion . . . 884
- in diplegia . . . 884
- disseminated sclerosis . . . 185, 371, 385, 607, 630, 879, 883, 923
- from eighth nerve tumour . . . 884
- in familial ataxy . . . 884
- in Friedreich's disease . . . 176, 624, 883, 884
- hands . . . 607
- hysteria . . . 884
- illustrated (*Fig. 661*) 883
- in Little's disease . . . 169
- from mid-brain lesions . . . 884
- olivo-ponto-cerebellar atrophy . . . 884
- optic thalamus lesion . . . 884
- in paralysis agitans . . . 880
- from red nucleus lesion . . . 884
- rubrospinal tract lesion . . . 884

Tremor, intention, contd.

- superior cerebellar peduncle lesion . . . 884
- tegmentum lesion . . . 884
- of iris from dislocation of lens . . . 220
- due to lead 879, 881, 882
- of leg after cephalitis . . . 701
- in Graves' disease . . . 881
- due to manganese . . . 882
- lips due to alcohol . . . 881
- in general paralysis . . . 881
- due to lead . . . 882
- in Little's disease . . . 169
- due to manganese 879, 881, 882
- morphia . . . 879, 881
- of mouth in chronic alcoholic . . . 289
- due to muscular fatigue 879
- of neck from cephalitis . . . 157
- due to nervousness 879, 880, 882
- in neurasthenia . . . 879
- due to nicotine . . . 881
- in occupation neuroses . . . 189, 879
- paralysis agitans 609, 614, 879, 880, 881, 883
- Parkinsonian . . . 879
- in peripheral neuritis . . . 320
- post-encephalic . . . 879
- due to pyrexia . . . 879
- railway spine . . . 879
- rigor . . . 879, 882
- senile . . . 879, 880
- due to skins . . . 882
- tobacco . . . 879
- of tongue due to alcohol . . . 881
- in cirrhosis of liver . . . 466
- congenital . . . 67, 880
- in general paralysis . . . 184, 881
- due to lead . . . 882
- due to trade processes . . . 881
- unilateral . . . 880, 882
- in chorea . . . 882
- after hemiplegia . . . 882
- due to hysteria . . . 882
- mid-brain tumour . . . 882
- subthalamic tumour . . . 882
- in uræmia . . . 879
- volitional . . . 883
- due to weakness . . . 880
- Trench fever (see Fever)**
- Trephining in coma** . . . 154
- for meningeal hæmorrhage . . . 154
- Treponema pallidum in cerebrospinal fluid** . . . 384
- chancre . . . 476
- pertence in yaws . . . 501
- Triiceps jerks in hysteria** . . . 614
- increased, from cerebral lesion . . . 613
- unequal, in hemiplegia . . . 381
- nerve-supply of 616, (*Fig. 474*) 618, 620
- pseudo-hypertrophy of
- Trichiasis from trachoma** . . . 286
- Trichina spiralis, albuminuria from** . . . 16
- cachexia from . . . 128
- severe anaemia from . . . 35
- Trichinella spiralis** . . . 569
- in human muscle . . . 569
- (*Fig. 452*) . . . 569
- Trichinella in meat** . . . 569
- stools . . . 569
- Trichinosis** . . . 569, 885
- acute pains all over in . . . 569
- rheumatism simulated by . . . 569
- cholera simulated by . . . 569
- delirium in . . . 211
- dermatomyositis simulated by . . . 569
- enteric fever simulated by . . . 569
- eosinophilia in 272, 569, 591, 703, 885
- epidemic . . . 569, 885
- erythema in . . . 276
- face affected in . . . 569
- gastro-enteritis in . . . 569

Trichinosis, contd.

- leucocytosis in . . . 569
- limbs affected in . . . 569
- microscopical examination in diagnosis . . . 569, 591
- mouth muscles affected in . . . 885
- neck affected in . . . 569
- oedema of face and eyes in . . . 569
- pain in limbs in . . . 568
- muscles in . . . 885
- tongue from . . . 590
- parasites in blood in . . . 885
- muscles in . . . 885
- poly-dermato-myositis simulating . . . 295
- polymyositis simulating . . . 702
- from pork 569, 591, 885
- profuse perspirations in . . . 569
- pseudo . . . 569
- pyrexia in . . . 569, 885
- stiffness of muscles in . . . 885
- swelling of muscles in . . . 569
- tenderness of spine in . . . 888
- tongue affected by 591, 885
- Trichinella spiralis in muscles in . . . 569
- trichinella in stools in . . . 569
- trismus due to . . . 885
- trunk affected in . . . 569
- trichloroacetic acid, albumin precipitated by . . . 20
- in blood-urea estimation . . . 20
- Trichoccephalus dispar, no blood changes from** . . . 35
- in cæcum and colon . . . 635
- eosinophilia from . . . 272
- no eosinophilia from . . . 635
- illustrated (*Fig. 495*) 634
- ovum of (*Fig. 98, 103, 496*) 635
- no symptoms from . . . 635
- Trichophyta, thirty species** 310
- Trichophyton acuminatum** . . . 310
- crateriforme . . . 310
- rosaceum . . . 310
- sulphureum . . . 310
- in tinea circinata . . . 312
- sycosis . . . 311
- violaceum . . . 310
- Tricuspid murmurs** . . . 120
- presystolic bruit . . . 120
- regurgitation from emphysema . . . 269
- mitral regurgitation . . . 262
- nutmeg liver from . . . 463
- systolic bruit from . . . 262
- thrill due to . . . 876
- stenosis, aortic with . . . 847
- heart failure with . . . 847
- lividity with . . . 847
- mitral stenosis with . . . 463
- due to new growth (*Fig. 683*) 909
- nutmeg liver with . . . 463
- oedema of legs with . . . 847
- orthopnea with . . . 847
- presystolic thrill from . . . 876
- pulsatile liver with . . . 463, 847
- systolic bruit . . . 118, 120
- valve, infective endocarditis of . . . 364
- new growth obstructing . . . 909
- (*Fig. 683*) . . . 909
- Trigeminal nerve (see Nerve, Trigeminal)**
- neuralgia (see Neuralgia, Trigeminal; and Tric Douloureux)
- Trigone of bladder, inflamed, pain in penis from** . . . 493, 576
- Trinitrin, angina abdominalis and** . . . 396
- pectoris and . . . 396
- fainting due to . . . 297
- Trinitrophenol, acute yellow atrophy from** . . . 416
- jaundice due to . . . 408
- yellow urine after . . . 903
- Trinitrotoluol, acute yellow atrophy due to** 345, 416
- ammonal and . . . 917
- dermatitis from . . . 917

Trinitrotoluol, contd.

- erythema from .. 275
- in explosives .. 917
- jaundice due to .. 408
- leucopenia from .. 455
- poisoning, choleraemia in 213
- coma in .. 153
- delirium from .. 213
- yellow skin from .. 645
- Trional, bradypnea from 110
- coma from .. 110, 154
- cyanosis from .. 196
- erythema from .. 275
- haemoglobinuria from 357
- methaemoglobinuria after .. 196
- noises in head from .. 504
- stupor from .. 110
- vertigo from .. 504
- Triple phosphate 638
- crystals (Fig. 499) 638
- in cystitis .. 638
- Trisphlegia, infantile spastic 169
- TRISMUS 884
- arthritis of temporomaxillary joint simulating .. 884
- due to catalepsy .. 885
- in cholera .. 885
- conditions simulating 884
- in epilepsy .. 885
- facial neuralgia simulating .. 884
- in hydrophobia .. 885
- hysteria .. 176, 21
- simulating .. 884
- impacted wisdom tooth simulating .. 884
- inability to open mouth in .. 884
- malingerer of .. 885
- in meningitis .. 885
- due to perioritis of jaw 884
- scleroderma simulating 886
- in septicæmia .. 885
- strychnine poisoning .. 885
- tetanus 176, 190, 521, 694, 741, 797, 854, 885
- tetany .. 885
- toxæmia .. 885
- due to trichinosis .. 885
- in typhoid fever .. 885
- uræmia .. 885
- Trochanter, great, bed-sore over .. 421
- Tropæolum maus, dermatitis due to .. 916
- Trophic changes in diabetes .. 335
- nails .. 496
- peripheral neuritis .. 320
- syringomyelia .. 320
- hair changes in tic douloureux .. 548
- joint changes in syringomyelia .. 619
- lesions from cerebral embolism .. 170
- thrombosis .. 170
- in infantile paralysis 145
- skin changes in syringomyelia .. 619
- tic douloureux .. 548
- ulcer (see Ulcer)
- Trophædema, hereditary (see Meigs's Disease)
- Trophozoites of malaria parasites .. 42
- Tropical abscess of liver 315
- anaemia, fainting in .. 297
- cachexia .. 127
- fevers, jaundice in .. 408
- pain in limbs in .. 568
- hepatitis, jaundice from 408
- pain in shoulder from 580
- infections, D.A.H. from 597
- liver .. 463
- cough from .. 187
- Trophic cheiropompholyx in .. 124
- chyluria in .. 140
- congestion of liver in .. 417
- dengue in .. 571
- dysentery and 99, 564, 871
- elephantiasis in 72, 849
- filaria in 36, 72, 140
- malaria in .. 779
- residence in, D.A.H. after .. 246
- debility after .. 246

Tropics, residence in, contd.

- dyspnea after .. 246
- hypothermia after .. 392
- low blood-pressure from .. 106
- yellow fever in .. 345
- Trousers, ill-fitting, priapism from .. 657
- Trousseau's sign in tetany 3, 189
- Truffles, haemoglobinuria from .. 357
- Truss, compression of spermatic cord by .. 85
- inguinal glands inflamed from .. 830
- testis atrophy from .. 85
- Tryglyphus longior, dermatitis due to .. 916
- Trypanosoma gambiense (Fig. 644) 779
- in blood films .. 37
- cerebrospinal fluid .. 37, 384
- Leishman's stain and .. 37
- Trypanosomes in animals .. 37
- birds .. 280, 708
- cerebrospinal fluid .. 708
- fish .. 709
- immature .. 37
- Trypanosomiasis, anaemia in .. 36
- apyrexial .. 708
- blood parasites in .. 36
- cerebrospinal fluid in .. 37
- coma in .. 153
- delirium in .. 211
- drowsiness from .. 708
- enlarged glands in .. 37
- erythema from 276, 280
- general account of .. 37
- gland puncture in diagnosing .. 37
- kala-azar and .. 37
- latent .. 708
- malaria simulated by .. 708
- parasites in .. 708
- pyrexia in .. 688
- pyrexial bouts in .. 708
- rouleaux formation in .. 51
- sleeping sickness and .. 37, 153, 384, 708
- spread by Glossina palpalis .. 37
- trypanosomes in cerebrospinal fluid in .. 384
- tsetse fly and .. 708
- in Uganda .. 37, 708
- (and see Sleeping Sickness)
- tsetse fly, trypanosomiasis from .. 708
- in Uganda .. 708
- Tsutsugamushi, purpura in .. 676
- Tubal abortion .. 573, 842
- gestation (see Gestation)
- mole from extra-uterine gestation .. 489
- Tube-casts (see Casts, Urinary)
- Tubercle bacilli (see Bacillus)
- mucous, in perineum .. 766
- of scrotum .. 767
- in syphilis .. 601
- Tubercles in choroid 139, 520
- illustrated (Fig. 429) 520
- in tuberculous meningitis 385, 627, 732, 787
- erythema multiforme .. 600
- miliary, in tuberculous peritonitis .. 64
- Tubercular leprosy .. 501
- Tuberculides (see Sclerofuldermia)
- Tuberculin, difficulties with 361
- eosinophilia from .. 271
- injection of, in diagnosis 932
- of phthisis .. 360
- test .. 932
- in Addison's disease 45
- anaemia .. 43
- Koch's .. 828
- in lupus .. 895
- tuberculosis 819, 898
- technique of .. 360
- temperature chart of positive (Fig. 295) 360
- in tuberculous peritonitis .. 777

Tuberculin, contd.

- In von Pirquet's test .. 316
- Tuberculosis, abdominal, ascites in .. 316
- amenorrhœa from .. 23
- celiac disease simulating .. 216
- enlarged glands felt in .. 216
- milk and .. 932
- omentum rolled up and thick in .. 216
- pigmentation of skin in .. 643
- (and see Peritonitis, Tuberculous)
- of abdominal wall .. 65
- acetonuria from .. 3
- actinomycosis simulating .. 892
- anaemia from .. 44, 515
- of ankle, incidence of .. 432
- limping due to .. 456
- rickets simulating .. 458
- talipes from .. 147
- anorexia in .. 58
- nervous simulating .. 934
- Buzin's disease and .. 895
- of bladder, account of 355, 577, 720, 721
- aching in perineum from .. 579
- age incidence of 355, 577
- Bilharzia hamatobia simulating 356, 577
- blood drops from .. 721
- penis due to .. 721
- in urine from .. 494
- colic from .. 148
- cystitis with .. 699, 720
- cystoscope in diagnosing 355, 577, 722
- cystoscopic appearances of .. 721
- epithelioma simulating .. 355
- film from (Fig. 88) 89
- frequency of micturition from 355, 577, 652, 719, 720, 721, 901
- grey submucous tubercles in .. 721
- hæmaturia from 348, 349, 355, 577, 721
- pain after micturition from .. 493
- in penis from 493, 576, 577, 719
- pricking in glans .. 721
- penis from .. 721
- primary .. 577
- pyuria from (Fig. 88) 89, 349, 355, 494, 577, 716, 720, 721
- rectal examination in diagnosing .. 355
- renal tuberculosis simulating 355, 577
- secondary to kidney .. 355, 720, 721
- strangury due to .. 797
- tubercle bacilli in urine from 355, 494, 577, 719, 721
- of epididymis with .. 493, 722
- in prostate with .. 355, 493, 577, 721, 722, 723
- seminal vesicles with 355, 493, 577, 578, 721, 722
- testes with 355, 577, 585, 721, 768
- vas deferens with 493
- tuberculosis in chest with .. 355
- ulceration in .. 721
- ureter felt per rectum in .. 577
- involved with 355, 577
- ureteric calculus simulating .. 577, 719
- usually secondary .. 577
- vaginal examination in diagnosing .. 355
- vesical crises simulating .. 798
- in young adults 493, 720

Tuberculosis, contd.

- of bone, account of 817, 818
- arthritis from .. 426
- secondary infection in 819
- syphilis simulating .. 819
- X rays in diagnosing 306
- bowel, albumosturia with 21
- mesenteric glands enlarged from .. 476
- pneumoperitoneum from .. 800
- pyuria due to .. 716
- breast .. 838
- carcinoma simulated by .. 838
- pain in breast from 529
- pus from nipple due to .. 227
- cachexia from 3, 16, 44, 127, 515
- of cæcum, account of 562
- appendicitis simulated by .. 562, 828
- carcinoma simulated by .. 162, 562
- excision of .. 562
- illustrated (Fig. 449) 562
- pain in iliac fossa from .. 558, 562
- phthisis and .. 562
- stenosis of bowel by 162
- swelling in right iliac fossa due to .. 828
- cervix, cancer distinguished from .. 488
- choroid .. 520
- coli bacilluria simulating 712
- of colon, abdominal tumour due to .. 812
- abscess due to .. 812
- blood per anum from 96
- constipation with .. 812
- malignant disease simulated by .. 812
- pain over .. 812
- tenderness over .. 812
- tumour in hypochondrium due to 809
- vomiting with .. 812
- cornæa .. 891
- diagnosis of .. 932
- diarrhoea from .. 217
- of elbow, incidence of .. 432
- empyema simulating .. 695
- of epididymis 585, 587, 723, 768, 849, 850, 851
- abscess of scrotum from .. 851
- globus major nodule in .. 851
- nodules in 350, 585, 723, 768
- prostate affected in 851
- seminal vesicle affected with .. 578, 851
- sinus in scrotum from 851
- spermatic cord infected from .. 589
- suppurated .. 850
- with tuberculous bladder 493, 722
- vas deferens thickened with .. 851
- epididymitis from .. 851
- family history in .. 932
- fatty liver in .. 469
- of fauces .. 762
- sore throat due to .. 757
- general enlargement of lymph glands in 471, 473
- wasting in .. 78
- general, bronchitis distinguished from .. 390
- bronchopneumonia distinguished from 390
- from caseous glands 480
- hyperpyrexia in .. 390
- from mesias .. 480
- purpura in .. 676, 678
- spleen enlarged in .. 778, 787
- typhoid fever simulated by .. 785
- giant cells in .. 475, 501
- of gluteal bursa, limping from .. 457
- guinea-pig inoculation in diagnosing 65, 135
- test for, X rays and 135
- gumma simulating .. 898

Tuberculosis, contd.

- of hand, writer's cramp .. 189
- simulated by .. 457
- hlp, account of .. 457
- - anaemia with .. 47
- - attitude with .. 457
- - buttocks asymmetrical with .. 457
- - in children .. 480
- - crying out at night from .. 457
- - gluteal wasting with .. 79, 457
- - groin bulged by .. 826
- - hysteria simulating .. 179
- - incidence of .. 432
- - limping due to .. 456, 457
- - natal fold oblique with .. 457
- - pain in iliac fossa from .. 555, 558
- - - knee from .. 432
- - psoas abscess simulating .. 458
- - pyrexia from .. 457
- - rickets simulating .. 458
- - stance in (Fig. 377) .. 458
- - starting pains at night from .. 457
- - tuberculous peritonitis with .. 65
- - hypothermia in .. 392
- - of ileocaecal valve .. 562
- - ileum .. 562
- - influenza simulated by .. 713
- - simulating .. 692
- - intestinal catarrh from .. 217
- - joints, account of .. 432
- - - anaemia with .. 43
- - - ankylosis from .. 179
- - - in children .. 432
- - - contracture from .. 179
- - - echondroses from .. 179
- - - exostoses from .. 179
- - - gonorrhoeal arthritis simulating .. 425
- - - injury and .. 432
- - - insidious onset of .. 432
- - - joint adhesions from .. 179
- - - lardaceous disease with .. 432
- - - milk and .. 932
- - - muscular atrophy with .. 432
- - - pain in .. 432
- - - pallor with .. 432
- - - pyrexia with .. 432
- - - rheumatic fever simulated by .. 423
- - - screaming at night from .. 432
- - - swelling of .. 432
- - - tuberculous peritonitis with .. 65
- - kidney, account of .. 351, 352, 448, 719
- - - aching in loin in .. 352, 719
- - - actinomycosis simulating .. 724
- - - age incidence of .. 352
- - - albuminuria from .. 16, 352, 719
- - - - from .. 55, 57
- - - - appendicitis simulated by .. 564
- - - - ascending nephritis from .. 9, 183
- - - - blood-clot from kidney in .. 147
- - - - brown tongue with .. 57
- - - - Cheyne-Stokes breathing from .. 139
- - - - coli bacilluria simulated by .. 352
- - - - colic due to .. 719
- - - - coma from .. 57
- - - - convulsions from .. 57
- - - - cystoscope in diagnosing .. 352, 448, 564, 719
- - - - cystoscopic appearances of .. 721
- - - - dry tongue with .. 57
- - - - dyspnoea with .. 57
- - - - failing health with .. 57
- - - - frequency of micturition with .. 349, 352, 448, 490, 719, 721, 901
- - - - guinea-pig inoculation with urine in diagnosing .. 719
- - - - haematuria from .. 348, 349, 449, 719, 721

Tuberculosis of kidney, contd.

- - headache with .. 57
- - hicough with .. 57
- - intermittent albuminuria from .. 18
- - - kidney enlarged in .. 448, 449, 578, 721
- - - - tender in .. 578
- - - - loss of appetite with .. 57
- - - - sphincter control from .. 57
- - - - muscular twitchings from .. 57
- - - - nodules in prostate with .. 352
- - - - seminal vesicles in .. 352
- - - - pain in iliac fossa from .. 555, 558, 564
- - - - loin from .. 352, 564
- - - - penis from .. 721
- - - - plug of mucus in urine from .. 349
- - - - polyuria from .. 57, 719
- - - - pulse-rate increased with .. 57
- - - - pus cells from (Fig. 87) .. 89
- - - - pyelography in diagnosing .. 564
- - - - pyonephrosis due to .. 718
- - - - pyuria from .. 349, 352, 564, 716, 719, 721
- - - - rectal examination in diagnosing .. 352, 719
- - - - renal calculus simulated by (Fig. 287) .. 352
- - - - - simulating .. 719
- - - - - colic from .. 147, 352
- - - - - restlessness from .. 57
- - - - - skiagram of (Fig. 287) .. 352
- - - - - stranguary due to .. 798
- - - - - without symptoms .. 719
- - - - - temperature subnormal with .. 57
- - - - tenderness in loin from .. 721
- - - - tubercle bacilli in urine from (Fig. 87, 89, 352, 448, 564, 719)
- - - - - in prostate with .. 448, 719
- - - - - testis with .. 448, 585, 719
- - - - - vesiculae seminales with .. 448, 719
- - - - - tuberculous bladder from .. 720, 721
- - - - - - simulated by .. 577
- - - - - peritonitis and .. 65
- - - - - uraemia from .. 139, 183
- - - - - ureter affected in .. 352, 448, 532, 721
- - - - - felt per rectum with .. 448, 721
- - - - - vaginam with .. 448, 721
- - - - - retracted with .. 448
- - - - - (Fig. 573) .. 717, 721
- - - - - thickened in .. 719
- - - - - ureteral catheterization in diagnosing .. 564
- - - - - ureteritis from .. 349
- - - - - urine of low specific gravity in .. 719
- - - - - opalescent in .. 719
- - - - - pale in .. 719
- - - - - turbid in .. 719
- - - - - vaginal examination in diagnosing .. 352, 719
- - - - - vesical disease simulated by .. 719
- - - - - X-ray shadow of .. 719
- - - - - X rays in diagnosing .. 352
- - - - - knee, anaemia with .. 74
- - - - - in children .. 480
- - - - - hysteria simulating .. 432
- - - - - incidence of .. 456
- - - - - limping from .. 456
- - - - - popliteal abscess from .. 844
- - - - - rickets simulating .. 458
- - - - - tuberculous peritonitis with .. 65
- - - - - Koch's old tuberculin in diagnosing .. 819, 898
- - - - - of larynx (Fig. 210) .. 245
- - - - - cough from .. 188
- - - - - dysphagia from .. 245
- - - - - haemoptysis from .. 361
- - - - - hoarseness from .. 387
- - - - - laryngoscope in diagnosing .. 762

Tuberculosis of larynx, contd.

- - phthisis with .. 762
- - - secondary to phthisis .. 367
- - - sore throat due to .. 758
- - - stridor due to .. 799
- - - tubercle bacilli in sputum .. 367, 762
- - - voice altered by .. 188
- - - latent, loss of weight due to .. 932
- - - leucocytosis rare in .. 453
- - - of liver .. 469
- - - liver enlarged in .. 470
- - - of lymphatic glands (see under Lymphatic Glands) .. 352
- - - lymphocytes in serous exudates in .. 135
- - - marasmus from .. 480
- - - mediastinal fibrosis from .. 910
- - - mediastinitis from .. 535
- - - of metacarpal bone, skiagram of (Fig. 630) .. 819
- - - Miculicz's syndrome in .. 848
- - - miliary, in children .. 719
- - - leucopenia in .. 455
- - - rigor in .. 737
- - - muscular atrophy in .. 78
- - - of nail .. 497
- - - nose, epistaxis from .. 273
- - - notes on .. 706
- - - occipital glands enlarged in .. 473
- - - opsonic index in .. 932
- - - of orbit, exophthalmos from .. 284
- - - orchitis from .. 85
- - - of palate .. 730, 757, 762
- - - sore throat due to .. 757
- - - pancreatitis from .. 128
- - - of pelvis, lumbosacral plexus affected by .. 81
- - - tumour of cauda equina simulated by .. 81
- - - penis .. 765
- - - perforation of palate from .. 730
- - - peritonitis of sternum in .. 862
- - - peripheral neuritis from .. 570
- - - of peritoneum (see Peritonitis, Tuberculosis) .. 719
- - - polyrrhomenitis from .. 02, 138
- - - pneumonic, rigor in .. 737
- - - post-mortem warts due to .. 301
- - - of prostate, abscess due to .. 723
- - - aching in perineum from .. 579
- - - difficulty in micturition from .. 492
- - - haematuria from .. 348, 723
- - - nodule in epididymis with .. 723
- - - seminal vesicle with .. 723
- - - perineal sinus from .. 766
- - - rectal examination in diagnosing .. 766
- - - secondary to bladder .. 723, 766
- - - testis .. 766
- - - seminal vesicle affected with .. 578
- - - with tuberculous bladder .. 493, 557, 721, 722
- - - - epididymitis .. 851
- - - - kidney .. 448, 719
- - - - testis .. 595, 768
- - - - urethra invaded from .. 230
- - - - psoas abscess from .. 698
- - - - pulmonary, acute, delirium in .. 211
- - - - - apyrexial .. 706
- - - - - bronchiectasis from .. 366
- - - - - bronchopneumonia .. 366
- - - - - simulating .. 364, 700
- - - - - cough from .. 187
- - - - - in diabetes .. 334
- - - - - dyspnoea from .. 247, 404
- - - - - effusion due to .. 703
- - - - - elastic fibres in .. 740
- - - - - sputum in .. 740
- - - - - fibroid lung from .. 366
- - - - - gangrene of lung from .. 322, 323
- - - - - headache from .. 371
- - - - - indicanuria from .. 395
- - - - - influenza simulated by .. 706
- - - - - simulating .. 692

Tuberculosis, pulmonary, contd.

- - insomnia in .. 404
- - - laryngeal paralysis from .. 606
- - - miliary, without bacilli in sputum .. 700
- - - - bronchitis simulated by .. 700
- - - - starting like influenza .. 700
- - - pain in chest from .. 532, 535
- - - - limbs in .. 568, 570
- - - - neck from .. 532
- - - - shoulder from .. 532
- - - - pleuritic effusion from .. 135
- - - - pneumothorax and .. 198
- - - - pousses evolutes in .. 706
- - - - pyrexia due to .. 687, 706, 713
- - - - rheumatism of shoulder simulated by .. 863
- - - - rigor in .. 740
- - - - secondary infection in .. 706, 740
- - - - sputum in .. 788
- - - - tenderness of chest in .. 863, 864
- - - - typhoid fever simulated by .. 689
- - - - (and see Phthisis) .. 715
- - - - pyrexia in .. 688, 706, 715
- - - - without pyrexia .. 706
- - - - recto-vesical fistula from .. 296
- - - - of rib .. 818
- - - - submammary abscess from .. 838
- - - - tenderness of chest from .. 862
- - - - sacro-iliac joint .. 432
- - - - seminal vesicle .. 578, 723
- - - - aching in perineum from .. 579
- - - - with tuberculous bladder .. 493, 577, 721, 722
- - - - - epididymitis .. 862
- - - - - testis .. 585, 768
- - - - - urethra invaded from .. 230
- - - - - severe anaemia in .. 16
- - - - - of shoulder, incidence of .. 432
- - - - - sore on penis from .. 763
- - - - - of spermatic cord .. 589
- - - - - spine - see Spinal Caries
- - - - - sternum, tenderness of chest from .. 862
- - - - - suprarenal capsules in Addison's disease .. 45
- - - - - surgical, milk and .. 932
- - - - - tachycardia in .. 672
- - - - - tenderness of spine from .. 868
- - - - - testis atrophy from .. 85, 86, 507
- - - - - enlarged in .. 86
- - - - - of testis, account of .. 585, 768
- - - - - age incidence of .. 587
- - - - - epididymis first affected in .. 768, 849
- - - - - fistula in scrotum from .. 585
- - - - - growth distinguished from .. 587
- - - - - hernia testis from .. 768, 769, 850
- - - - - nodule in epididymis from .. 585
- - - - - notes on .. 849
- - - - - pain in testis from .. 585
- - - - - primary .. 585
- - - - - scrotal fistula from .. 767
- - - - - sinus from .. 768
- - - - - sore from .. 768
- - - - - scrotum involved from .. 767
- - - - - secondary to tuberculous bladder .. 585
- - - - - - kidney .. 585
- - - - - - prostate .. 585
- - - - - - seminal vesicle .. 585
- - - - - sinus from .. 585, 849, 850
- - - - - spermatic cord infected from .. 589
- - - - - - thickened with .. 586
- - - - - swelling of testis from .. 849
- - - - - syphilitic distinguished from .. 586
- - - - - torsion simulating .. 850
- - - - - with tuberculous bladder .. 577, 721, 768
- - - - - - kidney .. 448, 449

- Tuberculosis of testis, contd.*
- - with tuberculous prostatic .. 768
 - - seminal vesicles .. 768
 - - vas deferens .. 585, 768
 - - vas deferens thickened with .. 849
 - - von Pirquet's test in .. 585
 - thyroid gland enlarged in .. 877
 - tongue swollen from .. 852
 - of tonsil, secondary to phthisis .. 761
 - - tuberculosis of larynx .. 761
 - - seldom primary .. 761
 - - sore throat due to .. 757
 - umbilicus .. 65, 593
 - ureter .. 352, 578
 - pain in iliac fossa from .. 558
 - - penis from .. 576
 - rectal examination in diagnosing .. 350, 355
 - secondary to kidney .. 448, 721
 - vaginal examination in diagnosing .. 355
 - urethra, secondary to prostate .. 230
 - - seminal vesicles .. 240
 - uterus, colic due to .. 148
 - metrorrhagia from .. 487
 - ovula .. 762
 - sore throat due to .. 757
 - vas deferens .. 768, 849
 - - with tuberculous cystitis .. 493
 - - from tuberculous testis .. 585
 - vesicles due to .. 917
 - visceral, multiple benign sarcoid with .. 502
 - von Pirquet's skin reaction in .. 563, 819, 898
 - of vulva, syphilis simulating .. 854
 - vulval swelling due to .. 853
 - of wrist, incidence of .. 432
 - yaws distinguished from .. 501
- Tuberculous arthritis (see Arthritis)*
- caries (see Caries)
 - colitis, induricans from .. 395
 - dactylitis (see Dactylitis)
 - epididymo-orchitis .. 86
 - gingivitis, bleeding gums from .. 93, 95
 - - phthisis and .. 95
 - meningitis (see Meningitis)
 - nodule of brain, hemianopsia from .. 379
 - - in globus major .. 851
 - - seminal vesicle .. 723
 - - vas deferens .. 768
 - otitis media .. 523
 - periostitis of fibula, limping from .. 456
 - - tibia, limping from .. 456
 - peritonitis (see Peritonitis)
 - seminal vesicles felt per rectum .. 778
 - - with tuberculous kidney .. 448, 719
 - stomatitis, pyralism from .. 661
 - ulcer, diagram (Fig. 669) .. 895
 - epithelioma simulated by .. 898
 - - gumma simulated by .. 898
 - ulceration (see Ulceration)
- Tubular breathing with fibroid lung .. 210*
- above pleuritic effusion .. 209
- Tugging, tracheal, from aneurysm .. 240*
- Tumour, abdominal, abdominal distention from .. 250*
- due to abscess of broad ligament .. 829
 - actinomycosis .. 828
 - aneurysm .. 413, 538
 - anuria from .. 55, 57
 - due to appendicitis .. 812, 828
 - ascites simulated by .. 60
 - due to bladder distention .. 55, 61, 815
- Tumour, abdominal, contd.*
- due to carcinoma of caecum .. 828
 - colon .. 162, 167, 439, 525, 555, 593, 809, 815
 - duodenum .. 343, 811
 - pancreas .. 554
 - pylorus .. 593
 - sigmoid colon .. 826
 - stomach .. 340, 525, 537, 809, 811, 829, (Fig. 650) 846
 - chondroma of pelvic bones .. 829
 - with chronic intestinal obstruction .. 396
 - in chronic peritonitis .. 525
 - constipation from .. 164
 - from cystic kidney .. 15
 - diaphragm pushed up by .. 374
 - due to diverticulitis .. 697
 - dyspnoea from .. 247, 250
 - due to enlarged iliac glands .. 827
 - expansile pulsation in .. 413
 - due to faeces .. 439
 - fibroid of uterus .. 829
 - floating kidney .. 813
 - gall-bladder .. 829
 - glands .. 811
 - growth in colon .. 525
 - heart displaced by .. 373, 374, 376
 - from hip-joint disease .. 829
 - hydatid cyst .. 829
 - hydronephrosis .. 829
 - hyperplastic tuberculosis of colon .. 812
 - intussusception .. 101, 164, 167, 809, 812, 828
 - kidney .. 811
 - linea alba from .. 459
 - liver displaced upwards by .. 462
 - due to mating round gastric ulcer .. 809
 - movable kidney .. 813
 - multiple, ascites with .. 63
 - from hydatid disease .. 63
 - malignant .. 63
 - from ovarian cyst .. 63
 - tuberculous .. 63
 - from necrosis of spine .. 829
 - orthopnea from .. 250
 - due to osteomyelitis of ilium .. 829
 - ovarian cyst .. 829
 - growth .. 24
 - palpitation from .. 595
 - pancreatic .. 810
 - due to pancreatic cyst .. 811
 - pelvic lesions .. 815
 - pericolic .. 812
 - perityphilitis .. 812
 - pouch of bladder .. 829
 - pregnancy .. 829
 - pycnography in diagnosis of .. 446
 - due to pyonephrosis .. 829
 - retention of urine .. 55
 - Riedel's lobe .. 829
 - rigid rectus simulating .. 809
 - due to sacro-iliac joint disease .. 829
 - sarcoma of pelvic bones .. 829
 - stomach .. 809
 - scybala .. 815
 - spleen .. 811, 812
 - suppuration of lumbar vertebrae .. 829
 - suprarenal .. 439, 811
 - thickened colon .. 812
 - tuberculous caecum .. 828
 - colon .. 809
 - glands .. 828
 - peritonitis .. 65, 706, 777, 809
 - spine .. 829
 - urachal cyst .. 815
 - both ureters obstructed by .. 55
 - (and see Abdominal Distention; and Swelling, Abdominal)
- Tumour, contd.*
- of acoustic nerve, deafness from .. 208
 - - tinnitus due to .. 879
 - - vertigo due to .. 912
 - at base of brain, trigeminal neuralgia from .. 548
 - of bladder (see Bladder)
 - bones in chloroma .. 51
 - brain (see Cerebral Tumour)
 - cauda equina (see Cauda Equina)

 - cough from . . . 187
 - dilatation of stomach from . . . 218, 554
 - duodenal cap deformed with . . . 554
 - empyema from . . . 134
 - fainting first evidence 298
 - faintness from . . . 482
 - food relation of pain in 48

Ulcer, duodenal, contd.
 - fractional test meal in 343, (Fig. 284) 344
 - functional dyspepsia diagnosed from . . . 104
 - gall-bladder enlargement simulated by 462
 - gall-stones simulated by . . . 48
 - simulating 153, 343, 410
 - gastroectasis from 343, 801
 - gastric HCl high in . . . 554
 - ulcer simulated by . . . 48, 342
 - general peritonitis from . . . 485, 734
 - giddiness from 482, 504
 - hæmatæmesis from . . . 336, 342, 482
 - heart disease simulating . . . 52
 - heartburn from . . . 376
 - hunger pain from 48, 343, 538, 554
 - hyperchlorhydria with . . . 343
 - diagnosed from . . . 104
 - from hypertonic dyspepsia . . . 400
 - hypertonic stomach with (Fig. 283) 343, 554
 - indigestion from . . . 397
 - intervals of freedom in . . . 554
 - jaundice from 153, 412
 - laparotomy in diagnosing . . . 153, 343
 - leaking, subdiaphragmatic peritonitis from . . . 580
 - loss of weight due to 933
 - melena from 44, 48, 97, 298, 342, 343, 481, 482, 554
 - nocturnal pain in . . . 554
 - occult blood in stools from 104, 130, 163, 554
 - oedema of legs after 515
 - operation in diagnosis 554
 - out of condition from 113
 - pain in back from . . . 528
 - epigastrium from 343, 538, 566
 - hypochondrium from . . . 554, 566
 - shoulder from 580, 583
 - pallor due to . . . 298
 - pancreatitis from 128, 130
 - simulating . . . 153
 - perforation of . . . 63
 - colic simulated by 149
 - fainting due to . . . 297
 - general peritonitis from . . . 149
 - laparotomy for 149, 536
 - pain in epigastrium from . . . 536
 - peritonitis from . . . 168
 - pleurisy from . . . 137
 - pyloric stenosis from 218
 - rigidity over . . . 734
 - salivation from . . . 662
 - severe hæmorrhage from . . . 157
 - sex incidence of 342, 554
 - shortness of breath from . . . 113
 - site of pains of . . . 48
 - skiagram of (Fig. 282) 343
 - stenosis from . . . 554
 - stomach emptying rapidly with 343, 554
 - subdiaphragmatic abscess from 555, 649, 807
 - peritonitis from . . . 583
 - suppurative peritonitis from . . . 63
 - surgical emphysema from . . . 254
 - tetany from . . . 799
 - thirst due to . . . 875
 - transverse stomach with . . . 343
 - undue pulsation of abdominal aorta simulating . . . 662
 - vertigo from 482, 504
 - visceroptosis diagnosed from . . . 104
 - vomiting from 342, 343

Ulcer, duodenal, contd.
 - X rays in diagnosing 153, 343, 554
 - dyspeptic, of cheek . . . 898
 - gum . . . 898
 - tongue . . . 898
 - epithelioma starting in epitheliomatous, diagnosed (Fig. 670) 895
 - gastric, abdominal pain from . . . 339, 342
 - tenderness from . . . 342
 - account of . . . 339
 - acetonuria from . . . 3
 - acute peritonitis from 63
 - adhesions from 163, 218
 - age incidence of 48, 339
 - albumosuria with . . . 21
 - anaemia from 48, 339, 342
 - anæmic vomiting simulating 48, 931
 - arsenic simulating . . . 103
 - ascites from . . . 63
 - attacks of . . . 397
 - barium and X rays in diagnosing . . . 340
 - blood per anum from 97
 - carcinoma from . . . 338, 397, 802
 - coli simulating (Fig. 140) 161
 - distinguished from 219
 - of stomach simulating . . . 339
 - in chlorosis . . . 346
 - cirrhosis of liver simulating . . . 339, 344
 - coffee-ground vomit from . . . 319
 - colic from . . . 148
 - cough from . . . 187
 - dilated right ventricle simulating . . . 536
 - duodenal ulcer simulating . . . 48, 342
 - empyema from 133, 134
 - epigastric pain from . . . 48, 336
 - excess of acid with . . . 537
 - food relation of pain in . . . 339
 - fractional test meal in 343, (Fig. 287) 344
 - functional dyspepsia diagnosed from . . . 104
 - gall-bladder enlargement simulated by 462
 - gall-stone distinguished from . . . 538
 - simulating 343, 410
 - gas under diaphragm from . . . 647
 - gastroectasis from 214, 218, 801
 - gastric HCl with . . . 930
 - gastrostaxis simulating . . . 336, 339, 346
 - hæmatæmesis from . . . 48, 336, 339, 342, 397, 482, 537, 930
 - hæmorrhagic erosions and . . . 340
 - heart disease simulating . . . 864
 - heartburn from . . . 376
 - hyperæsthesia with . . . 339
 - hyperchlorhydria diagnosed from . . . 104
 - leaking, pain in pelvis from . . . 573
 - subdiaphragmatic peritonitis from 580
 - local tenderness with 398
 - loss of weight due to 933
 - matting round, epigastric tumour due to . . . 809
 - melæna from 97, 339, 342, 481, 482
 - nausea from . . . 339
 - occult blood in stools from 104, 130, 163
 - oedema of legs after 515
 - omental abscess from 810
 - out of condition from 113
 - pain in back from . . . 339, 528, 537
 - chest from . . . 864
 - epigastrium from . . . 339, 537, 566

Ulcer, gastric, contd.
 - pain after food with . . . 397
 - in hypochondrium from . . . 553, 566
 - shoulder from 580, 583
 - between shoulders from . . . 566
 - in spine from . . . 871
 - pancreatic artery opened by . . . 339
 - pancreatitis from 128, 130
 - perforation of . . . 63
 - acute abdominal pain from . . . 807
 - pancreatitis simulating . . . 485
 - angina abdominalis simulating . . . 152
 - colic simulated by 149
 - collapse from . . . 807
 - dysmenorrhœa simulated by . . . 239
 - fainting due to . . . 297
 - general peritonitis from 63, 149, 168, 485, 734
 - inferior vena cava thrombosis simulating . . . 152
 - latent . . . 807
 - notes on . . . 807
 - pain in epigastrium from . . . 536
 - in plumbism . . . 151
 - subphrenic abscess from . . . 807
 - in tabes dorsalis . . . 151
 - urgent laparotomy for . . . 149, 536
 - periodic remission of symptoms of . . . 397
 - pleurisy from . . . 137
 - pneumothorax from 647
 - pyloric stenosis from 214, 218, 340
 - rigidity over . . . 734
 - salivation from . . . 662
 - serous effusion in chest from . . . 133
 - sex incidence of 48, 339
 - shortness of breath from . . . 113
 - skiagram of (Fig. 275) 339
 - slipping rib simulating . . . 553
 - splenic artery opened by . . . 319
 - subdiaphragmatic abscess from . . . 555, 647, 649, 807
 - peritonitis from . . . 583
 - surgical emphysema from . . . 254
 - tabes dorsalis simulating . . . 396
 - tenderness in chest from . . . 864
 - epigastrium from 339
 - on pressure over . . . 537
 - of spine from . . . 871
 - tetany from . . . 3, 214, 799
 - tongue clean with . . . 339
 - undue pulsation of abdominal aorta simulating . . . 662
 - uræmia from . . . 214
 - visceroptosis diagnosed from . . . 104
 - simulating . . . 48
 - vomiting from 48, 339, 342, 537, 928, 930
 - relieving pain of . . . 397
 - X rays in defining (Fig. 317) 398
 - gummatous, diagram of (Fig. 668) 895
 - indolent, in Raynaud's disease . . . 203
 - Mooren's . . . 891
 - perforating, from corn . . . 893
 - in diabetes . . . 335, 894
 - of foot 892, (Fig. 666) 893
 - in general paralysis . . . 892
 - of hand . . . 892
 - irresponsiveness to treatment . . . 893
 - in leprosy . . . 892
 - little pain in . . . 893
 - in peripheral neuritis . . . 892
 - in syphilis . . . 892

Ulcer, perforating, contd.
 - in syringomyelia .. 892
 - tabes dorsalis .. 321,
 335, 627, 892,
 (Fig. 666) 893, 894
 - rodent, account of .. 892
 - age incidence of .. 225, 892
 - of any part of body .. 895
 - arising in later life .. 500
 - bone destroyed by .. 225, 892
 - cartilage destroyed by .. 225
 - of cornea .. 891
 - crateriform .. 892
 - duration of (Fig. 671) .. 895
 - of ear, carache from .. 252
 - at edge of orbit .. 892
 - epithelioma distin-
 guished from .. 892
 - simulating .. 225
 - of face .. 892, 895
 - glands not affected
 from .. 892
 - little pain with .. 892
 - lupus vulgaris dis-
 tinguished from .. 892
 - simulating .. 500
 - of nose .. 225, 892
 - pre-auricular gland
 enlarged from .. 471
 - radium curing .. 225
 - starting as nodule .. 892
 - syphilide distin-
 guished from .. 892
 - sarcoma from .. 501, 898
 - on septum nasi .. 271
 - serpinginous, syphilitic .. 895
 - snail-track, in syphilis .. 186, 691
 - stercoral, of bowel .. 63
 - cæcum .. 564
 - surgical emphysema
 from .. 254
 - trophic, from Clarke's
 column lesion .. 145
 - of finger .. 301
 - foot in talipes .. 144
 - in talipes .. 145
 - typhoid, acute peri-
 tonitis from .. 63
 - ascites from .. 63
 - perforation of .. 63
 - general peritonitis
 from .. 63, 149
 - simulating colic .. 149
 - urgent laparotomy
 for .. 149
 - in urethra .. 240
 - of vagina, decubitus .. 231
 - varicose, epithelioma
 from .. 895
Ulceration of anus, pain
 - in rectum from .. 727
 - spasm of sphincter
 ani from .. 166
 - tuberculous .. 101
 - arytено-epiglottidean
 folds, tuberculous
 (Fig. 209) 245, 389
 - bile-ducts from gall-
 stones .. 411
 - bladder from appendi-
 citis .. 724
 - Bilharzia hæmatobia
 cystitis .. 720, 722
 - cystoscopy in dia-
 gnosing .. 722, 724
 - frequency of mic-
 turition from .. 722
 - hæmaturia from .. 722
 - from injury .. 722
 - malignant, cystitis
 from .. 720
 - pain on micturition
 from .. 722
 - phosphates coating .. 722
 - pyuria due to .. 716
 - simple .. 722
 - surgical emphysema
 from .. 254
 - tuberculous
 (Fig. 574) 717, 720, 721
 - bowel, diarrhoea from .. 806
 - dysenteric, acute peri-
 tonitis from .. 63
 - adherent to bladder .. 356, 724
 - ascites from .. 63
 - cystitis from .. 724

Ulceration of bowel, contd.
 - dysenteric, hæmaturia
 from .. 348, 356
 - opening into blad-
 der .. 710, 724
 - perforation of .. 63
 - suppurative peri-
 tonitis from .. 63
 - general peritonitis
 from .. 734
 - malignant, pus in
 stools from .. 681
 - pyuria due to .. 716
 - stricture of colon from .. 162
 - in tuberculous peri-
 tonitis .. 806
 - tuberculous, acute peri-
 tonitis from .. 63
 - adherent to bladder .. 356, 724
 - albumosuria with .. 21
 - ascites from .. 63
 - colic from .. 148
 - cystitis from .. 724
 - hæmaturia from .. 348, 356
 - opening into blad-
 der .. 710, 724
 - perforation of .. 63
 - colic simulated
 by .. 149
 - general peritonitis
 from .. 63, 149
 - in phthisis .. 562
 - pneumoperitoneum .. 800
 - pus in stools from .. 681
 - stenosis from .. 162
 - typhoid, pus in
 stools from .. 681
 - venereal, pus in stools
 from .. 681
 - check from acids .. 898
 - actinomycotic .. 562
 - from alkalis .. 898
 - carious tooth .. 898
 - dyspeptic .. 898
 - from mercury .. 898
 - in secondary syphilis .. 898
 - from septic infection .. 898
 - chest wall, actinomy-
 cotic .. 562
 - colon from dysentery .. 99, 216
 - subphrenic abscess
 from .. 807
 - tuberculous .. 562
 - blood per anum
 from .. 96, 97
 - carcinoma simu-
 lated by .. 162
 - (and see Colitis, Ulcer-
 ative)
CORNEA .. 287, 890
 - with acne rosacea .. 890
 - from acute conjunc-
 tivitis .. 890
 - adhesion of iris due to .. 890
 - anterior polar cataract
 due to .. 890
 - bacteriology of .. 891
 - catarrhal .. 890
 - diphtheritic .. 891
 - epiphora from .. 272
 - due to exophthalmos .. 891
 - fluorescein in demon-
 strating .. 890
 - from foreign body .. 890
 - gonorrhoeal .. 285, 891
 - in Graves' disease .. 891
 - from herpes frontalis .. 891
 - hypopyon with .. 890
 - illustrated (Fig. 234) .. 287
 - from injury .. 890
 - iridocyclitis with .. 890
 - iritis with .. 890
 - lachrymation with .. 890
 - opacity following .. 890
 - in ophthalmia neo-
 natorum .. 285
 - pain in eye from .. 546, 890
 - pannus with .. 891
 - panophthalmitis due
 to .. 890, 891
 - due to paralysis of
 fifth nerve .. 891
 - seventh nerve .. 891
 - perforation of cornea
 due to .. 890, 891
 - phlyctenular .. 890

Ulceration of cornea, contd.
 - photophobia from .. 639, 890
 - pneumococcal .. 890
 - prolapse of iris due .. 890
 - pupil irregular from .. 674
 - from rhinitis .. 890
 - simple infective .. 890
 - in trachoma .. 891
 - tuberculous .. 891
 - ear, gonococcal .. 252
 - from Klebs-Löffler
 bacillus .. 252
 - otitis media .. 252
 - staphylococcal .. 252
 - streptococcal .. 252
 - due to syphilis .. 252
 - Vincent's angina
 organisms .. 252
 - epiglottis, pain in ear
 from .. 253
 - tuberculous
 (Fig. 209) 245, 389
 - epithelioma .. 886
 - FACE .. 891
 - in leprosy .. 892
 - lupous .. 891
 - malignant .. 891
 - in scrofula .. 891, 892
 - syphilis .. 891, 892
 - fauces, snail-track .. 691
 - finger .. 801
 - FOOT .. 892
 - due to atheroma .. 893
 - burn .. 893
 - chilblains .. 893
 - Clarke's column le-
 sion .. 145
 - in diabetes .. 894
 - due to embolism .. 893
 - frost-bite .. 893
 - injury .. 893
 - intermittent claudi-
 cation .. 893
 - paraplegia .. 893
 - in Raynaud's disease .. 893
 - due to rubbing .. 893
 - in syringomyelia .. 893
 - talipes .. 144, 145, 893
 - due to thrombosis .. 893
 - vascular spasm .. 893
 - (and see Ulcer, Per-
 forating)
 - frenum lingue .. 590, 898
 - in groin from malig-
 nant glands .. 831
 - of gum .. 898
 - intestine (see Ulcera-
 tion of Bowel)
 - jaw, actinomycotic .. 562
 - larynx, decubital .. 245
 - diphtheritic, hæm-
 atysis from .. 361, 367
 - epitheliomatous .. 388
 - hoarseness from .. 388
 - laryngoscope in dia-
 gnosing .. 367
 - leprosy .. 245
 - cyanosis from .. 197

 - hoarseness from .. 388
 - œdema of larynx
 with .. 249
 - lupoid .. 245
 - cyanosis from .. 197
 - hoarseness from .. 388
 - œdema of larynx
 with .. 249
 - malignant, cyanosis
 from .. 197
 - hæmoptysis from .. 361, 367
 - œdema of larynx
 with .. 249
 - pain in ear from .. 253
 - post-typhoid, œdema
 of larynx with .. 249
 - septic, pain in ear
 from .. 253
 - syphilitic, cyanosis
 from .. 197
 - hæmoptysis from .. 361, 367
 - hoarseness from .. 388
 - laryngeal crises
 simulated by .. 249
 - œdema of larynx
 with .. 249
 - pain in ear from .. 253

Ulceration of larynx, contd.
 - traumatic .. 245
 - cyanosis from .. 197
 - hoarseness from .. 388
 - œdema of larynx
 with .. 249
 - pain in ear from .. 253
 - tuberculous, apical
 lung signs with .. 245
 - cyanosis from .. 197
 - epiglottis affected
 in .. 245
 - hæmoptysis from .. 361, 367
 - œdema of larynx
 with .. 249
 - pain in ear from .. 253
 - pale swollen aryteno-
 epiglottidean folds
 with .. 245
 - tubercle bacilli in
 sputum with .. 245
 - typhoid .. 245
 - hæmoptysis from .. 361, 367
 - stridor due to .. 799
 - variolous .. 244
 - cyanosis from .. 197
 - hæmoptysis from .. 361, 367
LEG .. 893
 - due to anthrax .. 895
 - atheroma .. 894
 - in Bazin's disease .. 502, 895
 - after burn .. 894
 - from cold .. 894
 - cut .. 894
 - diphtheria .. 894
 - in elephantiæsis .. 894
 - erythema induratum
 scrofulosorum .. 895
 - after fracture .. 894
 - due to glanders .. 895
 - gumma .. 500, 895
 - in hemiplegia .. 894
 - infantile paralysis .. 894
 - from injury .. 894
 - kick .. 894
 - after labour .. 894
 - due to lymphatic ob-
 struction .. 894
 - malingering (Fig. 667) .. 894
 - nitric acid (Fig. 667) .. 894
 - in old age .. 894
 - due to phagedæna .. 894
 - pregnancy .. 894
 - sarcomatous .. 895
 - from scratch .. 894
 - syphilitic .. 895
 - tuberculous .. 895
 - varicose .. 893
 - in white-leg .. 894
 - yaws .. 501
 - lip, carcinomatous
 (Fig. 378) 460
 - in secondary syphilis .. 898
 - round lips in yaws .. 501
 - of meatus of ear,
 organisms causing .. 252

- - - - - dyspeptic .. 898
- - - - - dysphagia from .. 244
- - - - - epitheliomatous .. 896
- - - - - (Fig. 673)
- - - - - gummatous .. 244, 474
- - - - - (Fig. 676)
- - - - - leprosy .. 244
- - - - - malignant .. 244
- - - - - from mercury .. 898
- - - - - microscope in diagnosing .. 897
- - - - - in secondary syphilis .. 898
- - - - - from septic infection .. 898
- - - - - in stomatitis .. 899
- - - - - from syphilis .. 261
- - - - - tooth-plate .. 244
- - - - - tuberculous .. 244
- - - - - (Fig. 677)
- - - - - from Vincent's angina .. 899
- - - - - tonail in secondary syphilis .. 898
- - - - - snail-track .. 691

Ulceration, contd.

- of trachea due to carcinoma of thyroid gland .. 876
- - - - - hæmoptysis from .. 361
- - - - - from neoplasm .. 361
- - - - - syphilis .. 361
- - - - - tuberculous, of anus .. 101
- - - - - **aryteno-epiglottidean folds (Fig. 209) 245, 389**
- - - - - bladder (Fig. 574) 717, 720, 721
- - - - - bowel (see Ulceration of Bowel)
- - - - - colon (see Ulceration of Colon)
- - - - - diagram of (Fig. 669) 895
- - - - - of epiglottis (Fig. 209) 245, 389
- - - - - epithelioma simulated by .. 898
- - - - - of gumma simulated by .. 898
- - - - - of larynx (see Ulceration of Larynx)
- - - - - leg .. 895
- - - - - rectum (see Ulceration of Rectum)
- - - - - tongue .. 244
- - - - - (Fig. 677) 897, 889
- - - - - umbilicus .. 593
- - - - - ureteric orifice .. 350
- - - - - venereal, of rectum (see Ulceration of Rectum)
- - - - - of vulva from syphilis .. 854
- - - - - ulcerative colitis (see Colitis)
- - - - - endocarditis (see Endocarditis, Infective)
- - - - - gastritis in anthrax .. 338
- - - - - stomatitis .. 898, 899
- - - - - - - - - - bleeding gums from .. 93
- - - - - - - - - - pyralism from .. 661
- - - - - **Ulcus serpens .. 890**
- - - - - Ulna, chondroma of, skiagram of .. 821
- - - - - - - - - - nodule on, in yaws .. 501
- - - - - - - - - - sarcoma invading, skiagram of (Fig. 642) 823
- - - - - - - - - - skiagram of normal .. 819
- - - - - (Fig. 631)
- - - - - Ulnar anaesthesia from cervical rib .. 545
- - - - - - - - - - in Klumpke's palsy .. 618
- - - - - - - - - - analgesia in tabes dorsalis .. 545
- - - - - - - - - - deflection of fingers in rheumatoid arthritis (Fig. 334) 427, 428
- - - - - - - - - - in osteo-arthritis .. 428, 432
- - - - - - - - - - jerks, increased, from cerebral lesion .. 613
- - - - - - - - - - unequal, in hemiplegia .. 381
- - - - - - - - - - nerve (see Nerve)
- - - - - - - - - - paralysis (see Paralysis)
- - - - - - - - - - Unbilical cord, infected, blood per anum from .. 96, 101
- - - - - - - - - - short, dystocia from .. 250
- - - - - - - - - - tetanus from infection of .. 885
- - - - - - - - - - fistula in tuberculous peritonitis .. 706, 804
- - - - - - - - - - hernia (see Hernia)
- - - - - **PAIN .. 593**
- - - - - - - - - - (and see Pain, Umbilical)
- - - - - - - - - - region, the organs situated in .. 808
- - - - - - - - - - veins, distended in cirrhosis of liver .. 67, 465
- - - - - - - - - - Umbilicated nodules in liver .. 68, 315, 465, 468
- - - - - - - - - - vesicles in small-pox .. 743, 913, 920
- - - - - Umbilicus, abscess at, in tuberculous peritonitis .. 593
- - - - - - - - - - bloody sweat of .. 803
- - - - - - - - - - caput Medusæ at .. 59, 910
- - - - - - - - - - carcinoma at, secondary to stomach .. 397
- - - - - - - - - - eczema intertrigo of .. 593
- - - - - - - - - - epithelioma of .. 593
- - - - - - - - - - faecal fistula at (see Fistula)
- - - - - - - - - - fixed in malignant peritonitis .. 65
- - - - - - - - - - flattened in chronic peritonitis .. 525
- - - - - - - - - - flush with surface from ascites .. 59, 61
- - - - - - - - - - granulation tissue at .. 593
- - - - - - - - - - hæmorrhage from, due to congenital obliteration of bile-ducts .. 411
- - - - - - - - - - inflamed in infants .. 804

Umbilicus, inflamed, contd.

- - - - - from intertrigo .. 804
- - - - - perigastric abscess .. 804
- - - - - in pneumococcal peritonitis .. 804
- - - - - from subdiaphragmatic abscess .. 804
- - - - - in tuberculous peritonitis .. 804
- - - - - lymphatic drainage of .. 830
- - - - - malignant nodules at .. 804, 805
- - - - - new growth affecting .. 593
- - - - - in obesity .. 61
- - - - - oedematous, in pneumococcal peritonitis .. 59
- - - - - tuberculous peritonitis .. 59
- - - - - protruded, from ascites .. 59, 61
- - - - - reddened in pneumococcal peritonitis .. 59
- - - - - tuberculous peritonitis .. 59, 525
- - - - - **relations in ascites .. 60**
- - - - - - - - - - with ovarian cyst .. 60
- - - - - - - - - - scabies affecting .. 918
- - - - - - - - - - sebaceous cyst of .. 593
- - - - - - - - - - sensory centre for .. 631
- - - - - (Fig. 485)
- - - - - skin reddened round .. 65
- - - - - stretched transversely by ascites .. 59, 61
- - - - - tuberculous infiltration of .. 65
- - - - - ulceration of .. 593
- - - - - veins distended at, in cirrhosis .. 59
- - - - - Uncinate gyrus (see Gyrus)
- - - - - region, tumour of, aura from .. 87
- - - - - - - - - - dreamy consciousness .. 87
- - - - - Unconsciousness, see Coma
- - - - - Undescended testis (see Testis, Ectopic)
- - - - - Undescribable feeling as an aura .. 86
- - - - - Undulant fever (see Fever, Malta)
- - - - - **UNEQUAL PULSES .. 673**
- - - - - - - - - - (and see Pulses, Unequal)
- - - - - - - - - - pupils (see Pupils)
- - - - - - - - - - Unrupted molar, pain in ear from .. 253
- - - - - - - - - - - - - - - jaw from .. 567
- - - - - - - - - - Unilobular cirrhosis .. 67
- - - - - - - - - - United States, tick paralysis in .. 625
- - - - - - - - - - Unardonable sin in melancholia .. 503
- - - - - - - - - - Unreality, sense of, as an aura .. 86
- - - - - - - - - - Unripe fruit, diarrhoea from .. 216
- - - - - - - - - - Upas tree, dermatitis due to .. 915, 916
- - - - - - - - - - Upper neuron lesions, Babinski's sign and .. 88
- - - - - - - - - - **tone limit test of hearing 206**
- - - - - - - - - - Urachus, cyst of (see Cyst)
- - - - - - - - - - infiltrated in malignant peritonitis .. 65
- - - - - - - - - - malignant nodules in .. 804, 815
- - - - - - - - - - situation of .. 805
- - - - - - - - - - Uræmia, acetonuria from .. 3
- - - - - - - - - - from acute nephritis .. 139, 212
- - - - - - - - - - affection of vision in .. 377
- - - - - - - - - - albuminuria with .. 183, 521, 396
- - - - - - - - - - without albuminuria .. 396
- - - - - - - - - - albuminuric retinitis .. 396, 922, 925
- - - - - - - - - - alkalosis and .. 214
- - - - - - - - - - amaurosis in .. 922
- - - - - - - - - - amblyopia in .. 183
- - - - - - - - - - anaemia and .. 55, 56, 57
- - - - - - - - - - anuria and .. 139, 183, 211
- - - - - - - - - - from ascending nephritis .. 653
- - - - - - - - - - asthma in .. 88
- - - - - - - - - - Babinski's sign in .. 88
- - - - - - - - - - blindness in .. 925
- - - - - - - - - - bradycardia in .. 109
- - - - - - - - - - bradypnoea in .. 110, 111
- - - - - - - - - - breathing in .. 111
- - - - - - - - - - bromidrosis in .. 803

Uræmia, contd.

- from calculous disease of kidney .. 139
- carcinoma of kidney .. 139
- cerebral abscess simulated by .. 111
- - - - - compression simulated by .. 111
- - - - - hæmorrhage simulated by .. 111
- - - - - tumour simulated by .. 111
- - - - - Cheyne-Stokes breathing in .. 139
- - - - - from chronic interstitial nephritis .. 211
- - - - - nephritis .. 14, 57, 139, 174
- - - - - parenchymatous .. 211
- - - - - nephritis .. 211
- - - - - coli bacilluria .. 211
- - - - - coma from .. 57, 88, 109, 153, 154, 181, 183, 521
- - - - - in combined sclerosis of cord .. 211
- - - - - compression paraplegia .. 211
- - - - - convulsions from .. 14, 55, 57, 111, 174, 181, 183, 521
- - - - - convulsive twitchings in .. 55
- - - - - cramps in .. 190
- - - - - from cystic kidneys .. 139
- - - - - cystitis .. 211
- - - - - death from .. 55
- - - - - delirium in .. 211, 213
- - - - - in disseminated sclerosis .. 211
- - - - - drowsiness in .. 55, 56, 372
- - - - - dyspnoea in .. 372
- - - - - attacks in .. 57
- - - - - eclampsia in .. 183
- - - - - effects of hæmorrhage simulated .. 157
- - - - - encephalitis simulating .. 223
- - - - - from enlarged prostate .. 183, 211, 396
- - - - - epileptiform convulsion in .. 736
- - - - - from fracture-dislocation of spine .. 211
- - - - - gastrectasis in .. 213, 214
- - - - - gastritis in .. 396
- - - - - giddiness from .. 57
- - - - - headache from .. 55, 57, 184, 369, 371, 372
- - - - - hiccough from .. 57, 386, 387
- - - - - high blood-pressure and .. 111, 183, 396
- - - - - hyperpyrexia in .. 390
- - - - - hypertrophied heart and .. 183
- - - - - indigestion simulated by .. 396
- - - - - from infective pyelonephritis .. 211
- - - - - in kidney disease .. 211
- - - - - latent .. 55
- - - - - no lockjaw in .. 521
- - - - - loss of appetite in .. 55, 56, 396
- - - - - sphincter control in .. 57
- - - - - muscular twitchings in .. 57
- - - - - from nephritis .. 396
- - - - - odour of breath in .. 396
- - - - - opisthotonos in .. 521
- - - - - optic neuritis in .. 111
- - - - - from polycystic disease .. 57
- - - - - in primary lateral sclerosis .. 211
- - - - - pupils small in .. 55
- - - - - from pyelonephritis .. 718
- - - - - pyloric stenosis .. 213
- - - - - pyuria .. 396
- - - - - renal tube-casts in .. 111, 521
- - - - - from renal tuberculosis .. 183
- - - - - restlessness in .. 57
- - - - - from retention of urine .. 211
- - - - - retinal changes and .. 183, 372
- - - - - rigidity of face in .. 885
- - - - - rigor simulated by .. 736
- - - - - from sarcoma of kidney .. 139
- - - - - stercor in .. 57
- - - - - from stricture of urethra .. 183, 211
- - - - - symptoms of .. 57
- - - - - in tabes dorsalis .. 211
- - - - - tetanus with .. 213
- - - - - tinnitus due to .. 879
- - - - - tongue dry in .. 55
- - - - - tremor in .. 879
- - - - - from tuberculous kidney .. 139
- - - - - urea in blood in .. 111
- - - - - cerebrospinal fluid in .. 111, 383
- - - - - uridrosis in .. 803
- - - - - venesection in .. 154

Uræmia, contd.

- vomiting due to 55, 372, 396, 928
- Urate, ammonium, hedgehog crystals of 899
- thornapple crystals of (Fig. 678) 899
- calculus, X rays and 440
- **DEPOSIT IN URINE 899**
- of sodium (see Sodium Urate)
- Urates, albumose simulated by 7
- brick-red 715
- clearing on warming 715
- concentration of urine indicated by 899
- after diarrhoea 900
- in fevers 900
- heart failure 900
- hot weather 899
- kidney disease and 900
- in lobar pneumonia 900
- microscopical examination of 899
- pink 715
- in rheumatic fever 900
- after sweating 899, 900
- uric acid confused with 900
- in urine after biliary colic 554
- uroerythrin and 715, 899, 902
- after vomiting 900
- warming test for 899
- white ring with nitric acid 6
- Urea in blood (see Blood)
- cerebrospinal fluid 383
- in uræmia 111
- concentration test 19
- crystals on skin 803
- effluence with sodium hypobromite 803
- nitrate, crystalline 7
- albuminuria simulated by 7
- white ring with 7
- percentage in healthy urine 19
- soluble in alcohol 20
- trichloroacetic acid 20
- uric acid and 901
- Ureter, anatomical course 442
- blood-clot in, colic from 147
- blood-stained urine issuing from (Fig. 293) 354
- calculus in (see Calculus)
- carcinoma invading 353
- felt per rectum 577, 721
- in tuberculous kidney 448
- per vaginam 350, 721
- in tuberculous kidney 448
- kinked, albuminuria from 9
- ascending nephritis from 9
- from movable kidney 9
- operation (Fig. 375) 447
- X rays in diagnosing (Fig. 375) 447
- obstructed by aneurysm 9
- calcareous gland 147
- carcinoma of bladder 722
- colic from 147
- hydronephrosis from 56, 449
- after nephropexy 447
- pyonephrosis from 449, 717
- by renal papilloma 351
- tuberculous gland 147
- vesical tumour 449
- œdema of, in pyelitis 717
- orifice of, œdema of 350
- ulceration of 350
- pain along, from calculus 56, 719
- papilloma of 351
- pus coming from, illustrated (Fig. 571) 717
- rectal examination in investigating 350
- retracted, with renal tuberculosis 448, (Fig. 573) 717, 721
- tenderness over, from bacteriuria 91
- thickened by tubercle 577, 719

Ureter, contd.

- tuberculosis of (see Tuberculosis)
- Ureteral catheterization, colic from 147
- in diagnosing movable kidney 564
- tuberculous kidney 564
- ureteral calculus 554, 559
- (and see Bougie, Radiographic)
- colic (see Colic)
- Ureters, both obstructed by abdominal tumour 55
- calculi 55
- carcinoma of bladder 55, 56
- uterus 55, 56
- fibromyoma 57
- latent uræmia with 55
- by ovarian carcinoma 57
- pelvic tumour 55, 57
- Urethritis, account of 578**
- acute, pain in iliac fossa from 555
- appendicitis simulated by 559
- due to *Bacillus coli* 90, 559, 578
- pneumonia 90
- pyocyaneus 90
- tuberculosis 90
- after calculus 559
- calculus simulated by 559
- colic from 147
- cystoscope in diagnosing 578
- descending from kidney 578
- frequency of micturition from 578
- due to Friedländer's bacillus 90
- pain in iliac fossa from 557
- penis from 576, 578
- due to pneumococcus 90
- rectal examination in diagnosing 578
- due to staphylococcus 90, 578
- streptococcus 90
- tuberculous 349, 578
- vesical disease simulated by 578
- Urethrography, account of 445**
- Urethra, abscess of, aching in perineum from 579
- *Bacillus xerosis* in 88
- bacteriological examination of 83, 86
- blood from, due to carcinoma 230
- chancre 230
- calculus in (see Calculus)
- carcinoma of (see Carcinoma)
- cruncle of (see Caruncle)
- chancre in 230
- DISCHARGE FROM 227**
- (and see Discharge, Urethral)
- divisions of, importance in gonorrhœa 228
- endoscopic appearances 229
- epithelioma of, pain due to 851
- stenosis of urethra by 851
- FÆCES PASSED THROUGH 296, 724**
- fistula of (see Fistula)
- flatus passing through 724
- foreign body in (see Foreign Body)
- gonococcus in 231, 854
- gummatous 230
- hemorrhage from, from calculus 493
- herpes of 230
- injury to (see Injury)
- instrumentation of, prostatic abscess from 723
- irritation in, from herpes 230
- nevus of 348, 356
- normal bacteria of 88
- pain in (see Pain)
- papilloma of (see Papilloma)
- pigmentation of, in Addison's disease 643
- polypus of, discharge due to 229

Urethra, polypus of, contd.

- endoscope in diagnosing 229
- posterior, gonococcus from 425
- gonorrhœa of 86
- prolapse of, bleeding from 855
- **caruncle simulated by 855**
- vulval swelling due to 853
- rectum opening into (Fig. 575) 728
- rupture of (see Rupture)
- scalding in, in gonorrhœa 574
- soft sores in 230
- spasm of 492
- *Staphylococcus albus* in 88
- *Streptococcus brevis* in 88
- stricture of (see Stricture)
- **syphilis of 230**
- tuberculosis of, secondary to prostate 230
- seminal vesicles 230
- tumour of, due to carcinoma 230
- ulcers in 230
- vesicles in 230
- Urethral crises in tabes dorsalis 627
- sepsis, D.A.H. from 246
- debility from 246
- dyspnoea from 246
- stenosis (see Stricture of Urethra)
- Urethritis from acidity of urine 902
- acute gonococcal 356
- hæmaturia from 348, 356
- septic 356
- urethral discharge from 356
- from acute pyelitis 228
- *Bacillus coli* 228
- bacteriological examination in 227, 228
- balanitis with 763
- cavernitis from 579
- chancre simulating 230
- chordee from 579, 763
- from cystitis 850
- cystitis from 228, 720, 722
- dyspareunia due to 239
- endoscope in investigating 229
- epididymitis from 228, 850
- **epididymo-orchitis from 584, 849**
- gonorrhœal 90, 227, 228, 348, 356, 584, 763
- gouty 656, 902
- hæmaturia with 722
- herpetic 230
- from impacted calculus 850
- after instrumentation 228, 850
- leucocytosis in 453
- from leucorrhœa 228, 584
- **method of investigating 229**
- due to *Micrococcus catarrhalis* 90
- not always gonococcal 227
- pain on micturition from 493, 763
- in penis from 574, 578, 763
- periurethral abscess from 767
- due to pneumococcus 90
- posterior, cystitis distinguished from 723
- simulated by 720
- two-glass test for 723
- priapism from 656
- after prostatectomy 850
- from prostatic abscess 578
- prostatic abscess from 575, 723, 766
- from prostatitis 578, 850
- prostatitis from 228, 493, 575, 720, 723
- from pyelitis 850
- pyuria from 716, 722
- staphylococcal 228
- due to *Staphylococcus albus* 90
- aureus 90
- strangury due to 797
- due to *Streptococcus pyogenes longus* 90

Urethritis, contd.

- due to stricture 723, 850
- suprapubic pain with 722
- testicular abscess from 768
- **two-glass test in 720**
- urethral discharge from 722
- fistula from 766
- uric acid and 901
- Urethroscopy (see Endoscopy)
- Urethrotomy, anuria from 58
- Uric acid (see Acid)
- Uridrosis 803**
- (and see under Sweating)
- Urinary fistula (see Fistula)
- meatus (see Meatus)
- URINE, ABNORMAL COLORATION OF 902**
- absence of (see Anuria)
- acetone in 3
- in acute alcoholism 331
- cyclical vomiting 479, 928
- diabetes 330, 331, 655
- **acidity of, account of 637**
- cystitis due to 902
- epididymo-orchitis due to 902
- increased frequency of micturition from 491
- undue, oxalate of lime with 901
- uric acid with 901
- urethritis due to 902
- albumin in (see Albuminuria)
- albumose in (see Albumosuria)
- alcapton in (see Alcaptonuria)
- ammonia in 90, 638
- in phosphorus poisoning 421
- **amphoteric reaction in 637**
- ants and flies attracted to diabetic 334
- aspirin products in 214
- bacteria in, in pyelitis 718
- suppurative nephritis 736
- bacteriological examination of (see Bacteriological Examination)
- in bacteriuria, characters 90
- **bile in, account of 903**
- (and see Jaundice)
- Bilharzia ova from (Fig. 96) 102, 356, 577, 722
- biliverdin in 906
- **black, account of 904**
- due to alcaptonuria 904, 905
- from biliverdin 903
- in blackwater fever 357
- due to carboloria 904, 906
- druses 904
- gallic acid 904
- hæmaturia 904
- hæmoglobinuria 357, 904
- indicanuria 904
- jaundice 904
- melanuria 904, 905
- in ochronosis 906
- due to porphyrinuria 904
- resorcin 904
- salicylates 904, 906
- selol 904
- ura ursi 904
- blood in (see Hæmaturia)
- casts in (Fig. 12) 6, 349
- blood-red, in hæmoglobinuria 357
- paroxysmal hæmoglobinuria 358
- blood-stained, issuing from ureter (Fig. 293) 354
- **blue, account of 906**
- from methylene blue 906
- sediment in, from indigo blue 907
- **bright yellow, from drugs 903**
- brown, account of 904
- in acute nephritis 12
- due to alcaptonuria 904, 905
- carboloria 904, 906
- drugs 904
- gallic acid 904
- hæmaturia 904
- hæmoglobinuria 347, 357, 904

Urine, brown, contd.

- due to indicanuria .. 904
- jaundice .. 904
- melanuria .. 904, 905
- porphyrinuria .. 904
- resorcin .. 904
- ring in, from indican .. 395
- due to salicylates .. 904
- salol .. 904
- uva ursi .. 904
- brown-black, in acute nephritis .. 12
- brownish, in acute nephritis .. 12
- bubbly, from yeasts .. 647
- carbonic acid products in .. 214
- casts in (see Casts, Urinary)
- cayenne pepper deposit in .. 900
- in boys .. 901
- health .. 901
- changes in acute nephritis .. 12
- chronic nephritis .. 15
- colic .. 151
- with cystic kidneys .. 15
- in general microbial infections .. 90
- myxœdema .. 50
- with obstruction to urine outflow .. 55
- in phosphorus poisoning .. 421
- chlorides absent from, in pneumonia .. 200, 364
- in, in acute nephritis .. 12
- deficient in pneumonia .. 419
- in phosphorus poisoning .. 421
- after chrysophanic acid .. 903
- chrysophanic acid in, test for .. 904
- chylous .. 72
- (and see Chyluria)
- clots in .. 349
- from renal growth .. 351
- colour of, in acute nephritis .. 12
- cystinuria .. 203
- jaundice .. 405
- colourless in diabetes insipidus .. 902
- concentrated from acute gastritis .. 338
- chronic gastritis .. 338
- diarrhoea .. 900
- in fevers .. 900
- heart failure .. 900
- hot weather .. 899
- after sweating .. 899, 900
- urates indicating .. 899
- after vomiting .. 900
- creatinine in .. 3
- crystals in (see under Crystals)
- cultures (see Bacteriological Examination)
- in .. 203
- from alcapton .. 327
- hæmaturia .. 348
- black-brown ring in, with nitric acid .. 6
- darkening on standing, in alcaptonuria .. 904, 905
- carbouluria .. 906
- melanuria .. 904, 905
- deposit, brown, from phosphates and blood .. 12
- cayenne pepper .. 900
- oxalate .. 523
- powdered wig .. 523
- uric acid .. 900
- of mucus in .. 496
- deposits, coloured figures of micro-organisms in (Figs. 87-92) .. 89
- diabetic, colour of .. 902
- diacetic acid in (see Diacetic acid)
- diastase in .. 19
- coefficient of .. 216
- difficulty in starting flow of .. 491
- dinitro-aminophenol in .. 903
- dribbling of, from paralysis of sphincter .. 495
- retention .. 55, 492
- retroverted gravid uterus .. 841

Urine, dribbling of, contd.

- from stricture .. 492, 575
- (and see Incontinence)
- effervescence in, from carbonate .. 5
- epithelial casts in (see Casts, Urinary)
- extravasation of, aching in perineum from .. 579
- from rupture of urethra .. 351
- scrotal fistula from .. 767
- faeculent, from Bacillus coli .. 647
- fat droplets in .. 140
- fatty casts in .. (Fig. 10) 6
- filaments in, in gleet .. 228
- from urethritis .. 229
- fluorescence of, after eosin .. 904
- foul-smelling, from cystitis .. 699
- fragments of new growth in .. 10, 349
- papilloma in .. 722
- gas in, due to Bacillus coli .. 647
- yeasts .. 647
- globulin in .. 5
- in acute nephritis .. 12
- glycuronic acid in .. 327
- from drugs .. 332
- golden-brown, in pernicious anemia .. 422
- from urobilin .. 422
- granular casts in (Fig. 9) 6, 349
- gravel in, after renal colic .. 554
- green, account of .. 906
- from biliverdin .. 903, 906
- in jaundice .. 906
- from methylene blue .. 906
- sweets .. 906
- greenish, in carbouluria .. 906
- guaiacum test applied to hæmatoporphyrin in .. 903
- (and see Hæmaturia; Hæmoglobinuria)
- hairs in .. 646
- hexagonal crystals in (Fig. 177) 203
- high - coloured, from active congestion of liver .. 417
- in cirrhosis of liver .. 466
- with hepatic abscess .. 464
- in influenza .. 712
- with lardaceous kidney .. 10
- from uroerythrin .. 902
- homogentisic acid in .. 905
- hyaline tube-casts in .. 353
- hydatid hooklets in .. 450
- hydroquinoneacetic acid in .. 905
- incontinence of (see Incontinence)
- indican in (see Indicanuria)
- injections into guinea-pig in diagnosing spirochaetosis .. 693
- iodides in .. 94
- guaiacum test and .. 125
- iodine coefficient of, in carcinoma of pancreas .. 129
- normal .. 129
- in pancreatitis .. 129
- lactose in .. 327
- levulose in .. 327
- in lardaceous kidney .. 10
- lead in .. 45, 85, 94, 155, 184
- leucin in, in acute yellow atrophy .. 345, 416, 928
- leucocytes in (see Leucocytes)
- melanin in .. 469, 477, 831
- melaninogen in .. 831, 905
- methæmoglobin in (see Methæmoglobinuria)
- methylene blue in, tests for .. 906
- micro-organisms in .. 88
- (and see Bacteriuria)
- microscopical examination of .. 8
- milky, from chyluria .. 140
- phosphates .. 638
- phosphaturia .. 140
- (and see Chyluria)
- MUCUS IN .. 496

Urine, mucus in, contd.

- from catarrh .. 496
- cystitis .. 219
- in normal females .. 496
- from oxaluria .. 496
- tube-casts simulated by .. 496
- murky, in hæmoglobinuria .. 357
- nitrogen in phosphorus poisoning .. 421
- normal daily total of .. 652
- nucleoprotein in, albuminuria simulated by .. 524
- from oxaluria .. 524
- obstruction to outflow of, causes of .. 9
- granular kidney from .. 1
- opalescent from albumen .. 5
- carbonates .. 5
- coli bacilluria .. 699
- globulin .. 5
- nucleoproteid .. 5
- phosphates .. 3, 5
- in pyelitis .. 718
- from salicyl-sulphonic acid .. 7
- in tuberculous kidney .. 719
- orange-coloured .. 902
- from bilirubin .. 903
- uroerythrin .. 902
- over-abundant (see Polyuria)
- oxalate in (see Oxaluria)
- oxybutyric acid in .. 3
- pale and abundant, in angina pectoris .. 533
- in ascending nephritis .. 11
- chronic nephritis .. 15
- with lardaceous kidney .. 10
- in pyelitis .. 720
- tuberculous kidney .. 719
- pentose in .. 327
- perineal passage of .. 766
- phosphates in (see Phosphates; and Phosphaturia)
- picramic acid in .. 903
- pigment granules in, in malaria .. 39
- pink .. 903
- from aperients .. 904
- chrysophanic acid .. 904
- after eosin .. 904
- from rhubarb .. 904
- rosaniline .. 904
- santonin .. 904
- senna .. 904
- after sweets .. 904
- pink deposit in, due to urates .. 899
- pinkish, in urobilinuria .. 902
- plugs of mucus in .. 349
- porphyrin in (see Porphyrinuria)
- porter-coloured, in acholuric jaundice .. 419
- septicæmia .. 419
- purple, due to indigo blue .. 907
- pus in (see Pyuria)
- pyriform cells in .. 902
- ray fungi in .. 724
- red .. 903
- from blood .. 903
- chrysophanic acid .. 903
- eosin .. 903
- in hæmaturia .. 348
- due to hæmoglobinuria .. 903
- in infants, from porphyrin .. 904
- after phenolphthalein .. 903
- due to porphyrinuria .. 903
- rosaniline .. 903
- sweets .. 903
- urofuscine .. 903
- uroporphyrin .. 903
- red corpuscles in, in acute nephritis .. 17
- reducing substances in, various .. 327
- reduction with, after acetanilide .. 196
- drugs .. 196
- phenacetin .. 196
- phenazone .. 196
- sulphonal .. 196
- trional .. 196
- veronal .. 196
- removal of albumin from 20

Urine, contd.

- renal cells in (see Casts, Urinary)
- epithelium in, in bacteriuria .. 90
- resin in, from copaiba .. 6
- retention of (see Retention)
- after rhubarb .. 903
- in rowing men .. 18
- salicylate products in .. 214
- salol products in .. 214
- after santonin .. 903
- scanty, from active congestion of liver .. 417
- in acute nephritis .. 353
- chronic nephritis .. 13
- with hepatic abscess .. 44
- after senna .. 903
- shceny, in pyelitis .. 718
- smoky, in acute nephritis .. 12
- general infections .. 90
- (and see Hæmaturia)
- solids, low, in pyelitis .. 718
- specific gravity of, in acute nephritis .. 12
- alcoholism .. 331
- Bright's disease .. 263
- chronic nephritis .. 15
- diabetes .. 331
- high, in acute nephritis .. 353
- cirrhosis of liver .. 466
- diabetes .. 334, 655
- in lardaceous disease .. 10
- low, from ascending nephritis .. 11
- in chronic interstitial nephritis .. 347
- diabetes .. 334
- insipidus .. 655
- myxœdema .. 50
- with obstructive anuria .. 55
- polycystic kidneys .. 353, 450
- in pyelitis .. 718
- tuberculous kidney .. 719
- spectroscopic test applied to .. 12
- spermatozoa in, from oxaluria .. 524
- spirochaetes in, in spirochaetosis icterohæmorrhagica .. 420
- spontaneous coagulation of .. 140
- Staphylococcus aureus in .. (Fig. 99) 89
- stream, alterations in .. 491
- little force in, from enlarged prostate .. 493
- Streptococcus pyogenes longus in .. (Fig. 89) 89
- sudden stoppage of flow of .. 491, 493
- sulphates in, in carbouluria .. 906
- sulphuretted hydrogen in .. 203
- suppression of .. 57
- (and see Anuria)
- sweetbriar odour of, in cystinuria .. 203
- tailed epithelial cells in .. 902
- tests for acetone illustrated .. (Fig. 2-8) 4
- threads in .. 229
- total passed in health .. 490
- tube-casts in (see Casts, Urinary)
- tubercle bacilli in (see Bacillus, Tubercle)
- turbid, in pyelitis .. 718, 720
- tuberculous kidney .. 719
- twisted stream of .. 491
- tyrosin in, in acute yellow atrophy .. 345, 416, 928
- URATE DEPOSIT IN .. 899
- urica in, in acute nephritis .. 12
- diminished in acute yellow atrophy .. 345, 416
- low, from obstruction .. 55
- percentage .. 19
- in phosphorus poisoning .. 421
- URIC ACID IN .. 900
- crystals in, in acute nephritis .. 12

Urine, contd.

- urobilin in (see Urobilinuria) ..
- urochrome in .. 902
- uroerythrin in .. 902
- uroporphyrin in .. 903
- per vaginam 356, 494, 724
- vesical cells in .. 349
- **waxy casts in (Fig. 11) 6**
- white ring in, from ..
- albumose .. 6, 20, 22
- urates .. 6
- urea nitrate .. 7
- Urobilin, absorption band 902
- **fluorescence test for .. 407**
- illustrated (Fig. 32) 406
- spectroscope in detecting .. 407, 902
- spectrum of .. (Fig. 23) 13
- in stools .. 215
- **Urobilinuria, account of 902**
- in cholangitis .. 129
- cirrhosis of liver 784, 902
- from gall-stones .. 129
- in hæmolytic diseases 902
- from intestinal infection 902
- in liver disease 902
- malaria 39, 417, 902
- from pancreatitis .. 129
- in pernicious anemia .. 447, 407, 422, 902
- after picric acid .. 902
- pinkish tinge of urine in .. 902
- stercobilin allied to .. 902
- urine orange-yellow in .. 902
- Urochrome, normal colour of urine due to .. 902
- in uric acid crystals 900
- Uroerythrin, effect of alkali on .. 902
- liver disease and .. 902
- urates and 715, 899, 902
- **in urine 902**
- urine high-coloured .. 902
- from .. 903
- Urolucsin .. 903
- Uroporphyrin of Fischer .. 903
- **Urotropine, cystitis simulated after 798**
- hæmaturia from 348, 798
- hæmoglobinuria from 357
- in pyuria .. 798
- strangury due to .. 798
- Urtica, dermatitis due to 916
- Urticaria, acute, from shell-fish poisoning .. 127
- angioneurotic oedema .. 126, 918
- simulated by .. 824
- from aspirin .. 514
- balm of Peru .. 917
- bullous .. 935
- from crab .. 278, 935
- in children .. 600
- dermatitis herpetiformis .. 126, 918
- erysipelas simulated by 935
- erythema papulatum distinguished from .. 600
- factitious .. (Fig. 654) 856
- epidermolysis bullosa .. 126
- hæmoglobinuria in .. 358
- finger affected by .. 301
- from fish .. 824
- formalin .. 917
- fried fish .. 935
- in hydatid disease 470
- itching in .. 600, 659
- from jelly-fish sting .. 278
- of lips .. 459
- from lobster .. 935
- mussels .. 935
- nigricans .. 644
- papular .. 600
- papulosa .. 598
- wheals in .. 935
- parts affected by .. 600
- pemphigus and .. 127
- pigmentosa .. 644
- factitious lesions in .. 889
- itching in .. 889
- wheals in .. 889
- xanthoma multiplex distinguished from .. 889
- from pork .. 824
- ptomaine poisoning .. 514
- in rat-bite fever .. 740
- scales in .. 744
- scarlet fever simulated by .. 935

Urticaria, contd.

- from sea-cat pricks .. 278
- after serum 277, 659, 677, 851
- from strawberries 278, 935
- tongue swollen with .. 851
- from weever-fish prick 278
- wheals in .. 600, 934
- **Uterine colic, causes of 148**
- from defective uterine muscle .. 238
- in membranous dysmenorrhœa .. 238
- sepsis, noises in head from .. 504
- vertigo from .. 504
- sound (see Sound) ..
- Uterus, absence of, sterility due to .. 793
- adenomyoma of, pelvic swelling due to .. 840
- adhesions found, colic due to .. 148
- anteversion of, dystocia from .. 250
- from pendulous belly 250
- asymmetrical, in pregnancy .. 489
- bacteriological investigation of .. 83
- carcinoma of (see Carcinoma) .. 237
- cast of .. 237
- from membranous dysmenorrhœa .. 238
- pregnancy .. 238
- cervix of (see Cervix Uteri)
- chorion-epithelioma of, colic due to .. 148
- metrorrhagia from .. 487
- pelvic swelling due to 840
- cochleate, dysmenorrhœa with .. 238
- sterility due to .. 793
- congestion of, backache from .. 483, 573
- dysmenorrhœa from 238
- leucorrhœa from .. 483
- menorrhagia from .. 482, 483
- pelvic pain from .. 573
- contraction ring of, dystocia due to .. 250
- recognition of .. 251
- contractions felt .. 61
- curettage of (see Curettage)
- discharge from .. 528
- disease of, backache from .. 528
- chloasma from 642, 643
- frequency of menstruation from .. 901
- pain in leg from .. 543
- displaced, albuminuria from .. 9, 11
- ascending nephritis from .. 9
- casts in urine from .. 11
- by cellulitis .. 843
- colic due to .. 148
- sterility due to .. 793
- distance sound passes into .. 483
- double, amenorrhœa with .. 23
- drawn up by ovarian cyst 60
- enlarged, in endometritis .. 238
- by fibromyoma .. 483
- from pregnancy .. 489
- felt per rectum .. 728
- fibromyoma of (see Fibromyoma)
- fixed by cellulitis .. 843
- pelvic abscess .. 843
- with salpingo-oophoritis .. 238
- gravid (see Pregnancy)
- growths of body of, metrorrhagia from .. 487
- hæmorrhage from (see Hæmorrhage; Menorrhagia; Metrorrhagia)
- hour-glass contraction of .. 250, 252
- hyperinvolution of 23, 24, 794
- inertia of .. 252

Uterus, inertia of, contd.

- dystocia due to .. 250
- **Infantile, account of 793**
- amenorrhœa with .. 23
- sterility due to .. 793
- infection of, acute nephritis from .. 11
- colic simulated by .. 149
- general peritonitis from .. 149
- septicæmia from .. 785
- urgent laparotomy after .. 149
- inflamed, pain in spine from .. 871
- tenderness of spine from .. 871
- injury to, colic due to 148
- instrumentation of (see Instrumentation)
- **Inversion of, account of 658**
- cup-shaped depression at fundus with .. 658
- extrusion of fibroid .. 658
- simulating .. 658
- after labour .. 658
- polypoid fibromyoma .. 658
- prolapse of uterus .. 657
- simulated by .. 657
- severe hæmorrhage with .. 658
- shock with .. 658
- sound in diagnosing .. 658
- vulval swelling due to .. 853
- irregular in shape from fibroids .. 238
- lesions of, histology in diagnosing .. 487
- lipiodol in .. (Fig. 692) 490
- neurosis of, colic due to .. 148
- ovarian cyst and position of .. 60
- polypus of (see Polypus)
- **PROLAPSE OF 657**
- (and see Prolapse)
- rapid enlargement of, from cystic change in fibroid .. 488
- sarcoma .. 488
- referred pain from .. 871
- retroflexion of, bimanual examination in diagnosing .. 238
- dysmenorrhœa from 237
- endometritis with .. 483
- menorrhagia with .. 483
- retroverted, backache from .. 573
- bearing-down pain from .. 529
- bimanual examination in diagnosing .. 238
- dyschezia seldom due to .. 166
- dysmenorrhœa from 237
- dyspareunia due to 239
- endometritis with .. 483
- felt per rectum .. 728
- gravid, amenorrhœa with .. 841
- bladder distended from 61, 815, 841
- incontinence of urine from .. 61
- retention of urine from .. 55
- strangury due to 797
- tenesmus due to 873
- urine dribbling with .. 841
- menorrhagia from 482, 483
- micturition difficult from .. 492
- pelvic pain from .. 573
- pregnancy in .. 841
- sciatic pain from .. 539
- vomiting due to .. 929
- rupture of .. 252
- sarcoma of (see Sarcoma)
- secretion of normal .. 231
- reaction of .. 231
- site with ascites .. 60
- small adult, amenorrhœa with .. 23
- sterility due to .. 793

Uterus, contd.

- spasm of, dystocia from 250
- subinvolution of, chronic metritis from .. 483
- endometritis with .. 483
- after labour .. 483
- menorrhagia from 482, 483
- metrostasis from .. 489
- superinvolution of, amenorrhœa from 23, 24
- bimanual examination in diagnosing .. 24
- after pregnancy .. 24
- sound in diagnosing .. 24
- tetanic contraction of .. 252
- tonic contraction of .. 252
- tuberculosis of, colic due to .. 148
- metrorrhagia from .. 487
- tumour of, albuminuria from .. 11
- breaking down, anæmia from .. 47
- casts in urine from .. 11
- jaundice from 407, 413
- kidney enlargement simulated by .. 438
- unicornuate, ovarian atrophy with .. 24
- X rays and lipiodol investigating (Fig. 691) 939
- Uva ursi, polyuria from 653
- urine black from .. 904
- brown from .. 904
- Uvula, actinomycosis of .. 762
- sore throat due to .. 757
- aspergillosis of, sore throat due to .. 757
- carcinoma of .. 762
- sore throat due to .. 757
- catarrh of, bacteria which cause .. 757
- sore throat due to .. 757
- diphtherial membrane on .. 248
- gumma of .. 762
- sore throat due to .. 757
- inflammation of .. 761
- cervical adenitis from 763
- cough from .. 186
- oedematous, cough from 186
- pendulous, cough from .. 186, 188
- tuberculosis of .. 762
- sore throat due to .. 757
- **VACCINAL eruptions 920**
- Vaccination, cheloid from .. 131
- Vaccine, actinomycotic .. 562
- rigor after .. 737
- Vaccinia, anthrax simulated by .. 824
- of face .. 824
- papules in .. 920
- pustule in .. 920
- small-pox simulated by .. 920
- simulating .. 685
- vesicles in .. 920
- Vacciniform erythema of infants .. 498
- Vacuoles in malaria parasites .. 42
- Vagabond's pigmentation of skin .. 642
- Vagina, absent .. 23
- amenorrhœa from .. 23
- dyspareunia due to 239
- bacteriological investigation of .. 43, 83
- carcinoma of (see Carcinoma)
- closed, sterility due to 793
- cyst of, presenting externally .. 638
- decubitus ulcer of .. 231
- dermatitis herpetiformis affecting .. 95
- distention of .. 23
- erythema bullosum affecting .. 95
- extroversion of bladder into .. 658
- feces passed through .. 356
- fibromyoma of, vulval swelling due to .. 853
- presenting through .. 657, 658
- gonococcus from .. 425

Vagina, contd.

- growth in, felt per rectum .. 728
- hæmorrhage from, in infants .. 489
- - purpura hæmorrhagica .. 346
- (and see Menorrhagia; Metrorrhagia; Menorrhagia)
- hyperæsthesia of, dyspareunia from .. 239
- imperforate, amenorrhæa from .. 23
- kraurosis of .. 855
- normal secretions of .. 231
- pain in, from kraurosis .. 239
- pemphigus affecting .. 127
- prolapse of, discharge due to .. 231
- rigidity of, dystocia due to .. 250
- short, in pseudo-hermaphroditism .. 793
- sinus of .. 23
- stenosis of .. 23
- after fevers .. 23
- from kraurosis .. 239, 855
- vaginitis .. 23
- swollen in obstructed labour .. 252
- tenderness of, from pudic neuritis .. 239
- tumour of, prolapse of uterus simulated by .. 657
- dystocia from .. 250
- protruding through .. 657, 658
- urinary fistula in .. 494
- urine passed through .. 356, 494, 724
- Vaginal casts (see Casts)
- DISCHARGE .. 231
- (and see Discharge, Vaginal)
- examination in acute nephritis .. 10
- appendicitis .. 151, 814
- ascites and .. 60, 66
- in bearing-down pain cases .. 529
- blood per anum .. 97
- calculus felt on .. 56
- in chyluria .. 140
- colic cases .. 151
- diagnosing carcinoma of bladder .. 56, 350
- - uterus .. 57
- diverticulitis .. 556, 557
- obturator hernia .. 832
- oöphoritis .. 559
- ovarian new growth .. 413
- - tumour .. 777
- parametric abscess .. 693
- prolapse of ovaries .. 239
- pyosalpinx .. 693, 715, 724, 728, 829
- retroversion and flexion .. 238
- salpingitis .. 559
- salpingo-oöphoritis .. 239
- suppurating ovarian cyst .. 693
- tuberculous kidney .. 719
- in dysmenorrhæa .. 238
- hydrops amnii and .. 61
- in lumbago .. 528
- œdema of leg cases .. 512
- ovarian cyst and .. 60
- in paralysis of legs .. 81
- peritonitis .. 151
- during pregnancy .. 251
- in sciatica .. 539
- tenesmus .. 873
- tuberculous ureter felt on .. 352, 355
- ureter felt on .. 350, 448, 721
- ureteral calculus felt on .. 720
- secretion, failing, in dystocia .. 252
- lactic acid in .. 231
- long bacillus normal in .. 231
- normal amount of .. 231
- reaction of .. 231
- Vaginismus, dyspareunia from .. 239, 240
- neurotic .. 240

Vaginismus, contd.

- due to spasm of levator ani .. 239
- sterility due to .. 793
- Vaginitis, account of .. 231
- aching in perineum from .. 579
- from decubitus ulcer .. 231
- discharge due to .. 211
- after fevers .. 231
- granular catarrhal .. 231
- in infancy .. 23
- membranous, due to Bacillus coli .. 232
- casts of vagina due to .. 232
- due to diphtheria .. 232
- from pessary .. 231
- prolapse .. 231
- seldom primary .. 231
- senile granular, metrostaxis from .. 489
- stenosis of vagina from .. 23
- Vagus nerve (see Nerve, Cranial, Tenth)
- nucleus degeneration, acute dyspnea from .. 606
- laryngeal paralysis from .. 606
- Valerian, cacogeusia from .. 860
- erythema from .. 275
- Valetudinarianism in hepatosis .. 463
- Valvular disease, acute rheumatism and .. 17, 68, 136
- albuminuria from .. 17, 68
- aortic (see Aortic Disease)
- ascites and .. 62, 68
- cerebral embolism from .. 170
- Cheyne-Stokes breathing from .. 139
- chorea and .. 17
- erythema and .. 17
- growing pains and .. 17
- heart failure from .. 17, 68, 69, 139, 201
- impulse displaced in .. 373
- history pointing to .. 17
- menorrhagia from .. 484
- in Monolism .. 236
- œdema of legs from .. 517
- palpitation from .. 594
- shortness of breath from .. 113
- subcutaneous nodules and .. 17
- tonsillitis and .. 17
- (and see Aortic Regurgitation; Heart; Mitral Stenosis, etc.)
- Van den Bergh's test .. 414
- Vanillin, erythema from .. 275
- Vanilla, dermatitis due to .. 915
- Vaquez's disease (see Polycythæmia, Splenomegaly)
- Varicella (see Chicken-pox)
- Varicocele, aching pain in .. 855
- in testis from .. 589
- bag-of-worms feeling in .. 855
- hernia with .. 833
- simulated by .. 833
- impulse on coughing in .. 589
- omental hernia simulating .. 851
- orchitis after operation for .. 86
- in pendulous scrotum .. 589
- with renal tumour .. 437, 449
- testis atrophy from .. 85
- vulval .. 853, 855
- Varicose ulcer, epithelioma from .. 895
- of leg .. 893
- veins (see Veins, Varicose)
- Variola (see Small-pox)
- Varix, saphena (see Saphena Varix)
- Varnish, aeroplane (see Aeroplane Dope)
- bullæ from .. 123
- dermatitis from .. 124
- erythema from .. 275
- vesicles from .. 124
- Vas aberrans of Haller, cyst of .. 587
- deferens thickened in epididymo-orchitis .. 584
- tuberculous epididymitis .. 851

Vas deferens, contd.

- tuberculous (see Tuberculosis)
- Vascular lesions in abdomen, colic simulated by .. 152
- peritonitis simulated by .. 152
- Vasodilators, angina abdominalis and .. 396
- pectoris and .. 396
- in diagnosis of cause of cardiac pain .. 53
- Vasomotor disorder in neuromyositis .. 569
- peripheral neuritis .. 570
- after poliomyelitis .. 620
- instability, faintings due to .. 296
- lesions in infantile paralysis .. 145
- neuroses (see Neuroses)
- symptoms from cervical rib .. 204
- Vater, ampulla of (see Ampulla)
- Vegetables, absence of, scurvy from .. 93, 679
- bottled, botulism from .. 243
- in cure of scurvy rickets .. 51
- epiphora from .. 273
- exaluria from .. 523
- Vein, aneurysm obstructing, œdema from .. 511, 512
- axillary, secondary growth round .. 322
- thrombosis of, spread to superior vena cava .. 515
- from whitlow .. 515
- blood-flow in, method of testing direction of .. 908
- femoral, thrombosis of, embolism of lung from .. 199
- œdema of leg from .. 512
- glands obstructing, œdema from .. 511
- iliac, pelvic tumour obstructing .. 512
- thrombosis of (see Thrombosis)
- innominate, obstructed by enlarged glands .. 476
- new growth .. 248
- œdema of arm from .. 910
- varicose veins on chest due to .. 910
- thrombosis of, causes of .. 910
- jugular, thrombosis of (see Thrombosis)
- mesenteric, thrombosis of (see Thrombosis)
- popliteal, obstructed by aneurysm .. 512
- thrombosis of, œdema of leg from .. 512
- portal, obstructed, account of .. 66, 67, 344
- albuminuria from .. 344
- by aneurysm of hepatic artery .. 61, 67
- ascites from .. 61, 63, 344, 784
- causes of .. 61
- distended abdominal veins from .. 344
- by enlarged glands .. 66, 778, 784
- gall-bladder tumour .. 778
- hæmatemesis from .. 344
- hæmorrhagic erosions from .. 344
- jaundice with .. 784
- by leukæmic glands .. 66
- liver tumour .. 778
- lymphadenomatous glands .. 61, 66
- lymphatic leukæmia glands .. 61
- malignant glands .. 61
- nausea from .. 344
- œdema of legs from .. 344
- by pancreatic tumour .. 778
- renal tumour .. 67
- some causes of .. 412

Vein, portal, obstructed, contd.

- spleen enlarged from .. 778, 784
- stomach congestion from .. 344
- by thrombosis .. 61
- tuberculous glands .. 61, 66, 67
- tumour of colon .. 61, 67
- duodenum .. 61, 67
- kidney .. 61
- liver .. 61
- pancreas .. 61, 67
- stomach .. 61, 67, 778
- suprarenal .. 61, 67
- tumours .. 61, 67, 784
- varicose gastric veins from .. 344
- œsophageal veins from .. 344
- vomiting from .. 344
- pressure on, ascites from .. 344
- hæmatemesis from .. 336, 344
- jaundice with .. 344
- thrombosis of (see Thrombosis)
- pulmonary, aneurysm opening into .. 534
- renal, thrombosis of (see Thrombosis)
- retinal, thrombosis of (see Thrombosis)
- rupture of, purpura due to .. 676
- saphenous, thrombosed before inferior vena cava .. 10
- œdema of one leg from .. 10
- splenic, thrombosis of, hæmatemesis from .. 345
- subclavian, obstructed, distended neck veins from .. Fig. 520, 660
- thoracic veins from .. Fig. 520, 660
- by mediastinal lymphosarcoma .. 660
- superficial circumflex iliac, congested in appendicitis .. 558
- thrombosis of, pain in iliac fossa from .. 557
- thrombosis of (see Thrombosis of Vein)
- tumour obstructing, œdema from .. 511
- Veins, abdominal, direction of blood-flow in .. 908
- distended in ascites .. 59
- from inferior vena cava obstruction .. 59
- portal obstruction .. 344
- reversed current in .. 10, 59
- from inferior vena cava obstruction .. 908
- varicose (see Veins, Varicose)
- appendicular, thrombosis of, colic from .. 148
- of arm, distended, due to axillary aneurysm .. 817
- cerebral, rupture of, in fit of passion .. 145
- talipes from .. 145
- in whooping-cough .. 145
- thrombosis of, after influenza .. 145
- measles .. 145
- talipes from .. 145
- on face, dilated, in cirrhosis of liver .. 466
- frontal, dilated, from cavernous sinus thrombosis .. 284
- gastric, varicose, from portal obstruction .. 344
- jugular, enlarged thyroid compressing .. 877
- mammary, distended in pregnancy .. 837
- in neck, collapse of, from adherent pericardium .. 265
- distended from aneurysm (Fig. 218) .. 260

Veins in neck, distended, contd.

--- from lymphosarcoma of mediastinum (Fig. 520) 660

--- superior vena cava obstruction (Fig. 218) 260

--- pulsation of, nutmeg liver and... 463

--- new growth invading, gangrene from... 322

--- œsophageal, varicose (see Veins, Varicose)

--- ophthalmic, dilated, from cavernous sinus thrombosis... 284

--- pelvic, pressure on, œdema of vulva from 855

--- prominent over sarcoma 821

--- renal, involved by kidney growth... 10

--- thrombosis of (see Thrombosis)

--- retinal, dilated in optic neuritis... 519

--- and tortuous, from thrombosis of retinal vein... 519

--- empty, from retinal embolism... 520

--- tortuous in optic neuritis... 519

--- thoracic, blood-flow reversed in, from superior vena cava obstruction... 910

--- dilated from adherent pericardium 265

--- lymphosarcoma of mediastinum (Fig. 520) 660

--- mediastinitis... 515

--- varicose (see Veins, Varicose)

--- umbilical, dilated in cirrhosis of liver 59, 67, 465

--- **VARICOSE ABDOMINAL**... 908

--- with ascites... 909

--- from inferior vena cava thrombosis 10, 68, 909

--- reversal of blood-flow in... 10

--- from syphilitic mediastinitis (Fig. 682) 908

--- gastric, from portal obstruction... 344

--- gumma with... 895

--- nodules on legs from 502

--- in nose, epistaxis from 273

--- œdema due to... 511

--- œsophageal, in cirrhosis of liver... 337

--- hæmatemesis from 336, 337

--- from portal obstruction... 344

--- in orbit... 285

--- pelvic, dystocia due to 250

--- phlebitis in... 539

--- pigmentation round 677

--- with popliteal aneurysm... 844

--- ruptured, fainting due to... 297

--- purpura due to... 676

--- vulval swelling due to... 853

--- saphena varix with... 825

--- **THORACIC**... 910

--- from aneurysm (Fig. 218) 260

--- innominate vein obstruction... 910

--- intrathoracic new growth... 365

--- mediastinal fibrosis 137

--- growth... 386

--- new growth 136, 248, 260, 365, 911

--- superior vena cava obstruction 136, 137, (Fig. 218) 260, 365, 515, 910

--- syphilitic... 137

--- syphilitic mediastinitis (Fig. 682) 908

Veins, varicose, contd.

--- thrill in... 825

--- ulcer due to... 893

Vena cava, inferior, involved by kidney growth... 10

--- obstruction, abdominal veins distended from... 59

--- albuminuria from... 9, 909

--- by ascites 59, 515, 909

--- ascites from... 62, 63, 68

--- asphyxial nephritis from... 9

--- by carcinoma... 9

--- chronic mediastinitis 62, 68

--- effects of... 9

--- by enlarged bronchial glands... 476

--- liver... 909

--- mediastinal glands... 476

--- spleen... 909

--- growth in retroperitoneal glands... 909

--- hæmaturia from... 9, 909

--- by intrathoracic new growth 68

--- leucocytes in urine from... 9

--- by malignant glands 9

--- mediastinal growth... 62

--- new growth... 515

--- in kidney... 910

--- retroperitoneal glands... 910

--- within it (Fig. 682) 909

--- œdema of back from... 9

--- genitals from... 9

--- legs from... 63, 515, 517, 909

--- by ovarian cyst 515, 909

--- after phlebitis... 515

--- renal cells in urine from... 9

--- reversed blood-flow in abdominal veins due to... 908

--- by thrombosis 62, 68, 909

--- tube-casts from... 9

--- thrombosis of (see Thrombosis)

--- superior, obstruction from aneurysm 198, (Fig. 218) 260, 514, 516, 910, 911

--- blood-flow in chest veins reversed from... 910

--- by congenital fibroma... 911

--- cyanosis from... 196, 198, 260

--- by dermoid cyst 911

--- enlarged bronchial glands 476

--- mediastinal glands... 476

--- hydatid cyst... 910

--- mediastinal fibrosis 137, 198, 514, 516

--- growth 514, 516

--- gumma 514, 516

--- sarcoma... 910

--- new growth 132, 136, 198, 248, 260, 365

--- œdema of arms from 198, 514, 516, 910

--- face from 514, 516, 910

--- head from... 910

--- neck from 514, 516, 910

--- by syphilis... 137

--- thrombosis... 516

Vena cava, superior, contd.

--- obstruction, varicose veins on chest from 136, 137, (Fig. 218) 260, 365, 515, 910, 911

--- opened by aneurysm 122, (Fig. 169) 198

--- thrombosis of (see Thrombosis)

Venereal ulceration of rectum, blood per anum from... 97

--- tuberculous ulceration, simulating... 101

Venesection, colour index after... 44

--- leucocytosis after... 453

--- in uræmia... 154

Venom, snake, delirium from... 211

Venous hum, subclavicular, in children... 122

--- pulse in neck in diagnosing heart-block 667

--- stasis, diarrhoea from... 217

--- intestinal catarrh from... 217

--- stigmata due to alcohol 881

Ventilation, bad, fainting due to... 297

--- headache from... 371

--- insomnia due to 402, 403

--- morning headache and... 370

Ventral hernia of laparotomy scar... 636

Ventricle, intrinsic rate of contraction of... 667, 670

--- lateral, air distention of (Figs. 688, 689) 937

--- injection into... 936

--- distended in hydrocephalus (Figs. 688, 689) 937

--- skiagram of (Fig. 687) 936

--- left, hypertrophied, accentuated aortic sound with... 2

--- from aortic disease 374

--- arteriosclerosis 2, 374, 729

--- in athletes... 274

--- causes of... 258

--- with chronic nephritis... 2

--- in elderly people... 374

--- from granular kidney... 729

--- with high blood-pressure... 2, 729

--- impulse displaced to left and down with... 374

--- from mitral regurgitation... 374

--- prolonged first sound with 2, 373

--- reduplicated first sound with... 729

--- from renal disease 374

--- skiagram (Fig. 107) 121

--- nerve relations of... 863

--- preponderance of electrocardiogram of... (Fig. 109) 122

--- nerve-supply of... 533

--- right, dilated in emphysema... 536

--- gall-stones simulated by... 536

--- gastric ulcer simulated by... 536

--- pain in epigastrium from... 536

--- enlargement of 267-269

--- causes of... 268

--- from chronic bronchitis... 374

--- emphysema... 374

--- impulse displaced to left with... 374

--- from mitral regurgitation... 374

--- stenosis... 71

--- sign of... 71

--- skiagram (Fig. 107) 121

--- preponderance of electrocardiogram of... (Fig. 108) 122

--- single... 196, 267

Ventricle, contd.

--- thrombus in cerebral embolism from... 170

Ventricles, diameter of... 70

Ventricular extrasystole, electrocardiograms of (Figs. 535, 537) 669

Ventriculo-systolic wave in polygram... 663

Veratrum album, dermatitis due to... 916

--- viride, dermatitis due to 916

Verrey's lights, barium salts in... 917

--- dermatitis from... 917

Vermiform appendix (see Appendix)

Vermin-killer, phosphorus in... 94

--- strychnine poisoning from... 521

--- suicide by... 94

Vermis, tumour of... 733

Veronal, ataxy from... 77

--- bradypnoea from... 110

--- bulle from... 123

--- Cheyne-Stokes breathing from... 139

--- coma from... 110, 154

--- cyanosis from... 196

--- erythema from... 275

--- hæmoglobinuria from 357

--- methæmoglobinæmia from... 650

--- methæmoglobinuria after... 196

--- polycythaemia from... 650

--- purpura due to... 676

--- stupor from... 110

--- wheals due to... 935

Verroca necrogenica, finger affected by... 301

--- plana juvenilis... 599

--- papules in... 598

--- vulgaris... 599

Vertebrae (see Spine)

Vertical area (Figs. 658, 659) 867

--- sensory area (Fig. 443) 550

VERTIGO... 911

--- from acetanilide... 504

--- in acromegaly... 504

--- Addison's disease... 911

--- airmen... 504

--- due to alcohol 504, 911

--- alterations of blood-pressure... 911

--- altitude... 504

--- in anæmia... 911

--- from anæsthesia of feet 911

--- anuria... 55

--- aortic regurgitation... 504

--- arsenic... 504

--- arteriosclerosis 14, 504, 911

--- aspirin... 504

--- ataxy with... 77

--- from atheroma of cerebral arteries... 504

--- aural irritation... 505

--- in balloonists... 504

--- from blow on ear... 504

--- in boiler-makers... 504

--- from bony changes round ear... 504

--- bowel troubles... 911

--- brick-making... 504

--- bromides... 504

--- in caisson workers... 504

--- from carbon bisulphide 878

--- cerebellar lesions 76, 77, 110, 912

--- cerebral... 911

--- from cerebral abscess 110, 385, 504, 912

--- hæmorrhage... 110

--- lesions... 110

--- tumour 110, 385, 504, 912

--- cervical herpes... 253

--- chlorosis... 504

--- chronic constipation... 504

--- coal gas... 504

--- cocaine... 504

--- coke fires... 504

--- in convalescence... 911

--- from D.A.H... 247

--- deafness with... 205, 207

--- from dental sepsis 504, 911

--- dial... 504

Vertigo, contd.

 - starvation, delirium due to 211
 - Waterbrash, heartburn and 376, 536
 - haskiness from 376
 - mechanism of 928
 - Waterhammer pulse in aortic regurgitation 259, 875
 - Waters, dermatitis from 515
 - œdema from 515
 - Wax in ear, cough from 185, 186
 - creaking due to 878
 - deadness from 207
 - discharge due to 522
 - earache from 252
 - noises in head from 504
 - vertigo from 504, 912
 - meatus obstructed by 207
 - taper in urethra 575
 - Wax-tipped bougie in diagnosing uterine calculus 578
 - Waxy casts 8
 - illustrated (Fig. 10) 6
 - in lardaceous disease 10
 - Weak heart, D.A.H. and 115
 - Weasel-bite, spiræocetosis from 213, 740
 - Weather changes, tabetic pains and 541
 - influencing chronic rheumatism 571
 - **Weber's test of hearing** 206
 - Weed-killer, arsenic in 85, 94, 103, 873
 - Weeping in eczema 742, 914, 918, 919
 - epiphora from 272
 - Weever fish, erythema from 275
 - headache from 278
 - poisoning by 278
 - prick, delirium from 211
 - swelling of skin from 278
 - urticaria from 278
 - vomiting from 278
 - **Weichselbaum, diplococcus (of see Meningococcus)**
 - Weight carrying, brachial plexus injured by 204
 - in butcher boys 192
 - dead fingers from 204
 - on head, headache from 372
 - kyphosis from 194

Weight carrying, contd.

- in nursery maids .. 192
- scoliosis from 191, 192
- on chest sensation from heart disease .. 52
- effect of alcohol on .. 934
- in epigastrum, sense of, from gastritis .. 398
- excessive, diabetes and 330
- increased in myxoedema 127, 656
- of liver, relation to body weight .. 461
- relatively high in children .. 461
- **LOSS OF** .. 932
- due to abuse of purgatives .. 933
- in Addison's disease 934
- due to alcohol .. 934
- aneurysm .. 933
- in anorexia nervosa 934
- cachexia .. 127
- from carcinoma 557, 932
- of colon 98, 163, 557
- rectum 98, 166, 557
- stomach 340, 397, 933
- care and anxiety .. 933
- carious teeth .. 933
- in children .. 932
- cirrhosis of liver .. 933
- due to coli bacillus 933
- colitis .. 933
- constipation .. 933
- diabetes 58, 334, 932, 934
- duodenal ulcer .. 933
- dyspepsia .. 933
- errors of diet .. 932
- excessive drinking .. 933
- flatulence .. 933
- fungus vesiculosus .. 934
- gastric ulcer .. 933

- skin in leprosy .. 645
- leucodermia .. 645
- syphilis .. 645
- ring from albumose .. 6, 12
- in nitric acid test .. 5
- with nucleoproteid .. 6
- urates .. 6
- from urea nitrate .. 7
- in urine from albumose .. 20, 22
- in copaiba .. 6
- tongue, pica and .. 128
- **Whitlow**, axillary abscess from .. 816
- due to Bacillus coli .. 302
- chancre simulating .. 476
- cow-pox simulating .. 302
- due to diphtheria .. 302
- epitrochlear gland enlarged from .. 476
- finger affected by .. 301
- leucocytosis with .. 453, 454
- limping due to .. 456
- pain in foot from .. 456
- septicæmia from .. 785
- suppurating lymphatic glands from .. 695
- symptomatic leukaemia from .. 454
- thrombosis of axillary vein from .. 515
- innominate vein from 910
- superior vena cava from .. 515
- from tight-fitting boots .. 497
- (and see Onychia)
- **Whitlows** in Morvan's disease .. 302, 320
- syringomyelia .. 142, 302
- **Whooping-cough**, asphyxia in .. 182
- Bordet-Gengou reaction in .. 250

Whooping-cough, contd.

- convulsions in .. 181, 182
- cough from .. 186, 187
- dyspnoea from 247, 250
- eyes swollen from .. 515
- fraenal ulcer from 364, 590, 898
- hæmoptysis from 361, 364
- hernia of lung from .. 210
- leucocytosis in .. 453, 454
- oedema of face in .. 515
- peroneal atrophy after rupture of cerebral veins .. 145
- surgical emphysema .. 254
- from .. 454
- symptomatic leukaemia after .. 454
- talipes from .. 145
- Tooth's peroneal atrophy after .. 79
- vomiting in .. 250, 929
- without the whoop .. 250
- **Widal reaction**, delayed (Fig. 546) 690
- in paratyphoid fever .. 84, 715, 785
- soon disappearing after typhoid .. 316
- in typhoid fever 84, 316, 419, 564, 677, 689, 715, 739, 784
- **Wild hops**, dermatitis due to .. 915
- **Wilson**, S. A. K., on abductor pollicis wasting from cervical rib (Fig. 475) 619
- **Wind** in angina pectoris .. 52
- cæcum .. 828
- from gall-stones .. 396
- intestinal .. 303
- palpitations due to .. 597
- round heart .. 114
- sense of fullness seldom due to .. 308
- **Wine**, polyuria from .. 653
- **Winged scapula** in carpenters .. (Fig. 473) 617
- from paralysis of serratus magnus .. 617
- **Winking** defective in facial paralysis .. 603
- Graves' disease .. 292
- paralysis agitans .. 292
- involuntary, after facial paralysis .. (Fig. 457) 604, 605
- reflex lost in fifth nerve paralysis .. 891
- **Winter**, bronchitis in .. 700
- cough, ascites and .. 68
- emphysema and 17, 199
- heart failure and .. 68
- **Wireless operators**, deafness in .. 207
- **Wisdom teeth**, impacted, inability to open mouth due to .. 884
- skiagram (Fig. 663) .. 885
- tetanus simulated by .. 175, 886
- X rays in diagnosis 884
- **Wolf-bite**, delirium from 213
- hydrophobia from 213, 885
- **Wolfian body**, cyst of .. 811
- **Womb** (see Uterus)
- **Women**, blood-pressure in middle-aged .. 106
- glaucoma in .. 288
- hypothyroidism in .. 50
- obesity in .. 507
- secret drinking in .. 85
- **Wood splinter** in rectum .. 726
- ticks in Canada .. 625
- paralysis from .. 625
- **Woods**, dermatitis due to 916
- **Wool**, anthrax from 683, 824
- **Word blindness**, account of .. 771
- hemianopsia with 771, 772
- centres in brain .. (Fig. 602) 770
- **deafness**, account of .. 771
- **Work**, hard, erythromelalgia and .. 320
- myocardial change from .. 18
- long hours of, fainting due to .. 296

Workmen's Compensation

- Act, saturnine encephalopathy and .. 214
- **Worm-like contractions** in reaction of degeneration .. 74
- **WORMS** .. 632
- bag of, sensation of, in varicocele .. 855
- convulsions from .. 181
- cough from .. 186
- enuresis from .. 270
- eosinophilia from .. 633
- fainting due to .. 297
- grinding of teeth from .. 335
- hæmoptysis from .. 186
- increased appetite from .. 58
- frequency of micturition from .. 491
- insomnia due to .. 403
- loss of appetite from .. 633
- mucus in stools simulating .. 495
- night terrors from .. 403
- nightmares from .. 499
- nose-picking due to .. 633
- ova in stools from .. 638
- priapism due to .. 656
- round (see Ascaris Lumbricoides)
- in stools .. 104
- tape (see Tænia)
- tenesmus due to .. 873
- vomiting due to .. 929, 930
- voracious appetite from (and see Parasites)
- **Worms-under-skin** sensation in cocaine habit .. 755
- **Worry**, brachial neuralgia from .. 543
- constipation from .. 161
- D.A.H. from .. 115
- diabetes from .. 331
- dyspepsia from .. 400
- general paralysis and .. 305
- malaria recrudescence from .. 42
- musca volitantes and .. 92
- neurasthenia from 571, 871
- pyralorrhæa from .. 662

- flatulence . . . 302
- heartburn . . . 376
- laryngeal para-
lysis . . . 606
- limping . . . 457
- painful shoulder 582
- rigid back . . . 566
- stiff neck . . . 795
- cervical caries 528, 694
- rib 82, 142, 204,
545, 619
- chest conditions . . . 187
- chondroma of pelvic
bones . . . 829
- chronic intestinal
obstruction . . . 396
- colitis . . . 104, 700
- congenital dislo-
cation of hip . . . 195
- dental abscess . . . 694
- disease . . . 567
- sepsis 47, 113,
504, 687, 713
- dilated stomach . . . 398
- diverticulitis . . . 698
- diverticulum of
bladder . . . 447
- duodenal ulcer 153,
343, 554
- empyema . . . 112, 695
- of ethmoidal
sinuses . . . 694
- frontal sinus . . . 694
- sphenoidal
sinuses . . . 694

X rays in diagnosing, contd.
- enlarged bronchial
glands . . . 471
- gall-bladder . . . 437
- mediastinal
glands 471, 476
- thymus gland . . . 248
- epithelioma of oesophagus . . . 566
- exostosis of frontal
bone . . . 255
- fibroid lung 143, 269
- foreign body in heel 552
- oesophagus . . . 337
- tongue . . . 590
- fracture . . . 190
- of astragalus . . . 552
- jaw . . . 834
- os calcis . . . 552
- rib . . . 862
- sternum . . . 862
- fusiform aneurysm 262
- gall-stone 344, 941
- gastroptosis . . . 399
- growth in antrum
of Highmore . . . 567
- bone . . . 190, 406
- spine . . . 583, 629
- hip-joint disease . . . 831
- hour-glass stomach
219, 399
- hydatid cyst of
chest . . . 582
- hydronephrosis . . . 352
- hypertonus of colon 308
- impacted wisdom
tooth . . . 884
- intestinal obstruc-
tion . . . 303
- intramedullary
bone abscess . . . 694
- intrathoracic new
growth 68, 82,
136, 209
- ivory exostosis . . . 284
- Lane's kink . . . 561
- leontiasis ossea 255
- liver abscess . . . 465
- lobar pneumonia 364
- lymphosarcoma . . . 472
- of mediastinum 186
- malignant disease
of thorax . . . 132
- mediastinal fibrosis 137
- growth 186, 535,
566, 582
- lesions . . . 863
- masses . . . 188
- myelomata . . . 22
- nature of constipa-
tion . . . 161
- new growth of lung 198
- in spine . . . 610
- oesophageal obstruc-
tion . . . 240, 241
- orbital periostitis 284
- osteo-arthritis . . . 431
- of spine . . . 565
- periostitis . . . 818
- phthisis 114, 134,
188, 360, 362,
582, 687, 932
- pneumothorax 209,
532, 647
- psosas abscess 458, 698
- pyloric stenosis 160, 308
- renal calculi 19, 56,
351, 353, 556,
654, 718, 719
- tuberculosis . . . 352
- rheumatoid arthri-
tis . . . 428, 431
- sacro-iliac joint
disease . . . 831
- salivary calculus . . . 590
- sarcoma of bone . . . 845
- femur . . .
- jaw . . . 836
- mediastinum . . . 186
- os calcis . . . 552
- pelvic bones 829, 833
- spine . . . 194
- spastic constipa-
tion . . . 308
- spinal caries 193,
458, 536, 565,
583, 594, 829, 831
- tumour . . . 594
- spine on os calcis
540, 551, 552, 820

X rays in diagnosing, contd.
- spondylitis defor-
mans . . . 869
- stricture of bowel 162
- subacromial burs-
itis . . . 582
- subdiaphragmatic
abscess . . . 555,
649, 697, 807
- talipes due to bone
injury . . . 147
- thoracic aneurysm 188
- new growth . . . 188
- tuberculous of bone 306
- iliac glands . . . 563
- mediastinal
glands . . . 712
- ureteral calculus
56, 353, 559, 577,
578, 720
- vesical calculus
355, 444, 721
- epididymitis from . . . 85
- erythema from 275, 276
- in excluding aneurysm 654
- mediastinal new
growth . . . 654
- fatty heart and . . . 115
- fibroid heart and . . . 115
- foreign body in blad-
der . . . 444
- gall-bladder and 941
- in guinea-pig inocu-
lation test . . . 65
- test for tubercle . . . 135
- after haemoptysis . . . 362
- in haemoptysis . . . 359
- heart size measured
by . . . 115, 597
- hip disease and . . . 457
- impotency due to . . . 393
- of kidneys, oxygen
inflation before . . . 445
- leucopenia from . . . 455
- leukaemia improved by 44
- and lipiodol in locating
spinal lesions . . . 326
- lung cases . . . 936
- in locating diaphragm 801
- myocardial degenera-
tion and . . . 115
- orchitis from . . . 85
- ovarian dermoid and 444
- and oxalate calculi . . . 440
- oxygen miction and 936
- pelvic shadows with 444
- and phosphate calculi 440
- in phthisis . . . 362
- pigmentation of skin
from . . . 276
- in psychography . . . 449
- shield required for . . . 86
- after shoulder injury 581
- of skull in diagnosing
dyspituitarism . . . 509
- sodium bromide and 445
**SPECIAL METHODS
OF DIAGNOSIS BY 935**
- spleen reduced by . . . 33
- splenomedullary leuk-
aemia treated by . . . 33
- sterility from . . . 86
- of teeth in anaemia . . . 43
- telangiectases from 276
- testis atrophy from 85, 86
- tetralodoponophthal-
mia . . . 941
- in treating mycosis
fungoides . . . 888
- tuberculous kidney
shadow with . . . 719
- and urate calculi . . . 440
- urethral calculus and 444
- uric acid calculus not
opaque to . . . 440
- and xanthin calculi 440
- (and see Illustrations—
Skiagrams)
X-ray cistrix, epithelioma
from . . . 886
- disease . . . 458
- shadows, various abdo-
minal . . . 440
- ulcer of finger . . . 301
- workers, photophobia in 639
Xanthelasma palpebrarum
illustrated (Fig. 319) 406
- in jaundice . . . 405
- planum in jaundice . . . 405

- Xanthelasma, contd.*
- tuberosum in jaundice 405
Xanthin bases, list of 901
- uric acid and 901
- calculus, X rays and 440
- Fehling's solution reduced by 327
Xanthoma diabeticorum 335
- acne simulated by 889
- on elbows (*Fig. 665*) 889
- lichen planus simulated by 889
- multiplex in hepatic disease 889
- planum 889
- yellow papules in 598
Xanthoproteic cerebrospinal fluid 382
Xanthopsia 928
- due to amyl nitrite 926
- cannabis indica 926
- in jaundice 405, 926
- due to picric acid 926
- santonin 926
Xeroderma pigmentosum 886
- account of 888
- leucocytosis in 454
- lymphocytosis in 454
Xerodermia (see *Keratosis Pilaris*)
Xerosis of conjunctiva 891
Xerosis of conjunctiva, contd.
- night blindness due to 926
Xylol in histology 487
Y
YAWNING, arm movements with 614
Yaws, account of 501
- bone nodules in 501
- framboesial granuloma of 501
- gumma in 501
- no immunity to syphilis from 501
- never congenital 501
- nodules in 501
- papules in 743
- raspberry granulations in 743
- scabs in 743
- acropiginous ulcers in 501
- syphilis simulated by 501
- *Treponema pertenue* in 501
- tuberculosis distinguished from 501
Yeast cells, gas in urine due to 647
- in pyloric stenosis 401
- sputum 792
- vomit 902, 401, 929
Yeast cells in vomit, contd.
- in dilated stomach 930
- in estimating sugar 329
- lactose not fermented by 327
- levulose fermented by 328, 329
- pentose not fermented by 372
- in sugar testing 328
Yellow atrophy of liver, acute (see *Acute Yellow Atrophy*)
- chrome, dermatitis from 917
- used by tanners 917
- fever (see *Fever*)
- nodules in xanthoma 889
- plaques in skin 889
- skin from picric acid 645
- T.N.T. 645
- (and see *Jaundice*)
- spot 920, 921
- acutest vision at 220
- choroiditis of, amblyopia due to 922
- nystagmus due to 922
- cones and rods in 921
- retinitis of, amblyopia due to 922
- nystagmus due to 922
- vision (see *Vision*)
Yellow-green sickness: chlorosis 485
Z
ZENKER'S degeneration, rupture of muscle from 561
- in typhoid fever 561
Ziehl-Neelson stain (*Fig. 87*) 89
- for tubercle bacilli 788
Zimmerlin, myopathy of 172
Zinc acetate in urobilin test 407
- oxide, basophilia from 30
- sulphate in estimating blood sugar 333
- vomiting due to 928
- sulphide, basophilia from 30
- workers, basophilia in 30
Zona (see *Herpes Zoster*)
Zones, Charcot's spasmodic, in hysteria 862
Zygomatic bone overgrown in acromegaly 293
- muscle weak in myopathy 291
Zymotic diarrhoea 101, 479
- (and see *Diarrhoea and Vomiting*)
